Support Costs. In some circles, there is a widespread assumption that a large amount of fat exists within the defense budget which can be cut out without undermining readiness. This was the attitude expressed by President Carter during the recent campaign. On June 10, 1976, he told the Democratic Platform Committee: "Without endangering the defense of our nation or our commitments to our allies, we can reduce defense expenditures by about $5 to $7 billion annually." On September 9, 1976, he said flatly, "My statement is that 5 to 6 percent of the funds being expended by the Pentagon are being wasted." [51]

TABLE 23.—INDIRECT SUPPORT COSTS IN DOD, SELECTED FISCAL YEARS

[In billions of dollars]

Category	Fiscal year—				
	1970	1974	1976	1978	1982
Training, medical, and general personnel	10.9	12.9	14.3	15.2	18.4
Central supply and maintenance	9.1	8.4	9.8	11.8	14.2
Administration	1.5	1.7	2.2	2.3	2.6
Total	21.5	23.0	26.3	29.3	35.2
Percentage of defense budget	28	27	27	24	21

Source: "Annual Defense Reports," appropriate years.

Not even the most ardent defender of the Pentagon would deny that there are some inefficiencies in an organization with an annual budget of $120 billion and real assets of several hundred billion dollars. However, the amount of inefficiency is relatively small. Moreover, it has become smaller in the last few years. In the post-Vietnam period the Pentagon has taken a number of steps to reduce its overhead costs. For example, since 1969 DOD has taken a total of 2,700 separate actions to reduce, consolidate, or close domestic installations. These actions now save about $4 billion annually in recurring costs. The Pentagon has increased the ratio of combat to support troops, or the tooth-to-tail ratio, in the services. The army has added three new divisions while holding its manpower level constant at 790,000. The marines have maintained a force of three combat divisions and three air wings despite a 10 percent decline in manpower, and the air force has increased the number of tactical air wings by three within a constant manpower level.

Since 1972, the services have reduced the number of general officers by 14 percent and decreased the percentage of flag officers per 10,000 military personnel from 5.7 to 5.5 percent. During this same period, DOD has cut its officer population by 61,000, or 18 percent, and increased the enlisted-to-officer ratio from 5.9-to-1 to 6.6-to-1. Over the past few years, DOD has reduced training costs by consolidating some joint activities under a single service and has cut down on moving costs by lengthening terms and limiting the number of changes of station for personnel serving initial terms of service.

The effectiveness of these steps can be demonstrated by analyzing the indirect support costs in the defense budget. As is indicated in Table 23, in fiscal year 1970 the costs of such activities as training, supply, and administration amounted to 28 percent of the DOD budget. After remaining at that level until fiscal year 1976, the percentage devoted to support declined to 24 percent in fiscal year 1978. Within the next five years, these costs are projected to decline to 21 percent of the entire defense budget.

While much remains to be done, particularly in the area of domestic base closures, the data in Table 23 indicate that there are no other great savings available in the support area. Some efficiencies are possible, but there do not appear to be any significant savings that will not have unintended harmful side effects. For example, lengthening tours of duty still further would save funds but could have an adverse impact upon retention, as people are required to serve extended terms in arduous assignments. Similarly, reducing the number of flag officers much further and thus restricting promotion opportunities might drive many good officers into premature retirement.

CONCLUSION

The defense budget for FY 1978 is substantial. It continues the trend begun two years ago of real increases in the level of defense spending. Over the next five years defense spending will continue to rise unless significant policy changes are made. As measured against the GNP and the federal budget, and compared with the level of defense spending of the U.S.S.R. the cost of defense is not unreasonable. Moreover, in terms of what it buys, the expenditure is more than reasonable. The FY 1978 budget gives this nation a sizable military force without a draft, provides the weapons that maintain essential equivalence with our adversaries in the area of strategic weaponry, undertakes the long overdue modernizatfon of our general-purpose forces, and pays the deferred costs of having maintained a large military establishment during the cold war period and two protracted wars in Asia.

Some efficiencies are possible in the personnel, support, and weapons modernization area, but these are minimal. The only way to change substantially the size and distribution of the defense budget is to change the shape of international politics and our role in it. Deferring programs, stretching out production lines, and suggesting politically impossible reductions are gimmicks at best and no substitute for real movement. Unless the new administration is prepared to change our role in the world, it will have to pay the costs. The sooner it understands and communicates this to the American people, the better off we all will be.

FOOTNOTES

[1] Unless otherwise noted, all figures are drawn from the fiscal 1978 budget.

[2] Donald Rumsfeld, *Annual Defense Department Report, FY 1978*, p. 6.

[3] For an analysis of the McGovern defense budget, see David Ott et al., *Nixon, McGovern and the Federal Budget* (Washington, D.C.: American Enterprise Institute, 1972).

[4] Press conference by Secretary of Defense Donald Rumsfeld at the Pentagon, January 18, 1977.

[5] The planning assumptions are drawn primarily from three sources: *FY 1978 Defense Report*, pp. 58–100; Congressional Budget Office, *Plannig U.S. General Purpose Forces: Overview*, January 1977; and Congressional Budget Office, *U.S. Strategic Nuclear Forces: Deterrence Policies and Procurement Issues*, April 1977.

[6] Since pay raises are spread out among all forms of compensation and since some forms of compensation are in kind, the total increase in the military personnel account will be somewnat smaller than the actual amount of the raise.

[7] Although the civil service retirement system is contributory, the funds paid into the system by the government and the employee do not cover the full costs of operating the system. This is because the present charges do not take into account future increases in prices and wages. However, the deficit in the civil service retirement system does not affect directly the size of the budget for DOD or other government agencies because, unlike military retirement costs, the retirement costs of past civil service employees are excluded from agency budgets. During FY 1978, the federal government will pay out $11.2 billion to 1.6 million retired federal employees. The unfunded liability of the civil service retirement system is $107 billion.

[8] Beginning in FY 1979, the defense retired-pay appropriation may be transferred out of the defense budget, probably into the income security account. If that should happen, a charge for the retirement costs of today's military personnel would most likely be substituted. Under this new system, in FY 1979, the defense budget would be charged $7.0 billion instead of $9.7 billion. The total savings to defense in the FY 1979–1982 period would be about $12 billion. For a complete discussion of this subject see Congressional Budget Office, *Retirement Accounting Changes: Budget and Policy Impacts*, April 1977.

[9] The reserve group most in jeopardy appears to be the naval reserve. The FY 1977 Ford defense budget proposed to cut its strength in half. As discussed below, President Carter made the same proposal in his FY 1978 budget amendments.

[10] As will be discussed later, the all-volunteer force may well run into difficulty on other grounds. The attractiveness of a military career is declining, military service has deteriorated from a calling or a profession into just an occupation, the number of males reaching the age of eighteen is declining, and job opportunities in the civilian sector are improving. In this author's opinion, vast increases in compensation will not solve these problems. However, I do agree that attempts to reduce or erode the present level of benefits would exacerbate the situation.

[11] This estimate was arrived at by developing an optimum base structure to support the present force structure.

[12] There are some indications that the nation may be contemplating increased efforts in this area. For example, the House added $44 million to the civil defense account in the FY 1978 defense authorization bill. However, the Senate Armed Services Committee recommended that only $5.2 million be added.

[13] Senator Robert Griffin (Republican-Michigan) in referring to the Lance cancellation decision remarked: "The Administration may call this economy, I call it madness," quoted in F. Clifton Berry, "NATO Readiness—Frank Talk at Last," *Armed Forces Journal* (March 1977), p. 24.

[14] The House Armed Services Committee has already rejected both of these reductions (*Report to the House Committee on the*

Budget on the National Defense Function, March 15, 1977). The full House and Senate have voted funds for continuing the university.

[15] Remarks of Secretary of Defense Harold Brown before the Senate Armed Services Committee, January 25, 1977 (Department of Defense press release).

[16] On May 14, 1977, DOD announced that Secretary Brown would conduct a thoroughgoing reassessment of "a Ford Administration policy that hypothesized crippling of the Soviet Union's ability to recover after a nuclear war." Bernard Weinraub, "U.S. Is Reassessing Its Strategy for Meeting Soviet Nuclear Strike," *New York Times*, May 15, 1977, p. 1.

ABORTION RIGHTS

Mr. ABOUREZK. Mr. President, I am sure my dismay at President Carter's remark during Tuesday's press conference on the equities involved in obtaining abortions is shared by many Americans, particularly poor Americans.

The President's view is a disappointing signal to the poor in this country demonstrating an insensitivity by the Federal Government to their plight. Mr. Carter stated that—

> There are many things in life that are not fair, that wealthy people can afford and poor people can't.

However true that assertion is, it has no place in a discussion of basic individual rights and should never be applied as a test to determine which citizens in our country should enjoy rights guaranteed by our Constitution and which citizens should be denied those rights.

Mr. Carter's unfortunate statement is repugnant to the thrust of the Constitution generally. This nation is founded on concepts of equality and fairness. We have made great strides, particularly during the past 25 years, to ensure the viability of those concepts.

When the Supreme Court in 1973 barred governmental interference with a woman's decision to terminate a pregnancy during the first trimester, it reinforced a woman's constitutional right to privacy. Yet the President appears to argue that the Federal Government should take no action to insure that the right guaranteed all Americans is not rendered meaningless for poor Americans. Is the President suggesting that the Government deliberately enforce and perpetuate such an inequitable situation?

Contrary to the President's view, I feel the Federal Government should, indeed must, lead the way in promoting fairness. If it is inevitable that all citizens will never have exactly equal opportunities, Government policy should not be designed to promote more inequality. The elimination of Federal funding for abortions places our Government in the incongruous position of doing just that. Surely our experience with desegregation under the 14th amendment has taught us that the encouragement of inequalities is not the proper role of the Federal Government or State governments.

Many Americans saw in Mr. Carter's election the chance that the Federal Government would finally regain an understanding of the problems of the poor; that the Government would attempt to reduce, not widen, the gap between the privileged and underprivileged; that the Federal Government and this President in particular would represent all interests, not just those of the wealthy. It is my hope that Tuesday's comment by President Carter has not permanently damaged our vision.

THE UKRAINIAN GROUP

Mr. CASE. Mr. President. I want to call attention to new evidence of the extraordinary perseverance of the Helsinki watchers in the U.S.S.R.

In the face of ever mounting pressure from the Soviet authorities—the deplorable 12- and 15-year prison sentences given to Mykola Rudenko, leader, and to Oleksiy Tykhy, member, of the Ukrainian Group to Promote Observance of the Helsinki Accords; the recent appearance of a new statement by the Ukrainian Group is all the more remarkable.

This statement was relayed to the West from General Grigorenko, coordinator between the Moscow and Ukrainian Helsinki Watch Groups. This declaration of the Public Group to Promote Observance of the Helsinki Accords in the Ukraine protests the very severe prison terms just given to Rudenko and Tykhy.

The statement stresses the illegal secrecy of the KGB activities against Helsinki watchers in the U.S.S.R.—showing how sensitive the Soviet authorities are to world and even domestic public opinion. The trials of Rudenko and Tykhy were held in the working class village of Druzhkivka, 100 kilometers from Donetsk—which is a large city about 300 miles from Kiev. Not content with holding the trial in a remote vil-

lage where any strangers wanting to attend the trial would be recognized immediately by the local police, the trial was held in a "Red Corner"—a Communist Party information center—inside a factory for which one needed a special security pass—thereby further limiting the attendance at the trial. Workers from the factory where Tykhy had been employed before his arrest in Donetsk tried to attend his trial—they were all turned back. Members of the Helsinki Groups and other dissidents also attempted to go to the trial and many were held in jail for 3 days and then forcibly returned to their homes. Even Tykhy's 80-year-old mother and Rudenko's wife were not allowed into the trial until the sixth day and were appalled at the defendants' state of obvious exhaustion.

Both men are in bad health—Tykhy after 7 years in camp on political charges, and Rudenko as a result of a back injury he got during the war. They may not survive their lengthy sentences in the infamous conditions of Soviet labor camps.

So that my colleagues can acquaint themselves with the actual text of the Declaration of the Ukrainian Group to Promote Observance of the Helsinki Accords of July 1, 1977, and an editorial from the Washington Post on the recent deplorable actions of the Soviet authorities in the Ukraine, I ask unanimous consent to print them in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FROM THE COMMITTEE FOR THE DEFENSE OF SOVIET POLITICAL PRISONERS

The following is the first declaration by the members of Ukrainian Helsinki Group after the trial of two of its members, Mykola Rudenko and Oleksiy Tykhy. This is the first trial of members of the Soviet Helsinki Monitoring groups to have taken Place in the Soviet Union. The declaration was transmitted to the West by Zinaida Mykhalivna Grigorenko at 20:50 London time, July 2, 1977. The translation is by the Committee for the Defense of Soviet Political Prisoners.

DECLARATION OF THE UKRAINIAN GROUP TO PROMOTE THE IMPLEMENTATION OF THE HELSINKI ACCORDS; ON THE TRIAL OF MYKOLA RUDENKO AND OLEKSIY TYKHY

Such is "socialist democracy"! And so, seven years strict regime and five years exile have been meted out to the leader of the Ukrainian Group to Promote the Implimentation of the Helsinki Accords; the poet and philosopher Mykola Rudenko; and ten years of special regime and five years' exile for a member of the Group, the school teacher Oleksiy Tykhy. Can what occurred be called a trial? No!

People are tried openly and justly (if they are criminals), but in this case people have been tyrannized for many years and afterward secretly taken away for investigation in a gangster-like manner, 800 km. away from their native city. For the site of the trial they chose a place (Druzhkivka) even 100 kilometers further away. Krasniy Ugolok ("Red Corner"—a recreation club) situated in a closed enterprise was transformed into a court-room and filled with a carefully selected audience. No friends or observers were allowed into the court-room. Not even close friends or family had been informed, either about the conclusion of the investigation or the beginning of the trial.

As a result the defendants were left without any defense. And the wife of Rudenko and the 80-year-old mother of Tykhy were admitted only on the 6th day. They were shaken by the appearance of the accused. Both defendants appeared tired and exhausted. During the course of the defense and especially during his final statement Mykola Rudenko felt faint several times. This is not surprising, as five months of detention in a Donetsk prison, situated in a heavily polluted "industrialized" region, could not have passed without having taken their toll.

The Court declared the Ukrainian Group to be an anti-Soviet organization and its documents were regarded as anti-Soviet. This is a blatant falsehood. Among the documents of this Group there isn't one which we do not support. We find only documents which discuss the actual violation of the Helsinki Accords in our country. One can easily be convinced of this provided all the facts we have reported are subjected to public examination. But such a public examination was not even attempted. Worse than this, measures were adopted so that even the public would not know what was taking place in the court.

The organizers of the trial behaved in a Mafia-like way; abducting the victims and isolating them. This is precisely the principle they followed by choosing Druzhkivka as the place of the trial. In a large city, for example in Donetsk, it would have been more difficult to spot an outsider. But in Druzhkivka the militia knows all the inhabitants. This is why friends of the defendants arriving from Kiev and Moscow immediately fell into the hands of the authorities. Some were detained for three days in a preliminary detention cell, and then were forcibly sent home. Naturally, in conditions of extreme isolation, it is possible for the authorities to make false charges and mete out punishment for a truthful account of repressive activities on the part of the authorities. In such conditions reprisals can be made with gangster-like cruelty.

The court sentence for Mykola Rudenko means death. Due to his war wounds he will not last long under the conditions of a strict regime concentration camp. For Oleksiy Tykhy the verdict virtually means life imprisonment. Tykhy is a fifty-year old, infirmed person, and even if he survives the conditions of a special regime camp, followed by exile, his health will undoubtedly deteriorate.

Only universal indignation can be the answer to such inhumanity. Shame on the executioners of the judicial cover-up! Shame on those who inspire these executioners! Freedom for Mykola Rudenko, Oleksiy Tykhy and Vasyl Barladyanu, (who was convicted concurrently in Odessa on the 29th of June) for distributing materials of the Ukrainian Group! Freedom for the other arrested members of the Helsinki Groups: Yuri Orlov, Aleksandr Ginsburg, Anatoly Shcharansky, Mykola Matusevych, Myroslav Marynovych, Zviad Gamsakhurdia and Merab Kostava! Freedom for all political prisoners in the USSR!

[From the Washington Post, July 6, 1977]

THE UKRAINIAN EXAMPLE

Mikola Rudenko and Oleksi Tikhy, newly sentenced to harsh camp-and-exile terms in the Soviet Ukraine, are dissidents with a difference. They demanded not just that the Kremlin live up to the human-rights guarantees it accepted in the Helsinki agreement. They also demanded that Moscow respect the Helsinki guarantees for "national minorities." That the Soviet Union, like any other totalitarian state, fears a contagion of individual rights is well known. No less important is its resistance to meaningful "national" rights for the 100-plus ethnic or national groups within its borders. Russians, or Great Russians, are a minority in the country they largely control. Of the others, Ukrainians are the largest (50 million), richest, most sensitively located and historically the most assertive.

From the Kremlin's centralist "Soviet" viewpoint, it is elementary political logic to crack down on any sign of uncontrolled ethnic expression. The result intended by the Rudenko-Tikhy prosecution surely is to intimidate closet nationalists. But it is at least as likely that the example of the two will encourage others, in and out of the Ukraine. For over the decades of Soviet power repression by the Soviet authorities has failed to ground out, and may even have kept glowing, a nationalist spark. And meanwhile ethnicity has become a global phenomenon, leading the likes of Scots, Quebecois, Moluccans and Palestinians to challenge in one way or another the existing national structures.

Ethnic movements are fed by their own profound sources. But they are open to political stimulation. The Helsinki agreement turned out, expectedly, to be one such stimulus: It provided the handle for Messrs. Rudenko and Tikhy. President Carter's support for rights is another. Specifically, by deciding to raise the broadcasting power (and political status) of American radio stations that broadcast in Ukrainian and other non-Russian Soviet languages, he is not so subtly reaching over the Kremlin's head to communicate with Soviet citizens directly in a national frame-work. It is a way to be true to the cause of rights but it is also a way to stir Kremlin suspicions about his purposes. In current international conditions, ethnicity is fire and no outsider should play lightly with it.

SIX PRESIDENTS HAVE SUPPORTED THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, it has now been almost 2 months since President Carter formally asked this body to ratify the International Convention on the Prevention and Punishment of the Crime of Genocide. In his message, the President declared that—

> Ratification would be a significant enhancement of the human rights commitments of this Nation, demonstrating again to the world in concrete fashion our commitment to advance and protect human rights.

The purpose of the treaty is to make genocide a crime under international law whether it is committed in war or peacetime. The treaty outlaws the destruction of a national, racial, ethnic, or religious group, as well as establishes procedures for trying and punishing violators. The convention defines genocide as the destruction, or the attempt to destroy, any of these groups by killing, causing serious bodily or mental harm, restricting births, forcibly transferring children, or inflicting upon the group conditions or life designed to cause its physical destruction. Genocide, the conspiracy, direct incitement, or attempt to commit genocide, and complicity in genocide are punishable.

"The convention," the President states, "thus protects the most fundamental right—the right to live—and it creates an essential limit on the actions governments may appropriately take with respect to the people they govern."

I would like to remind the Senate that President Carter is not the first president to support the treaty. Five Presidents since Harry Truman's time have urged

this body to ratify it. The Senate nevertheless consistently has failed to act.

It has now been some 28 years since the Genocide Convention was adopted by the General Assembly of the United Nations. Since then, 83 nations, from across the world, have endorsed it. Let us finally take the advice of Presidents Truman, Kennedy, Johnson, Nixon, Ford, and now President Carter, and ratify the Genocide Convention this session.

INSTANT VOTER REGISTRATION

Mr. THURMOND. Mr. President, last week reports surfaced that President Carter and the Democratic leadership in the House had reached a compromise agreement on instant voter registration. In fact, I even read some reports which indicated to my dismay that some Republicans have endorsed the compromise.

On Sunday, the Washington Post carried an excellent editorial adeptly analyzed the flaws in the compromise. The editorial pointed out that an optional system is almost as bad as a mandatory one. In part, the editorial stated:

> If the program is to be optional, why is it needed at all? The States are free to adopt instant-registration systems any time. What would the legislation add? Just one thing: money. Federal money, to be precise, through grants for administrative overhead and fraud control and "voter outreach" programs and the like in States that do agree to open their registration rolls on Election Day.

The editorial, Mr. President, went on further to suggest that the real problem is voter apathy—the need to get people who are already registered to go to the polls, and this requires "good grassroots organizations, attractive candidates and issues, and strong campaigns."

I hope President Carter and the Democratic leadership in both the House and the Senate have had an opportunity to read the Post editorial.

In my judgment, it would be prudent for them to cancel any further action on this bill which will encourage voter irregularities and involve a further unwarranted giveaway of Federal tax dollars.

Mr. President, in order to share this timely editorial from the Sunday, July 17, 1977, Washington Post with my colleagues, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THAT INSTANT-VOTER BILL

At first glance, it may seem that the Carter administration and the House Democratic leadership have vastly improved their Election Day registration bill by agreeing to make the program voluntary. After all, the most persuasive and least partisan objection to the bill has been that it would compel every state to adopt by 1980, at least for federal elections, a new instant-registration system that could easily lead to widespread fraud and confusion at the polls. If the program is now to be optional forever, that criticism has been swept away. States with histories of Election Day problems, such as Rhode Island, Louisiana, Maryland and Illinois, will be free to go on requiring would-be voters to register in advance. States with less turbulent traditions may try out the new approach.

That sounds just fine . . . but wait a minute. If the program is to be optional, why is it needed at all? The states are free to adopt instant-registration or no-registration systems any time. What would the legislation add? Just one thing: money, Federal money, to be precise, through grants for administrative overhead and fraud control and "voter outreach" programs and the like in states that do agree to open their registration rolls on Election Day.

That's why the bill is still alive—and why we still object to it. We have no quarrel with federal inducements in principle; the carrot is often more effective than the stick. But the idea of federal aid for state and local electoral activities has its own problems. Without careful supervision, "voter outreach" could quickly turn into voter roundups for the benefit of one party, faction or candidate. *With* federal monitoring, on the other hand, would come federal regulations and bureaucracy—and equal-opportunity rules for precinct workers would not be far behind.

It doesn't help that the federal largesse would go only to willing states. On the contrary, the states most cordial to Election Day registration are likely to be those with the fewest voting problems—and the least real need for federal aid. One could argue, in fact, that if the aim is to shore up state and local election boards, the greatest help should go to those that don't dare risk instant registration at all. But bolstering election administration seems to be a secondary interest for the Democrats. Their first hope is to get more people to the polls. They ought to try to do that in the customary ways, through good grass-roots organizations, attractive candidates and issues, and strong campaigns.

JACK ANDERSON ON RECLAMATION POLICY

Mr. ABOUREZK. Mr. President, in the July 16, 1977 edition of the Washington Post, there appeared an interesting article by Jack Anderson and Les Whitten on the fate of small farms in reclamation projects. In the midst of the controversy over whether the Government should proceed with a number of water projects, another very significant problem with Federal reclamation policy has been somewhat overlooked. As the Anderson column makes clear, reclamation policy was intended to foster the development of small family farms. Unfortunately, this has not occurred. As a rule, family farming only occurs in those reclamation projects where family farming had already been firmly established. In those projects where large scale farming was the rule, the construction of a reclamation project, contrary to the clear intention of the law, has only resulted in changes in the patterns of ownership, not the size of farming operations. Land is now owned by nonresident investors and operated in large units by farmers leasing the land. Small family farms are not to be found.

Reclamation projects involve huge subsidies to the irrigators. If these subsidies went to family farmers, they could be justified, but when they go to wealthy investors, they are a disgrace.

The column does not point out that Senators NELSON, HASKELL, METCALF, and myself have introduced legislation that would restore reclamation policy to its original purpose. Secretary Andrus has also pledged to do what he can to accomplish this. As the first Secretary in many decades to commit himself this way, I think he cannot be praised enough.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SMALL FARMS' THIRST MAY BE SLAKED

(By Jack Anderson and Les Whitten)

The small farmers, like the buffalos which preceded them, may soon become an endangered species. Unable to compete with the agricultural giants, they have been forced off the land by the millions.

But now Cecil Andrus, the blunt-spoken new Secretary of the Interior, has declared his intention to implement a land reform law to help the small farmers.

The law goes back to the Teddy Roosevelt era and has been ignored by the Interior Department's Bureau of Reclamation just about as long. If Andrus can get his reluctant reclamation officials to enforce his new policy, this could force the break-up of more than half a million acres of prime farmland in the western states.

This land is dependent on federal irrigation projects for water. It was Roosevelt's idea to break up the land into 160-acre plots for family farms, and he personally pushed the measure through Congress.

But it has become the habit of the bureaucrats to thwart laws they don't like by lax enforcement. Perhaps because it is easier for the Bureau of Reclamation to deal with a few big farmers than a lot of little farmers, the responsible bureaucrats have allowed the big growers to circumvent the law for the past 50 years.

Roosevelt, for example, got a residency clause inserted into the law forbidding absentee landlords from profiting from the federal water. Yet the reclamation officials, employing a common bureaucratic tactic, insulated the clause with regulatory language which blunted its impact.

In 1926, the bureaucrats maneuvered to remove the residency clause altogether. It was a questionable legal decision that pulled the few remaining teeth out of the law. Thereafter, the large landholders were granted irrigation water for thousands of acres apiece if they promised to divest themselves of their excess acreage within 10 years.

Many of the growers divested their federally watered acreage, all right, by transferring it to family members or business associates. In one bizarre deal, 1,280 acres of valuable California farmland wound up as the possession of several corporations with headquarters in the Netherlands Antilles.

Many a giant landowner has reaped fabulous profits, meanwhile, from federal irrigation water. The small farmers, who were supposed to benefit from this water, have been reduced to protesting through obscure but valiant organizations such as National Land for People.

From its base in Fresno, Calif., this little group has been battling in the courts to require the Bureau of Reclamation to enforce the law. The courts have ordered the recalcitrant bureaucrats at least to draw up rules to regulate the slipshod land divestiture process.

But inside the encrusted Bureau of Reclamation, there is still stubborn resistance to drawing up tough new regulations. Many officials secretly side with their former boss, Gilbert Stams, who has been seen on Capitol Hill lobbying in favor of the big growers.

ENERGY

Mr. GOLDWATER. Mr. President, late last Friday this body completed a piece of legislation once more directed at the

so-called energy crisis. I do not use the term so-called lightly, but so far there has not been any convincing proof that there is such an energy crisis. It has been over 20 years now that this country has known that it was approaching a shortage of petroleum products and in that time, and particularly the last 4 or 5 years, the Congress has done absolutely nothing about it and the President has done even less. I think it should be perfectly obvious by now that the American people are not going to conserve energy by driving smaller cars, shorter distances, or slower speeds. I honestly do not believe the American people care much whether they pay more for gasoline in the form of taxes or just plain cost. There is no evidence to show that. Now, with these hard facts staring us in the face constantly, and the constant repetition that we are growing short of petroleum, the answer should be perfectly obvious to everyone, including people in this body who supposedly have made quite a study of it, however, if they have not, they have made quite a career out of running on the subject of energy. The answer is to obtain more raw petroleum, more natural gas, and then a third one, to encourage the development of new fuels. This body, and I mean the Congress, has done nothing to encourage the drilling of new wells for petroleum or gas. Instead, they have made it more difficult and have even gone so far now as to put the Federal Government in the world drilling business. If anyone thinks for one moment that the Federal Government can find oil and gas more cheaply than the private companies, they are just naive or they are perfectly willing to overlook the complete inability of the Federal Government to operate economically and efficiently in any field. As this country grows and our 230 million become 250 million and then 300 million people, there is no way in God's green world that conservation alone is even going to approach the solution to the problem. The only answer, as long as we are depending upon petroleum products and byproducts, is to find more of it and that is going to be done when we encourage small companies, individuals, and large companies to start drilling more holes in the ground so they will know where to find it. If we do this, and I will admit it is going to take some tax incentives to do it, and rightly so, then this country will shortly be out of its so-called energy crisis and, in my opinion, will not have to depend on the OPEC nations. Now how about the new fuels? We have heard nothing about them from the committee charged with energy. We have heard no words of encouragement, no appropriations for NASA or other scientific bodies engaged in the pursuit of these fuels. We have been, if anything, sitting on our hands playing politics with a subject that could well develop into a critical problem for this country if what we are told is only half true. I do not believe I have ever sat through such days of frustration as we undertook last week to pass the offshore tidelands bill, and I do not think I have sat through so much plain political hogwash as I heard last week or have continued to hear on the whole subject of energy. I think the American people are waiting for someone to show them the way, and I am convinced it is not going to be this Congress under the direction that it has in this particular field. It is not easy to be critical of my colleagues, but I think the time has come when a spade should be called a spade, because what we did last week certainly was not in the interest of the American public or even in the interest of obtaining more energy.

HUMAN RIGHTS

Mr. SPARKMAN. Mr. President, the Committee on Foreign Relations has recently received the third report on the condition of Americans arrested and imprisoned in Mexico as required in section 408(b)(2) of the International Security Assistance and Arms Export Control Act of 1976. This report covers the period from January 15 to May 15.

I ask unanimous consent that a copy of both this report and a letter from Senator CASE, the ranking minority member of the Foreign Relations Committee and myself to President Carter on this matter be printed in the RECORD following these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. SPARKMAN. Mr. President, the Committee on Foreign Relations held 2 days of hearings in June on a Treaty with Mexico on the Execution of Penal Sentences and on a similar treaty with Canada. The committee has ordered both treaties reported favorably to the Senate. During the course of these hearings, the committee received numerous accounts of abuse of Americans by Mexican law enforcement officials and stories of torture and extortion by prison officials, Mexican attorneys, and Mexican inmates in the prisons. The report just submitted by the Department of State indicates that the Mexican Government has begun action to prevent such abuses and to punish the individuals responsible when such incidents do occur.

The steps taken by the Mexican Government are commendable, but they are not a solution to the problems of all American prisoners in Mexico or in other nations where a large number of U.S. citizens are jailed. The Committee on Foreign Relations has urged the President to continue efforts to secure protection for the rights of the accused in all nations where significant numbers of Americans have been arrested or convicted. The committee has also recommended the assignment of additional consular officers to these countries to assist U.S. citizens who become entangled in unfamiliar legal systems.

The letters follow:

EXHIBIT 1

DEPARTMENT OF STATE,
Washington, July 2, 1977.

The Honorable JOHN SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate.

DEAR MR. CHAIRMAN: In compliance with Section 408(b)(2) of the International Security Assistance and Arms Export Control Act of 1976 (P.L. 94–329), I am writing to report on the progress which has been made toward achieving full respect for the human and legal rights of United States citizens detained in Mexico.

In the Secretary's last report, submitted to you on March 4, 1977, he reported on the number of substantiated cases of physical abuse and denial of human and legal rights guaranteed U.S. citizens under Mexican law, and of the Department's major concern for the timely notification to our consular officers of the arrest of an American citizen and subsequent prompt access to the arrestee.

There have been significant improvements in several respects affecting American prisoners in Mexico since the Secretary's previous report. These improvements arise from the responsiveness of the Government of Mexico under President Lopez Portillo on this issue, and particularly from the energetic manner in which the Attorney General of Mexico has tackled those aspects of the problem which lie within his jurisdiction. I am also pleased to report that notification and access to prisoners has noticeably improved in most parts of Mexico, especially within our Embassy's consular district, where prompt notification was formerly the exception rather than the rule.

Claims of physical abuse at the time of arrest have decreased somewhat. During the period covered by this report (i.e. January 15 through May 15, 1977) there were 550 arrests involving Americans in Mexico. Out of that number there were 42 cases involving alleged physical abuse at the time of arrest. Of that number there were only nine cases where the abuse was substantiated and another 20 cases where the evidence was not sufficient to reach a clear conclusion. In 13 cases the allegation of physical abuse was not substantiated. The Mexican Attorney General is now taking prompt corrective actions when cases of substantiated abuse are brought to his attention. This represents substantial improvement over the past. There have similarly been fewer allegations of physical abuse within the prisons. In the Federal District, the prison authorities themselves now appear more willing to investigate such abuses and, if substantiated, take punitive actions. The problem of "extortion" in the prisons, in the form of payments paid to prison personnel or inmate bosses for both privileges and necessities of life, remains an unfortunate feature of prison life in most parts of Mexico. Within its consular district, however, the Embassy has received greater cooperation from prison authorities in arranging for medical treatment for prisoners. Nonetheless, inadequate medical and dental care continue to be serious problems.

Another significant development, having a direct bearing on the number of future United States citizens detained in Mexico, should be noted. This is the Mexican Attorney General's decision not to prosecute persons who are clearly not traffickers and who are apprehended with small amounts of marijuana or other prohibited substances. Since this policy went into effect in late March, some 50 Americans arrested with 100 grams or less of marijuana, or an amount not exceeding 3 grams of other drugs, have been deported or American consular officers have assisted in arranging their departure from Mexico. The Mexican Attorney General is also surveying cases of Americans in the same category whose trial is in progress, and those who have received convictions, to determine whether ameliorative action might be possible.

As you are no doubt aware, the Foreign Relations Committee of the Senate held open hearings on June 15 and 16 on the matter of the Treaty on the Execution of Penal Sentences. The Department understands that hearings on the implementing legislation will be held by the House of Rep-

resentatives on July 13 and 14. Similar legislation is pending in the Senate. However, no date has yet been set for hearings in that body. The department is naturally hopeful for speedy ratification and implementation of the treaty with Mexico since we believe that it will do much to help alleviate the long range problems generated by large numbers of Americans serving extended sentences in Mexico.

Although it is evident that our vigorous efforts to improve notification and consular officers' access to American prisoners are slowly eliciting the cooperation of the Mexican authorities, it is equally evident that there is much room for progress in this area. Perhaps more difficult to remedy is the single most serious problem for an American arrested in Mexico, i.e., his inability to find competent and efficient legal representation at a reasonable cost. This problem exists both for those who must rely on public defenders, and those who are able to pay large legal fees for legal representation.

As the Secretary indicated to you in his last report, we are in a continuing dialogue with the new Mexican administration on this major problem in our relations. We now see that dialogue becoming productive. We have every expectation that our discussion of the plight of U.S. citizens detained in Mexico will result in continued improvement.

Sincerely,

WARREN CHRISTOPHER,
Acting Secretary.

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., July 12, 1977.

The PRESIDENT,
The White House.

DEAR MR. PRESIDENT: The Committee on Foreign Relations recently concluded two days of hearings on the Treaties with Mexico and Canada on the Execution of Penal Sentences. The Committee has ordered these Treaties reported favorably to the Senate.

During the course of the hearings, the Committee was disturbed by the reports it received from former prisoners in Mexico and the families of prisoners regarding the abuse of Americans imprisoned in Mexican institutions. These witnesses told of torture, extortion and denial of food and medical care necessary for survival. Complaints were also received about the inability of understaffed consular offices to assist adequately Americans in Mexico.

The Committee appreciates the fact that the Government of Mexico has initiated efforts to improve the treatment of prisoners and to review the cases of Americans arrested for the possession of small amounts of drugs. These steps are laudable, but the Committee feels that the United States can take additional action to protect its citizens contending with the legal systems of other nations, including Mexico, Bolivia and other countries where large numbers of Americans are held on criminal charges having nothing to do with politics.

The most urgent representations should be made to these nations to express the strong interest of the United States in the protection of the rights of the accused regardless of their nationality. The Government of Mexico has acted to alleviate the situation of prisoners in the area of Mexico City, but, unfortunately, reports to the Committee indicate that the situation in the outlying areas of Mexico has not changed significantly.

Prompt, effective assistance to U.S. citizens by consular offices is important to those accused of crimes in unfamiliar legal systems. Immediate consideration should be given to the work load of consular officers in Mexico and to the assignment of additional experienced officers to deal with the problems of the large numbers of Americans visiting that country. The Committee also feels that this review should consider the situation in other nations where large numbers of Americans are incarcerated.

Information received by the Committee indicates that ten or twelve qualified, experienced officers are needed in Mexico. These additional officers would allow better service to the prisoners and others, especially those facing difficulties in areas not served by a consulate. Although smaller numbers of additional consular officers would be needed in other nations such as Bolivia, there is no less an urgent demand for personnel.

The Committee would appreciate your consideration of these concerns and information on the relevant developments.

With best wishes,

Sincerely,

JOHN SPARKMAN,
Chairman.
CLIFFORD P. CASE,
Ranking Minority Member.

THE HIGH RISKS OF NEUTRON WEAPONS

Mr. HATFIELD. Mr. President, one positive aspect of the debate the Senate had on whether to proceed with production of the neutron bomb has been the extension of public awareness on this vital subject. The President is scheduled to make his final decision on deployment of enhanced radiation warheads in August. Following Senate debate of this matter and in anticipation of the President's decision, I am most pleased to ask that a thoughtful article concerning the potential dangers of neutron weapons be printed in the RECORD. This article, which appeared in the Washington Post on Sunday, July 17, was written by Mr. Alton Frye and deserves the attention of both my colleagues and the public. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE HIGH RISKS OF NEUTRON WEAPONS
(By Alton Frye)

Although they have come to public attention only lately, arguments over the military utility and deterrent value of "enhanced radiation weapons"—the neutron bomb—have occupied the national security community for two decades. They have always been inconclusive.

Army commanders have been reluctant to procure such weapons largely because the radiation effects on which they rely would rarely kill enemy personnel instantaneously, leaving many irradiated troops capable of fighting for some period after an attack. This problem is bound to persist with the systems currently proposed. If, as some sources indicate, personnel within 200 to 300 yards would be incapacitated in a few minutes, others might receive lethal doses out to more than half a mile, although they could survive for days or weeks. The battlefield scene would deserve Herman Kahn's famous caption: "Will the living envy the dead?"

One of the greatest uncertainties concerns the likely behavior of these "walking corpses." Knowing that they face prolonged agony and certain death, would these troops lay down their arms or would they exact vengeance? The matter is especially pressing if the affected forces control nuclear weapons of their own.

Given such battlefield uncertainties, what accounts for the Army's recent shift to favor neutron weapons? Political, bureaucratic and technical factors appear to have combined. Worried about the aging nuclear components of its European arsenal, the Army was rebuffed three years ago when it sought congressional approval to modernize its tactical warheads. Influential members of the Joint Committee on Atomic Energy, prompted by experts from the Las Alamos and Livermore nuclear laboratories, withheld support, complaining that the tactical nuclear innovations were too "conventional." Politically, it was clear that the Army would have to suggest more dramatic changes.

Bureaucratically, some figures in the Army had come to fear the steady erosion of their nuclear mission. The drastic decline in nuclear-capable air defense forces had been followed by the negotiated abandonment of the Army's anti-ballistic missile (ABM) system, the service's best hope for a long-term nuclear role. There was talk in NATO and in the Mutual Force Reduction discussions of cutting the number of theater nuclear weapons in Europe. Thus, there were powerful institutional reasons for the Army to devise novel and exciting weapons to protect its claim to a nuclear mission.

Technologically, work on warheads for the ABM system had made significant progress toward enhancing various types of radiation. Weapon engineers had explored different kinds of "kill mechanisms" for use against missiles and had tinkered with ways to "fine-tune the output spectrum" from nuclear detonations. There was much interest in finding an alternative application for this costly and hard-won knowledge.

Furthermore, the legacy of James Schlesinger's tenure as Secretary of Defense was a heightened interest in the Pentagon and among our NATO allies in forging nuclear systems capable of discrete attacks and less wholesale destruction. Faced with these inducements and the very impressive threat of Soviet armed forces, the Army hierarchy overcame its persistent skepticism of enhanced radiation devices.

Yet this history only underscores the fact that policymakers have not addressed the vital issues. Would such weapons increase or decrease the likelihood that nuclear weapons would actually be used, raising or lowering the so-called nuclear threshhold? Would they strengthen or weaken deterrence of Soviet attack? Would they facilitate or impede negotiated restraint on the use of force in Europe and, more generally, on the nuclear arms race between the United States and the Soviet Union? In sum, would they contribute to American security? These questions defy final answers but they demand scrupulous judgment.

WHY THE SECRECY

The disreputable procedure through which the weapons nearly evaded legislative and public scrutiny may prejudice one's initial view of the case. If the purpose of enhanced radiation warheads is to bolster deterrence, why were they cloaked in such secrecy? Deterrence exists in the mind of a potential adversary, not in the hidden recesses of the public works budget.

Though unaware of the original proposals, President Carter has become a party to a badly tainted procedure by urging Congress to pass the appropriations before he has completed his own review of the program's merits. He can redeem this violation of democratic process only by the most thoroughgoing and critical evaluation of the program. Carter's evident concern for the horrors of nuclear war gives hope that he will attend the problem with special care—but that same concern may make him vulnerable to the tempting prospect of "more humane" weapons.

One can be sure that no presidential study will resolve the fundamental dilemmas posed by all tactical nuclear weapons. It may be that the deployment of neutron weapons could reinforce deterrence by persuading

Moscow that NATO would use them, if necessary, to repel a conventional attack. That increment of deterrence, however, is likely to be minor compared to the overwhelming influence of 7,000 U.S. nuclear weapons already deployed on the continent, weapons which the Russians have every reason to fear would be employed, not only against invaders but behind their lines.

Moreover, we must reckon with a perverse consequence of deploying enhanced radiation systems. To the very degree that the Soviets expect such weapons to be used against conventional armor, we increase Moscow's incentives to launch preemptive nuclear strikes against our tactical forces. Russian doctrine already emphasized the likelihood that any war would go nuclear; preemptive nuclear attacks are common topics in Soviet military discourse. Thus, the price of a putative increase in deterrence by deployment of neutron bombs is further pressure on the Soviets to go first with weapons that would render meaningless any hypothetical limits on damage promised by new U.S. weapons. The net result is likely to be a reduction in the slender chances that a conflict could remain conventional long enough for diplomacy to exercise its own powers of damage-limitation.

The proposed investment in neutron warheads to fit three tactical weapons systems in Europe—the Lance missile and both 8-inch and 155-millimeter artillery—would also divert funds from the pressing need to improve survivability for nuclear forces deployed in Europe.

If we are serious about a tactical nuclear option for NATO, th urgent requirement is to reduce the vulnerability of such weapons to the kinds of preemptive strikes the Soviets might mount. Only by concerted action on this front can we diminish the danger that nuclear weapons will be used at the very outset of a European war. Money spent on enhanced radiation weapons, which could ultimately approach $3 billion, will do nothing to meet this central weakness in the force.

Equally important is the fact that a comparable expenditure could well buy a more effective and usable conventional capability to deal with the threat of Soviet tanks. With the advent of precision-guided munitions (PGM), Soviet tanks are becoming far more vulnerable to destruction by high explosives. The neutron bomb budget could add more than 100,000 precision anti-tank weapons to the NATO arsenal. Such "smart" weapons avoid the severe operational difficulties of nuclear explosives. They do not require the same degree of centralized command and control, since they are presumably authorized to attack any Soviet tank on Western territory. And, needless to say, hundreds of PGMs can be fired without yielding the devastation of a handful of nuclear weapons.

Army studies acknowledge the trade-off between enhanced radiation weapons and PGMs, but they contend that the nuclear devices could deliver a faster shock to an attacking enemy. This might turn the tide of a conventional battle. Undoubtedly, there would be a dramatic and traumatic effect from the use of neutron warheads, but the claimed advantage highlights some other troublesome features of Army employment doctrine.

In order to achieve the desired shock treatment, the Army contemplates not discrete and singular use of neutron weapons, but barrages of dozens of such rounds. Indeed, some employment packages are said to involve well over 100 nuclear warheads. This reckless employment doctrine is scarcely a plan for selective and discriminating use.

In a setting like Germany, where average population densities exceed 650 people per square mile, the Army's ideas for using enhanced radiation weapons offer no meaningful protection to civilians in the combat zone. One hundred nuclear rounds could easily be another Hiroshima. Furthermore, knowing the approximate lethal radius of nuclear weapons, the Soviets can vary their own tactics, separating their tanks enough to prevent multiple kills even by neutron weapons. This may force NATO to target each tank individually; if so, conventional PGMs will clearly be more cost-effective than nuclear devices.

All of these contingencies reveal the difficulty of calculating the consequences of a neutron weapons deployment. Some years ago, when pressed in the Senate Armed Services Committee to estimate collateral damages and casualties from using a portion of its tactical nuclear force, Army witnesses confessed their inability to do so. The same confession is in order today. The variables are simply too numerous—and too variable. The recommended force rests more on guesswork than calculation. If one doubts that assertion, let him consider the conclusion of the Army's attempt last year to treat the matter systematically: With the shift to enhanced radiation weapons and substantial adjustments in employment doctrine, the authors found that the ideal number of weapons to deploy in Europe was the number currently deployed there. *Sic semper status quo.*

STOKING THE ARMS RACE

As the President deliberates on this subject, his commitment to arms control will be very much at stake. While it is possible that the Soviets have been pursuing enhanced radiation techniques, it is certain that they will do so if the United States goes forward with testing and production of neutron weapons. Every experience to date indicates that Moscow's military authorities will insist on retaining the option to match the United States technologically.

The real choice confronting the President, then, may be whether he prefers a neutron bomb or a comprehensive ban on nuclear tests, with all that it portends for the effort to curb proliferation and to curtail the Soviet-American strategic competition. Coinciding with U.S. movement toward the cruise missile, projected improvements in the capacity of U.S. missiles to strike Soviet missile silos and the general malaise of detente, the neutron bomb controversy inevitably creates the impression that the technological arms race is continuing unabated. That is not the objective to which the Carter administration proclaims its dedication.

To be sure, the Soviet Union shares responsibility for provoking these new developments in the technological competition. Moscow's introduction of mobile SS-20 missiles to cover targets in Western Europe has triggered much alarm there and allies are anxiously asking what the United States proposes to do to meet the rising Soviet threat. The steady growth in Russian armor forces has created an imbalance that demands correction or countermeasures. It may even be that some members of the administration hope to play the neutron bomb option as a bargaining chip to elicit cutbacks in the number of Soviet armored divisions.

Out of this commotion some good may emerge. Close study of the Army's proposals may persuade the President more vividly than anything else that plans to use tactical nuclear weapons in Europe are a snare and a delusion. He may well discover that the most refined nuclear weapons cannot relieve the defects of the schemes to employ them. The President could well conclude, as others have, that NATO cannot reasonably expect to counter a Soviet conventional threat except by adequate conventional forces of its own. And he may well perceive the truth too long ignored by all of us, namely, that the only proper function of tactical nuclear weapons is to deter the use of similar weapons by the other side. If the neutron bomb debate leads Jimmy Carter to these essential insights, it will have made its contribution to national security.

NATIONAL ASSOCIATION OF RETAIL GROCERS OF THE UNITED STATES SUPPORTS S. 1699

Mr. JOHNSTON. Mr. President, I recently received a letter and statement from the National Association of Retail Grocers of the United States in support of S. 1699, the Diesel Fuel and Gasoline Conservation Act of 1977. I sponsored this bill and chaired a hearing on it on June 27 before the Subcommittee on Energy Conservation and Regulation of the Committee on Energy and Natural Resources. The purpose of S. 1699 is to promote backhauling of trucks; this is, filling them with cargo on their return trips rather than their traveling empty on the return trips. However, this bill would only apply to markets known as "uniform zone delivered pricing systems." The grocery business and drug stores are good examples.

In the hearings a question arose as to whether this bill might conceivably have an adverse effect on small business. Before deciding to sponsor this bill I satisfied myself that small business—and large business for that matter—will benefit from increased backhauling. However, it is gratifying to see this association supporting S. 1699 because, first, their members are nearly all small businesses and, second, practically all their members are potentially affected by S. 1699.

I ask unanimous consent that the letter of July 12, 1977, and statement from the National Association of Retail Grocers of the United States be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NARGUS,
Washington, D.C., July 12, 1977.

Senator BENNETT JOHNSTON, Jr.,
Chairman, Subcommittee on Energy Conservation and Regulation of the Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR CHAIRMAN JOHNSTON, JR.: The National Association of Retail Grocers of the United States, representing independent retail grocers in the United States since 1893, is pleased to announce support for passage of S. 1699. NARGUS members support increasing food distribution efficiency, reducing energy waste, and cutting down on the number of grocery trucks running empty.

NARGUS has long been an advocate of Robinson-Patman Act and fought to preserve the law many times in the last forty years. NARGUS believes S. 1699 is harmonious with Robinson-Patman Act. S. 1699 requires that backhaul allowance meet Robinson-Patman Act principles of being justified by savings in cost of delivery, and be available to all buyers on a non-discriminatory basis.

NARGUS respectfully requests that the enclosed statement of William E. Crook, President of Bill Crook's Foodtown Super Markets in Nashville, Tennessee and NARGUS be included in the subcommittee hearing record and that you insert the statement in the CONGRESSIONAL RECORD to inform other Senators that independent retail grocers support S. 1699.

Sincerely,

FRANK D. REGISTER,
Executive Director.

STATEMENT ON S. 1699

(By William E. Crook)

THE BACKHAUL BILL—ENTITLED DIESEL FUEL AND GASOLINE CONSERVATION ACT OF 1977—S. 1699—ENDORSED BY INDEPENDENT RETAIL GROCERS

I. Description of Association

The National Association of Retail Grocers of the United States (NARGUS) supports S. 1699—a bill to provide energy conservation by alleviating current and continuing fuel waste, to reduce empty vehicle movements, and to increase efficiency in transporting goods by motor carriers for the ultimate benefit of consumers.

NARGUS has represented independent retail grocers for over 80 years. The association has over 40,000 members in the United States. Its governing Board is composed entirely of local grocery store operators from some thirteen states. NARGUS members operate small stores and supermarkets. They purchase their merchandise from either an independent wholesaler, or through a retailer-owned cooperative. NARGUS' membership concern is directed entirely to preserving the viability of independent grocers whose business is normally concentrated in only one community.

II. NARGUS Efforts Leading Up To Endorsement of S. 1699

NARUS became a supporter of S. 1699 after public hearings were held on the bill by the Senate Energy Conservation Subcommittee. The association's study and consideration concerning the operation and effects of the measure were extensive and painstaking; so much so that it was not prepared to offer its views at the June 27, 1977 public hearing on S. 1699 by the Senate Energy Conservation and Regulation Subcommittee.

Before reaching a position endorsing S. 1699, the association had the benefit of the oral and written statements presented to the Senate Energy Subcommittee by eight witnesses, three of whom opposed the bill. Prior to its decision to support the bill, NARGUS gave careful consideration to arguments for and against the measure, particularly those alleging that the bill favors large chain distributors, and that the bill would undermine, weaken, and harm the Robinson-Patman Act. If either of these claims against S. 1699 were factual, or if there was even a reasonable probability of their accuracy, NARGUS would not only withhold its support of S. 1699, but would have actively opposed the proposed legislation. Prior to taking a position on S. 1699, the association examined the bill carefully to determine whether it would favor large buyers over smaller competitors and whether it would weaken the Robinson-Patman Act.

III. Why The Consumer Will Benefit From Backhaul Legislation S. 1699

Removing artificial legal hurdles standing in the way of manufacturers and other sellers offering meaningful backhaul allowances under an effective customer pickup program has many benefits for consumers and members of the grocery industry generally.

The greatest benefit this legislation will provide is to encourage the elimination of wasteful costs of distribution. One example is described as "deadheading" which occurs when distributors' trucks return from a trip empty. This causes waste of valuable resources, e.g., personnel, fuel, and equipment. The National Commission On Productivity And Work Quality estimated, in 1975, that the annual savings in food distribution costs through greater utilization of truck operating time amounts to approximately $100 million.

The goal to be achieved is not just conserving energy by reducing waste of fuel, but also bringing about economies of operation for distributors and suppliers. Increasing productivity is a national need with substantial benefits for every citizen.

Aside from more efficient use of equipment and personnel, S. 1699 would also encourage better utilization of capital.

The National Commission On Productivity And Work Quality refers, for instance, to reduced inventory investment through more precise timing of merchandise receipt at warehouses of suppliers and distributors; reduction in lost sales from out-of-stock conditions; and less warehousing costs through balanced workweeks for warehouse crews by scheduling backhauls when other work requirements are at a minimum as potential savings available through backhaul.

S. 1699 offers sellers and buyers more flexibility in responding to changing economic conditions. The measure will be useful in meeting rising costs.

Better utilization of employee skills helps to maintain wages at fair levels. Labor also benefits from the legislation.

Backhaul allowances will stimulate both increased productivity and cost reduction. Consumers will benefit from the legislation.

IV. S. 1699 Will Not Harm the Robinson-Patman Act

S. 1699 has a very narrow and limited application. It allows, but does not require, sellers to offer a meaningful cost-justified and non-discriminatory backhaul allowance only if and when the buyer provides transportation for his own products from the seller's distribution center. The bill applies only when the seller offers to sell the particular commodity to the buyer under a uniform zone delivered pricing system.

A seller or a buyer who, for any reason or for no reason, does not wish to participate in a transaction involving a backhaul allowance is not required to do so by S. 1699. The bill is permissive in nature. It is not mandatory, except that where seller and buyer agree to an allowance, it must be made available to all the seller's customers on a non-discriminatory basis, and the allowance must not exceed the actual savings in delivery costs to the seller.

The current legal barrier to granting a meaningful backhaul allowance, as provided in S. 1699, is based on a Federal Trade Commission legal interpretation issued in the form of an advisory opinion. The legal roadblock to backhaul allowances is not the result of any litigated adversary proceeding before the courts, or the Commission. Neither the courts nor the Commission has ruled that a backhaul allowance, as authorized under S. 1699, is prohibited under the Robinson-Patman Act. In over forty years, the Federal Trade Commission has not brought a complaint under the Robinson-Patman Act against a seller, or a buyer, for granting, or for receiving, a backhaul allowance which would be permitted under S. 1699.

Since, as the record shows, a backhaul allowance meeting all the conditions set forth in S. 1699 has never been the object of Federal Trade Commission enforcement proceeding since the Robinson-Patman Act first became law over forty years ago, there appears to be no rational basis for contending that the bill would weaken or undermine the Robinson-Patman Act.

A key requirement provided in the bill is that the backhaul allowance be made "available to all the seller's customers on a non-discriminatory basis." The allowance must also, according to the terms of the bill, be "no greater than the actual savings in delivery costs to the seller." Thus, in order to comply with the bill, a backhaul allowance must be non-discriminatory and cost-justified, both key elements of the Robinson-Patman Act long established method of operation to protect small business from harmful price discriminations.

NARGUS has carefully considered the arguments of S. 1699 opponents, as presented at the public hearing on the bill before the Senate Energy and Natural Resources Subcommittee on Energy Conservation and Regulation. The association has paid particular and close attention to statements alleging that the Robinson-Patman Act will be hurt by the bill.

NARGUS' strong and consistent support of the Robinson-Patman Act since its enactment is a matter of public record. Each time in the history of this law, the Act has been attacked in Congress through efforts to pass weakening legislation, the association has played a prominent part in its defense. Countless public testimonies attest to NAR GUS' consistent support of the Robinson-Patman Act. The public record is so long and so uniform in demonstrating NARGUS' defense of the Robinson-Patman Act that it easily establishes the association's good faith in this matter. If S. 1699 would in any way cripple the Robinson-Patman Act, NARGUS would not hesitate to oppose the measure.

Because NARGUS is a supporter of the Robinson-Patman Act, it is important that the association not automatically, and without sound reason, oppose a legislative proposal affecting the application of the act. Following such a policy does a disservice both to the law and to those it seeks to protect. This concern is reason enough for the association's taking the added time required to weigh and consider the effects of S. 1699, and explains its inability to appear at the public hearing held on the legislation June 27, 1977 by the Senate Energy Conservation and Regulation Subcommittee.

NARGUS regards the arguments made against S. 1699 on the grounds of injuring small business and the Robinson-Patman Act unconvincing. Unsupported allegations are made that small business in general, and small grocers particularly, will be hurt by S. 1699. It has been said, for instance, that small grocers will be denied the benefit of backhaul allowances authorized under S. 1699 because many of them do not own or operate trucks.

The answer to this argument is that wholesale suppliers of grocers operate trucks, and the vast majority of grocery wholesalers, as well as the two national trade associations representing wholesale grocery distributors, support S. 1699. Backhauling by wholesalers will result in more efficient cost saving utilization of capital equipment and personnel. Retail grocers will benefit from economies of operation experienced by manufacturers and by wholesale suppliers operating a customer pick-up service. Whenever distribution cost savings can be effected in the highly competitive grocery industry, everyone gains, including retail grocers and their customers.

No effort should be spared to achieve greater operating efficiency in the distribution of grocery products to consumers. This is what S. 1699 is all about. There never was a greater need for this bill to hold down the harmful effects of inflationary price increases. It is fair and equitable to all businesses and will benefit the entire economy.

THE INTELLIGENCE ICEBERG

Mr. GOLDWATER. Mr. President, a recent editorial in the Washington Post entitled, "The Intelligence Iceberg," made the destructive recommendation that—

Put the whole intelligence package—congressional oversight as well as Executive-branch management and control—on the table, where it can be inspected and argued out in the round.

A nation has to have intelligence. Without it, it cannot survive A nation

needs intelligence just as the Washington Post needs it and obtains it in its own particular way. Business needs intelligence. Individuals need intelligence in the sense that they know what is going on around them. But I suggest that to do what the Washington Post has outlined would be the surest way in the world to destroy completely our intelligence-gathering organization. The Senate nearly did 2 years ago and the House came close to helping, but since the new Intelligence Committee under the able leadership of Senator INOUYE has replaced these other efforts. We are making great progress toward establishing an intelligence gathering and evaluating mechanism that will be of great value to our country and, I might say, to the free world. Intelligence is not gathered and is not evaluated on the public benches or tables or an open park. Intelligence is gathered and evaluated so only those who need to know will know. I ask unanimous consent that the editorial to which I referred to be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE INTELLIGENCE ICEBERG

Should the Pentagon continue to run the National Security Agency and the National Reconnaissance Office? Or should it yield up these multibillion-dollar intelligence-collection agencies (communications and satellites, respectively) to the Director of Central Intelligence? We are dealing here with something more than the usual epic bureaucratic struggle for territory. The real issue is whether, for the first time since the intelligence community was organized in 1947, the President will actually control the whole of it. Similarly, will the Senate Intelligence Committee, and any future House counterpart, actually oversee the whole of it? For without centralization, the President will remain poorly placed to prevent gross abuses of the sort whose disclosure led to the current review, and to get the kind of intelligence he needs to conduct national policy. And the Congress will be unable to conduct effective oversight.

Look at it this way: Currently the Pentagon, conditioned to scan the world for military threats, controls NSA and NRO. But are these agencies being assigned the right tasks, and only those tasks that are really necessary? And are their findings properly evaluated and used? Remember, we are talking about fully 80 per cent of the intelligence budget. Somebody, it seems to us, ought to be taking into account not only the theoretical military threat but also the political diversities—and realities—that help shape and define the military threat in practical terms. Somebody ought to be conveying to the government's intelligence chief (in this case, the Director of Central Intelligence) the questions on the mind of the chief civilian policy maker. And, frankly, we don't see who else but the President can perform this role as ultimate taskmaster of all branches of intelligence collection and analysis.

Pentagon opponents of consolidation suggest it will rob the President of dissent in the intelligence-estimating process. This is well worth worrying about but it is not a likely result of the step at hand. There are other ways, including sensible leadership and strict rules of procedure, for building protection of independent thinking and dissent into intelligence estimating.

Mr. Carter seems to understand the need to bring the intelligence community under (1) presidential control and (2) legislative oversight. He is working with the Senate Intelligence Committee to frame new legislative charters—statements of mission and authority—for the intelligence agencies. He chose, however, to take up the NSA/NRO question before dealing in public with the proposed charters. The result is that the public sees the tip of an iceberg whose general dimensions are still concealed, and the impression is spread that the President, rather than coming to grips with basic problems of accountability and effectiveness, is simply toying with the organizational boxes.

The remedy is obvious: Put the whole intelligence package—congressional oversight as well as executive-branch management and control—on the table, where it can be inspected and argued out in the round.

LETTER TO THE PRESIDENT REGARDING BELGRADE CONFERENCE

Mr. HUMPHREY. Mr. President, on June 13, I, along with 40 of my colleagues in the Senate and 53 Members of the House of Representatives, wrote to President Carter to express our support for the administration's efforts to raise the subject of human rights in the Soviet Union at the current Belgrade Conference. We urged the administration to do everything possible to insure that all signatories to the Helsinski Final Act abide by its provisions, and we expressed particular concern over the increased intimidation of Andrei Sakharov and over the cases of Anatoly Scharansky, Yuri Orlov, Aleksandr Ginzburg, Oleksa Tykhy, Mikola Rudenko, and other Soviet dissidents who have come under increasing pressures in the U.S.S.R. because of their attempts to monitor Soviet compliance with the Helsinki agreement.

I would like to note for the record that Senator DALE BUMPERS wished to sign the letter. Unfortunately, when his notification was received in my office, the letter had already been delivered to the President.

WORLD BANK INTENDS TO LOAN $2.9 BILLION TO HUMAN RIGHTS VIOLATORS

Mr. ABOUREZK. Mr. President, confidential World Bank figures published by the Center for International Policy show that the Bank intends to lend $110 million to Chile, one of the world's most brutal dictatorships, in fiscal year 1979. This high figure is especially interesting in light of the Bank's refusal to commit any money at all to the previously freely elected government of the late President Salvador Allende.

No less interesting is the fact that the World Bank also intends to lend $25 million to the East African Community, one of whose members is Uganda—scene of the terrible outrages perpetrated by President Idi Amin.

These two examples illustrate the need for effective human rights guidelines on the billions in foreign aid money Congress votes every year. An increasing proportion is going to the World Bank and other financial institutions. We vote the money, yet we do not know where it goes.

Certainly the World Bank funds many praiseworthy projects including water supply and sewerage, agricultural development and other health and education projects. But unfortunately the full picture of World Bank activities is more complex, as the Center for International Policy study indicates. According to the preliminary 1979 World Bank loan list, included as the appendix to the study, the Bank intends to increase loans to four newly repressive governments twice as fast as to all others. These Governments—Chile, Uruguay, Argentina, and the Philippines—have all received major new loans since the onset of torture and repression and are tentatively scheduled to get $664 million in 1979, according to the World Bank document.

The House Appropriations Committee has already said it will require submission of a list of fiscal year 1979 World Bank loans as a regular part of the administration's presentation. Although I am aware the World Bank is displeased at the disclosure of its confidential loan list, the real fault lies in that institution's excessive secretiveness. So that Congress and the taxpayers may know where their foreign aid dollars are going, I ask for unanimous consent that the Center for International Policy's research study be printed in the RECORD.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

RESEARCH STUDY

(World Bank sets $2.9 billion in loans to human rights violators for fiscal year 1979)

WORLD BANK SETS $2.9 BILLION IN LOANS TO RIGHTS VIOLATORS

Fifteen of the world's most repressive governments will get $2.9 billion in World Bank loans in fiscal 1979, according to information contained in confidential World Bank working papers.[1] Total loans will reach $9 billion.

Of the 15 governments, four—Argentina, Chile, Ethiopia, and Uruguay—have had their bilateral aid cut by President Carter or by Congress because of human rights violations. These four will get $454 million from the World Bank in FY 1979, according to the lending report. The United States will contribute one dollar out of every four.

TABLE 1.—WORLD BANK LOANS TO 15 REPRESSIVE GOVERNMENTS, FISCAL YEAR 1979

Country	Amount (millions)	Standby projects
Argentina	$200	100
Brazil	640	310
Chile	110	----
El Salvador	35	15
Guatemala	40	45
Haiti	23	----
Nicaragua	22	25
Paraguay	33	25
Uruguay	39	----
South Korea	370	50
Indonesia	635	160
Philippines	315	25
Thailand	185	35
Ethiopia	105	75
Zaire	105	30
Total	2,857	895

Note.—This list is composed of the 13 countries named as rights violators by Representative Clarence Long (D.-Md.) chairman of the House Appropriations Subcommittee on Foreign Aid (except for the Dominican Republic, which will receive no World Bank loans in fiscal year 1979), plus Chile, South Korea, and Zaire, cited by other U.S. government sources as rights violators.

Source: World Bank.

[1] At end of paper.

World Bank loans to countries that have newly become repressive during the 1970's will rise more than twice as fast as to all other countries, the working paper also reveals (Figure 1). Loans to countries that were already repressive will rise at the same rate as all others.

Loans to the newly repressive countries—Argentina, Chile, the Philippines, and Uruguay, each of which have experienced military takeovers or martial law since the early 1970's—will rise from an average total of $90 million a year in FY 1971–1973, when the countries were still democratic, to $664 million in the World Bank fiscal year 1979 (July 1, 1978–June 30, 1979), according to figures in the document. This sevenfold increase contrasts with an increase of three times in World Bank lending to all other countries over the same period. (Table 2).

TABLE 2.—WORLD BANK LOANS TO NEWLY REPRESSIVE REGIMES

[Dollar amounts in millions]

Fiscal year	Amount	3-yr averages	Index (1971–73=100)
Loans to newly repressive regimes: [1]			
1965	$42.7		
1966	7.7	$49.1	54.4
1967	96.9		
1968	66.3		
1969	131.1	113.7	125.9
1970	143.8		
1971	195.8		
1972	50.7	90.3	100.0
1973	24.3		
1974	192.1		
1975	228.0	257.7	285.4
1976	353.0		
1977	NA		
1978	NA		
1979	664.0		735.3
Loans to all others:			
1965	959.9		
1966	1,081.5	998.7	36.4
1967	954.6		
1968	849.4		
1969	1,573.4	1,471.0	53.6
1970	1,990.3		
1971	2,248.3		
1972	2,504.1	2,743.2	100.0
1973	3,477.2		
1974	4,404.0		
1975	5,376.0	5,353.1	195.1
1976	6,279.4		
1977	NA		
1978	NA		
1979	8,297.0		302.5

[1] Argentina, Chile, the Philippines, Uruguay.

Source: World Bank.

The reason for the disproportionate increase in World Bank lending to the four countries is the willingness of their new military governments to impose World Bank-approved policies, according to information in various World Bank country reports.

On the other hand, the World Bank will make no loans to Uganda in FY 1979, continuing a cutoff that has remained in force ever since President Idi Amin seized power in 1971. The World Bank says President Amin has been following the wrong economic policies.

Details of the World Bank's provisional FY 1979 program follow:

Chile will get $110 million, up from zero in the early 1970's. Chile received no World Bank loan commitments during the three years of the democratically elected government of the late President Salvador Allende because the international lending organization disapproved of his economic policies.[2]

Argentina will get $200 million (with another $100 million in possible standby projects). Under military rule since March 1976, the South American country got no World Bank loans during the previous five years (1972–1976) of lax military rule and democratically elected civilian government.

Uruguay will get $39 million, up from $11 million in the early 1970's (FY 1971–1973). Uruguay's congress was abolished in 1973 and repression intensified in November 1975. As in Chile and Argentina, the military has instituted World Bank-approved economic policies, and in FY 1976 the bank lent $52 million.

The Philippines will get $315 million, up from an average $29 million in the early 1970's (FY 1971–1973), and elevenfold increase while overall lending has increased three times. Martial law was declared in September 1972; receptivity to World Bank advice followed shortly thereafter.

The following major World Bank recipients entered the 1970's with repressive governments already in place. They were also already applying World Bank-approved economic policies:

South Korea will receive $370 million, up from an average $118 million in FY 1971–1973. The South Korean increase is in line with the overall increase in World Bank lending.

Indonesia will get $635 million, up from an average $115 million in FY 1971–1973, an increase of five and a half times compared to a threefold overall increase. The FY 1979 loans, however, will be on harder terms than the FY 1971–1973 credits. The increase in amounts reflects the sharp rise in Indonesia's oil revenues and improved debt servicing capacity. Indonesia's present military government assumed power in a bloody purge in 1965. The World Bank disapproved of the previous Sukarno government's policies and made no loans to Indonesia until FY 1969.

Brazil will get $640 million, up from $244 million in FY 1971–1973. The increase to Brazil will be roughly in line with (actually 14 per cent slower than) the increase to the rest of the world, although the bank lists another $310 million in possible standby operations for FY 1979. The World Bank frowned on the policies of the elected Goulart government in the early 1960's. Following the 1964 military coup, World Bank lending rose from zero to an average $73 million a year during the rest of the decade to reach $498 million in FY 1976.

Thailand will get $185 million (possibly $220 million). The military most recently assumed power in October 1976. World Bank lending to Thailand during the 1970's has increased steadily through both civilian and military governments 46 per cent faster than the worldwide rate of increase. This higher than average increase is partially linked to a change in Thai economic management, as fiscal conservatives have been replaced by planners willing to finance development through major foreign indebtedness.

Of the nine countries reviewed above, four of the five newly repressive ones—Chile, Argentina, the Philippines and Uruguay—each show a close correlation between the onset of repression in the 1970's and disproportionate increases in World Bank loans, while Brazil and Indonesia show a similar pattern in the 1960's. Only Uganda has been cut off. In the other cases the new government "rationalized" (i.e., increased) prices for essential goods, held down wages and threw the country wide open to foreign investments by removing controls on international trade and investment. Major World Bank loans followed.

The working paper gives these further details on loans to repressive regimes:

Ethiopia will get $105 million, up from $21 million in the FY 1971–1973 base period, a fivefold increase while overall lending will rise three times.

The Dominican Republic will get no loans in FY 1979 and received none in FY 1976. It received an average $7 million a year in FY 1971–1973.

El Salvador will get $35 million ($15 more possible in standby), up from $14 million in FY 1971–1973 and roughly in line with the worldwide increase.

Guatemala will get $40 million in FY 1979, up from $13 million in FY 1971–1973, in line with the overall worldwide increase.

Haiti will get $23 million, up from $4 million average in FY 1971–1973, increasing twice as fast as the overall.

Nicaragua will get $22 million, up slightly from a $21 million average in FY 1971–1973 (while overall World Bank loans tripled).

Paraguay will get $33 million, a major jump from the $2 million a year average FY 1971–1973.

Iran will get no loans, compared to an average $114 million a year in FY 1971–1973. With a large current account surplus, the country does not need World Bank loans.

Zaire will get $105 million, up from an average $17 million in FY 1971–1973, twice as fast as the overall increase despite Zaire's recent major debt rescheduling and political chaos. A further $30 million is listed in standby projects.

Other significant World Bank loans, not necessarily to human rights violators, are revealed in the confidential lending document:

India will get $1.2 billion, more than any other country in the world (although India is one of the lowest recipients on a per capita basis), roughly in line with the overall increase in the volume of World Bank lending.

Egypt will get $265 million, up from $27 million during FY 1971–1973, with a further $120 million in standby. The near tenfold increase during the 1970's comes as Egypt throws off the previous Soviet influence in favor of U.S. aid and raises prices for consumer necessities, a move that last year provoked major riots. In the early 1950's the World Bank turned down an Egyptian request for credits for the Aswan Dam, which was then built by the Russians. The World Bank made no loans to Egypt from 1959 to 1970, the period of Soviet ascendancy. While it appears that the World Bank is operating in tandem with the United States in Egypt, as in Chile, World Bank spokesmen maintain this is coincidental, that Egypt made no suitable requests for aid in the 1960's and is only making such requests now.

Yugoslavia will get $285 million and Romania $170 million. World Bank spokesmen

[2] The major West European governments and private banks continued aids and credits to Chile during the Allende period. Only the United States, the World Bank and the Inter-American Development Bank cut off loans to Chile. World Bank spokesmen call the pattern coincidental.

cite loans to the two Communist countries as proof of the bank's political neutrality from the United States.

China will get no loans. The Republic of China government still holds China's place at the World Bank. The Republic of China will also get no loans in FY 1979, although it has received $348 million in past World Bank loans.

Of the $9.0 billion in planned FY 1979 World Bank loans, $6.5 billion will come from the International Bank for Reconstruction and Development, the World Bank's conventional terms lending facility. The International Development Association will lend $2.5 billion in highly concessional 50-year loans to the very poorest countries, including India, Bangladesh and Pakistan. The operations of the third World Bank affiliate, the International Finance Corporation, are not covered in the report.

Agricultural and rural development projects aimed at the poor will account for $3 billion of the FY 1979 lending program, one-third of the total. In FY 1976 agriculture projects ranged from a flood protection and paddy land reclamation program in Burma to a fishery project on Lake Tanganyika in Burudi to a rubber tree replanting program in Thailand. In India the bank brought irrigation to 100,000 farms, in Tanzania it extended cornfields and dairy farms, in Turkey it supplied agricultural credit for 18,000 farmers. Although details are unknown, many of the same projects will be continued through FY 1979, while the proportion of agriculture loans in the total will rise from 25 to 33 per cent.

As in FY 1976, industry and public utilities will get the largest share in FY 1979—$4.2 billion or 47 per cent. Projects range from power dams to roads, railways and ports to aviation and telecommunications. There are the traditional infrastructure projects with which the World Bank has come to be identified. In addition to the $4.2 billion project loans, untied foreign exchange loans for distribution to domestic industries and enterprises, usually by government relending institutions, will account for $879 million or 10 percent.

Education, population, tourism, urbanization, and technical assistance loans totaling $852 million will make up the remainder of the World Bank's FY 1979 lending program.

Of the $9 billion total, about $4 billion or 45 per cent will go for agriculture, education, water supply and sewerage and population projects that are arguably of direct benefit to the needy, the Center's analysis of the confidential report indicates. The remaining $5 billion or 55 per cent will go for industry, infrastructure, and untied balance-of-payments loans with no direct impact on the needy. For the 15 repressive governments of Table 1, the proportion is the same.

The Harkin amendment now pending before the Senate would require the U.S. director at the World Bank to vote against a loan to any government guilty of a "consistent pattern of gross violation of internationally recognized human rights." The Harkin amendment makes an exception for aid that is "directed specifically for programs which serve the basic human needs of citizens" of repressive countries.

Although the U.S. directors do not have the final say, the Harkin amendment would jeopardize the 55 per cent of planned FY 1979 loans to repressive governments that will not directly benefit the needy. Out of $2.9 billion planned for these governments, $1.6 billion would be for general economic development which, according to the new available precedents, may not meet the legislative requirement:

TABLE 3.—IMPACT OF HARKIN AMENDMENT

[In millions of dollars]

	World Bank loans in fiscal year 1979		
Country	Total	Jeopardized by Harkin amendment	Purpose
Chile	110	90	Powerplants, highways.
Argentina	200	140	Ports, railways.
Brazil	640	390	Steel plants, railways, roads, intermediate credit institutions.
El Salvador	35	35	Power plants.
Haiti	23	15	Do.
Nicaragua	22	12	Intermediate credit.
Paraguay	33	7	Airports.
Indonesia	635	240	Railways, ports, power.
South Korea	370	260	Highways, power plants, intermediate credit.
Philippines	315	140	Highways, urbanization.
Thailand	185	135	Dams, roads, industries, telecommunications.
Ethiopia	105	30	Powerplants.
Zaire	105	93	Aluminum, ports.
Guatemala	40	----------	
Uruguay	39	----------	
Total	2,857	1,587	

Source: World Bank.

While the $2.9 billion in projected World Bank loans to dictatorships in FY 1979 will obviously undermine the Carter administration's budding campaign for human rights abroad, their most serious consequences are far more subtle. Indeed, it may be that the lending policies of the World Bank actually encourage the spread of authoritarian government.

Officials of the World Bank claim that loans are made on the basis of a nation's objective "creditworthiness." In practice, this means that the bank has a marked preference for governments willing to implement tough austerity programs, to hold down labor unrest and to throw their countries wide open to foreign investments.

Ironically, in the name of stability and economic development, the World Bank has sacrificed human rights—the end purpose of economic development.

THE SURFACE MINING CONFERENCE REPORT

Mr. METCALF. Mr. President, shortly, I hope the Senate will consider the conference report on the Surface Mining and Reclamation Act. The report was filed on July 12. A copy of the report and the text of the final bill agreed upon is contained in the CONGRESSIONAL RECORD for July 12 at pages H6938–H6971. The report and final text have by now been printed and are available to every Senator. The following explanation of the major provisions of the bill and the changes from the Senate bill that previously passed the Senate may answer some of the questions concerning this legislation. I ask unanimous consent that this information be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SURFACE MINING CONFERENCE REPORT

The conference report represents the culmination of many years of patient effort by many Members on both sides of the aisle in the Senate and the House to develop the first Federal legislation to regulate surface coal mining. The agreed upon bill is a strong, enforceable and balanced one. It contains many revisions of H.R. 25, the predecessor bill which was vetoed by President Ford, revisions which will ensure that the transition from the existing patch-work of State and Federal administration to one uniform regulatory system will be as expeditious and as equitable as possible.

The Surface Mining and Reclamation Act of 1977 was introduced early in the 95th Congress in both the House (H.R. 2) and the Senate (S. 7). H.R. 2 was nearly identical to the vetoed H.R. 25, whereas S. 7 was somewhat streamlined so as to place the emphasis upon coal mining exclusive of other mineral extraction. The Senate Energy and Natural Resources Committee added many features bringing the bill more in line with the House bill.

MAJOR PROVISIONS

The joint statement of managers explains the conference report in some detail. However, in the interest of clarifying the understanding of my colleagues, I will highlight some major provisions in the report:

First. Environmental standards. The conference report establishes the basic standard that lands may not be surface mined unless they can be reclaimed. It includes the following environmental protection standards: prevention of dumping spoil and overburden downslope in mountainous areas; a requirement that mine sites be regraded to approximate original contour, including backfilling to final cut to eliminate highways; revegetation measures to assure land stability and long term productivity; and water protection standards directed at protection of water quantity and quality. The latter will be particularly significant in maintaining the delicate hydrologic relationships in the West and preventing acid mine drainage in the East. The environmental performance standards are not inflexible, however, as the report provides for variances from these standards in order to allow cetain planned postmining land uses. Mountaintop mining is recognized as a regularly permitted activity under special environmental requirements.

Second, State responsibility. The report gives the principal responsibility for surface mining regulation to the States. The States are given 34 months to prepare adequate regulatory programs to meet the minimum standards in the act. Federal funding is available to help the States prepare and enforce such programs.

Third. Surface impacts of underground mines. The report also treats surface impacts of underground mines such as those resulting from mine waste disposal. In particular, mine waste embankments are covered by rigorous engineering requirements.

Fourth. Reclamation of orphan lands. The report establishes a reclamation program to repair past damages from both surface and underground coal mines in all regions of the country. In addition, assistance is provided for the construction of public facilities in order to ameliorate the impact of rapid coal development. For 15 years, a reclamation fee of 35 cents per ton for surface mined coal and 15 cents per ton for underground mined coal, and 15 cents per ton or 10 percent of the value of lignite coal, whichever is less, is assessed in order to provide for the reclamation program. One-half of this money must be spent in the State or Indian reservation in which it is collected.

Fifth. State mineral institutes. The bill also authorizes the Secretary of the Interior to establish State mining and mineral resources research institutes at State or other eligible universities. These institutes will perform research on mineral extraction and processing technologies, and train engineers and scientists to serve the needs of the Nation's mining industry. This program should help to avoid future materials and personnel shortages. Ten regional coal research laboratories and 1000 energy research fellowships are also to be established.

Sixth. Surface-owner protection. The conference report establishes as Federal coal leasing policy a requirement that the Secretary of the Interior not lease for surface mining without the consent of the surface owner Federal coal deposits underlying land owned by a person who has his principal place of residence on the land, or personally farms or ranches the land affected by the mining operation, or receives directly a "significant portion" of his income from such farming. By so defining "surface owner," the conferees seek to prevent speculators purchasing land only in the hope of reaping a windfall profit simply because Federal coal deposits lie underneath the land.

Seventh. Prime farmlands. The conference report establishes special performance standards respecting soil reconstruction of prime farmland after mining and requires the regulatory authority to make a written finding that the operator has the ability to restore the land to premining levels of agricultural productivity.

Mr. President, as with any legislation which touches so many vital areas of national, State and personal interests, a number of major issues emerged in conference:

(a) The treatment of alluvial valley floors and prime farmlands will have an important bearing upon the ability of our farming communities to continue over the years to produce the quantity of food demanded by domestic and foreign markets. The conference report does not impose a ban on surface mining in these critical areas but rather requires a case-by-case judgment by the regulatory authority as to whether soil structures and the hydrology can be restored so that the productive capacity of the land will be returned to its pre-mining levels.

(b) The conference report reflects a deep concern with protection of surface owner rights. Instances where federally-owned coal deposits underlie privately-owned surface posed difficult problems which long delayed the conference committee considering H.R. 25 in 1975. The present conference report adopts the House bill which is virtually the same language as that reported by the Senate Energy and Natural Resources Committee in S. 7. For the relatively small number of western ranchers and farmers who are opposed to the leasing of the underlying Federal coal and the disruption of their traditional way of life, the conference report would provide the right to withhold consent and prevent the strip mining of this land.

In instances where the underlying coal deposit is privately owned, the conference report left to existing State law and the jurisdiction of State courts the settlement of questions regarding the surface owner's consent for surface mining.

(c) Another group of citizens who will be seriously affected by this legislation are the small operators. Mine operators whose annual output of coal is less than 100,000 tons often do not have a sufficient profit margin to absorb the costs of environmental protection standards imposed by the bill. The conference report contains relief measures for such small operators, extending the grace period from 9 to 18 months beyond the date of enactment, during which the only interim performance standard applying to their operations would be a prohibition against the placement of spoil on the downslope.

(d) Landowners in mountainous areas have been concerned that where stripmining produces flat land which is useful for residential, industrial or other types of develop-

ment, the steep slope performance standards of the bill would preclude such valuable uses. In recognition of this need, the conference report modifies the standards so as to allow retention of strip mine benches.

However, all highwalls are to be eliminated, except in specific cases approved by the Secretary.

(e) The reclamation of orphan or abandoned mined lands has been a long-neglected problem in many coal-producing States. The role of the State governments and the allocation of funds collected from a special reclamation fee imposed on coal production were matters at issue. The Conference report divides the funds 50–50 between coal-producing States and Indian Tribes on one hand and the Secretary of Interior on the other, specifying that States and tribes are to exercise comparable authority under programs approved by the Secretary.

Mr. President, I mention these issues in order to underscore the conscientious manner in which the Conferees have worked together to produce a fair and equitable conference report. I believe this bill will help to ensure the restoration of environmental quality after mining is completed. It will protect the interests of people in the neighborhood of coal mining operations. It will eliminate the depressing legacy of orphan lands. It will encourage the rational development of the industry.

CAPTIVE NATIONS WEEK: A MOMENT OF REFLECTION

Mr. HEINZ. Mr. President, 1 year after America's 200th July celebration of freedom, it is fitting that we in the Senate should observe Captive Nations Week.

It is fitting, because the basic human freedoms upon which our Nation is founded have been ignored in foreign lands; it is fitting, because imperialism and colonialism still exist; it is fitting, because despite our own freedom, there are millions of people in Europe, Asia, and Africa oppressed by Communist regimes. The period of World War II witnessed the occupation of free Latvia, Lithuania, and Estonia. The Soviet sphere has increased since that time, however, and the peoples of Romania, Czechoslavakia, Hungary, Bulgaria, and Poland all have fallen under Soviet rule. Within the last 2 years, their influence has been felt in lands ranging from Laos to Angola. The Iron Curtain has not been lifted. Indeed, we have no indication that the spread of communism will cease in the immediate future.

It had been our hope that the Helsinki accord would produce some changes in the political climate, but that agreement is now 2 years old and no substantial improvements have been made in the Soviet Union. The Soviet Union continues to deny the basic rights of free speech, assembly, religion, and travel to its "citizens." Russian labor camps in Siberia exist in 1977, and we know from countless cases that have reached the West that the Soviet attitude toward dissidents is harsh and unyielding.

I urge my colleagues to take note of these somber facts. Our democracy cannot remain complacent while repression occurs throughout the world. It is understandable that many Eastern Europeans feel forsaken by the free Western world. For the sake of these oppressed people, and for the protection of our own free Nation, we must continually press for liberty and freedom. I look forward to the day when we shall observe the end of Captive Nations Week—a time when all peoples and all countries shall be free.

CAPTIVE NATIONS WEEK

Mr. McINTYRE. Mr. President, this week marks the 19th annual observance of Captive Nations Week, a time when we traditionally pause to reflect upon the plight of millions of people still living under the yoke of Communist oppression.

Yet despite all the eloquent statements that will be made condemning it, that oppression persists as a grim reality.

We know there is no rational alternative to exploring every feasible and honorable avenue to peace and world stability in the nuclear age. And that includes a willingness to engage in meaningful dialogue with our adversaries in order to defuse potentially explosive situations where our interests conflict, for instance, and to further the cause of arms control.

But even as we pursue these worthy goals, we cannot ignore the plight of those formerly free nations now dominated by the Soviet Union. To do so would affront our very birthright.

Many of us are, after all, people or descendants of people who left their lands of origin to find a haven from oppression in America.

The U.S.S.R. must know full well and at all times our deep concern for the people of the captive nations. And so we must emphasize that concern again and again and again—as much to remind the Soviets that captive peoples are always in our minds and hearts as to reassure the subjugated that we have not forgotten them.

Captive Nations Week is not a pleasant observance. Not for us. Not for the peoples of the captive nations. And, I would hope, not for the Soviets. Nor should it be. I look forward to the day when we will no longer have to hold this observance, that the day may finally come when no nation will be deprived of independence, freedom, and human rights.

UNIONIZATION OF THE MILITARY

Mr. THURMOND. Mr. President, this morning in the Armed Services Committee, we concluded the second day of hearings on unionization of the military. I believe that these hearings will conclusively show that we need legislation now.

A timely article on this issue, Defense Would Suffer From Military Unions, appeared in the State, Columbia, S.C., July 16, 1977. Mr. President, I ask unanimous consent that this article be printed in the RECORD:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DEFENSE WOULD SUFFER FROM MILITARY UNIONS

Amid all the publicity over the B–1 bomber, the cruise missile, the neutron bomb and Strategic Arms Limitation Talks, little public notice has been drawn to another serious consideration of national defense—the threat of unionizing the armed forces.

It seems safe to say, and public opinion surveys bear this out, that the idea of "organizing" the nation's uniformed troops is repugnant to most Americans. Indeed, many union members themselves shy away from the idea.

Nevertheless, there is a serious move under way within organized labor to bring the uniformed services within the union ranks. At the moment, the lead in this potentially crippling movement is being taken by the American Federation of Government Employes. Even now, the AFGE is sampling opinion throughout its numerous locals to determine the prevailing will of the membership. Fortunately for the future of the country, there seems to be no overwhelming support for the concept.

But other labor unions or "associations," some of which already include reservists and National Guardsmen in their civilian capacities, are watching developments with interest.

Professional military men, both active and retired, are aghast at the thought of the disruptions which could be created with the unionization of the armed forces. They likewise are puzzled at the inaction of President Carter, Defense Secretary Harold Brown, and Administration officials who could—and should—act now to forestall any further growth of the union effort within the services.

A number of members of Congress, including South Carolina's Sen. Strom Thurmond, are pressing for legislation which would prohibit in clear and unequivocal language the unionization of the military. The U.S. Constitution and a number of existing federal statutes already give a reasonable basis for banning organizational efforts but not in precise terms.

The U.S. Supreme Court, however, has recognized the unique character of military service and the necessity for discipline therein. Its most recent ruling on the subject phrased that recognition in these words:

"The fundamental necessity for obedience, and the consequent necessity for imposition of discipline, may render permissible within the military that which would be constitutionally impermissible outside it."

It requires no great imagination to envision the utterly chaotic and disastrous results which could occur if the regular chain of command within the armed establishment, or any portion of it, were disrupted by counter-actions—ranging from argumentative resistance to outright strikes—on the part of unionized soldiers, sailors, or airmen.

Day by day, the nation is seeing one example after another in which the public's convenience and occasional safety is flouted by organized labor within the governmental sector. There is little cause to think that unions in uniform would be any less militant.

The armed forces have gone about as far as they can or should go in complying with legislative and executive mandates which erode the fighting fabric of the military. At this stage of the game, the Administration and the Congress should jointly slam the door in the face of union organizers—in or out of uniform.

NEWS REPORT THAT COAL RAISES PUBLIC HEALTH HAZARDS IS BASED ON INACCURATE, PRELIMINARY DATA, SENATOR RANDOLPH FINDS

Mr. RANDOLPH. Mr. President, last Wednesday the Committee on Energy and Natural Resources began marking up the coal conversion legislation as part of President Carter's energy proposals.

In discussing the provisions for converting existing powerplant facilities to coal, a member referred to an article of

July 4 on the front page of the Washington Post. Its headline read: "Premature Deaths Linked to Coal and Oil Burning." The story, by staff writer Thomas O'Toole, said that 21,000 people died prematurely each year east of the Mississippi River because of pollutants exhausted by powerplants burning coal and oil. Citing findings allegedly concluded from a study by the Brookhaven National Laboratory in New York and Carnegie-Mellon University of Pittsburgh, the article warned that conversion to coal to produce electricity would result in as many as 35,000 premature deaths annually from powerplant pollution by the year 2010.

The question was properly raised during the Energy Committee's meeting: "Why has no one bothered to refute these findings?"

Mr. President, I did not accept the figures reported by the Post. Immediately after it appeared, I asked officials of the Energy Research and Development Administration to arrange a meeting with me and the Brookhaven researchers, with representatives of the President's Energy Policy and Planning Office.

On Friday, July 8, we received a briefing on the preliminary results of the Brookhaven study, which is still underway. I asked for a report on the methodology applied to obtain estimates of the energy impacts of the national energy plan. This report was delivered on Tuesday, July 12, and promptly delivered to the news media. I regret that our efforts to convey this information did not result in local media attention. I fear that the 35,000 mortality figure, which is subject to wide variance with the final impact results, will be "set in concrete" unless it is publicly questioned.

For this reason, I ask unanimous consent that the original Post article, together with a press release issued from my office following the July 8 meeting with Brookhaven officials, and the report from the Office of Energy Policy and Planning, be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, July 4, 1977]

PREMATURE DEATHS LINKED TO COAL AND OIL BURNING

(By Thomas O'Toole)

As many as 21,000 people die prematurely east of the Mississippi River every year because of pollutants exhausted into the air by power plants burning coal and oil.

These people die at least one and as many as 15 years short of their expected lifespans, due mostly to heart and lung failure brought on by chronic respiratory diseases such as bronchitis and emphysema. The lung diseases are believed caused by sulfur dioxide gas and microscopic sulfate particles, combustion products of coal and oil that settle in the lungs of people inhaling them.

These are some of the conclusions of scientists at the Brookhaven National Laboratory in New York and the Carnegie-Mellon University in Pittsburgh, who have been at work for two years on a portion of a still-secret energy study for the National Academy of Sciences.

Financed by a $3 million grant from the Energy Research and Development Administration, the study was designed to take a long and comprehensive look at the pros and cons of nuclear power and the alternatives to it. The study has involved the work of more than 200 scientists and economists and more than 50 institutions coast-to-coast.

The Brookhaven and Carnegie-Mellon findings warn that if the nation turns to coal as its principal alternate source of electricity, it can expect as many as 35,000 premature deaths by the year 2010 instead of the estimated 21,000 taking place right now. The study predicts the 35,000 deaths from lung disease even if electric power plants install expensive devices to scrub out 80 per cent of the sulfur exhausted by their smokestacks.

One of the most striking findings of the study is that the stack gases exhausted by power plants in the Midwest are roughly 10 times more harmful to people on the East Coast than to Midwesterners living within 50 miles of the power plants.

The main reason is that the tall (up to 900 feet) smokestacks built in the last 10 years to carry air pollutants away from the power plants discharge them so high they're caught by prevailing westerly winds and brought to the East Coast. The study identifies power plants in Ohio, Illinois and western Pennsylvania as polluters of New York and New Jersey.

Another reason is that the sulfur dioxide that makes up most of the sulfur exhaust coming out of the tall stacks stays in the atmosphere a longer time. This gives the sulfur dioxide more opportunity to combine with moisture, aerosols and dust to form sulfates, which scientists now believe are more toxic than the sulfur dioxide.

"When somebody breathes in a sulfate it would be in the form of something like sulfuric acid," Brookhaven's Ronald Meyers said in a telephone interview. "Humans have a chance to exhale the sulfur dioxide gas. Things like sulfuric acid stick to the lungs and cause more damage."

The Brookhaven-Carnegie-Mellon part of the study discusses the pollutants exhausted into the air by 266 power plants in the eastern half of the United States because they burn more sulfur-bearing fuels and because the population is denser than it is in the west.

The study says that the 266 power plants polluted the air in a year as recent as 1973 with 17 million tons of sulfur dioxide. About 75 per cent of the sulfur pollutant came from coal-burning plants, the rest from oil burners. The plants most responsible for the pollution are in Illinois, Indiana, Michigan, Wisconsin and Ohio.

The study emphasizes that its figure of 21,000 premature deaths from sulfur pollutants is nothing more than an estimate. The study says it can only infer that the deaths were due to air pollution and not some unexplained cause.

But scientists involved insist it is the most careful study done so far on the health effects of air pollution. They say they have analyzed death rates and air pollution in more than 100 Eastern U.S. cities where they have identified increases in the death rate with increases in air pollution.

Scientists said they have also monitored weather and wind patterns in the same cities and have shown that increases in death rate came at the same time that winds carried more air pollution to the cities suffering higher death rates.

The study will recommend that if U.S. power plants are ordered to switch to coal, as President Carter has suggested, they be ordered to burn coal with the lowest sulfur content. The study will also recommend that the Environmental Protection Agency insist that all power plants burning coal be equipped with scrubbers to take out at least 80 per cent and as much as 90 per cent of the sulfur before it leaves the smokestack.

"The implications for the increased use of coal are grim," the study states. "We recommend that these implications be viewed and studied at the highest levels of government."

FROM THE OFFICE OF SENATOR JENNINGS RANDOLPH

WASHINGTON.—Senator Jennings Randolph has charged that a premature news report of results of a long-term study of health hazards in burning fossil fuels is "incomplete, inaccurate, and selectively slanted."

Randolph, chairman of the Senate Environment and Public Works Committee, said the conclusions drawn from the study "apparently were leaked by some one involved in the study who seeks to discredit coal and favors greater emphasis on nuclear production of electricity."

The West Virginia senator vigorously supports the Carter energy program's focus on increased utilization of coal. The committee he heads acquired jurisdiction over nuclear regulatory matters in the Congressional reorganization earlier this year.

"Even though the study involves the utilization of all fossil fuels," Randolph commented, "the news reports emphasized only coal as a potential pollution hazard to public health."

He noted further that the study will not be completed for several more months. A summary leaked last week uses as its base, Randolph said, "the worst case of pollution by coal burning." He explained that the study centers on sulfur oxides and sulfates emissions from power plants in the state of Ohio. "Air pollution control requirements in Ohio," he added, "are far below those currently imposed in West Virginia, or under existing Federal law."

Randolph, whose state is a major coal producer, said he feels the preliminary results as reported "are neither scientifically accurate nor environmentally helpful."

One of the keystones of the Carter energy program is the increased use of coal for the production of electricity. His long-range plan involves the doubling of current coal consumption to 1.2 billion tons by 1985, and to 2 billion tons by the year 2000.

Environmental concerns prompted the Energy Research and Development Administration to commission, in 1975, a scientific study of the health impact of burning fossil fuels. The study, being conducted under the auspices of the National Academy of Sciences, receives technical support from Brookhaven National Laboratory, of Upton, New York.

The $3 million study, funded by ERDA, reportedly points to the possibility of increased pollution-related deaths resulting from the increased use of fossil fuels. Stories appearing last week cited a preliminary projection of up to 35,000 annual pollution-related deaths by the year 2010, compared to the present 21,000 deaths attributed to environmental pollution The study covers only the Eastern half of the United States.

"As chairman of the committee concerned with environmental pollution," Randolph said, "I feel these figures—if substantiated by scientific analysis—would have a great bearing on our efforts to effect the Carter energy program and on our upcoming consideration of coal-conversion legislation."

Questioning the projected mortality assumptions, Randolph called a meeting last Friday of Brookhaven officials, ERDA administrators and Administration experts representing energy chief, Dr. James Schlesinger.

"I learned that the projections which were published are premature and inaccurate," Randolph said. "I was told that they are based on existing laws and do not reflect the additional air pollution standards resulting from the Administration's energy proposals." New air quality standards are now being worked out by House-Senate conferees considering the Clean Air Amendments of 1977.

"I believe that the preliminary findings were leaked to the press in an effort to make a convincing case for the proliferation of nuclear power plants," Randolph asserted. "The facts of the complete study will show, I hope, conclusively, that the burning of fossil fuels

can be conducted with greater safety and the protection of public health in the future."

Randolph criticized the preliminary report as being based on an assumption that, by the year 2010, only 80 percent of the airborne pollutants from power plants would be controlled. "Even a 10 percent increase in pollution control efficiency over the next 30 years would reduce the study's assumption on pollution-related mortality to 18,000 annually," the Senator declared. "That's less than two percent of all deaths. Cigarette smoking contributes to 17 percent of all deaths each year."

Randolph also noted that the present mortality rate of pollution-related deaths would continue whether or not utilities burned coal, oil, natural gas, or any fossil fuel. "That is the purpose of our clean air legislation, to insure that whatever fuel is burned we will reduce the hazards to public health," he added.

He announced that a more objective analysis of the ongoing air pollution study can be expected this week, when the Senate Committee on Energy and Natural Resources begins marking up its coal-conversion legislation.

"I can understand the motives of the pronuclear people in leaking a report that is, on its face, highly critical to fossil fuels," said Randolph. "But I think that such a vital subject must be explored on a rational basis, not subject to the emotional slanting of statistics which ignore any pretense of responsible scientific evaluation."

EXECUTIVE OFFICE OF THE PRESIDENT,
ENERGY POLICY AND PLANNING,
Washington, D.C., July 12, 1977.

DEAR SENATOR RANDOLPH: Last Friday, July 8, 1977, you hosted a group from Brookhaven National Laboratory to discuss some preliminary estimates derived from some of Brookhaven's research-in-progress on the health effects attributable to sulfates produced by increased electric generation using fossil fuels. You posed several questions that the Brookhaven analysts promised to analyze and provide answers. The note that they prepared is enclosed.

We are pleased to respond to your request to apply the Brookhaven methodology to estimates of the energy impacts of the National Energy Plan, but I emphasize that the methodology used by the Brookhaven analysts is not necessarily endorsed by this office. There are major uncertainties associated with predicting air quality concentrations of sulfates because neither the chemical interactions in the atmosphere nor the mechanisms for long-range transport of sulfates are well understood. In addition, the damage functions that the Brookhaven analysts used to calculate health impacts from sulfates have been questioned by some authorities. Because of these uncertainties and because the Brookhaven model has not undergone official review, any results from this model should be utilized with extreme care and regarded as preliminary.

Thank you for this opportunity to provide information about Brookhaven's research-in-progress. If I can be of any further assistance, please contact me.

Sincerely,

ALVIN L. ALM.

THE HEALTH COSTS OF POLLUTION FROM FOSSIL FUEL POWER PLANTS [1]

This note responds to inquiries Senator Randolph, Chairman of the Committee on Environment and Public Works, and a joint letter from Senator Henry M. Jackson, Chairman of the Committee on Energy and Natural Resources and Senator Floyd K. Haskell, Chairman of the Subcommittee on Energy Production and Supply. The Senators asked about the work of Brookhaven scientists on the health effects of increased fossil fuel use in electric power generation and particularly about work in progress on the long-range transport of air pollutants and its effect on health. The Senators' inquiries were generated by a July 4, 1977 Washington Post article "Premature Deaths Linked to Coal and Oil Burning," which quoted specific estimates of premature deaths (1 to 15 years earlier than expected) due to atmospheric sulfur pollution from fossil-fuel burning power plants. The Post article was apparently drawn from a preliminary draft working paper on the long-range transport of pollution. This draft was submitted by Brookhaven meteorologists (Meyers) for consideration by the Risk Impact Panel of the National Academy of Sciences—National Research Council Committee on Nuclear and Alternative Energy Sources (the CONARS Study).[2]

Although the Washington Post article made it clear that the draft emphasized that the figures of deaths from pollutants were estimates, it gave no feeling of the uncertainties surrounding the present long-range pollution transport work or the uncertainties in the health damage functions. This left the reader to infer much greater scientific accuracy in the estimates than actually exists. The draft used by the Post has not been released to the public and will not be available until the study is finished and all professional reviews are completed. Until a final version is released, all estimates are subject to change and revision.

This note now addresses four specific questions posed by Senator Randolph.

Q1: If the Brookhaven meteorology model and health effects assessment methods were applied to the National Energy Plan, what would be the impact in 1985?

A: The estimate is that the NEP would reduce the number of premature deaths due to the generation of energy by fossil fuels by about 2,000 persons per year.

The uncertainties associated with these calculations are so large that one must question the significance of any specific number; however, the Brookhaven long-range transport air quality model was used to estimate the health impacts of sulfur air pollution from fossil fueled power plants. The long-range transport air quality model estimates the atmospheric concentration of pollutants. These concentrations are then multiplied by the population exposed and by a dose/response health effects damage function to estimate deaths associated with pollution.

The results of the model calculation for 1975 in the population east of the Mississippi (131 million) were approximately 21,000 deaths. These estimates reflect the number of people that died prematurely due to exposure to air pollutants. Because of uncertainties associated with the model, the actual number could have ranged from 0 to about 50,000.

Using the same methodology, the model predicts approximately the same level of effects associated with the 1985 base case for fossil fuel power plants in this region. This is due to a 10 percent increase in population in 1985 (144 million) that outweighs the projected decrease in SO_2 emissions in this region over 1975–1985. The model projects a decrease of 2,000 deaths under the President's program as compared to the base case in 1985.

Q2: How do the deaths that Brookhaven attributes to using fossil fuels compare to deaths from other causes?

A: Approximately one percent of the population dies each year. Thus, in 1975 there were approximately 1.3 million deaths east of the Mississippi. The premature 21,000 deaths associated with the sulfur air pollutants of fossil fuel power plants would thus have constituted 1.6 percent of total deaths.

The 19,500 deaths associated with sulfur air pollutants from fossil fuel power plants predicted under the President's program would constitute 1.4 percent of the total 1.4 million deaths expected in 1985 in this region. One may compare these figures with the 17 percent of total deaths which are associated with smoking and the 5 percent of total deaths which are a result of car accidents, half of which were due to drunken drivers.

Q3: What difference would it make if oil were burned rather than coal?

A: Substitution of coal for oil would not necessarily increase mortality rates and could conceivably decrease them.

The health effect depends primarily on sulfur dioxide sulfates which are directly related to emissions as determined by the sulfur content of the fuel and control technology. Current standards allow 50 percent more sulfur dioxide emissions from coal than oil for equivalent heat content of the fuel. There is some evidence that oil has a higher rate of primary sulfate emissions from the stack and a higher rate of conversion of sulfur dioxide to sulfate in the plume close to the power plant. Therefore, there is the possibility that for the same sulfur emission rate the oil-fired plant could produce greater effects. It is unclear how much these considerations would affect the results in the long-range transport model. This has yet to be evaluated in the long-range air quality model, and indeed, present lack of understanding of the relevant atmospheric processes precludes this further analysis at this time.

Q4: The "premature death" statistics in the Washington Post article were quite specific. How confident are you that these are accurate predictions of premature deaths due to sulfur pollutants from fossil-fuel power plants?

A: The uncertainties are large. The method for estimating premature deaths assumes a direct relationship between the amount of sulfates in the atmosphere and the number of premature deaths. This is reasonable when one is estimating the effects of small additions in amounts of sulfate to a substantial background level of ambient sulfates.

However, when one is estimating the effects of a large increase in the amount of sulfates in circumstances where this addition is itself a substantial part of the ambient sulfate concentration (as was done in the preliminary working draft for fossil fuel plants in the eastern United States), there is great uncertainty associated with estimates produced by the use of this method.

It is a matter of common sense that the further from the source of pollution, the greater the uncertainty in estimating its effects. But if one addresses oneself to estimates of effects that can be made within a 50 mile radius of a fossil-fuel power plant, there is a 10 percent possibility that the effects may be zero and a similar possibility that they may be as much as five times greater. Obviously, there is an increasing possibility that the effects from a particular source are zero as one goes from distance of 50 to 1,500 miles and a similarly decreas-

[1] Note by L. D. Hamilton, M.D., Ph. D., Biomedical and Environmental Assessment Division, National Center for Analysis of Energy Systems and R. E. Meyers, B.S. Atmospheric Sciences Division, Department of Applied Science, Brookhaven National Laboratory, Upton, New York 11973.

[2] This study was commissioned by ERDA in 1975; its report is expected late this August. The health damage functions used were derived by Brookhaven's health effects assessment group (Hamilton) from reanalysis of epidemiological data published in the open literature. The research on the long-range transport of pollutants has been in progress for about two years and requires several years more work. The assessment of the health effects of alternative energy sources has been in progress for four years, and will be a continuing activity, designed to remove the uncertainties in the assessments as gaps in knowledge are filled and estimates improved.

ing possibility that the health effects are greater than those calculated. Thus, the uncertainties in these numbers are very high. The interrelationship of the health damage function and the long-range transport air quality model in going from individual plant impacts to multistate impacts is under further examination.

PROGRESS IN RURAL HEALTH LEGISLATION

Mr. CLARK. Mr. President, I am pleased to inform my colleagues that there has been substantial progress recently in the efforts to make health services more available for those who live in small towns and rural areas.

On Thursday, July 21, the Senate Finance Health Subcommittee will conduct a hearing on S. 708, a bill that I introduced along with Senator LEAHY and 54 cosponsors. S. 708 would permit medicare reimbursement for primary health services provided by nurse practioners and physician assistants in rural clinic settings.

Yesterday, the House Ways and Means Health Subcommittee marked up H.R. 2504, a bill that is nearly identical to S. 708. Representative DAN ROSTENKOWSKI, the subcommittee chairman and sponsor of H.R. 2504, hopes to report the bill to the full committee before the August recess.

Last March, the Senate Rural Development Subcommittee held a hearing on S. 708, at which we received valuable testimony from individuals and organizations representing a wide range of interests. That hearing has now been published and individual copies are available through written requests to my office or to the Senate Agriculture Committee.

NATIONAL HEALTH CONFERENCE ON HEALTH CARE COSTS

Mr. JAVITS. Mr. President, as many of my colleagues know, an issue of great concern both to Senator KENNEDY and to myself is the rising cost of health care. The problems associated with this issue are highly complex, and, as with most complex issues, the number of questions greatly exceeds the number of answers and solutions. Currently Congress is considering a proposal for hospital cost containment submitted by the administration. While hospital costs are certainly one of the major contributors to the health cost spiral, they are by no means the only contributor. Other factors which play a significant role include third party reimbursement, advancing technology, and a growing pool of health manpower.

In an effort to examine closely both the problem and alternative solutions, Senator KENNEDY and I recently cosponsored a conference with National Journal "Controlling Health Care Costs—A National Leadership Conference." During that conference, Senator KENNEDY addressed the opening general session.

I ask unanimous consent that Senator KENNEDY's remarks before this conference be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

SENATOR KENNEDY'S ADDRESS BEFORE NATIONAL LEADERSHIP CONFERENCE, JUNE 27, 1977

It is a pleasure for me to be here today to keynote this second National Leadership Conference. I am also proud to have the opportunity to cosponsor this conference with my good friend and colleague from New York, Senator Javits. It is probably appropriate that Senator Javits and I sponsor this conference on controlling health care costs, since our two states are most frequently cited as being among the highest cost states in health care in the nation. In Massachusetts we are trying to do something about it with a hospital cost control program that Governor Dukakis believes could serve as a model for the nation. My only concern is that the program seems to be popular with the hospitals. I will let Senator Javits speak for the popularity of the New York cost control program.

"The problems of providing satisfactory medical services to all the people of the United States at a cost which they can meet is a pressing one."

That sentence is fifty years old. I borrowed it from the report of the Committee on the Costs of Medical Care which began its work in 1927, and completed its report in 1932.

The Committee on the Costs of Medical Care was so perceptive that it was half a century ahead of its time.

The Committee, in its five years of pioneering work, documented for the first time, the burden of the costs of medical care on the sick and on the poor. Fifty years later, there are still 20 million Americans without any health insurance coverage. There are another 30 million with such inadequate insurance that it is almost useless when they are faced with major ills and bills.

In its recommendations, the Committee pointed out the way toward a national health program. It emphasized the need for planned regionalization of services. It called for more organized group practice arrangements to provide primary care and specialized therapy. The CCMC provided the data fifty years ago that proved the United States needed national health insurance. Its findings and recommendations are a model for the kind of program which fifty years later we call Health Security. To be sure, we have made some progress over the years—notably Medicare and Medicaid. But the problems have outstripped our solutions and we are farther behind now than we were fifty years ago.

Why has it taken so long for the United States to have action by the Congress on a national health insurance plan? When the data proves over and over again that there are serious inequities in the health care system, why do we wait? The experience of all other developed countries has proven that national health insurance programs provide good quality health care to all citizens within affordable expenditures. Why is the United States such a backward and underdeveloped nation in health care?

Fifty years ago the AMA endorsed the minority report on the costs of medical care. The minority report opposed the recommendations for group practice, government health insurance and most of the rest. For five decades the AMA has fought against national health security. It has fought against health planning. It has fought against HMOs. The AMA has fought any change in the status quo.

In this Congress the AMA is playing the same old cards of opposition and obstruction. But Congress now has a stronger hand. President Carter has committed himself to introducing a national health insurance plan early next year. He has committed himself to a plan that will be universal and mandatory; will provide comprehensive benefits; and will be financed through a combination of payroll and general tax revenues.

Finally we have a President who is committed to the basic principles that the Committee on the Costs of Medical Care formulated fifty years ago.

The time is long overdue for Health Security. I first introduced the Health Security Act, S. 3, in 1970. I have reintroduced it in every Congress since then. Health Security would assure that every resident of the United States would have comprehensive health care benefits. Health Security would make sure that at the stressful time of illness or injury no American would have to face paying exorbitant physician fees or hospital bills out of his pocket. Health Security promises to bring about reform to the system:

So that services are more equitably distributed;

So that costs and expenditures are contained;

So that controls and incentives are introduced into the health care system;

So that alternative systems will be developed to compete with the fee for service and cost-plus models that we now have.

The goals we have are easy to understand:

Health should be a basic right for all Americans, not just an expensive privilege for the few.

We want Health Security for the people of America, just as we established Social Security over forty years ago;

Decent quality health care should be available to all at a cost they can afford to pay; and

No mother should have to ignore her children's health because she cannot pay the cost of the deductible in the insurance policy. No mother should have to face the choice of deciding whether her child is $50 or $100 sick.

We need Health Security today more than ever. Escalating health care costs are eating away at our Gross National Product in an unnatural way. In Canada, the fraction of the GNP which goes to health care has stabilized at 7%. In the United States, we passed the 7% milestone in 1970. Today we have reached 8.6% and we are on our way to double digits if we don't control it. Why can't we control our insatiable system? Because we don't have a national health plan that would permit us to exert the kinds of controls that are necessary. Only with a program like Health Security will we be able to control costs and still achieve equity in access to good quality health care for all.

Health Security is not a revolutionary proposal. It will not scrap all of our existing system or impose an entirely new one. Health Security will build upon what is good at present, and change what doesn't work. It represents neither the purely free market approach which the AMA supports, nor the purely public model of a national health service. Health Security builds on the expertise of both the private and public sectors.

Because Health Security does build on the existing system, it is essential that we try to make the health care system as efficient and effective as possible, even before full implementation of Health Security. We must begin now to reform the controls and incentives in health care. If Health Security were enacted today, its administrator would be faced with an irrational system. A system which reflects the failure of market competition in health care. And in answer to that market failure we have created a system of regulatory chaos. We legislate and regulate with the "Control of the Month." We try out one control. When it doesn't work fast enough, we add another one. Right now, in varying stages of development we have:

PSRO's.
HMO's.
HSA's.
Certificate of need.
Rate review.
Prospective reimbursement.

Fee schedules.
Cost sharing.
Surgical consultant requirements.
Prior authorization.
Pre-admission review.
Concurrent review.
Fraud control.
Etc., Etc., Etc.

The regulation is piecemeal, fragmented, and conflicting. Health Security could bring order to that chaos.

Without Health Security we have this situation because health care is an appendage to every department of government. Health care is part of income maintenance programs: it is part of jobs programs: it is part of employee benefits programs. It is appended to housing, to transportation, to defense, to veterans, to education, to commerce, to corrections and every other kind of program. The chief health official of this country—the Assistant Secretary for Health in HEW—has under his jurisdiction less than 15 percent of the Federal health budget; only 5 billion of the 43 billion dollars in the Federal health budget. There is no central health direction. Every department, and every program, tries to control its piece of the health care pie.

Executive disarray is compounded in the States. The States have some rights in this battle with the bulging health care pocketbook. State and local governments pay 13 percent of the total health care bill. They also have major regulatory responsibility in professional and facility licensure, regulation of health insurance, and in carrying out Federal regulation.

On the Congressional side, the fragmentation is just as bad. Almost every committee of Congress has some concern with health care reflecting the fact that health care concerns permeate the entire Federal Government. But it is the Finance Committees of both Houses of Congress that are making decisions on controls and these decisions frequently conflict with those of the Health Committee.

And so we have this "Control of the Month" approach. Each Congressional committee wants to make its mark. The States don't want to give all their powers to the Federal Government. We have so confused our health care centipede that its feet are no longer synchronized.

And what evidence do we have about how well all this regulation is working? The evidence is not very encouraging. HMOs work well to hold down costs, but there are not enough HMOs around. There is some evidence that PSROs, under the control of doctors, may not be very cost effective. Health planning and certificate of need have not been administered with enough clout to close down unneeded beds. Reimbursement policies have led us to the current inflation.

Most importantly, we have very little evidence regarding how these controls work in concert or in conflict. How do the cost controls impact on quality; and in turn how do the quality controls impact on access to services and costs?

How do we change this system in order to get ready for Health Security? Obviously some reform of the executive agencies as well as Congressional committee jurisdiction is needed. My colleagues and I will work on the latter. President Carter has promised to deal with the former.

In addition, through my chairmanship of the Subcommittee on Health and Scientific Research, I will not only work toward National Health Security, but also toward reform of the systems of controls and incentives in health care.

President Carter has proposed a transitional hospital cost containment plan, which I introduced with some reservations in April. It is a step in the right direction, but we cannot lose sight of our greater goals. We have held extensive hearings on the bill. We have heard the pros and cons. And we have learned a lot about the mysterious workings of a supposedly non-profit industry that has a billion dollars in profits. Something is needed now, and we intend to report a cost control bill to the Senate next month. We are working on that bill right now. Any cost control measure will. like a tourniquet, only slow down the irrational escalation of health care costs. We continue to need more refined and more effective means to restructure the health care system for National Health Security.

We will also, through our Health Subcommitttee, be evaluating the health planning legislation. Health Security would build on the health service areas and agencies. So the health planning process needs to be made a more effective and central mechanism. The health planning process must not be captured by the providers. The public must be in charge. Health planning also needs the flexibility and authority to experiment with various controls and incentives. The HSAs and the State Health Planning Agencies need more clout to control the system.

But regulation of the system should not be used only for control. It should be used to structure a more innovative and competitive health care system. We must build incentives for efficiency which bettter competition in the system could bring about. We are prepared to deal with this dichotomy between regulation and competition. On the one hand, as Chairman of the Subcommittee on Health and Scientific Research, I am proponent of regulatory measures such as health planning.

On the other hand, as Chairman of the Subcommittee on Anti-Trust and Monopoly, I am a proponent of the competitive model. Some might suggest this creates ambivalence. I believe it offers an important opportunity. For with these two jurisdictions, we intend to examine some of the basic and sensitive issues in the interplay between regulation and competition. We are currently formulating our agenda for the fall. I would like to expose to you today where I am coming from on some of these issues, and some of the areas we intend to explore. I welcome your assistance over the next few months as we bring our agenda into final focus.

I start from the belief that health care is not like most other industries where free market competition operates. The consumer is not, and cannot be, fully informed. Risk of illness is randomly distributed, and risk of the cost of health care is not uniformly borne by the population. The economic injunction that more is better does not work well in health care: more may be detrimental to health. Too many surgeons in an area, competing with each other, produce more and more surgery and higher and higher fees, not lower ones. Too many hospital beds in a community means too much hospitalization, not lower hospital rates. Too many insurance companies in an area mean not better competition with premium prices, but higher premiums because no one insurer can control the costs of the system.

We can and will promote better and more informed competition among organized health care systems, such as HMOs. Despite the continuing opposition of the organized medical profession, we intend, with the Administration, to continue strong and expanded support for HMO development. HMOs are no longer experiments, they are proven competitive alternatives to fee-for-service. We probably need to ease the regulatory burdens on them. But open competition without some direction and regulation cannot work. We have seen what the free market response is to more and more health care dollars: the Medicaid mills in New York and the prepaid health plan scandals in California. We need to structure regulation of health care systems to control the fraud, abuse, and other temptations associated with the prospect of prolific profits.

There are several areas where unnecessary restriction appears to stifle desirable competitive forces. It does appear that the professional associates, particularly the AMA and the ADA, have extensive control over entry into their professions. Restrictive licensing laws which prevent full use of paraprofessionals, control of professional school accreditation, control of specialty boards and certification, and restrictions on hospital privileges are among the areas that need to be investigated. Unless some of these practices can be proven as necessary to assure quality of care or patient safety, they may represent unnecessary restrictions on health manpower supply.

While the consumer may never be able to be fully informed about health care and its expected outcomes, that does not imply that the consumer must continue in absolute ignorance. The more information about health, health practices, and health care organization and pricing that the consumer has, the better is she able to make the right choice. To the extent that restrictions on professional advertising prevent that informed consumer, then we should reevaluate such restrictions. Health care appears to be a fertile field for anti-trust activity. The Federal Trade Commission and the Anti-Trust Division in the Department of Justice have recently become active in health care. My committees will work with them and with the Department of HEW in developing a legislative agenda.

The complex interplay between regulation and competition is crucial to the debates on national health insurance. I intend to explore the issues thoroughly in both of my subcommittees and I intend to propose answers. This conference, with its theme of cost control, can help me to structure an agenda of issues. I invite your help and that of others. Are the questions we seek to answer the right ones? Should other questions be posed in addition? We want to ask the right questions so we may formulate the right answers.

The American people will not wait another fifty years before they have Health Security. The American people say month after month—when they answer pollsters, that they want a government sponsored national health plan. They say they want an equitable health care system. They insist on having an accountable health care system. I think we should give it to them in this Congress.

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

Mr. HUMPHREY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification.

The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that several such notifications were received on July 12, 13, and 14, 1977.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room S–116 in the Capitol.

CAPTIVE NATIONS WEEK

Mr. DOLE. Mr. President, I rise to call the attention of my distinguished colleagues in the Senate to an oversight on the part of the White House which has grieved thousands of Americans of Eastern European ancestry who annually observe Captive Nations Week during the third week of July. They are distressed because President Carter has not, as yet, issued a captive nations proclamation recognizing the desires of the enslaved peoples of the world for freedom and independence. Given Mr. Carter's well-known commitment to human rights and the fact that since 1959 every American President has issued an annual captive nations proclamation, this oversight, if not corrected, will take on overtones which could seriously undermine the President's credibility in the human rights arena. To prevent this unfortunate occurrence, I have sent a telegram to President Carter respectfully reminding him of the captive nations tradition and urging him to follow the lead of his distinguished predecessors.

TIME TO REFLECT

The captive nations resolution was signed into law by President Dwight D. Eisenhower on July 17, 1959. Public Law 86–90 authorizes and requests the President of the United States to issue an annual proclamation during the third week of July "until such time as freedom and independence shall have been achieved for all the captive nations of the world." Given the current state of affairs in the Soviet Union and the fact that the Belgrade preparatory meeting is still in progress, I can think of no more propitious time to pause and to reflect on the fate which has befallen the millions of people who presently live under Communist domination.

SOVIET IMPERIALISM

The first to fall under Communist rule were the Russians. Believing that their revolution in 1917 would lead to a more just society, the Russian people soon learned that under the Bolsheviks they had replaced one form of autocratic rule with another.

The next nation to fall to the Communists was Ukraine, followed by Armenia, Azerbaijan, Byelorussia, Cossackia, Georgia, Idel-Ural, North Caucasia, Turkestan, and Mongolia.

The 1920's witnessed the formation of the Union of Soviet Socialist Republics and the beginning of a new brand of Russian imperialism based on ruthless repression of individual, religious, and national rights. By the end of the 1930's, a new instrument of totalitarian domination, the Gulag Archipelago, had been perfected at the cost of millions of innocent lives.

In 1940, Estonia, Latvia, and Lithuania were invaded by the Soviet Union soon after Stalin and Hitler reached an understanding concerning spheres of influence in Eastern Europe. The United States has never recognized the forced Soviet incorporation of the Baltic republics which followed the invasion.

During World War II, Soviet armies "liberated" Albania, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, Romania, and Yugoslavia and then proceeded to force a Communist regime on the helpless citizenry.

Since the war, 10 more nations—North Korea, mainland China, Tibet, North Vietnam, Cuba, Cambodia, South Vietnam, Laos, Cambodia, and Angola—have come under Communist domination.

RESISTANCE STILL ALIVE

And yet, despite years of subjugation and of having to face the threat of summary execution, torture, imprisonment, exile, and other forms of inhumane repression, the people who live under Communist domination have not accepted their fate meekly. Time and time again—from East Germany in 1953, Poland and Hungary in 1956, to Czechoslovakia in 1968—they have demonstrated courage and tenacity in their efforts to free themselves of their Communist yoke.

New hope was provided by the Helsinki Final Act in 1975, a document which President Gerald R. Ford called a great moral victory for the West. Heartened by the fact that the free world had not forsaken them, dissidents and reformers in the Soviet Union formed Helsinki Watch Committees in Moscow, Kiev, Vilnius, and Tbilisi. In Czechoslovakia, meanwhile, a new human rights document, Charter 77, was promulgated. Supported by all elements of the national population, Charter 77 called for sweeping reforms and the liberalization of the Communist state.

We are all too aware of the response of the Communist leaders. Adding to their long list of Helsinki Final Act violations, the Soviets arrested Yuri Orlov and Anatole Scharansky, leaders of the Moscow Helsinki group and charged them with treason. Zviad Gamasahhourdia, Merab Kostova and Victor Ryshiladze, founders of the Georgian branch of the group, were arrested and interrogated in Tbilisi. The most brutal treatment, however, was reserved for the founding members of the Ukrainian group in Kiev. Mykola Rudenko and Oleskij Tykhiu were arrested, tried, and sentenced to hard labor for their attempts to monitor compliance with the Helsinki Final Act in Ukraine. In Czechoslovakia, Dr. Ian Patocka, one of the original signers of Charter 77, was interrogated for 11 hours. Unable to survive his ordeal because of fragile health, Dr. Patocka died a few days later.

AMERICAN FREEDOM

Living in America, we tend to take for granted the freedom and liberties which are such an integral part of our lives. We can easily overlook the indomitable spirit of the dissidents and the countless prisoners of conscience, individuals such as Mati Kiirends in Estonia, Andrejs Macepans in Latvia, Nijole Saudunaite in Lithuania, Valentyn Moroz in Ukraine, and many others who continue to languish in the Gulag because of the dedication to human, religious, and national rights.

A major tenet of our American political heritage has always been the premise that governments are constituted to serve the people. A major principle of Marxist political theory has been that man is the servant of the state. It is during Captive Nations Week that we are reminded of the irreconcilable differences which exist between these two political ideologies. While seeking cooperation and understanding with the Soviets and other Communist nations, we must never be lulled into the facile assumption that our objectives and theirs have somehow coalesced.

During this, the 19th annual observance of Captive Nations Week, let us recall with pride our precious American heritage. Let us rededicate ourselves to its preservation. Let us also remember the captive nations. Their desire for liberty and independence is a powerful deterrent to war, and one of the best hopes for a just and lasting peace. It is in the best interests of the United States to vigorously support their just aspirations.

AFTERMATH OF WAR: HUMANITARIAN PROBLEMS IN SOUTHEAST ASIA

Mr. KENNEDY. Mr. President, I want to commend President Carter for his action over the week-end in approving the parole of additional Indochinese refugees into the United States and in establishing an interagency task force within the administration to develop a longer-term approach to the continuing humanitarian problems of Southeast Asia.

As I suggested in a statement on Friday:

Over 7,000 "boat cases" from Vietnam are stranded in various parts of Asia, from Kuwait to Japan—and additional numbers of Indochinese refugees in Thailand, many with strong family or other ties to the United States, are seeking resettlement opportunities in other countries.

The United States carries a major responsibility for helping to resolve the humanitarian problems that remain in the aftermath of the Indochina war. We have already done our best in helping to meet the needs of those refugees evacuated by our country in 1975. But we have continuing humanitarian responsibilities. We cannot ignore the desperate plight of the "boat cases"—nor the resettlement needs among the refugees in Thailand—nor the struggle to normalize life among the war victims who remain in their native lands.

After months of tokenism and delay, we must finally develop a comprehensive approach to the growing humanitarian crisis in Southeast Asia. The needs are there. And the issue today is not the functioning of international programs to help the refugees and the war victims, but whether the United States will abandon a piecemeal approach and contribute its fair share of support.

We can begin by admitting a reasonable number of the refugees scattered in Asia. For this, we do not need special legislation. We do not need international conferences to

sort out the problems and our responsibilities as a nation.

But we do need a sense of urgency and compassion, and an active policy to join France, Australia, West Germany, and other countries in fully supporting the United Nations High Commissioner for Refugees (UNHCR), who first appealed in behalf of the "boat cases" more than a year ago.

Mr. President, the harsh aftermath of the Indochina War is still with us. The humanitarian problems resulting from this war still fester and grow. These problems very much involve the United States. And they not only touch the lives of countless families in Southeast Asia, but many families in our own country as well.

These humanitarian problems are not new. In some degree, most of them have been there since the end of the war more than 2 years ago. What is new, is that some of these problems are continuing to grow, and as time moves on, they are getting more difficult to resolve.

Mr. President, I would like to review just a few of these problems.

One of the more immediate and pressing problems—and a problem that has been generating much discussion in this country in recent days—involves the growing number of Vietnamese citizens who, for a variety of reasons, have been moving by boat from their native land in search of resettlement opportunities in other countries.

This is not a new problem. It began in the closing months of 1975. Initially, the number of "boat cases" was relatively small, and no major difficulties confronted the international community in protecting the rights and meeting the needs of these refugees. But as the months wore on and the number of boat cases rapidly grew, so did the difficulties. More and more, boatloads of refugees were being ignored at sea. More and more, Asian governments were refusing safe haven to the refugees and forcing boatloads of homeless people back to the open sea. Countless refugees were losing their lives. And resettlement opportunities for those in safe havens were suddenly in short supply.

The boat cases, like all other Indochinese displaced persons, are covered by the mandate of the United Nations High Commissioner for Refugees, Sadruddin Aga Khan. In full recognition of the growing difficulties, and with the initial humanitarian goal of promoting temporary safe havens and of insuring the protection and care of the homeless people involved, the UNHCR began appealing to the flagships of many nations and to the governments of many Asian countries in behalf of the refugees. And finally on July 28, 1976, he also found it necessary to issue his first international appeal for permanent resettlement opportunities for the boat cases from Vietnam. And over the past year he has appealed again and again—most recently in Geneva just a few days ago.

The record is clear that, despite the efforts of the UNHCR over the past year and more, governments have not fully supported the work of his office and have been slow in responding to his appeals for help. And so today temporary safe haven in Asian countries is still not guaranteed. And resettlement opportunities for the boat cases are needed more today than even before.

For Americans, at least, the problems confronting the UNHCR are best illustrated, perhaps, by the simple fact that the United States, which carries a major responsibility for helping to resolve the humanitarian problems in the aftermath of the war, did not respond to the UNHCR's July 1976 appeal until December of last year. And it was only in the spring of this year—after mounting public pressure and inexcusable bureaucratic delay—that boat cases began arriving for resettlement in the United States.

According to the Department of State, as of June 30, some 10,451 boat cases had registered with the UNHCR. Of this number only 3,330 cases had been permanently resettled, including 658 in the United States. Some 1,103 had gone to France, 792 to Australia, 201 to Canada, 126 to West Germany, and smaller numbers to several other countries. More than 7,100 cases remained in temporary safe havens in Asia, scattered from Kuwait to Japan, and reports suggest that the numbers are continuing to grow.

Mr. President, in addition to the desperate plight of the boat cases from Vietnam, some 80,000 Indochinese displaced persons are in Thailand. The bulk of these people—more than 67,500—are from Laos. Nearly 11,000 more are from Kampuchea. And the remainder—little more than 1,300—are from Vietnam. There has been a continuing influx into Thailand, mainly from Laos, since 1975. And because of this, the number of displaced persons has remained relatively constant, despite the onward movement of more than 50,000 refugees over the past 2 years.

Like the boat cases, the refugees in Thailand are under the mandate of the UNHCR. In cooperation with the Thai Government, since 1975 the UNHCR has been the channel and coordinator for all international relief and rehabilitation efforts in their behalf. The United States has been fully supportive of these efforts, contributing up to 80 percent of the UNHCR budget in Thailand.

In the early days of his program, the UNHCR said its purpose "is not only to provide temporary assistance to the displaced persons to insure their survival, but above all to contribute toward the promotion of lasting solutions to their problems including voluntary repatriation and resettlement."

In terms of the resettlement objective, Mr. President, the bulk of the refugees will undoubtedly remain in Thailand, and important steps are being taken by the Thai Government, the UNHCR, and other international agencies to help normalize the lives of the refugee families. Several private voluntary agencies, including many from the United States, have also been involved in helping the refugees, and I want to pay a special tribute to the field personnel of these voluntary agencies for their important humanitarian work.

Despite the resettlement process underway in Thailand, the Thai Government continues to look to other countries for help in resettling some of the refugees. And many of the refugees themselves—for family reunion and other personal reasons—wish to resettle elsewhere. As noted earlier, since 1975 more than 50,000 have moved from Thailand, over half of them to France. And others are waiting to move, including a few thousand families with relatives in the United States.

Mr. President, President Carter's action a couple of days ago offers new hope to these homeless people and to some of the boat cases from Vietnam. The President's action deserves the full support of Congress and the American people. And I am hopeful that after early consultations with Congress, the new resettlement program will get expeditiously underway in cooperation with other governments, the UNHCR, the Intergovernmental Committee for European Migration, ICEM, and the private voluntary agencies in this country.

And finally, even as America is pledging more help to Indochinese refugees, we must not forget the needs of the war victims who remain in their native land. Many humanitarian problems—including food shortages, the resettlement of displaced persons and the rehabilitation of other war victims—continue in Vietnam, for example. We must be mindful of such problems and of our responsibilities as a Nation in helping the people of Vietnam to rebuild their country and normalize their lives. And we must also be mindful of other human problems which touch the lives of many Americans, including the missing in action problems and the difficulties confronting families separated by the events of March and April 1975.

I am disturbed by some of the views recently expressed in Congress over the President's policy to work for a solution to such problems and for a normalization of relations with Vietnam. And I share the hope of many Americans that new ways can be found to help meet our responsibilities; for it serves no useful purpose to neglect the Indochina Peninsula and to remain aloof from the concern of the international community over the future of Vietnam and its neighbors.

Mr. President, little more than a year ago, I released an extensive report on "Humanitarian Problems of Southeast Asia," which was prepared by the Subcommittee on Refugees. As I noted in the report, America was welcoming many refugees to our shores, but in doing so we could not forget the needs of war victims who remained in Southeast Asia. I suggested then that the United States, having contributed so heavily to the years of war, could not fail to pursue policies and programs that would contribute to the peace. Hopefully, we will really work to accomplish this goal—in part, at least, by making every reasonable effort to help heal the wounds of conflict and ameliorate the continuing humanitarian problems in the aftermath of the Indochina war.

Mr. President, I ask unanimous consent to have printed in the RECORD the full text of a letter I addressed to President Carter on July 1, and a series of

tables on the refugee problem in Southeast Asia.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
July 1, 1977.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am writing to let you know of my full support for the pending proposal to parole into the United States a reasonable number of Vietnamese refugees scattered throughout Asia and displaced persons from Vietnam, Laos, and Kampuchea in Thailand.

Given the growing number of these homeless people and the demonstrated need to maintain some flexibility in meeting our humanitarian responsibilities toward them, I also wanted to recommend that the Attorney General be able to exercise his parole authority on a continuing basis over the coming months and without a specified ceiling on the number of entries into the United States. Hopefully, as well, the United States will work more closely with the United Nations High Commissioner for Refugees (UNHCR) and the Intergovernmental Committee for European Migration to promote resettlement opportunities in other countries, and will continue to support the material assistance and rehabilitation program of the UNHCR among the displaced persons who remain in Thailand.

In a related matter, I fully support your efforts to pursue a policy of reconciliation and normalization of relations with Vietnam, and commend you for the initial progress that has been made in recent weeks and months. I share the hope of many Americans that this process will continue, and that ways can be found to permit the United States to contribute at an early date to the international humanitarian programs underway in the war-affected areas of Vietnam. Of special concern, in this regard, are the severe food shortages reported by the United Nations.

It would be in the finest humanitarian tradition of the American people if our country could provide food assistance to the people of Vietnam under United Nations auspices. I would be pleased to work with you and your Administration to find ways to accomplish this humanitarian objective, which would also contribute to the process of reconciliation and normalization of relations with Vietnam.

As Chairman of the Subcommittee on Refugees in recent years, I have closely followed the humanitarian problems of the Indochina Peninsula, including those in the aftermath of the war. And I am extremely hopeful that in cooperation with international organizations and other countries, the United States will respond generously and compassionately to these pressing human needs in Southeast Asia.

Many thanks for your consideration, Mr. President, and best wishes.

Sincerely,

EDWARD M. KENNEDY.

HERBERT W. JOHNSON

Mr. HELMS. Mr. President, it is with deep regret that we note the passing of Mr. Herbert W. Johnson, Regional Director of the Veterans' Administration in Winston-Salem, N.C., on July 6, 1977.

Herb Johnson served in that position for many years, and was highly regarded by all who dealt with him. He was one of the most competent and professional individuals in the Federal service, and was completely dedicated to his work and to the veterans he served. No matter how difficult the details of a particular case may have been, Herb Johnson tackled it with enthusiasm and with the conviction that if there were any way at all to provide satisfaction to the veteran he would do it. He showed the same compassion and understanding to even the most "routine" cases, and was always immediately responsive to any and every request for information and assistance.

Herb Johnson set an example of personal conduct and professional dedication that every one of us can look to for inspiration. I pay my respects to his memory in appreciation for his always cheerful helpfulness and for his years of service to the citizens of North Carolina.

EXTENSIONS OF REMARKS

WASHINGTON STAR LAUDS GEORGE MAHON

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. PICKLE. Mr. Speaker, with the recent announcement by Representative GEORGE MAHON that he will not seek reelection to the 96th Congress, this Nation has to feel a genuine sense of loss.

There will be another time when the Members of this body will have a chance to salute this courageous patriot who has worked selflessly for his country and his State for more than a half-century but I would like to insert an editorial from the Washington Star, July 16, 1977, edition, which properly hails the Dean of the Congress. There has never been a more honorable or more respected Member of Congress than GEORGE MAHON. He is Gentleman GEORGE, the very symbol of dignified and effective public servant in the Congress.

The editorial follows:

SALUTE TO MAHON

Forty-four years is a long time for a man to serve in Congress. Long enough to achieve great power, and long enough, certainly, to get into trouble over the use of power.

The achievement of George Herman Mahon of Texas was to do the one without the other. Dean of the House of Representatives by virtue of a tenure longer than anybody else's, he has a remarkably unblemished reputation to go with the 44 years of service he will leave behind him when he goes home at the end of his present term, with no plans for running for office again. The money, the women, the drink and the intemperances of empire-building that have tarnished so many careers seem to have been resistible temptations for one congressman, anyway.

Rep. Mahon became a member of the House Appropriations Committee when, as a young county attorney, he was elected to Congress for the first time in 1934—the first representative of a new district taking in 25 West Texas counties. That it took so much territory to make a congressional district tells something about the district. Very few people because the farming is so hard and most of the oil is somewhere else. It's the part of Texas where they make an art form of jokes about how long it's been since it rained.

The South was still solid for Democrats back in the Thirties when Rep. Mahon first came to Washington, and the farmers of his district were poor enough to respond to the overtones of FDR's campaigns. Rep. Mahon was one of the young Democrats fired by the New Deal vision, but it never made either a statist or a tax-and-tax-and-spend-and-spend manipulator out of him.

Through the years that brought him to the chairmanship of the Appropriations committee in 1964, making him the second or third most powerful member of the House, he was stalwart against all the fiscal ingenuities of big spenders bent on taking more out of the Treasury than went in. Yet his was the kind of conservatism that took military needs very seriously. Nobody ever accused this congressman of being in an aircraft company's pocket, but they did call him Mr. Defense for the sharp eye he always kept on American strength against threats from abroad.

That sharp, defensive eye was always alert to threats of White House encroachment on the powers of the Congress, too. The executive impulse to get away from congressional scrutiny was forever producing legislative packages that would leave most of the real decision-making to administrators. Rep. Mahon always noticed and often succeeded in reclaiming areas of power for the elected branch.

He has been as abstemious of power as of the other Washington intoxicants, however. Even Ralph Nader has no fault to find with his leadership in a role where making enemies is as easy as giving in to corruptions. The dignities of the American system are the larger for those George Herman Mahon has brought to the House.

RIPPING OFF THE POOR

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. STOKES. Mr. Speaker, I am certain that you and my colleagues in the House have read the recent newspaper accounts of deception and and collusion in the application process of SBA minority business loans. Millions of dollars have gone to white and other nonminority companies who have deceptively coerced blacks to "front" for them in order to qualify for funds.

Noted syndicated columnist Carl T. Rowan has written a hard-hitting editorial on this fraudulent practice. Mr. Speaker, I only hope that the administration will take notice and institute measures to correct these abuses. Legitimate minority businesses deserve all the financial help they can get.

At this time, Mr. Speaker, I would like to submit to the RECORD Carl Rowan's editorial which appeared in the Sunday edition of the Cleveland Plain Dealer, July 10, 1977:

NEW AREA IN GYPPING THE POOR

(By Carl T. Rowan)

WASHINGTON.—Here we go again with another chapter of that continuing American saga of ripping off poor people.

This time it's Sen. Lawton Chiles Jr., D-Fla., and his Senate federal spending subcommittee telling us how white entrepreneurs, aided by some black fast-buck stooges, have drained millions out of a Small Business Administration (SBA) program created to assist the "economically and socially disadvantaged."

This SBA mess involves shameful collusion by top officials of the Nixon White House, conflicts of interest by public officials who should have known better.

The SBA venture was laudably intended. Richard Nixon said often that he would give black Americans "a piece of the action." So he allocated hundreds of millions of dollars to SBA programs that were supposed to give black-run and other minority businesses a chance to get government contracts, to gain the experience and expertise that would enable them to become stable parts of our free enterprise system.

Well, what happened? Several white hustlers rushed to the White House to argue: "Hey, man, this business of giving special business breaks to minorities is reverse discrimination. They gonna run me out of business."

The "entrepreneurs" came from a host of white firms across the land which were raking in money with lucrative food service arrangements on military bases and other federal installations.

Someone in the White House put it bluntly to the white hustlers: "President Nixon is supporting this program, so don't knock it, join it. Get yourself a black front man and lap up some of this gravy."

They got some pretty good front men. Robert J. Brown was Nixon's black man in the White House, earning a top-level salary of $36,000 a year. Somehow Brown was certified as "disadvantaged," and wound up as a "partner" of a white entrepreneur, Happy Franklin, in a deal at a military base in California.

Franklin reportedly reaped some $90,000 from this tidy arrangement. We may never know how much Brown got because, for reasons I don't understand, the Chiles subcommittee declined to force him to testify.

One black "front man" who did talk (the subcommittee kept him hidden for days, but I managed to reach him) is Joseph Harris of Richmond, Va.

Harris merely went to his tire dealer, John Williams, to get his tires changed some five years ago. Williams and his brother, Louis, a doctor and prominent GOP figure, allegedly talked Harris into becoming president and a stockholder in a sand and gravel operation that they called Atlantic Materials, Inc.

With Harris out front, Senate probers say, the group went to Thomas F. Regan, the Richmond district SBA director, and got a $350,000 loan. (Regan is now in federal prison serving a nine-year term for establishing dummy corporations to receive SBA loans.) There is as yet no charge that Regan did anything illegal in the case of Harris and Atlantic Materials.

I can't attest to the merits of Harris case, which he is pursuing in the courts. But this situation does portray SBA at its worst. So I ask:

Why do we let history repeat itself, over and over, where these programs for the poor are abused? Why do we flagellate ourselves with these repeated congressional "revelations" of money-grubbers stealing housing dollars, pocketing education funds, engaging in Medicaid graft, stealing food stamp funds—with only a stupid few ever jailed?

Let's put some of these exploiters of the poor—and programs to aid them—in prison. Then maybe we can get away from this centuries-old tragedy where them as has gets, and them as has not begets.

JOE KAPPLER: A CHAMPION FOR SENIOR CITIZENS

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. BONKER. Mr. Speaker, the work of Mr. Joe Kappler from Washington State deserves acclaim, and my appreciation for what he has done for senior citizens of our country is but one voice among many heralding his work.

Mr. Kappler became disabled in 1968. Rather than bemoan his own handicap, he used his newfound time to make improving the plight of elderly Americans his personal crusade. He has been successful in contributing to the happiness and respect of many senior citizens.

Some years ago, he requested that each Governor invite "forgotten senior citizens to share in their Thanksgiving festivities." As he said, a family dinner that is "plain, but willingly shared . . . gives our whole family sheer enjoyment. Loneliness is sad, at best, but there is nothing sadder than to see someone who is almost at life's end with no one on Earth to care about them."

One of those who applied his suggestion was a southern Governor named Jimmy Carter.

The list of elderly activities that Mr. Kappler is involved in is seemingly endless. One of the most inspiring to many elderly is the Joe Kappler Senior Citizen Hall of Fame. Mr. Kappler has honored many Americans by awarding them a place in the hall of fame. He selects those Americans who have made outstanding contributions for senior citizens through legislative or civic work and bestows each recipient with a certificate. He makes the awards "in recognition of outstanding work performed that makes life more meaningful for our elderly citizens." Their photographs are placed in the hall of fame in Everett, Wash., alongside renowned men and women, such as Governors and State legislators as as well as those Americans who have quietly made significant contributions to the elderly in their own localities.

Joe Kappler also keeps abreast of national and State legislation regarding the elderly and, in this way, serves as a liaison between the legislature and senior citizens. He regularly enlists the participation of senior citizens in lawmaking through his mailing list of over 1,000 recipients. Using this medium of exchange, he manages to inform and encourage the elderly.

Mr. Kappler's work should encourage us all to keep ever mindful of the outstanding contributions each senior citizen can make. In this time of renewed interest in our "roots," let us seek our heritage first from the treasure trove of each elderly American. As we seek answers about life, as we strive to be happier, more caring human beings, what better way to learn than to tap the wellspring of knowledge of those who have already spent a lifetime at it.

As Joe Kappler puts it, "There's an old saying that you can't change the world, but if I can do something and you can do something then, bit by bit, the world will change."

EVENTS SHOW IMPORTANCE OF INTERNATIONAL EDUCATION

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. SIMON. Mr. Speaker, it is ironic that we have been cutting back on our exchange programs and have failed to

fund an international education program at a time when it is becoming increasingly apparent that these programs not only are helpful for the cause of humanity, generally, but specifically are helpful for the strategic interests of the United States.

A week ago Sunday the Washington Post contained an article by the highest ranking insider to defect from the Soviet Union in decades, Mr. Boris Rabbot. And in that article, among other things, he says—

> Exchange programs have had a great impact on Soviet academic and cultural life. In Moscow and Leningrad, Soviet academics have been able to meet freely with Western exchange participants, exchange scientific literature and foreign languages and invite foreign colleagues home without fear.

Recently, in a briefing for a number of his colleagues in the House, our Ambassador to the United Nations, Andrew Young, pointed out that there is a substantial residue of goodwill for the United States in the African countries because so many Africans have been educated in the United States.

But in contrast to an increasing world interdependence and in spite of the obvious benefits derived from these exchange programs, our commitment to funding international education programs has never been substantial and is, in fact, declining.

As I noted when the House was considering the Foreign Relations Authorization Act, funding for the Fulbright-Hays exchange program is 30 percent smaller than it was 10 years ago, in terms of constant dollars. And although the 1978 Fulbright authorization was increased somewhat in order to respond to the challenge of our Helsinki agreements, that increase was denied in the appropriations bill.

Similarly, despite their importance to our understanding of other nations and ability to strengthen the ties of international cooperation, both section 603 of title VI of the National Defense Education Act and the International Education Act of 1966 were left unfunded in the HEW appropriation bill. The cost of this neglect in our ability to deal intelligently and sensitively with the rest of the world must be immense. We cannot afford not to fund a greater effort in international education in the future.

CHET HOLIFIELD SPEAKS OUT FOR THE BREEDER—PART I

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. TEAGUE. Mr. Speaker, the Honorable Chet Holifield spent 28 years as a member of the Joint Committee on Atomic Energy. He has had the distinct advantage of being able to assess our present nuclear status in light of its entire historical perspective. His intimate knowledge of this Nation's nuclear metamorphosis makes his judgment on nuclear issues most valuable. Whereas the debate over proliferation of nuclear weapons and the ultimate necessity and value of the breeder are current concerns for most of us, Chet Holifield has been involved with these issues from their inception, long before they were debated in the public arena.

In a speech this June, Mr. Holifield assessed the recent shift in our nuclear policy and its ramifications.

I wish to share his thoughts with you.

Due to the length of the speech it will appear in the RECORD in two parts:

ENERGY—A WORLD WIDE DEFICIT PROBLEM

Mr. Chairman, Friends, I am indeed honored by your invitation to speak to you today. As a layman with no scientific or engineering degrees, I do not feel qualified to discuss the intricacies of those disciplines.

My remarks therefore will be based on twenty eight years of experience in the Joint Committee on Atomic Energy. That committee, by the way, happened to be the first congressional committee charged with legislative and oversight responsibilities in evaluating scientific and engineering research and development projects which built our massive atomic capability.

I will discuss the background of our congressional effort and try to analyze the importance of our accomplishments, particularly in the energy programs and the impact which President Carter's decision to terminate the liquid metal fast breeder program will have on our economic and political system.

The energy fuel deficit is world wide, with only a few national exceptions. These exceptions are mainly the OPEC countries of the Middle East, the Soviet Union and minor oil production areas in South America, Indonesia and Algeria.

The impact of the energy fuel deficit has more effect in the industrially developed nations, because their economics have a higher standard of living, which has been built on a greater per capita use of fossil fuels.

The complex mass production, mass consumption societies are finding their fiscal, social and political structures threatened because:

1. They do not possess indigenous fossil fuels for their energy sources, or

2. They no longer can afford the financial drain on their fiscal resources due to the unparalleled rise in the cost of imported oil and gas.

It is true that a few of the industrially developed countries have some indigenous supplies of coal, oil or gas. These countries may be in a better position to postpone an early collapse of their economic, social and political structures, but they can take small comfort in their present relatively better position. They too are facing a dangerous future. They can compute with fair accuracy the time when they too will face collapse.

Each nation faces a different set of problems which will determine their duration—their national destiny.

Every developed or developing nation, which is short of fossil fuels, is now competing for the energy fuels of the oil and gas producing nations. There is no stability to the present or future price level which may be exacted, nor can any of the buying nations predict the future degree of supply availability.

When human beings become desperate they are prone to use desperate measures to protect and prolong their natural lives.

History records that when nations become desperate, they too take desperate actions to protect their national survival—their national destiny.

We know that the great wars of the past were basically caused by the ambitions of men fired with dreams of conquest of lands, trade routes, slaves and accumulated wealth.

We may try to quiet our fears, we may try to erase from our minds the lessons of history——

But have the human elements of avarice—of hatred or of madness inspired by desperate conditions based on real or fancied dangers, suddenly changed?

Frankly I doubt that such a change has occurred. Therefore I am deeply concerned. The international deficit in energy fuel sources can not be solved on a national basis.

No nation, regardless of its indigenous fuel resources can control the powerful forces which will be set in motion by man's failure to realize that all nations are involved.

No nation can safely hoard its fuel resources and preserve its national perpetuity as an island of safety, while other nations perish.

No nation can use its relative position of advantage to dictate to less fortunate nations terms of international conduct, nor can it impose on a weaker nation fiscal policies that are unrealistic or unbearable.

It was in my third year in Congress serving as a member of the House Committee on Military Affairs, when we entered the atomic age. In that fateful year of 1945, mankind stood paralyzed before the mushroom clouds that rose over the Japanese cities of Hiroshima and Nagasaki.

Fate threw me into man's first legislative efforts to control and direct the newest, most powerful, most concentrated source of energy ever discovered and used by man.

The fission of the atom!!!

In the House Committee on Military Affairs we received the first draft of legislation from Secretary of War Robert Patterson—the May-Johnson bill. That bill provided for military control of the atom. It failed completely to grasp the promise of the atom.

I wrote the dissenting report and Congressman Mel Price and I were the only two members of the committee who signed it.

Months later the McMahon bill was passed in the Senate and in the House providing for civilian control and for the correction of many of the defects in the original May-Johnson bill, as defined in our dissenting report.

I served on the Joint Committee of the House and Senate from its establishment in 1946 to the time of my retirement on December 30, 1974—twenty eight years.

During those three decades the United States worked very energetically, first—to develop the strongest atomic weapon inventory in the world.

Second, to develop over 2,000 peacetime applications of atomic energy. Great Britain, France, the Soviet Union and India also achieved atomic weapons.

It is a true statement to say that the combined total of atomic weapons owned by the nuclear weapon nations could, if used, destroy the world's great cities and most of the billions of people that live on our small planet.

It is because of this true statement that the nations of the world can no longer resort to world wars to settle their international differences. Self survival is the strongest instinct in the human being.

We must therefore abandon war between nations. We must co-operate in the solution of global problems in order to insure mutual survival.

The world's greatest problem today and in the coming three decades is to develop every source of energy possible. Concurrently the nations of the world must develop fair sharing procedures. I know this seems to most of us an impossible goal—until we consider any alternate policy.

I said "every source of energy possible." There is a vital need for every source. Coal, oil, gas, nuclear, solar, geo-thermal, wind,

tides, human and animal, fusion, etc., etc., certainly the elimination of energy waste has an important part in the picture of wisely using such energy as may be available. We can not rule out or delay the development of any form or source of energy regardless of the technical problems if the cost is justifiable.

We can not foreclose or delay the use of plutonium in any feasible mixture that will increase the use of uranium 238 or uranium 235 or energize fertile elements such as thorium.

Of course there is an ever present danger of the proliferation of nuclear weapons. The genie can not be put back into the bottle. We have known that since it was first released.

The primary challenge that faces the world's people is the attainment of enough energy to preserve the lives of an exploding birthrate that could double the world's population in a few decades. If we can do this seemingly impossible task of increasing energy supply, surely we can, thru co-operation, develop international safe guards against the misuse of any energy source fuel we can develop.

There were those who said we would never consumate an international treaty to diminish the spread of radioactivity from weapon testing, but we did develop the nuclear test ban treaty. We developed under United States leadership the international agency on atomic energy.

We developed the non proliferation treaty.

None of these international organizations are perfect—but they have been valuable devices to obtain a measure of stability in a rather unstable world.

I believe that we all appreciate that the national leadership of the United States is important to achieving stability in the world. We can not provide that leadership without wisdom and humility. We must have the respect and the co-operation of most of the other great nations in the world to achieve such a goal.

I have no desire to criticize our President. In my thirty two years in Congress I served under seven Presidents. Roosevelt, Truman, Eisenhower, Kennedy, Johnson, Nixon and Ford. I never felt it necessary to indulge in carping criticism or bitter personal remarks about any of those distinguished men. I never agreed 100 percent with their actions or philosophies.

But I was ever conscious of the tremendous responsibilities which rested upon them every minute of their terms of service.

I believe that President Carter is a man of honor and possessed of a strong motivation to serve this Nation with his best effort.

He seems to be moving very fast on a number of fronts. Considering his background of experience and the complications inherent in national and global problems, I would feel more comfortable if his pace was a bit slower and if he had more experienced advisors. In atomic matters as an example, he apparently is advising with a majority of people that have been traditionally opposed to the use of atomic energy. I speak of individuals such as David Freeman, Gus Speth, Russel Train and Charles Warren.

I must except James Schlessinger who has a very knowledgeable background in atomic matters as well as Federal Government service. I can not understand his position on the L.M.F.B.R. termination. When he was chairman of the A.E.C. he was a strong supporter of the breeder. On September 12, 1972 Mr. Schlesinger in testimony before the joint committee had this to say—"the breeder reactor obviously is a most impressive candidate for a major role in the future. It has, because of the energetic activities of the atomic energy commission over a period of twenty years, reached the stage of engineering development, unlike some other possible sources of energy, which because of less aggressive support by industry and by Government are not in a position to go to engineering development at this time."

Reference: Hearings before the Joint Committee Septemer 7, 8, and 12, 1972.

That testimony was given five years ago. It was true then and it is more needed today than it was before the OPEC oil embargo when imported oil from OPEC cost $3.00 per barrel—a fourth of its cost today.

I believe that President Carter is making a tragic mistake in his announced policy of terminating the liquid metal fast breeder reactor. He has too many advisors who have traditionally opposed the fast breeder development.

I do not believe he has availed himself of knowledgeable advice from hundreds of eminent scientists, engineers and chemists who have developed more than two thousand peace time applications of the atom.

As far as I know, he has not consulted with the Members of the House and Senate who for many years studied atomic problems. Men who were responsible for more than $140 billion dollars of authorization and appropriations of Federal monies.

The chairman of the Science and Technology Committee, Olin Teague returned from a conference in Europe on June 7th, just two weeks ago. He held conferences with officials of the International Atomic Energy Agency (which we sponsored in 1957), the French Atomic Energy Agency and the International Energy Agency. He reported to the press and his committee as follows.

"Quite simply, we found no agreement abroad with President Carter's proposal to halt breeder reactor development. It seems obvious that if our breeder program is curtailed now as President Carter proposed, it will be done unilaterally, no European nation will go along with us," he said.

Let us recall that we led in forming the International Atomic Energy Agency in 1957, for the purpose of safe guarding the development of the peaceful atom. We took the lead mainly to minimize the proliferation of nuclear weapons.

Suddenly without warning as Chairman Teague said, "We took unilateral action without either seeking the advice of this 110 nation group or telling them where we thought they were falling short in carrying out their objectives in safeguarding nuclear materials. To say the least this has the outward appearance of a no confidence vote in the organization".

I quote Chairman Teague further because he and his five committee members made the contact with the international agencies in Europe which the Carter administration should have made prior to the President's announcement of breeder termination. I quote—

"The officials with whom we met politely but firmly expressed their concerns over what has been proposed in the nuclear policy changes. There was also unanimity in their views. They made it clear that they are convinced that plutonium is important as a fuel and development of the breeder can not be stopped. They indicated their appreciation of the fact that the United States, with indigenous supplies of both fossil fuels and uranium, may have a little more time in putting the breeder to use. But they were also unanimous in their views that our needs for the breeder are close to urgent also, and if we cause a hiatus in our efforts we may not be able to build up the technical teams which are needed to bring the breeder into our time."

There is little wonder then that the Science and Technology Committee has restored the 150 million dollar annual appropriation for the breeder which President Carter had cut to thirty-one million dollars.

AIR BAGS LESS SAFE; INSURANCE CLAIMS PHONY

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. SHUSTER. Mr. Speaker, there are two major new developments in the air bag controversy which I would like to share with my colleagues.

First, statistical data showing that air bags are less safe than safety belts has been obtained from NHTSA, the Federal agency that is pushing for mandatory air bags. Specifically, the data shows that your chance of being killed in a serious car crash is 5½ times higher using an air bag equipped car instead of wearing safety belts. Your chance of being injured is nearly 2½ times higher. Surprisingly, the air bag did not even inflate in 42 percent of the tow away crashes.

Chart 1 shows that in 230 tow away crashes with air bag equipped cars, fatalities occurred in 1.7 percent of the accidents. However, in 4,032 crashes where safety belts were worn, fatalities occurred in only 0.3 percent of the accidents, making the safety belts 5.5 times as effective as lifesavers. The same crash data indicated that injuries occurred in 13.9 percent of the air bag cars and only 5.9 percent of the cars where safety belts were worn, making the belts 2.4 times as effective in preventing injuries. Eighty-seven percent of the air bag cars were also equipped with lap belts.

I would vigorously support the air bag if the evidence showed that it was effective. But, even when allowing for only 30 percent of the people wearing safety belts, NHTSA's own data shows that more lives can be saved with safety belts than with air bags. These statistics may not be conclusive, but it is the data available. The NHTSA air bag report also states:

> Unfortunately the small number of air bag equipped vehicles and the resulting small number of accidents make it impossible to quantitatively measure their injury and fatality reducing effectiveness. We believe that as the life and injury-reducing potential of the system is demonstrated to the public and design improvements are made, this concern will be minimized.

So, we are first given statistics which show that air bags are not as safe as safety belts, then told to disregard the statistics because they are not reliable, and finally told, in effect, to trust the judgment of the bureaucrats that Americans should be ordered to buy air bags. The same bureaucrats who gave us the mandatory buzzer interlock system. It seems more reasonable that the proper approach is to stick to the agreement former Secretary of Transportation Coleman extracted from the auto industry last year to market as many as 440,000 air bag cars over the next several years, and then use that experience to make a sound air bag decision. It is scary, that 9 percent of airbag inflation to date have been accidental. The initial air bag cost of approximately $200 does not include the re-

placement cost after inflation, which is estimated to exceed the original cost.

The second major development is that we have investigated the claim by the air bag lobby that insurance premiums could be reduced by 30 percent with air bags, and found that air bag users currently are getting less than 1 percent price reduction from the three insurance companies that support the air bag. We obtained quotations on a typical 1974 Oldsmobile Delta 88, with and without air bags, from 50 different insurance agents in Pennsylvania, Maryland, Virginia, and Washington, D.C., representing Allstate, GEICO, and Nationwide—chart 2. Allstate agents quoted an average discount of $3.44 on a $281 policy, 15 GEICO agents, a $2.29 discount on a $312 policy and 17 Nationwide agents, a $1.41 discount on a $295 policy.

So, the much touted reduced insurance premiums will offset the original cost of the air bag only if one drives the same car for 83.3 years. None would insure the replacement cost of accidental inflations. Ten other insurance companies contacted offered no price reduction for air bag equipped cars.

The air bag order is most unfair to the millions of Americans who wear safety belts, forcing them to pay extra for a system that may be less safe than the one already in their car. Congress should disapprove the mandatory air bag, unless or until, a better case is made.

CHART NO. 1.—AIR BAG VERSUS SAFETY BELT EXPERIENCE

	Air bag equipped [1]	Safety belt usage [2]	Safety belt ratio to air bag
Tow away crashes investigated	[3] 230	4,032	
Fatalities	4	12	[4] 1.7:0.3
(Percent)	(1.7)	(0.3)	
Injuries	32	239	[5] 12.9:5.9
(Percent)	(13.9)	(5.9)

BOND FOR ALIENS TO REDUCE WELFARE ABUSES

HON. JOHN KREBS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. KREBS. Mr. Speaker, on June 30, I introduced H.R. 8154, requiring the posting of a $5,000 bond by the sponsor of an alien seeking admission to the United States as an immigrant when, in the judgment of the U.S. consular officials, the possibility exists that the alien will become a public charge. Under present law, such a bond is not mandatory and my bill will close this loophole by making the bond a required step before such aliens are admitted to this country. There will be a $15,000 limit on the bond in the case of an immigrant family of three or more members. The bond will be in effect for 3 years from the date it is posted and, under the terms of the bond, Federal, State, and local governments spending public assistance moneys on such aliens will have an opportunity to recoup the payments by proceeding against the bond.

Recent revelations have disclosed that all too often legally admitted immigrants have been receiving public assistance soon after arriving in this country. Even more shocking is evidence that some sponsors of these aliens were aware that such aliens would apply for welfare payments immediately upon arrival in the United States. Furthermore, courts have held that affidavits of support filed by sponsors are not legally enforceable. Thus, governmental entities often cannot recover public assistance moneys paid to aliens.

The mechanism for the acceptance of such a bond already exists under present Federal regulations. The District Director of the Immigration and Naturalization Service—INS—having jurisdiction over the intended place of residence of an alien approves the public charge bond prior to the issuance of an immigrant visa to the alien upon receipt of a notification from a United States consular officer or upon presentation by an interested person of notification from the consular officer that such a bond is required. The District Director keeps a current list of companies holding certificates of authority as acceptable sureties on Federal bonds and this list is made available to prospective sponsors. Upon acceptance of such a bond, the District Director of the INS notifies the U.S. consular officer who requested the bond, giving the date, place of acceptance and the amount of the bond.

On Friday, July 22 I plan to reintroduce H.R. 8154 and have asked my colleagues to join me in cosponsoring this measure, which is now awaiting action in the Subcommittee on Immigration, Citizenship, and International Law of the House Committee on the Judiciary.

REMARKS ON COMPENSATORY EDUCATION

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. PERKINS. Mr. Speaker, on July 13, Congresswoman SHIRLEY CHISHOLM presented testimony at a hearing being conducted by the Department of Health, Education, and Welfare on the reauthorization of the Elementary and Secondary Education Act. Mrs. CHISHOLM's primary concern was with finding ways to improve the effectiveness of the compensatory education programs which are being offered under title I of that act.

Since Mrs. CHISHOLM's remarks are so pertinent to the issues which Congress will be facing during the next year as we review that act and as we try to find better ways to fashion these programs, I would like to share with the Members the full text of her statement. I believe that her comments are most relevant and will be useful to all of us as we reformulate our own thinking on title I and these other programs:

TESTIMONY BY CONGRESSWOMAN SHIRLEY CHISHOLM

Commissioner Boyer, Secretary Berry, and ladies and gentlemen: It is indeed a pleasure for me to come before you today to discuss the reauthorization of programs under the Elementary & Secondary Education Act. I believe that these hearings provide an important forum for public input and participation in the formulation of educational policy. Furthermore, I hope that additional hearings can be scheduled in other areas of the country, to provide a means of participation to an even greater number of individuals who traditionally have been excluded from this process

One might justifiably ask why I need to come before these public hearings to express views on these programs, when, as a member of Congress, I will get to vote on them on the House floor. Traditionally, it is the administration which comes before Congress to present its programs and legislative proposals—but I enjoy turning the tables, and having an opportunity to present some of my personal concerns about education to the administration before its proposals have been formed. I should remind you that I was an educator long before I became a politician, and I have always held the educational future of our children as my foremost concern. I appreciate then, this opportunity to share a few thoughts with you this morning.

The aspect of the Elementary and Secondary Education Act which I would like focus upon is title I, compensatory education. Title I is recognized as our major Federal effort to improve educational achievement and opportunity for disadvantaged children. Also, this will be a critically important year for title I. The Education and Labor Committee's Subcommittee on Elementary, Secondary,

and Vocational Education has set aside some three months for oversight hearings, and title I is expected to receive more congressional attention than in any other year since its enactment. Already, legislative proposals for revising title I have been introduced in Congress, and we can expect a great deal of discussion to be generated when NIE releases the final report of its two year study of compensatory education. In light of this interest and attention, it is my hope that the administration will give a great deal of thought to improving title I's ability to meet the educational needs of disadvantaged children, and that this will result in some thoughtful innovation of an important program. I would now like to address some of the areas which are of concern to me:

REORGANIZATION OF THE OFFICE OF EDUCATION

I believe that there needs to be a more direct line of reporting between the division of education for the disadvantaged and the commissioner. Dr. Boyer, although you have recently reorganized the Office of Education, there still remain some three layers of bureaucracy which separate you from the division which administers title I. The previous two administrations had little commitment to compensatory education, hoping ultimately to shift title I into a program of general aid to the States. It was convenient, therefore, to isolate title I with several layers of reporting. It is my belief that this administration feels differently about the importance of title I, and I hope that this will be reflected in the establishment of a more direct relationship with the Commissioner. Other programs, such as right to read, teacher corps, and bilingual education report directly to the Commissioner even though the scope of their programs are less than title I. I do not mean to suggest that the only alternative is for the division to report directly to the Commissioner, that is an administrative decision, but I do feel strongly that it needs to be streamlined, so that once again title I will have the ear of the education policymakers.

In a related issue, I am certain that today you will hear expressions of concern that, although title I represents almost one-third of OE's budget, it has less than 2 percent of the staff in the Office of Education. I believe that this speaks to the need for strengthening staff resources. Currently, there is only one title I staffperson, a regional program specialist, in each of the ten regional offices. This can only have a detrimental effect on the ability of the Office of Education to conduct meaningful program reviews, or provide adequate technical assistance to States and LEAs. I hope that in the coming months, you will move to increase program staff at the regional and Washington levels.

A "SUMMER BRIDGE" FOR TITLE I STUDENTS

Through my readings, a serious problem has come to my attention with regard to structuring of school programs. According to reaserch, title I students are progressing at a rate of achievement significantly greater than non-title I children, almost equal to the average achievement rates. According to the Federal education project, title I students are in fact achieving at a rate of one month for each month in title I. Unfortunately, in the absence of such enrichment during the summer vacation, this progress reverses, and title I students tend to lose up to a month or more of progress. To me, this indicates a strong need to develop and encourage title I "summer bridge" programs which, through continued educational enrichment and stimulation, protect the progress a title I student has made, and insure that this achievement is carried over to the following school year.

I am also sensitive to the fact that, as of now, we are functioning within a system of limited resources, and it would not be advisable to divert money from programs planned for the regular academic year, in order to conduct summer enrichment. I believe then that we need to increase the appropriation for title I, and perhaps through discretionary or model program grant incentives, encourage the development of these efforts. I think that other Members of Congress will work with me to this end, but the administration will have to take the initiative to document the need for such a bridge, as well as to encourage Congress to provide sufficient resources for them. I hope we will be able to work together to fill this gap, which may stand in the way of further improving and maintaining achievement gains for title I students.

HEW AUDIT PROCEDURES FOR TITLE I

I believe that there is a lack of coordination in the manner in which HEW resolves audit exceptions. As it currently stands, each layer of the Office of Education Management must sustain the report of the audit agency before a letter of findings can be issued to the State. Often, the Office of Education cannot agree on the provisions of the audit report, and this can significantly delay its issuance. In 1974, though, Congress set a statute of limitations, of five years, for making a final determination of any alleged misdeed. This has resulted in many States getting off the hook because of long delays in OE coming to resolution on the audit findings. Five years is certainly a reasonable goal for issuance of audit findings, so that it is clear that there needs to be some streamlining of the in-house procedure by which the Office of Education sustains the audit agency's findings.

Not only is there a problem in issuing audit findings, but it has also come to my attention that the Government has had difficulty getting back money from the State when audit exceptions have been decided. Perhaps we need to define sanctions that will be taken if, after not contesting the findings, or losing the appeal, a State fails to clear its outstanding audit debt.

In discussing the audit procedure recently with someone, they remarked that "the wonder is not that HEW does not get its money back, but that the audit system functions at all". In fact I was even told that approval on audits were held up because a particular administrator would not sign off on audit exceptions for supplanting because of a lack of personal conviction that supplanting violates the premise of title I. I would have to strongly state that this circumvents the law, and whether intentional or not, it is unconscionable for these audits to get continually bogged down in a bureaucratic quagmire.

In another area, I am concerned about the amount of technical assistance which OE is providing to the audit agency. Is the Office of Education doing a good job of providing technical assistance, so that people are aware of the legal requirements of title I? These are questions which need to be answered in conjunction with any action to streamline the auditing process.

I urge the administration to move to streamline this process, because without a strong mechanism there will be no means for insuring enforcement of the law. As you look at auditing, I think consideration should also be given to establishing positive incentives for States and local school districts which have used title I funds properly. Perhaps an additional allocation of 1 percent for discretionary or pilot programs could be considered. I think it an approach worth further study.

In a sense, all of these issues relate to a concern I have about the laws which guide the use of title 1 funds; comparability which stipulates that per pupil expenditures from State and local funds in schools in title I target areas must be at least 95 percent of the comparable expenditures in non-target schools, and supplanting, which provides that title I funds must supplement not replace State and local funds being expended in the target area, are being eroded. These aspects must be enforced if we are truly to have an impact upon educating disadvantaged children. Otherwise, title I will become little more than fiscal relief to local areas to maintain the status quo.

ALLOCATION CRITERIA

One of the more controversial questions which will occupy Congress reauthorization will be the criteria by which title I funds are to be allocated. Very early in the reauthorization process, the notion was advanced that the criteria should shift solely to a measure of educational deprivation, rather than economic deprivation. Although this is an issue which will be discussed fully during the reauthorization process, I would like to briefly outline a few of the reasons why I will oppose any such shift in the allocation formula:

1. Poverty is a good proxy of educationally deprived poor children and educationally deprived children have to face a double burden. According to the proposed educational deprivation formula, economically advantaged children could draw just as heavily upon title I resources as poor children. Middle and upper income youngsters who do not excell academically do not face the same obstacles as low-income educationally disadvantaged children.

2. We do not have a good instrument by which we can measure educational attainment.

3. In effect, such a formula would penalize successful title I programs in poor communities. For example, if you had a good program in a poor community which, over a two year period, had raised their title I children to an average rate of educational progress, then the next year all of the special programs in math and reading funded by title I would be cut off, as they would no longer qualify. Then to make this vicious cycle complete, only after a couple of years without title I services, when the students academic achievement had sufficiently regressed, would they again be eligible for title I monies. If this allocation formula were adopted, it would become a living nightmare to poor communities across the country. I urge citizens, as well as education and community groups to speak out loud and clear against this proposal, as nothing more than a sham to obliterate title I's effectiveness.

PARENT EDUCATION

A final program consideration which I hope will receive your attention is enhancing the role which parents play in supporting their child's educational progress. A great deal of educational research has identified the home as the key factor in the academic performance of children. A recent newsletter from the lawyer's committee for civil rights under law—Federal education project cited studies which show that family background factors such as income level, and parent expectations for children, account for more variance in achievement scores than school factors such as per pupil expenditures and teacher's level of education. They also note, though, that specific parent behaviors and attitudes which promote student achievement, cut across income brackets, and are not limited to any particular social class; "the key to higher achievement levels is what parents actually do with their children—not the amount of money or education they have".

This is a strong statement which I fully agree with. In fact, several compensatory education programs have been successful in establishing parent-tutors as an integral part of the instructional program. Realizing

that we cannot take money away from children in order to promote parent education, I again look to the administration to be a catalyst when innovation is warranted. In particular, I hope that you will look at the importance of parental involvement, and again present some findings to Congress. If additional funds are justified to make parent education a possibility, please let us know, as we are counting upon the administration to take an activist role in furthering the goals of title I through program improvement.

I have touched upon many issues in title I which I believe are important and worthy of discussion and study. I greatly appreciate the opportunity you have given me to share my concerns about title I, a program which so vitally affects the futures of our young people. I hope that this dialogue will be continued and broadened, and I look forward to the challenge of working with many of you here to build a better future for our young people.

AWARENESS OF DISABLED INDIVIDUALS

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. DICKS. Mr. Speaker, the difficulties faced by disabled individuals have recently become a subject of considerable attention by the Congress, the executive and Government as a whole. Increased awareness has come about from the private sector of our society as well. This is all for the good and I am happy that this situation is finally being addressed on a broad scale.

This awareness did not come about without a lot of push. I would like to take this opportunity to recognize an organization which has for the last 47 years provided those with visible physical disabilities an opportunity to work on their own behalf to establish an end to dependence on others and promote greater accessibility for the handicapped everywhere.

The Indoor Sports Club, Inc. was founded in 1930 at the suggestion of a disabled shutin in California, Edna Enochs, by G. Allison Phelps. Since that time it has grown to include chapters in 49 States.

Members of the ISC have, through united effort, been able to stimulate cooperation among civic, religious, and fraternal organizations to bring a better understanding and acceptance of the physically disabled. The club has made the difference between surrendering and readjusting for many of these individuals.

One of the major efforts of the ISC is in the area of promoting and supporting legislation at the Federal, State, and local levels. In my State there are a number of very active chapters which have aided the State legislature in the drafting and adoption of important legislation for the handicapped.

The current president of district five, which includes the area I represent, is William S. Buell from Tacoma, Wash. My experience in working with him and his organization has been of considerable value in keeping me informed on problems facing those who are disabled.

The club is currently working on efforts to have establised a national housing for the handicapped week. I am looking forward to working with them in this effort.

All of us who have been fortunate enough to be blessed with a sound body can learn a lesson, I feel, from the ISC.

EFFICIENCIES ACCOMPLISHED SINCE INCEPTION OF ALL VOLUNTEER FORCE

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. STEIGER. Mr. Speaker, the Department of the Army recently issued an information paper detailing some of the efficiencies accomplished since the inception of the All Volunteer Force—AVF. I had requested the information in a meeting last month with Secretary of the Army Clifford Alexander.

The information contained in the information paper gives an excellent perspective of what has been accomplished since we in Congress chose to end the draft 4 years ago. The constrast between the draft era and today is remarkable in terms of the strides made since inception of the AVF.

Because of the importance of the statistics contained in the paper, I would like at this time to place the body of the Army's study into the CONGRESSIONAL RECORD. The paper follows:

INFORMATION PAPER

SUBJECT

Efficiencies Accomplished Since Inception of All Volunteer Force

PURPOSE

To identify efficiencies that the Army has been able to effect since the All Volunteer Force was instituted.

FACTS

1. The draft officially ended in July 1973 (effective December 1972).

2. Since the ending of the draft and the Vietnam War, numerous actions have been taken to consolidate headquarters, shift manpower from support to combat functions, and reduce personnel turbulence in units, and improve the overall quality of the Army. Headquarters and support reductions in Europe, the Pacific, and CONUS will result in about 50,000 spaces for combat force improvement from end FY 74 to end FY 78. In addition to the major efficiencies in the force structure, improvements have been evident in procedures resulting from elimination of two-year terms of service and management actions as follows:

a. Average tour lengths increased from 12 months to 25 months from FY 72 to FY 76.

b. As a result of increased tour lengths, the average unit turnover (turbulence) rates have been reduced in Europe from 75 percent in FY 72 to 48 percent in FY 76 and in CONUS from 126 percent in FY 72 to 54 percent in FY 76.

c. The individual account (Trainees, Transients, Patients, and Prisoners) has dropped from 21 percent in 1972 to 16 percent in 1976.

d. The personnel readiness condition of major combat units (Divisions, Regiments, Separate Bdes/Bn) improved. Of 20 units reporting in December 1972, only 15 met personnel readiness criteria. In December 1976, 26 of 26 units met criteria.

3. Senior commanders have stated that this is the best Army in 30 years. The following statistics back these statements.

[In percent]

	Fiscal year 1972	Fiscal year 1976
Profile of Army-total high school graduates/GED	70.1	81.1
Mental category IV as percent of accessions	18.2	7.6
Reenlistment rates (percent of eligible) total	18.5	51.2
Reenlistment rates (percent of eligible):		
First term	9.6	33.7
Career	37.5	69.9
MOS AWOL (percent of total)	4.09	1.11
Desertion (percent of total)	1.61	.29
Courts-martial (percent of total)	.76	.27
Separations less than honorable (percent of total)	.96	.47

4. The combined improvements in structure, procedures, and improved quality in the Army from fiscal year 1972 projected through fiscal year 1978 permit an increase of 3 active divisions, an overall reduction of 21,000 Active Army end strength, and reduction of 68,000 civilians.

5. While efficiencies have been affected in the active components, much more needs to be accomplished, and the Army is working toward that end. Evaluations of current cost reductions are under consideration and will be forthcoming at a later date. There are, however, serious shortages in the Individual Ready Reserve (IRR) and in reserve component recruiting. Army is currently conducting in depth studies on necessary reserve component improvement plans and related costs.

WELCOME PRIME MINISTER BEGIN

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. SOLARZ. Mr. Speaker, tomorrow at the White House the new Prime Minister of Israel, Menachem Begin, will be meeting with President Carter to discuss the mutual hopes of both our countries for a just and lasting peace in the Middle East.

Yesterday, an advertisement taken out by David Weingarten, appeared in the New York Times, expressing the solidarity and support of the Jewish community in our country for the new Prime Minister as he embarks on the most important political mission of his long and distinguished career.

I am taking the liberty of placing it in the CONGRESSIONAL RECORD now because I think it eloquently and effectively bears witness to the moral significance of this historic meeting between the leaders of these two good and great democratic societies.

Mr. Weingarten prepared the advertisement on his own but in doing so he was also speaking for the entire Jewish community in our country:

Welcome Mr. Menachem Begin,
Prime Minister of the State of Israel

Menachem Ben Zev-Dov Begin, Shalom!
When you walk into the White House you
will not walk alone!
Behind you walk forty centuries of the history of the Jewish people;
Thousands of years of Jewish glory;
The majesty of the kings of Judea and Israel;
the eternal wisdom of the Judges
and the vision of the Prophets of Israel.
Behind you walk twenty centuries of the Jewish Diaspora;
The blood stained pages of a tortured history
of exile and dispersion, discrimination and bigotry
and the fight for survival and revival.
Behind you walk millions of victims of Inquisitions and persecution
genocide, pogroms, concentration camps and crematoria
You will be walking as the representative of a reborn nation,
with the blessing and prayers of our eternal People everywhere.
Mr. Prime Minister;
When you walk into the White House you
will not walk alone!

BALANCING THE ERDA BUDGET: PUTTING THE PLUTONIUM BREEDER IN PERSPECTIVE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. BROWN of California. Mr. Speaker, the debate over the Clinch River breeder reactor demonstration project has covered a large number of issues, and focused on many particular aspects of this phase of the liquid metal fast breeder reactor commercialization program. However, there has been little effort made to place breeder reactors, and the LMFBR in particular, in the proper perspective.

The LMFBR is one of several breeder technologies which show promise for the future. Breeder reactors are one of several fission reactors which can be used to generate electricity. Fission energy is only one of several means to generate electricity. In considering electrical energy sources for the 21st century, we have many options, of which the LMFBR is just one. The other nonfisson options include a range of solar, fusion, and geothermal options.

Since there are many energy options for the future, one might ask why several European countries, and until recently the United States, considered the LMBR as the energy option that the most resources should be directed toward. The answer for this is not all that mysterious. The leader in developing new energy technologies, both today and in the past, is the United States. The major U.S. energy research development, and demonstration program had been in the field of nuclear energy. In the early 1950's the U.S. energy program was the nuclear energy program of the Atomic Energy Commission, and the energy options which were researched and developed were a variety of nuclear energy options. The rest of the Western World, through our atoms for peace program, was encouraged to develop their own nuclear energy programs, including a breeder program, as we were developing breeders in their country. At another time I will elaborate on the history of breeder research and development programs throughout the world.

The nearly exclusive emphasis upon nuclear energy research and development continued in the United States until 1974, when the Congress abolished the Atomic Energy Commission, established the Energy Research and Development Administration, and passed the Federal Nonnuclear Energy Research and Development Act of 1974 which established, for the first time, a comprehensive nonnuclear energy research and development program in the Federal Government. Since that time the Federal energy research and development budget for nuclear programs has continued a modest growth, while the Federal nonnuclear energy programs have seen tremendous increases in funding. It has only been in the last 2 to 3 years that the Federal Government has looked closely at solar energy, geothermal energy, and several other energy sources.

The newness of nonnuclear energy programs can be illustrated by the fact that ERDA is just now, for the first time, conducting a study of all inexhaustible energy sources. According to ERDA, in a letter I will insert in the RECORD at the conclusion of these remarks, the charter of this study was to "look at inexhaustibles as a class and to make recommendations as to the total budget for all of them." This study is, and I quote, "the first time since the creation of ERDA that there has been such a comprehensive review." Since the LMFBR is one of 17 different inexhaustible energy options that ERDA is studying for the first time as competitors for research dollars and their potential contribution to our energy future, there should be little surprise in the decision by President Carter to defer the commercialization of the LMFBR at this time.

European countries have generally followed the lead of the United States in the energy field. They followed us on the nuclear energy program, and on the breeder program within the nuclear program. Since the United States is just beginning to explore nonnuclear options, there should be little surprise that other nations do not yet know that alternative energy sources exist. Certainly the existence of alternatives to the plutonium breeders changes the basis for commercializing this technology.

Mr. Speaker, we need a balanced Federal energy research and development program. We need to explore all of the energy options for the future. The ERDA inexhaustible energy resources study is the first attempt to do this. Premature commercialization of the LMFBR is counter to a balanced Federal energy research and development program and it should not occur. Since the Clinch River breeder reactor demonstration project is an integral part of this commercialization program, it should not be built at this time. This is another reason to support President Carter's recommendation to phase out this contract.

The letter referred to above, describing the ERDA inexhaustible energy resource study and how the LMFBR fits into this study, follows:

UNITED STATES ENERGY RESEARCH
AND DEVELOPMENT ADMINISTRATION,
Washington, D.C., July 15, 1977.

Hon. GEORGE E. BROWN, Jr.
House of Representatives,
Congress of the United States

DEAR MR. BROWN: I am pleased to reply to your lettter of July 5, 1977 in which you expressed general interest in the Inexhaustible Energy Resources Study (IERS) and particular interest in how the LMFBR fits into it.

The IERS was commissioned earlier this year by Robert W. Fri, Acting Administrator, as a major study to review the technological alternatives for utilizing renewable or inexhaustible energy resources and to formulate a strategy for their development and deployment. The charter was essentially to look at the inexhaustibles as a class and to make recommendations as to the total budget for all of them and the balance between them. I might point out that this is the first time since the creation of ERDA that there has been such a comprehensive review. Thus, the study reflects the agency's commitment to begin taking a more global approach to resource allocation among the inexhaustibles.

The study was originally conceived of as a five phase, 20 week effort, beginning in late March and ending in late July or early August. The primary target of the study is the agency's summer Budget Review Committee meeting where ERDA's FY 1979 budget request to the President will be formulated. This means that the major work of this study must be completed by the end of July. We are still operating on that schedule, but we have slipped a little. Therefore, it is just a bit premature for us to present our findings on the various options and on their negative and positive aspects. However, within the next several weeks as we wind up the initial phases of our work, I believe we will be in a position to brief you in detail; and we would, of course, be delighted to do so.

The "bottom line" of this study will be a research, development and demonstration (RD&D) strategy for the inexhaustibles over the next decade that will be used as a guide in formulating ERDA budget requests for all these options. In this context, the technologies that are being analyzed include those that tap any of the following primary resources—radiation from the sun; the fusionable isotopes of the light elements, most notably those of hydrogen; the fertile ores, notably uranium and thorium; and the hot dry rock geothermal resource.

The LMFBR is amoung the options being considered; but among the technologies that could use fertile ores it is only one of several which we are analyzing. We are also looking at the gas-cooled fast reactor (GCFR), the light water breeder and certain fission-fusion combinations. Indeed, all together the study will treat upwards of seventeen different technologies including nine solar options, two pure fusion options, at least five fission options, and the hot dry rock option.

The study design is explained fully in the attached Bulletin. Fundamentally it is aimed at answering the question of "How soon are the inexhaustibles needed?" If they are needed soon, the budgets must expand very rapidly; if they are not needed until well into the twenty-first century, the budgets can expand less rapidly.

The balance between options will depend upon such matters as the relative cost of

energy from each option, the environmental effects of each, and the relative complexity of each. A major part of this study is being devoted to identifying all of the important generic characteristics of the inexhaustibles and to weighing them appropriately.

From such analysis we hope to provide guidance on the total RD&D budget for all of the inexhaustible energy options; and on the relative balance between subprograms, i.e., the fraction of the total for photovoltaics, solar heating and cooling, fusion, the LMFBR, the GCFR, etc.

The study first identifies the set of potential problems that may limit the deployment of the "exhaustible" technologies, puts upper and lower time limits on when those problems must be solved, and from those considerations determines the time range that defines how soon we need the inexhaustibles.

Then, based on a relatively detailed set of evaluation criteria, preferred mixes of inexhaustible technologies for different times in the range are determined, and the RD&D required to bring the technologies to the point where the preferred deployment could be implemented is rolled back. This way we are able to relate future technology deployment scenarios to today's budget decision making process.

While we have not yet completed all the steps outlined above, we have made significant progress on a number of these. In the meantime, you and your staff are invited to the Public Meeting next Wednesday at which time I will present the results to date. If I can be of any further assistance, please feel free to contact me.

Sincerely,

BENNETT MILLER,
Executive Director,
Inexhaustible Energy Resources Study.

SOLAR ENERGY RESEARCH: MAKING SOLAR AFTER THE NUCLEAR MODEL?

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. OTTINGER. Mr. Speaker, those of us who oppose funding for the Clinch River breeder reactor, which is slated for House authorization next week, are well advised to present an alternative. Solar options including solar electric, solar thermal, wind power, and biomass provide such alternatives.

Not only is solar energy clean and efficient, it can provide renewable onsite power. And, to varying degrees, it is almost cost competitive compared to electricity at current prices.

What is needed to make it completely competitive is a change in policy toward solar options at the national level. Research and development should concentrate on small solar devices for producing onsite power rather than large central stations to produce solar electricity on the model of present nuclear plants. Present programs seem to have in mind the existing utility industry by "creating solar technologies in the image of nuclear power."

This quote is taken from the following article, "Solar Energy Research: Making Solar After the Nuclear Model?" from July's Science magazine. I commend to my colleagues' attention the complete article which follows:

SOLAR ENERGY RESEARCH: MAKING SOLAR AFTER THE NUCLEAR MODEL?

(By Allen L. Hammond and William D. Metz)

A point about solar energy that government planners seem to have trouble grasping is that it is fundamentally different from other energy sources. Solar energy is democratic. It falls on everyone and can be put to use by individuals and small groups of people. The public enthusiasm for solar is perhaps as much a reflection of this unusual accessibility as it is a vote for the environmental kindliness and inherent renewability of energy from the sun.

But the federal program to develop new energy technology is giving only belated recognition to solar energy's special characteristics. Despite the diffuse nature of the resource, the research program has emphasized large central stations to produce solar electricity in some distant future and has largely ignored small solar devices for producing on-site power—an approach one critic describes as "creating solar technologies in the image of nuclear power." The program contains virtually no significant projects to develop solar energy as a source of fuels and only modest efforts to exploit it as a source of heat. The massive engineering projects designed by aerospace companies which dominate much of the program seem to have in mind the existing utility industry—rather than individuals or communities—as the ultimate consumer of solar energy equipment.

One consequence of this R & D emphasis on large-scale, long-range systems is to distort economic and policy assessments of solar energy based on the current program, both within the Energy Research and Development Administration (ERDA) and in higher levels of the government. Indeed, the potential of solar energy is still regarded with skepticism by many government energy officials and publicly discounted by spokesmen for oil and electric utility companies. Funds for solar research are leveling off, because of cuts made by the outgoing Ford Administration and confirmed, with minor overall changes but some shift in emphasis, by the Carter Administration. Agency officials concede that even the present federal program—representing an investment less than one-half of that for new coal technologies and a small fraction of that committed to the nuclear field—has survived only because of the immense popular appeal of solar energy and consequent pressure from Congress.

In contrast to this official skepticism is the virtual explosion of optimism and activity elsewhere. Dozens of pieces of proposed solar legislation and hundreds of companies now manufacturing solar components reflect this interest. The number of solar-heated houses built in the United States has doubled approximately every 8 months since 1973, and the rate shows no signs of slackening. The rapid buildup of a fledgling industry has been matched or even exceeded by a staggering rate of technical innovation in designs for solar equipment and in research on advanced methods for capturing and using solar energy. Measured by the number of new ideas or the rate of progress, solar energy has become the hottest property and the most sought after action in the energy field. The burden of criticism from the solar energy community and from independent analysts is that the federal program has lagged rather than led many of these developments and that it has directed its research toward goals that betray a lack of understanding of the solar resource.

COMING TO GRIPS WITH SOLAR

The government's difficulty in coming to grips with solar energy is understandable because the solar program was born, in an institutional sense, only about 5 years ago. The early work on solar energy was scattered among various government agencies, but much of it was an outgrowth of the National Aeronautics and Space Administration (NASA) effort to find practical spin-offs from space technology. After the 1969 Apollo moon landings, four different NASA labs began to do modest amounts of solar energy research. In 1972 the National Science Foundation (NSF) became the lead agency for solar energy research, which was funded at only $2 million per year. Many of the early program managers came from NASA and much of the contracted research went to areospace companies.

In early 1975, all the solar research programs were shifted from the NSF, which has not been organized for commercial technology development, to the newly formed Energy Research and Development Administration, where solar was cast into competition with the nuclear breeder, the government's newly invigorated coal program, and the growing program for fusion. In its first 12 years the ERDA solar program was greatly understaffed and overworked—at one time 60 percent of the mail for the entire agency concerned solar energy. But in spite of institutional handicaps, the program grew rapidly because Congress authorized large increases in the solar research budget—as much as 80 percent above what the agency, officially requested.

The program under ERDA moved into a mode of design, construction, and testing of various types of solar power pilot plants on an aggressive timetable. Feeling pressure to build up the solar program rapidly, ERDA delegated a large—some critics would say dominant—role to its national laboratories and to various NASA laboratories. The different subprograms were evaluated in a series of "mission analysis" studies, largely performed by aerospace contractors, and new priorities were set. Much of the evaluation was based on the capability of various solar technologies to approach base-load electric power supply—under the assumption that anything else would fall short of a major contribution. During this crucial period of solidification, the program has no regular review by an outside advisory board and there were no congressional oversight hearings. One of the strongest outside influences on the shape of the program, according to well-informed observers, was the utility industry.

Today, government solar research is a $290 million effort spread among four subprograms for electric applications, one for fuels, and two for heating, cooling, and related direct applications, with a professional staff of about 70 persons. In fiscal 1978, the program recommended by the Carter Administration will grow only modestly to $320 million. Because the various solar technologies are generally unrelated to each other, there is not a great deal of overlap between the research bases needed for the subprograms. The result is that the different solar options are at an even greater disadvantage vis-a-vis other energy programs than the total solar research budget would indicate.

The largest allotment of ERDA funds and staff resources has been for solar electric technologies. The concept which the utility's research arm—the Electric Power Research Institute—sees as the most likely candidate for central electrity generation is the power tower, a system with a boiler on a high tower heated by the sunlight reflected from a field of hundreds or thousands of sun-following mirrors. The power tower with its related solar thermal systems is still the leading subprogram in dollar priority—$79 million in fiscal 1977. Next is research on photovoltaic power systems—an effort to develop low-cost versions of the silicon cells used on space satellites for converting sunlight directly to electricity. Wind-power research, although it is the solar electric technology closest to being economically competitive, receives only about 8 percent of the solar budget. Approxi-

mately 5 percent goes to develop methods of extracting energy from the small temperature differences between surface and deep seawater—a concept usually referred to as OTEC (ocean thermal energy conversion) and conceived to produce electricity or perhaps an energy-intensive chemical in a huge floating plant that would provide about 200 megawatts of power. Still less money presently goes to the solar resource that could be most versatile of all—plant matter or biomass, which can be converted into either heat, fuels, or electricity. ERDA officials are generally agreed that biomass is one area in which they have yet to get a strong and coherent program under way.

The solar heating and cooling subprogram is funded at $86 million at present and $96 million in the fiscal 1978 budget. Solar home and hot water heating is nearly competitive in some areas of the country already. However, the ERDA program has paid little attention before now to the benefits of passive solar heating—the capture of solar heat that can be achieved from a well-sealed south-facing window as opposed to a rooftop solar collector used with a water or airflow system to carry the heat downstairs. Such systems are now widely thought to be capable of filling a large fraction of the winter heating needs in many areas at costs generally less than those of active systems.

As the Carter Administration prepares to shift energy research to yet another agency—the proposed Department of Energy—solar energy is still in search of a proper institutional home. Noting that skepticism of the solar program is one of the proper functions of ERDA's management, Henry Marvin, solar program director, nevertheless says that the program has been subject to tight controls by the agency's upper echelons and by the Office of Management and Budget. In his words, "Congress has been the corrective factor" in the growth of the program. According to Marvin, the solar program now has all the money it needs, "but we are still somewhat staff limited and travel-money limited—that has been the mechanism of OMB control." He foresees a program that may have already reached its broadest extent and will focus more narrowly as early decisions are made about solar hardware development projects in 1978 to 1981 and successful technologies are transferred to private industry.

Marvin is credited by several observers with having sought to limit the role in the program of the national laboratories—which, he says, "are not natural stopping places" enroute to developing commercial technologies—and with having managed the program competently within the guidelines set by the agency.

CENTRALIZED VERSUS ON-SITE SOLAR

But critics believe those guidelines still reflect the narrow set of preconceptions with which the program began. One of these preconceptions is the preferred role of centralized energy systems. Several pieces of evidence suggest that the ERDA program has given inadequate attention to the issue of the appropriate scale for solar technologies and, in so doing, has failed to exploit the most promising characteristic of solar systems. A report recently issued by the Congressional Office of Technology Assessment (OTA), for example, points out that federal research on electric generating equipment of all kinds has been focused almost exclusively on a centralized approach and has neglected what OTA sees as a significant potential for on-site power production. The report—one of the most comprehensive studies of emerging solar technologies yet made—concludes that "devices having an output as small as a few kilowatts can be made as efficient as larger devices" and that on-site solar systems capable of generating electricity at prices competitive with those charged by utilities may be available "within 10 to 15 years." "Onsite solar energy," the report declares, "must be regarded as an important option."

The solar thermal subprogram provides an instance of how ERDA's choices of scale were established. Initially, the subprogram was conceived of exclusively in terms of central power stations, as large as possible. Charles Grosskreutz, an analyst with the engineering firm of Black and Veatch during the period when it was involved in the initial program analysis of power towers for ERDA, says that "everyone started by considering a 1,000 megawatt size and quickly scaled it down to about 100 megawatts" when it became clear that the tower height and the land acquisition problem were impractical for the larger sizes. "To my knowledge," he says, "there are no good studies of the optimum size of these facilities." Little serious consideration appears to have been given to solar thermal generating facilities in conjunction with community-scale energy systems or biomass fuel refineries—applications for which the optimum size, according to Princeton University physicists Robert Williams and Frank von Hippel, will probably be much less than 10 megawatts. According to Marvin at ERDA, "it may well be that 10 megawatts is the unit size for the power tower—we used 100 megawatts for our calculations."

Likewise, the wind-power program, according to early program documents, did not look carefully at the prospects for improved versions of small wind turbines for distributed applications, or at the potential economies of mass production that might apply to small devices but not to large ones. Instead, the program plunged ahead to build a large, 100-kilowatt prototype as a first step toward a commercial size conceived to be as large as possible with the materials available—1.5 to 2 megawatts.

Williams and his colleagues point out that the ERDA solar program throughout concentrates its main efforts on the largest and smallest scales of energy production, but they contend that an intermediate size may turn out to be the natural scale for many solar technologies. Their analysis points to community-size systems, equivalent to a few hundred or a few thousand houses, as the most cost-efficient, in that they would allow storage of solar energy on an annual basis—something impractical for an individual house—and would also allow the coproduction of solar heat and electricity in a manner that would be impractical for large central power plants.

Other independent analyses have come to similar conclusions. The noted British radio astronomer Martin Ryle, in a study of the applicability of solar energy to that country, concludes that a distributed network of small wind turbines provides the best match of potential supply to demand and would be competitive with coal-fired or nuclear generating stations. Ryle concluded that windpower, used with storage systems, could provide a substantial part of the power needs of the British Isles.

Another criticism of the solar program is that its management has been unnecessarily restrictive. During the last 2½ years, while ERDA has directed the program, it has been guided by a management philosophy of "aggressive sequential" development. In practice, this has meant a policy of giving priority to one solar technology in each subprogram, such as the power tower in the solar thermal program, and pushing it to quickly develop hardware and test its feasibility. What the policy has ruled out—reportedly because of skepticism from the agency leadership and budget-cutting by the Office of Management and Budget—is the parallel development of competing concepts. It is, of course, possible that the best candidates were not chosen initially, but nevertheless a whole solar subprogram could be phased out because of poor performance by an ill-advised solar concept. In particular, features such as scale and type of application have been heavily influenced by the original choices for development, and there is considerable danger that values derived from those choices will be the ones on which engineering and economic evaluations of future support will be made. It is just such considerations that lead environmentalists to make the charge that solar energy is being "set up" to fail.

Commenting on the desirability of pursuing parallel concepts, Marvin says that "it is not clear that we would not be more productive if we could pursue multiple paths." But he believes that it would be disruptive, if not politically impossible, to stop existing programs. He says he has attempted to correct what may be imbalances by bringing in a new group of managers (two of whom just arrived this month), and by supporting some of the neglected options as secondary, follow-on efforts when the budget allows. For instance, the fiscal 1978 budget includes $8 million for small-scale windmills. Marvin notes, however, that "it doesn't gain us time lost."

Another problem with the solar program has been lack of flexibility, leading to too little integration of different solar technologies with each other and with the energy needs they might ultimately satisfy. Storage is a problem with many solar systems, but the program has given little attention to applications in which biomass fuels would provide the storage element, or in which the need for storage is obviated by using solar energy in conjunction with another energy source. Solar-coal and solar-hydroelectric systems offer tantalizing possibilities for combinations that could approach around-the-clock power, and there is some evidence that direct solar energy and wind energy might complement each other well. Little attention has been given to on-site application of photovoltaic and solar-thermal devices, in which the utility grid could be used as a buffer and thus storage would not be required. In addition, a generally acknowledged problem with the ERDA program is that its sharply divided subprogram structure has limited the development of systems that serve two purposes at once, such as total energy systems that produce both heat and electricity with a considerable improvement over the efficiency of single-purpose system. The program has only belatedly begun to look at projects that do not fall into any of the predefined categories, such as solar irrigation, which ERDA developed no sooner than did the state of Guanajuato, Mexico.

The organizational structure of the energy agency, moreover, appears to be at cross-purposes with many novel or noncentralized applications. The solar energy division, for example, is effectively prohibited from working on community-scale solar systems because the agency management has decreed community-oriented projects to be in the domain of the conservation directorate.

Cost is the stumbling block most often cited by solar skeptics, and there is no doubt that few of the solar options are competitive today. But current cost estimates are almost certainly deceptive, in the absence of a real market. Furthermore, no one really knows what the costs of small-scale systems will be because so little research has been done on them. The conventional wisdom at the solar program planning office is that, compared to electricity at current prices, wind generators are competitive today or within a factor of 2 of being competitive, biomass fuels are a factor of 2 to 4 away from a competitive price, ocean thermal power systems a factor of 4 to 5, power towers a factor of 5 to 10, and photovoltaics a factor of 20 to 40 away. The opportunities for price reduction among these different technologies are controlled by quite different factors, however. Even the

technologies for which a market does exist—hot water heating, for example—do not yet benefit from the kinds of implicit subsidies enjoyed by most other energy sources or the advantages of mass production by a well-established industry.

Probably no question about solar energy is more controversial than whether it can become a major energy source in the near term or should be regarded (and funded) as a limited, long-range option. Assessments of this question tend to get swept up into what has become a highly polarized debate between environmental advocates and the defenders of coal and nuclear power—a debate whose terms are more nearly philosophical or ethical than economic. The one view holds that a transition to a predominantly solar economy is not only feasible but *necessary*—to avert climatic disaster from the buildup of carbon dioxide that would accompany massive use of coal, and to prevent the danger of nuclear warfare attendant on the proliferation of the plutonium economy. The other dismisses solar energy and holds that coal and nuclear are essential on the grounds that even if costs were to drop dramatically, it would still be many decades before enough solar-heated houses and solar power stations could be built to make any dent in this country's huge and growing appetite for energy.

But these tactical positions obscure a number of things that tend to argue the importance of solar energy on purely economic grounds, as well as some substantial problems. One of the key problems is that solar equipment tends to be capital-intensive, with high initial costs that are a deterrent to consumers unaccustomed to making decisions on a lifecycle basis. Another is that many existing institutional arrangements, from building codes to utility rate structures to federal tax policies, discriminate against unconventional energy sources. But some institutional barriers are being removed by legislation, and the prices of many solar components are already dropping sharply in response to steadily growing demand. It seems evident that the growth of distributed solar systems, for which equipment can be mass-produced, can be far more rapid than the growth of centralized power plants, which must be laboriously assembled in the field. Frost and Sullivan, a respected market research firm, predicts that 2.5 million U.S. homes will be solar heated by 1985. The government itself may become a major market for solar energy—a Department of Defense report done for the Federal Energy Administration estimates that a DOD market for up to 100 megawatts of photovoltaic devices a year may exist at the prices expected to prevail in the early 1980's.

Political fortunes may also play a role in determining the short- or long-term impact. Solar energy fared badly under a Republican administration. President Ford had many opportunities to attend solar project ribbon cuttings but did not do so. Under his administration, the OMB strenuously opposed and nearly gutted the major short-term elements of the government's solar energy program—the demonstration projects for solar heating. ERDA appealed to President Ford but, according to one observer, had the misfortune to argue its case during a week in which Ford was preoccupied with the Angolan crisis. In any case, the OMB position largely prevailed—a circumstance that apparently contributed substantially to the resignation of ERDA assistant administrator John Teem—and the proposed demonstration program, modest though it was, was drastically cut back.

The government program is having some effect—ERDA's work on photovoltaics and wind has stimulated some private investment. And quite apart from the government's program there appears to be a remarkable amount of momentum in solar thermal devices, wood burning stoves and boilers, and other components of a solar energy industry.

After 5 years of rapid but uneven development, solar energy is in need of reassessment. The present federal program has been as much the product of institutional happenstance and various technical predilections as it has been the product of coherent planning. In a broader perspective, the government policy under Republican administrations characterized solar energy as long-term option comparable to fusion and the breeder, but in fact it has little in common with these potential leviathans. Solar technology is more diverse, and even the most difficult technologies, such as photovoltaics, may be closer to commercial realization. Many solar technologies already work, even though the best designs have not been found, and they are already facing the economic challenges that other long-range options have yet to confront. It is arguably time to reconsider solar priorities and ask whether the distribution of research resources among nuclear, fossil, and solar options reflects a rational policy.

POSTAL SERVICE: VIEW FROM RURAL AMERICA IV

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. ABDNOR. Mr. Speaker, the U.S. Postal Service management would have you believe that 5-day mail delivery was OK with most Americans, and that they have a poll to prove it. As with any poll, however, you have to read the entire question before knowing how seriously to take the "findings."

In the case of 5-day delivery, those polled were asked if they would accept the cut in service to avoid a hike in postal rates, not just if they would accept the cut in service. The Postal Service is now considering both the cut and the hike in postage.

In previous remarks under the above caption, I have offered to my colleagues a view of the Postal Service as seen in rural America and expressed through its news media. Rural America is dependent on 6-day mail delivery in a manner that urban America is not. We're talking not only about delivery of newspapers, but about delivery of medicines and machinery repairs. Illness does not take a break over the weekend, nor does Mother Nature at harvest time. Rural America's need for 6-day mail delivery has been well expressed by these South Dakota editors:

[From the Watertown (S. Dak.) Public Opinion, May 23, 1977]

SATURDAY MAIL SUSPENSION WOULD BE HARDSHIP

The Commission on Postal Service, a special body organized to study U.S. Postal Service operations and suggest improvements has recommended among other things that Saturday mail deliveries be suspended and that the processing of mail be substantially reduced over the weekend. This, in our opinion, would be a serious mistake, a near-disastrous regression in the operation of a vital service to the American people.

From a newspaper's standpoint, this means Friday and Saturday papers would be delivered together on Monday, an inconvenience and irritation to the many who receive their papers by mail. From the general public's standpoint, reduced weekend mail handling means a tremendous . . . and perhaps sometimes an unworkable . . . accumulation of mail to be handled and dispatched each Monday.

The commission has recommended the curtailed weekend schedule to "save money." It is difficult to see just how a significant amount would be saved, especially when set against the hardships which would result.

U.S. Senator George McGovern, D-SD, remarks, "In practical terms, the savings will be minimal and the effect on service disastrous."

He adds in a letter to Sen. John Glenn, chairman of the subcommittee which now has responsibility for postal operations, "Farmers in my state depend on market news and information on a six day mail delivery week. If the Saturday delivery is eliminated, a rural patron will, in effect, not have access to timely mail and delivered materials for a substantial portion of the week when he has to make decisions on marketing and other related matters. To a lesser extent, this same holds true with city deliveries on Saturday.

"It seems to me that Congress, not the postal service, should make such a basic decision. USPS should not be permitted to unilaterally move on its own. . . ."

The postal service nationally has been under critical scrutiny for a long time for what many believe to be a deterioration of service despite increased costs to postal users. Locally and regionally, there are many bright spots in postal performance—the Watertown regional post office is one—but the the overall picture on a nationwide basis apparently is not as reassuring.

Curtailment of service to, in effect, wipe out weekend deliveries would, it seems to us, be a step backward in the USPS campaign to improve its service and its record. We hope it will not become a reality.

[From the Madison (S. Dak.) Daily Leader]

NEED SIX-DAY DELIVERY

Surveys made in South Dakota indicate that people want Saturday delivery of mail to continue, particularly in rural areas.

The U.S. Postal Service has proposed cutting mail delivery to only five days, but Congress may intervene. The change would mean no mail delivery from Friday until Monday, and, in the event of a Monday holiday, from Friday until Tuesday.

A spot survey by a Huron newspaper found that 93 per cent of those questioned consider six-day delivery essential, particularly for farmers.

An Aberdeen newspaper survey found 85.7 percent in opposition to the reduction of service. One person questioned said, "I feel if the Postal Service can't operate the mail efficiently, let the government take it back."

We aren't quite that ready to abandon the new postal organization, but we think they should recognize that cutting service must be done with care. Some Saturday mail delivery has already been abandoned in big city office districts where offices are closed over the weekend. Perhaps more cuts can be made in such areas. Extending such cuts to rural areas is another matter.

Saturday mail delivery is not done on "overtime," as might be expected. Usually work schedules are juggled so that mail delivery people working on Saturday get a day off during the week.

True, the total number of workers could be cut by eliminating Saturday delivery, but if you follow that line of reasoning, you could cut Tuesday or Thursday, or both, and save even more expense.

People use the mails because they expect prompt delivery. Poorer service will mean loss of revenue as well as lower expense. Technology exists to make mail service better

than it is, not worse, and we think that is the goal Congress should establish.

[From the Aberdeen (S. Dak.) American News, June 12, 1977]

CONGRESS SHOULD HEED APPEAL OF PEOPLE FOR EFFICIENT, SIX-DAY MAIL DELIVERY

Surveys made earlier this spring by the American News and other South Dakota newspapers reveal that people do care strongly about Saturday mail delivery.

The "straw vote" conducted by this newspaper resulted, as reported June 5, in 85.7 per cent opposition to reduction of mail delivery from the present six days a week schedule to five days a week.

A survey by the Huron Daily Plainsman of hundreds of readers found 93 per cent of the respondents consider six-day delivery essential, particularly for farmers.

Residents of neighboring rural states and rural states in all parts of the country agree with the objections South Dakotans have expressed to proposed reduction of mail delivery.

A typical comment came from Monango, N.D., where a respondent to the American News survey wrote: "I feel if the Postal Service can't operate the mail efficiently let the government take it back."

If the Congress heeds the advice its members are receiving from constituents it will certainly act to end the trend toward higher rates and decreased efficiency that has evolved under Postmaster General Benjamin Bailar's direction of the Postal Service.

It should be the responsibility of Congress to present a solution to the mail delivery problem before further deterioration takes place.

Recommendations coming from many sources are that Congress should return the Postal Service to its former status in the President's Cabinet and give it funds necessary to perform its duties satisfactorily.

The goal should be better not poorer, more costly service.

[From the Wilmot Enterprise, June 16, 1977]

GLEANINGS

(By Dorothy J. Nielsen)

Quite often, one sits back and decides that elimination of some service does not affect us. The proposal to curtail Saturday mail service would create untold problems to many, many people, especially in a rural area.

What about the rural people who subscribe to daily papers? Friday papers would not be delivered until Monday, and four federal Monday holidays would result in no delivery for three successive days. Think too, of the effect on those who are using the papers for advertising with this type of service change.

Mail service is also used to deliver medicines, machine parts and other essentials. Think of the problems with this delay in delivery.

One needs to re-think the purpose of the Federal Government—to provide SERVICE to the people. The Postal service was created to provide delivery of newspapers, books, magazines, a service needed to keep a well-informed public; it also delivers essentials such as mail, machine parts, medicines, etc. This delivery is not made to some convenient location miles away from the destination, but to the postal box in your area, to the mailbox or the end of your driveway or to the mailbox on your home.

The Postal Service offers a free franking (free mailing) for government officials so that they can keep in contact with their constituents back home. A necessary service to maintain representation of the people's wishes.

If the Postal Service is to remain a service to the people, service must be strengthened, curtailment of Saturday deliveries must not be realized.

You can make your wishes known on the subject by writing to Senators McGovern, Abourezk and Congressman Pressler and Abdnor. You can also help by contacting these vitally important Congressmen and Senators:

Congressman James M. Hanley, N.Y. Chr. of the House & SubCommittee on Postal Operations & Services, Room 239, Cannon House Office Bldg., Washington, D.C. 20515.

Congressman Charles H. Wilson, Texas-Chr. of the House Sub-Committee of Postal Personnel & Modernization, Room 2409, Rayburn House Office Bldg., Washington, D.C. 20515.

Senator John Glenn (Ohio), Chairman of the Senate Subcommittee on Energy, Nuclear Proliferation & Federal Services, 204 Russell Senate Office Bldg., Washington, D.C. 20510.

A five-day delivery of mail discriminates against rural people. Do your part. Write your congressman a letter TODAY!

[From the Sioux Falls Argus-Leader, July 4, 1977]

OPINION—AT 200 PLUS 1, CITIZENS STILL WANT EFFECTIVE MAIL SERVICE

On this, the nation's birthday, it would be well for the members of Congress to reflect on the vital services provided by government. One of those services is the mail system. The members only have to read their mail and the newspapers to discern that their constituents are unhappy about the prospect of trimming mail delivery to a five-day week. At 200 years plus 1 of freedom, citizens still want effective mail service which is a concept dating from colonial times.

The Aberdeen American News recently sampled its readers. The paper's poll showed 85.7 per cent opposed to five-day mail delivery. Only 14.3 per cent of the respondents in the paper's straw vote favored five-day service.

The Brookings Register has also polled its readers and got about the same results. The Register commented on its poll in an editorial and included Gov. Richard Kneip's letter to a House subcommittee on the question of cutting back mail service. The Register's editorial follows:

Brookings Daily Register subscribers are no different than people in other parts of the state who have responded to the question of five-day mail delivery. Through Thursday, 86 per cent of those responding to a straw vote do not favor dropping Saturday mail service. We, of course, couldn't agree more.

Gov. Richard Kneip has also gotten into the act, as evidenced by his recent letter to Rep. James Hanley, chairman of the House and Subcommittee on Postal Operations and Services. Here is part of the Governor's letter:

"One of my chief concerns is the recommendation calling for the elimination of Saturday mail service. In South Dakota, where three-quarters of the post offices are designated 'third' or 'fourth' class, our people are dependent upon the postal service as a vital link with other people and with all levels of government. They rely heavily upon newspapers to provide them with the most recent news, market and weather information, and the newspapers themselves are dependent upon the Postal Service for quick dissemination of the news at the lowest possible cost."

Kneip further said that to eliminate Saturday mail delivery would cause a delay in the delivery of both Friday and Saturday editions of daily papers, and in the case of a Monday holiday, it would mean delivery of Friday's news on the following Tuesday.

"I would have to believe that many subscribers would be discouraged because of these undue delays in receiving news and advertising, and I am strongly opposed to cutting service back to five days a week," Kneip said.

We hope that the strong support for six-day service voiced by rural areas will be listened to in Congress, even though the sparsely populated states like South Dakota, who have the most to lose, don't carry a lot of weight in Washington.

BROADWAY STYLE OF DIPLOMACY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. DERWINSKI. Mr. Speaker, my attention has been directed to U.S. foreign policy as it applies to Africa in the light of the Broadway style of diplomacy developed by U.N. Ambassador Andrew Young. A scholarly look at the Carter administration policy as it applies to Africa is given in the Phoenix Gazette of July 9 by the knowledgeable observer of the international scene Allan C. Brownfeld:

CARTER ADMINISTRATION SEEMS BENT ON COMMUNIZING AFRICAN CONTINENT

(By Allan C. Brownfeld)

In recent days the Soviet Union has been successful beyond its fondest expectations in expanding its influence on the African continent.

It has not only seen Marxist-Leninist governments assume power in Angola and Mozambique, but has seen a reversal of alignments in Ethiopia and has maintained a firm foothold in Somalia. Perhaps most surprising to policymakers in the Kremlin is the fact that rather than opposing Communist gains in Africa, the U.S. appears to be pursuing a policy which encourages such gains. This is particularly true with regard to Rhodesia and South West Africa where the U.S. has, rather than simply supporting free elections for members of all racial groups, expressed support for Marxist terrorist groups, such as SWAPO. In addition, U.S. public statements, such as those of Ambassador Andrew Young, have tended to support the aggressive role of the Soviet Union's Cuban proxies rather than cause the Communist to pause for fear of negative consequences elsewhere in the world.

While official policy makers in Washington may not be concerned with Communist gains in Africa, other careful observers are.

In an important article in the June issue of New America, black leader Bayard Rustin, the National Chairman of Social Democrats, U.S.A., declares, "The Soviet Union is up to something new and dangerous in Africa. It is adopting a belligerent and aggressive policy that threatens the independence and development of Africa."

Concerning Angola, Rustin notes, "After having won its independence from Portugal, Angola is increasingly falling under the influence of the Russians. Their influence is neither indirect nor subtle. In fact, it is so direct and pervasive that it is nothing less than neocolonialist. There are 25,000 Cubans in Angola, which is close to 10 per cent of the Cuban army . . . In addition, there are as many as 2,000 East Germans . . . Angola is not an isolated case. Cuba, which does the Soviets dirty work in Africa, has troops in six other African countries, and Sierra Leone, the Cubans are training an internal security

unit. They are also active in Equatoriol Guinea, where President Macias has established one of the bloodiest dictatorships in the world. About one-fourth of that country's original inhabitants have fled into exile. Fifty thousand people have been killed . . ."

While U.S. policy under the Carter administration has radically changed with regard to Rhodesia and South West Africa, and now appears to encourage the coming to power of the most radical and irresponsible elements in those countries, the fact is that the Soviet Union wants anything but a peaceful solution to these problems.

Rustin, being both a black and a liberal, is in a position to tell the truth which white liberal policymakers, in a kind of reverse racism, feel compelled to hide. He states, "The Soviet Union and Cuba have little interest in a peaceful transition to majority rule in Rhodesia and South West Africa. Their goal is to increase their own power by frustrating the American effort to negotiate a settlement. They are actively encouraging a military solution, regardless of the cost to black Africans . . . The truth is that Communism in the third world is, if anything, more savage than it is in Russia or Eastern Europe, as the current plight of the Cambodians and the Vietnamese well attests. Its apologists claim communism as a doctrine of equality . . . in practice it is rationale for state control of every aspect of people's existence."

There is no doubt that current U.S. policy will lead to a dramatic expansion of Communist influence in Africa and a deterioration in the quality of life for the black Africans who will have to live under the brutal dictatorships which will be imposed. In a private meeting on Capitol Hill in mid-June, former Secretary of State Henry Kissinger told a group of congressmen that if the Carter administration's Africa policy is not altered, it will lead to a Communist Africa and/or a race war of such intensity that it could spill over into the U.S.

Dr. Kissinger said that the policy of the Nixon and Ford administrations had been to try to steer a course that would bring moderate blacks into leadership positions in Rhodesia and South West Africa and protect the white minority, while the Carter administration is seeking to encourage the most radical of the terrorists and has no concern whatever for the minority of whites.

When he was recently in Washington, South African Foreign Minister R. F. Botha characterized U.S. policy as one of "trying to gain support in Africa by being more radical than the Russians." He expressed dismay over the fact that, at his meeting in Vienna with South African Prime Minister Vorster, Vice President Mondale, in effect, demanded that South Africa adopt a system of "one man, one vote." Vorster asked Mondale if he could suggest a form of government on the African continent that he could recommend for South Africa to follow. He could not.

Botha said, "Don't talk to us of morality. You wouldn't want any African form of government for yourselves. You apply norms to us that you do not apply to anyone else. We have given full cooperation on Rhodesia and South West Africa. We are moving away from discrimination based on race. It took you decades to move in that direction, and in your country blacks are a small minority. You seem to want us to change overnight. We have been with you in World Wars I and II and Korea. We have done you no harm, yet you make demands upon us that you make upon no one else."

Does the Carter administration seek Communist control of Africa? If it does not it should take these words from Rustin, Kissinger and Botha very seriously indeed.

PROGRAM REFORM FOR THE ELDERLY

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. CHAPPELL. Mr. Speaker, our dear friend and valued colleague, CLAUDE PEPPER, has been an outspoken and effective voice in the fight to improve the lot of older Americans. His legislative initiatives in this area have been a wellspring of hope for this large and growing group of Americans. Indeed, he offers not only leadership but inspiration through his energetic efforts in behalf of all older Americans. CLAUDE PEPPER has often been a lonely voice in the fight to improve the quality of life of this valuable but often ignored segment of our society. Older Americans in all walks of life are indeed fortunate to have a champion such as CLAUDE PEPPER in the forefront of their battle for equity and recognition at the national level. This distinguished American, with the active support of the White House, has provided a ray of hope for the elderly everywhere. I trust my colleagues will show the good wisdom to heed and follow CLAUDE PEPPER's leadership in this vital area.

By seeking to enrich and improve the human conditions of elderly Americans, CLAUDE PEPPER has rendered a service to his country that distinguishes him as a valuable leader in social progress. I am delighted that one of the outstanding newspapers in my district, the Daytona Beach News-Journal, has editorialized on CLAUDE PEPPER's outstanding achievements and I know my colleagues join me in wishing him success as he continues his work to provide a better America for all our citizens. The News-Journal editorial follows:

NEW ALLY FOR THE OLD

They walked to the entrance of the White House with the aid of canes or with the slowed pace of the arthritic or with the timidity of the elderly embarking on an experience so far removed from the norm of their existence.

They made their way to the fabled East Room, scene of so much history, and now they were the honored guests. Maybe here they, too, would make history by standing as the focal point of a new national concern that demands solutions.

These unusual White House guests—some 2,000 of the Washington's area's oldest residents—were serving as the beginning point of First Lady Rosalynn Carter's campaign to make growing old in America as much of a worry free experience as possible. She had summoned them out of their isolation in apartments or nursing homes so we could all be reminded that the old need our attention.

Rosalynn Carter, crowding 50, is just 15 years away from senior citizen status herself, but she doesn't look it. Slim, still fetchingly pretty, vibrant, youthful without the use of artificial makeup, she seems intent on remaining the vigorous woman from Plains, Ga., and the national campaign trail, and to use her charm in fulfilling the role of a responsible woman in a public position, concerned about national problems and not about herself.

She had said at the outset she intends to achieve reforms in programs for the mentally ill and the old. She has launched a new mental health commission, and last week she opened her drive to better the conditions of the elderly.

She summoned to the White House not only the old so they could stand out for viewing in a society that dotes on youth; she summoned those in public life who long have struggled with the problems of aging that seem to accelerate in such a society. Standing out among these long time warriors at Rosalynn Carter's conference was Florida's Rep. Claude Pepper, now 76 and still battling for needed change.

The Nation can give a lot of credit to Claude Pepper for achieving the major rights seniors now have. He was a guiding light in furthering Social Security in the Roosevelt years of social change. He was a lonely champion of national health insurance, losing his seat in the U.S. Senate because he was branded for suggesting such a "socialistic" idea.

Now a veteran of the House after his comeback, Claude Pepper has been vindicated in part by the passage of Medicare but he isn't letting his concern rest with the vindication.

Chairman of the House Select Committee on Aging, he sees dire need for new reforms.

Probably none is more bitter than he, that Medicare, along with the program for the poor, Medicaid, is being made the object of grafters, with the old and the government victimized by those who look on aging with an eye for exploitation. To a person bent upon improving the human condition, such exploitation is abominable.

Claude Pepper is fostering legislation to effect tighter control on these programs to drive out the cheaters. In addition, he's the author of a bill to provide a strong government program for home nursing care. He is convinced that there are millions of old people who would fare better and be far happier if they could remain in their own homes instead of being institutionalized to receive medical attention.

Such a program certainly fits into Mrs. Carter's call for ideas on which she can work to improve life for senior Americans. She knows first hand the worth of home care for the ailing because she saw the devotion to it practiced by her mother in law, Lillian Carter, among neighbors in Plains during her nursing career. Rosalynn Carter's concern for the poor and isolated was formed from first hand observation as a mere citizen of Plains and then as First Lady of Georgia, steeping herself in tackling human problems.

Contrasting in appearance though they are, Rosalynn Carter and Claude Pepper should make a good team in battling for attention to the problems of the elderly. Their devotion to such a cause should bring about reforms to assure Americans that growing old is a time of reward, not a time for exploitation of helplessness.—M.N.C.

SPRING QUESTIONNAIRE

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. COLLINS of Texas. Mr. Speaker, the people of the Third Congressional District of Texas have recently expressed their views on national issues in an overwhelming response to my spring questionnaire. While the Dallas area has always been conservative, this questionnaire showed particularly strong support for maintaining the Panama Canal and the right-to-work law.

Despite Washington's economic problems, Texas and the Dallas Metroplex are thriving. Our consistent economic progress is in large part due to the pro-business environment caused by the dynamic spirit of our people. People all around the country are beginning to recognize the value of our conservative approach and Dallas should be looked to as an excellent model for the rest of the Nation.

The following is a percentage breakdown of responses tabulated district-wide:

1. Do you support the Texas Right-to-Work laws?
Yes, 94 percent.
No, 6 percent.
2. How much net profit do you think the major oil companies make on each gallon of gasoline?
a. 1 cent, 59 percent.
b. 5 cents, 20 percent.
c. 10 cents, 10 percent.
d. 18 cents, 5 percent.
e. 25 cents, 6 percent.
(The correct answer is "a", 1 cent.)
3. Do you favor placing a Federal ban on saccharin?
Yes, 5 percent.
No, 95 percent.
4. Would you support my legislation for energy conservation which bans the use of diesel fuel or gasoline for the busing of public school students beyond the school nearest their home?
Yes, 98 percent.
No, 2 percent.
5. Should the United States give the Panama Canal to the country of Panama?
Yes, 2 percent.
No, 98 percent.
6. How do you rate the F.B.I.?
a. Excellent, 53 percent.
b. Average, 43 percent.
c. Poor, 16 percent.
7. How do you rate the C.I.A.?
a. Excellent, 35 percent.
b. Average, 49 percent.
c. Poor, 16 percent.

In response to my final question, which asked respondents to say what they felt was the most important issue facing the country today, the most frequent answers were "inflation," "too much Federal Government interference in our daily lives," and "the need for greater incentives for research and development of our natural fuel resources." Other frequent responses included "crime," "Government corruption," "lack of fiscal responsibility," and "forced busing."

THE POOR AND GOVERNMENT FUNDED ABORTIONS

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. KINDNESS. Mr. Speaker, as the national debate on Federal funding of abortions continues, and the emotions on both sides continue to run high, I thought I would share with my colleagues a recent letter from David W. Louisell, who is the distinguished Elizabeth Josselyn Boalt, professor of law at the University of California (Berkeley), on this whole complex and difficult subject.

Professor Louisell puts the whole debate in perspective and raises some serious questions about the prior experience of governmental promotion of "abortion on demand" through taxpayer funding under such programs as medicaid.

The full text of Professor Louisell's letter follows:

The slogan "don't deny the poor the abortions that the rich may obtain" superficially has emotional appeal, as does any plea for help for the poor. But it violates elemental principles of logic and humanity, for it comes down to this: because some of the rich kill off their children by abortion for convenience or whim, to equalize matters the public must help the poor do likewise. The humane and loving thing of course is to really help the poor, not help them to kill their children. The latter is repulsive to millions of Americans, for whom the reality of permissive abortion as killing innocent life is not mitigated by the euphemism "termination of pregnancy."

To attempt to make a constitutional Equal Protection argument from this slogan, is preposterous. There are many instances where a person has a constitutional right to do something, but no right to have the public pay for it. For example, one has a constitutional right to possess pornography, but no right to have the public pay for it, or to have it put on public library shelves. One has a constitutional right freely to travel in interstate commerce, but no right to governmental air plane tickets. One has the constitutional right to send his or her child to private school, but no right to have the school supported from public funds.

The Supreme Court in the abortion cases decided June 20, 1977, has at last laid to rest the monstrous doctrine of some lower courts that the Constitution requires government to treat abortion and childbirth as merely two alternative medical methods of dealing with pregnancy. It is hoped that Congress, too, will acknowledge that childbirth, which is life, and elective abortion, which is death, are separated by the deepest of all gulfs. It is hoped that Congress will put an end to the wicked nonsense that because it is economically cheaper to abort than to bear and rear, government must help to abort.—DAVID W. LOUISELL.

UNEMPLOYMENT COMPENSATION COST EQUALIZATION ACT OF 1977

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. VANDER JAGT. Mr. Speaker, on July 13, 1977, I joined a substantial number of Members in introducing H.R. 8291, a bill to assist States which confront unusually high rates of insured unemployment. I look forward to congressional consideration of this measure.

The recession imposed a severe strain upon the Federal-State unemployment insurance system. Along with more than 20 States, Michigan was forced to obtain advances from the U.S. Treasury in order to maintain benefits. Under the Federal Unemployment Tax Act Michigan employers are liable for repayment of $624 million in advances granted since 1975. Repayment failure would result in an escalating Federal unemployment tax being levied on the State's employers.

This obligation poses a substantial hardship for Michigan and other States which experienced extraordinary unemployment in the recession. The debt is a significant disincentive to the location of new businesses or the expansion of existing businesses in these States, and inhibits their economic recovery. In the absence of business growth, these areas will remain vulnerable to severe economic disruptions.

H.R. 8291 employs a cost equalization concept which involves Federal assumption of a portion of compensation costs during periods of extremely high unemployment. It assumes that the unemployment costs of a national recession should not be borne solely by individual States or their employers, but by our society as a whole.

In order to meet the existing fiscal crisis as well as to prevent similar debts from developing in the future, the legislation requires that for each year beginning with calendar 1974 the Treasury would bear a portion of a State's unemployment benefit costs first, if its insured unemployment rate was at least 6 percent, and second if its benefit payments exceeded those of a base year.

This innovative approach warrants thoughtful analysis. Its Federal costs must be reviewed and its implications with respect to the conceptual foundations of the unemployment insurance system thoroughly explored. The infusion of sizable Federal general revenues in this manner into the regular unemployment compensation program is a marked departure from existing practice, and this impact must be fully understood.

Congress must focus upon the financial burdens of unemployment now facing many industrial States and individual employers as a result of the national recession. This legislation constitutes a solid basis for such an analysis.

TESTIMONY OF CONGRESSMAN BINGHAM BEFORE THE SOCIAL SECURITY SUBCOMMITTEE OF THE HOUSE WAYS AND MEANS COMMITTEE

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. BINGHAM. Mr. Speaker, this morning I testified before the Social Security Subcommittee of the House Ways and Means Committee on the future of the Social Security System and President Carter's financing proposals for the system for the next 75 years. Clearly, this is one of the most important subjects facing this Congress. For the benefit of concerned persons in my district and other readers of the RECORD, I insert the full text of my testimony below:

TESTIMONY BY THE HONORABLE JONATHAN B. BINGHAM BEFORE THE SOCIAL SECURITY SUBCOMMITTEE OF THE HOUSE WAYS AND MEANS COMMITTEE

Mr. Chairman and Members of the Social Security Subcommittee. I appreciate the opportunity to testify on a matter of vital importance to all Americans—the restoration of fiscal integrity to the Social Security Trust Funds.

I generally support the President's proposals to prevent the short-run exhaustion of the Old Age, Survivors and Disability Insurance Trust Funds and drastically reduce their long-run projected deficits. I applaud the President's efforts reflected in his proposals to accomplish these difficult goals:

Without additional tax rate increases on the employee beyond that already in present law;

Without impairing the economic recovery this year and next, delaying increases in employer payroll tax liabilities until 1979; and

Without sacrificing the future benefits of workers, assuring them the same proportion of preretirement pay that today's retirees receive.

I also support the concept of supplementing the Trust Funds with general tax revenues. As a long-time cosponsor of Chairman Burke's proposal to supplement the Social Security Trust Funds with ⅓ general tax revenues, I welcome any step in that direction. However, I am concerned about pegging the trigger for countercyclical assistance to the Trust Funds of 6% unemployment. It is my fervent hope that after 1979 when unemployment is expected to go below 6%, that we will never see it above that level again. Congress and the Executive Branch should by then have devised jobs programs to insure that goal. One final point on the use of general tax revenues: it is not a new concept. The Advisory Council which proposed the original legislation recommended it in 1935 and a backup general revenues aid mechanism (allowing the authorization and appropriation of funds as needed) was enacted in 1939 but never used so it was repealed in 1950. The rationale for the mechanism was essentially the same—to avoid tax increases in a recessionary period.

Looking at the long-run aspect of the President's plan, I am concerned about acceptance of a so-called "manageable deficit" of 1.9% of taxable payroll into the middle of the next century. This leaves no room for what I am sure will be necessary changes in the Social Security law to eliminate inequities or liberalize benefits to meet changing economic conditions. I don't expect that, after short-run and long-run financing proposals are adopted, this Subcommittee will retire to oversight duties only and not make further changes in benefits. Of course, under the President's plan the temporary counter-cyclical general tax revenue aid to the Trust Funds could be made permanent beyond 1982 if so recommended by the next Social Security Advisory Council, but again we run into the 6% trigger problem. I strongly believe we need to build in room in the Social Security financing system to allow for some future changes in benefits. Perhaps we would be wise to heed the population experts and begin building a nest egg to deal with the drastic demographic changes expected in the next century. The post-war baby boom population will begin to retire at age 62 in 2007, while the U.S. birthrate is expected to go below the replacement rate to 1.9. If you believe as I do that we should try to limit the Social Security financing burden on employers and employees, then the funding of this long-run deficit and any expansion of reserves to provide program flexibility should be from general tax revenues.

I would like to mention briefly some of the inequities in the Social Security law and some of the liberalizations which I feel are necessary in the future. None of these are new proposals and have appeared in bill form before your Subcommittee and Committee, Congress after Congress. They are:

Easing the eligibility requirements for the blind for disability insurance and allowing them to continue to draw payments, irrespective of their earnings;

Increasing the outside earnings limitation or perhaps totally eliminating it in stages to encourage recipients to supplement their income by working;

Enacting a special Consumer Price Index for the elderly with cost-of-living increases for all recipients effective every six months instead of annually;

Ending all discriminatory provisions based on sex;

Raising minimum benefits levels for the elderly or providing a housing allowance to take care of area cost-of-living differentials; and last but certainly not least

Enacting a National Health Insurance Plan to replace Medicare and Medicaid.

I have no illusions about the costs involved in these changes, but we must face the fact eventually that present Social Security income levels are inadequate. The following article from the New York Daily News which appeared earlier this year will illustrate what I mean:

SURVEY FINDS SOCIAL SECURITY IS MORE LIKE SOCIAL INSECURITY

(By Arthur Mulligan)

You had been paying into Social Security ever since it started in 1936 and, last October, when you reached the age of 65, you retired and you and your wife began receiving $338 a month from the federal government. Great, huh?

Nope! If you were living modestly in an apartment in New York City, it cost you $641 to struggle through the month. That was $206 more—an increase of 47 percent—than it cost in October 1971, according to the Community Council of Greater New York.

The council noted that the 47.4 percent rise had outpaced the 40-percent increase in the consumers price index over the five-year period.

The findings of the council were based on a survey of elderly retired couples who furnish their own apartments, eat out occasionally and take an occasional modest vacation.

Bernard M. Shiffman, executive director of the council, said that the discrepancy between actual minimal budgetary costs and Social Security payments "cannot be ignored as we move forward in the public debate of the many issues raised under the Carter administration's Social Security and welfare-reform proposals."

The survey showed that if the elderly couple eliminated the occasional "luxuries," such as vacations and eating out, it would still cost $381 a month for bare essentials, such as food, rent, heat, utilities, medical and telephone.

When one considers the proposed replacement rate of wages to benefits to be maintained under the President's plan is 45%, it is clearly "Social Insecurity." In the past, the Government's response to this problem has been to discourage the supplementing of one's income through earnings (imposed poverty) and then provide layer upon layer of public assistance—S.S.I., housing subsidies, food stamps, veterans benefits, and Medicaid; and those are just the Federal programs. The result has been a maze of inequities as the different programs clash with each other, especially around Social Security cost-of-living adjustment time. Then when we add such so-called contributory income benefits programs as unemployment compensation, civil service retirement, and railroad retirement into the mix; Congress is faced with pressures to "pass-through," "disregard," or "equalize" benefits between the single program recipients and the multi-dippers. These pressures force the various program costs up and exacerbate the inequities. To give you an example of the extent of the problem—a staff analysis prepared for a welfare reform consulting group established in February 1977 by Secretary Califano found that 18% of recipients got benefits from five or more different programs. I might add that of the 10.6% of Americans over 65 who receive S.S.I., 70% also receive Social Security.

Social Security financing clearly cannot be considered in a vacuum. The billions involved impact on our economy, our tax structure, and our complex income insurance-welfare system. The House Ways and Means Committee has a unique opportunity in this Congress to consider Social Security financing reform, tax reform, welfare reform, and health insurance reform in the context of each other. It is an immense job and I have confidence in the Committee and its Subcommittees to study the matters carefully and come up with a comprehensive, interrelated approach.

LOCKHEED SHIPBUILDING STEEL OVERCHARGES ARE REPORTED LARGER

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. MINISH. Mr. Speaker, with the Renegotiation Reform Act (H.R. 5959) to be considered soon in the House, I thought my colleagues would be interested in the enclosed article from today's Washington Post.

Two points stand out in the story: First, this situation was uncovered by the Renegotiation Board, not by DOD or any of its procurement offices and not by the Justice Department. Second, a Board expert has estimated that, if the product line requirements of H.R. 5959 were in effect, the Renegotiation Board would have recovered $20 million in excessive profits from Lockheed—nearly four times the Board's annual salary and expenses.

The article by Morton Mintz follows:

LOCKHEED OVERCHARGE ESTIMATE RAISED

(By Morton Mintz)

Five weeks ago today, a government official charged that Lockheed Shipbuilding and Construction Co. (LSCC) built seven amphibious transport docks, known as LPDs, for the Navy, but billed the government for enough steel to build at least 12.

Company officials reacted with outrage to the accusation, made by Goodwin Chase, chairman of the Renegotiation Board, the small executive branch agency responsible for recovering excessive profits from defense, space and certain other government contractors.

"That's a lie," said Graham Whipple, president of Lockheed Shipbuilding in Seattle. Moreover, he alleged, Chase's estimate of the amount of missing steel—73 million pounds worth $7 million—was "extremely inaccurate."

Also angered was Robert W. Haack, chairman of Lockheed Aircraft Corp., owner of

LSCC. He said he was shocked by Chase's testimony to the Senate Banking, Housing, and Urban Affairs Committee, terming it "inaccurate, misleading, and unjust."

Committee Chairman William Proxmire (D.-Wis.) asked Chase to provide further documentation for his charges. To get it, Chase in late June sent three board aides—T. E. Driscoll, J. C. O'Connor and Henry J. Miller—to Seattle for three days to check both LSCC and Navy records and sources.

Their principal conclusion: the amount of steel unaccounted for was not the 73 million pounds originally alleged, but 117.4 million pounds, valued at $10.2 million—enough to build nine extra LPDs.

Chase reported the conclusion in a letter hand-delivered to proxmire late Friday. The "denials and protestations" of Whipple and Haack "are simply not valid," Chase said. "I stand foursquare on my statement and would be pleased to have it subjected to investigative scrutiny."

A spokesman for LSCC, asked for comment, recalled last night a statement made in June by Lockheed Chairman Haack: "The Renegotiation Board has not to date inspected applicable detailed books and records of Lockheed Shipbuilding."

The spokesman indicated that Haack referred to an inspection on the company premises. However, the board aides said they had found the relevant records in the custody of the Navy.

The seven LPDs delivered to the Navy—each containing between 12 million and 14 million pounds of steel—were commissioned between October, 1968, and July, 1971.

In Seattle, the board investigators found that the majority of the steel intended for the LPDs had been stored at the Leckenby Structural Steel Co.

Frequently, steel was transported from Leckenby to the shipyard without records being made, board aide Driscoll said in a memo forwarded by Chase to Proxmire.

"From the time the steel was booked or billed to the government until the Navy determined the weight of the ships, accountability is next to impossible to determine due to lack of documentation," Driscoll wrote.

"We know that millions of pounds purchased were not incorporated in the ships," Driscoll continued. He named two former executives who, he said, could have shed light on the situation:

H. P. McLaughlin, who had been president of the LSCC predecesor firm, Puget Sound Bridge and Dry Dock Co., when the Navy awarded the LPD construction contracts, who was president of Leckenby when the ships were built and "who is living in South America [and] is not available."

Robert N. Waters, a former executive vice president of LSCC, who in 1972 became treasurer and a vice president of Lockheeed Aircraft. Three years later, in 1975, the Lockheed bribery scandal began to unfold. In August of that year, Proxmire scheduled a hearing on whether there had been violations of the law under which the government had guaranteed $250 million in loans to Lockheed.

On Aug. 22, 1975—three days before the day of the hearing—Waters, 54, shot himself to death. His brother Norm, blamed business pressures. He said Robert had left a note in which the last words were, "I'm just too tired to go on."

The charges and countercharges in the Lockheed case are a visible aspect of an intense, prolonged and mostly behind-the-scenes struggle over legislation to guarantee the Renegotiation Board's survival and strengthen the ability of its staff—177 persons—to recover excessive profits.

The most controversial provision in the legislation—which Senate Banking plans to mark up Thursday—would require the board to look for possible excess profits in each of a contractor's product lines. This would prevent conglomerates such as Lockheed from consolidating various cost and profit figures from unrelated product lines, as they do now.

In Senate hearings in 1973, Chase, then a member of the board, showed that by filing consolidated reports for fighter aircraft and space gear, McDonnell Douglas Corp. avoided making refunds to the government of at least $15 million for 1967 and $16 million for 1968.

In his June testimony this year, Chase said that the board—while dominated by appointees of President Nixon—allowed Lockheed to file a consolidated report for fiscal 1971 in which it claimed a $68 million loss. Actually, Chase said, the company had a $4 million profit.

To transform the profit into a loss, Chase said, Lockheed used large losses claimed by LSCC as offsets to large profits generated by other affiliates engaged in defense production totally unrelated to shipbuilding.

After the hearing, board aide O'Connor, a financial analyst, made a further study in which he concluded that if the pending legislation had been in effect in 1971, Lockheed would have owed the government a refund of at least $20 million—more than triple the board's current budget of $5.6 million.

O'Connor said that, in 1971, the return on stockholder capital invested in Lockheed Missile and Space Co., which had missile sales to the government of $727 million, was 246.5 per cent.

Citing that return to Proxmire, Chase said, "Lockheed's indignation, charges of unfairness and platitudes of abuses by the Renegotiation Board impress me at the level of zero."

The principal advocates of the legislation are President Carter and legislators including Proxmire and Rep. Joseph G. Minish (D-N.J.).

Seeking to kill the legislation are not only companies mainly dependent upon defense contracts, such as Lockheed, but also trade groups, including the Financial Executives Institute and the Iron and Steel Institute, and numerous individual subcontractors that have launched a letter-writing campaign to Capitol Hill.

In addition, efforts to water down the legislation or to win exemptions from it have been made by, among others, the American Bankers Association, in behalf of banks, and Sun Oil Co., in behalf of oil companies.

CONFERENCE REPORT ON THE TREASURY-POSTAL SERVICE APPROPRIATIONS BILL

SPEECH OF

HON. ROBERT N. GIAIMO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 14, 1977

Mr. GIAIMO. Mr. Speaker, the conference report on the Treasury-Postal Service appropriations bill for 1978 is consistent with amounts included in the first budget resolution for fiscal year 1978. It is consistent with the subdivisions of budget authority and outlays made by the appropriations committee under section 302(b) of the Congressional Budget Act.

The conference report recommends appropriations of $7,478 million, $311 million less than the section 302(b) subdivision. Estimated outlays for the accounts within the purview of this bill would be $7,598 million, $279 million less than the section 302(b) subdivision. These balances of budget authority and outlays are more than sufficient to fund anticipated supplemental appropriations which will have to be made for claims and judgments. Thus, the conference report is without objection from the point of view of the congressional budget process.

The conference report recommends a number of appropriations for certain White House accounts and executive office functions which were stricken from the bill when it passed the House. These amounts, however, were anticipated in the budget resolution.

Mr. Speaker, I urge all Members to support the conference report.

REPEAL OF THE HATCH ACT HAS DANGEROUS IMPLICATIONS

HON. CHALMERS P. WYLIE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. WYLIE. Mr. Speaker, my attention has been called to a keenly analytical column by Mr. Neal R. Peirce, a respected writer, pinpointing the dangerous implications of the Hatch Act revisions passed a few weeks ago by this body and now pending in the Senate.

The column, published in the Baltimore Sun of July 18 states with clarity the very reasons I felt compelled to vote against what amounted to a repeal of the Hatch Act without any consultation with the Federal civil servants who, if the bill as passed by the House becomes law, would lose the protection provided for them by the act as originally passed.

As Mr. Peirce points out, there is no evidence that Federal workers are clamoring for more political "freedom" than they already have. The evidence is that when asked to perform a political act, they can easily employ the shield of the 1939 law, saying "Sorry, I am hatched."

The column follows:

REPEAL OF THE HATCH ACT HAS DANGEROUS IMPLICATIONS

(By Neal R. Peirce)

WASHINGTON.—Organized labor didn't win quite the clear-out victory advertised in the media last month when the House voted, 244 to 164, to remove most of the restrictions on political activity by federal government workers, virtually repealing the Hatch Act of 1939.

Before sending the Hatch Act repealer to the Senate, where it faces a real dogfight, including a possible filibuster, House members displayed genuine nervousness about the abuses that could result from total political "liberation" of the 2.8-million-member federal work force.

Over labor's protests, they watered down the bill by approving an amendment by Representative Leo Ryan (D., Calif.) that would keep as many as 280,000 federal workers "hatched." And it's in that group that some of the worst abuses might occur—law enforcement personnel, as well as federal employees who award contracts or conduct audits, investigations and inspections.

"It makes it easier to sell the bill to the American people," a White House aide told me. "You won't, for instance, have the specter of IRS [Internal Revenue Service] agents actively managing campaigns on weekends and at night, and then during the

day going out and auditing their opponents' returns."

Even with the Ryan amendment, though, the Hatch Act repeal has dangerous implications for federal workers and the average citizen alike. Subtle pressures could be exerted on government workers to campaign for or contribute to the campaigns of their bosses or co-workers, with little chance of proving the type of coercion prohibited in the law.

Critics say Hatch Act repeal is a pure power move by government employee unions and their AFL–CIO allies, anxious to recruit new political foot troops. Many house Democrats saw the bill as a way to throw a bone to the unions, previously rebuffed on common site picketing. Except for the American Civil Liberties Union, it's hard to find a single nonlabor organization in favor of repeal.

Republicans are overwhelmingly opposed, fearing their political ox could be gored by a hostile federal work force. But respected nonpartisan organizations, including Common Cause, the National Civil Service League and International Personnel Management Association (IPMA), are also opposed, despite the Ryan amendment.

The president of Common Cause, David Cohen, calls the bill "a politically arrogant move on the part of the Carter administration and Congress," taken without consultation with the federal civil servants who would lose their Hatch Act protections. "The central challenge of the Carter administration is to build respect for government," Mr. Cohen says. "So their first act is to politicize all aspects of the civil service."

The argument for Hatch Act repeal is that the present law is harsh and overly restrictive, allegedly making second-class citizens of government workers. "It is nothing less than scandalous and self-defeating to exclude 2.8 million of our brightest, most talented citizens from the political process," says Representative William L. Clay (D., Mo.), the chief House sponsor.

But the Hatch Act, opponents of repeal say, already permits broad political activity by federal workers. They can vote, express their political opinions as private citizens, wear political buttons and display bumper stickers, participate in nonpartisan elections and even belong to political organizations and attend political conventions as long as they aren't officers or organizers. They may not run for office, manage campaigns or handle political funds.

Representative Joseph L. Fisher (D. Va.) recalls that when the Hatch Act was passed in response to political coercion of Works Progress Administration employees in the late 1930's, civil servants in Washington viewed it as "a truly landmark piece of legislation for their protection and betterment." Today, there's no evidence federal workers are clamoring for political "freedom." Indeed, when asked to perform a political act, they can easily employ the shield of the 1939 law, saying, "Sorry, I'm hatched."

The result has been a federal work force that the public may perceive as unresponsive or inefficient—but not politically motivated.

Even while "hatched," federal workers and their unions have been spectacularly successful in getting Congress to raise salaries and award inflation-proof pensions that would be the envy of most private citizens. Without Hatch Act protections, the political machine organized for ever-increasing salaries and benefits might be well nigh invincible.

The unions defeated a compromise proposal by Representative Fisher, whose district has the most federal workers outside of Washington. Mr. Fisher would have let federal employees engage freely in politics at the state and local level, while continuing the Hatch Act bars to participation in presidential or congressional campaigns.

As passed by the House, Mr. Cohen says, the Hatch Act repealer "doesn't come close to drawing a reasonable balance between the values of political participation and a nonpoliticized civil service." One can only hope the Senate will have serious second thoughts about the matter.

SPEECH BY NEWSPAPERMAN DEXTER D. EURE

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. STOKES. Mr. Speaker, I rise on this occasion to bring to your attention and to the attention of my colleagues in the U.S. House of Representatives a recent speech made by a well-known Boston newspaperman and community activist, Dexter D. Eure.

Mr. Speaker, for a quarter century this dynamic individual has been involved in virtually every aspect of the newspaper publishing business. He is currently the assistant promotion manager at the Boston Globe Newspaper Co., one of the very few black managers in the white-owned press nationwide.

Because of his long record of achievement in the industry, Mr. Eure has spent a great deal of time and energy encouraging young people to consider journalism as a career. Many of the young black reporters on the Nation's major newspapers and journals have benefited from his guidance and expertise.

On June 22, 1977, Mr. Eure was invited to address journalism majors at the University of Kansas at a media workshop. Mr. Speaker, I was greatly impressed by Mr. Eure's candid remarks and I would like to share them with my colleagues at this time. I urge them to give consideration to his thought-provoking message.

The speech follows:

KEYNOTE ADDRESS BY DEXTER D. EURE, SR.

I am personally flattered by this opportunity to participate in this kind of workshop that brings to the University of Kansas some inspiring young people from the great midwest of Kansas and Missouri who are committed to making their impact upon the fourth estate.

I am not really a journalist—say in the sense that you appreciate Bob Maynard, a distinguished alumnus of this Journalism School, and now a ranking member of the editorial board of The Washington Post—or Tom Johnson of The New York Times, Chuck Stone of the Philadelphia Daily News, Francis Ward of The Los Angeles Times, Bob Johnson of JET Magazine, Vernon Jarret and Barbara Reynolds of The Chicago Tribune, John Dotson of Newsweek—or from my own shop in Boston, Editorial Page member John Robinson, Urban Editor Ron Hutson or Assistant Metropolitan Editor Carmen Fields.

For a while I wrote a column that appeared weekly on the Globe's op-ed page, largely because I probably knew more about Boston's black community that anyone else around the City Room. The expertise, which I developed as propaganda minister for the Boston Branch NAACP, during the early part of the turbulent sixties.

For the last ten years, I have been associated with top management. You might say that I've been the SPOOK who sits by the publisher's and editor's door.

Like everything else, the media, especially the newspaper industry, is caught up in a lot of changes—both physically and spiritually. The burden of adapting to the changes lies mainly with editorial practices and policies.

The serious daily newspaper is in the peculiar position of being both a follower and a leader.

It is a follower in that it must cater to a wide variety of tastes, respond to public attitudes and opinions and reflect the concerns of its readership.

All the media, including newspapers, are businesses which must generate profits through advertising and circulation gains. To do this they must feed a broad public appetite for news and features.

In this sense they are tied to public tastes and must follow them sufficiently enough to win increased linage and circulation, more viewers, listeners and readers and additional time slots to stay out front in a fiercely competitive arena—always!

The serious daily newspaper is also a leader when it commits itself to accountability. Newspapers must at all cost and at all times be answerable for what they print, they must be less edgy and less defensive than they have been in the past about criticism. They must provide access for opposing views—through such devices as letters to the editor, ombudsmen, corrections and an overall willingness to admit that they can be wrong.

A leadership position is also earned through a newspaper's credibility. This relates to how well we do our job—the care we take—the objectivity and balance of our reporting—and the good sense of our editorial judgments.

Meeting the demands of leadership can make good newspapers viable. That is why they are in business—that is really what they have to sell.

I understand that you who have been invited to participate in this workshop are a most creditable group. That you are quite serious about committing yourselves to serious study for these two weeks with instructors and journalists who will be conducting the workshop. I hope each of you will gain some clearer insights about what it takes to become a competent journalist because that's the only kind that counts!

I have been informed that during these two weeks you have concentrated on fundamentals and basics—and have been allowed to participate in open discussions, expose you to dealing with problems of reporting, techniques of the profession and related matters.

So I think it is important at the outset to pause and comment on minority-member status.

Being a black soul brother or sister has nothing to do with your being at this workshop.

Being serious about seeking a career in journalism, is the prime reason for being here on the campus of the University of Kansas today. You are interns willing to seek the best education and training available that prepares you to compete as professional journalists.

You cannot qualify if your grasp of English is insufficient. You have to know how to structure a sentence and understand clearly its full and true meaning.

You have to be able to gather your facts and information in a relatively short time, put it in written form and then fight with your editors to get it printed.

Now the editorial judgment weighs whether or not your work is professional and sellable. Simply stated—someone has to want what you are selling—and be willing to buy what you have written at the local newsstand. Being black isn't going to matter during this period.

As for the immediate concern here today

and tomorrow, it would be unconstructive to rap about how racist our society may happen to be or how the segregationists are keeping us all "deprived."

I would hope that you are here to deal with the mission at hand—that of learning all you can about professional journalism—and how you best can attain sufficient smarts and techniques for moving in upon the world of journalism. Only in that way will your influence make its mark from a minority perspective. This is the most direct way that I know of to help you get the "man" off your back.

Some literary enthusiasts—during the burning sixties and early seventies—who played roles in bringing about some social changes, have been off target with some of their views and prescriptions.

Far too much was written about black rage and brought about emotional responses that contributed to non-productive acts.

For example—"Don't accept the white man's education"—"It isn't necessary to know how much two plus two equals."—"Don't read all that fancy language and stuff"—

Recently, a newly appointed black director to one of New England's largest banks, Samuel R. Pierce, commented: "We need blacks who want to push ahead in the world of business, because in this country—the bottom line is business, not poetry and singing."

For the newspaper industry which is very much snow white, there isn't a single black heading a major metropolitan newspaper department—not in their editorial, advertising, circulation or production departments. So you can readily understand why your work here means that you have to get your "act" together.

The lack of minorities in decision-making positions represents a challenge—perhaps it's the newspapers, too, that should "get their act together" for you, the students here today.

Let's get down to this important fact—you've been here to take full advtange of the learning challenge that is being offered by this workshop. If you have to exploit, cajole or move some clowns out of your way, your time should be dominated by bombarding everyone with questions about what makes journalism tick.

And, if necessary, don't hit the blinkers until you have secured the maximum responses about the inner-workings of the journalism profession. Your attentiveness, has to be total commitment to LEARN—and learn—and learn!

Now I can imagine that many of you, having just gotten out of school—and most you being tired of being preached to, instructors constantly on your backs, and Mamma and Daddy never easing up with the lecturing—and then comes along this big turkey, me, who appears to be merely on a one-way dialogue trip.

Let's talk about how you can survive in journalism—and how you might attain your proper niche with a newspaper or some other medium.

Today there are more than 64,000 college students studying journalism in the post-Watergate era. Some forces argue that the minority students among the 64,000 have caused a lowering of standards. The charge seems patently false and nowhere supported by facts.

Way back in 1968, the media was taken to task by the Kerner Commission Report about being the major influence to inflaming the race riots by its insensitive reporting. A distinguished black journalist, Lerone Bennet, Jr. of Ebony magazine, commented: "It is impossible to speak of mass media in America without adding the specification of white or black media. It is impossible to speak of general publications when they are edited for white or black."

Bennet elaborated further: "This is a fundamental fact of life and of the communications in America: divided public and divided communities. If we confront the implications of the fact, we realize that white-oriented media cannot solve the race problems in America because white-oriented media are part of the race problem."

To intelligently deal with social changes—the role that the media can perform means that publishers and editors have to continue their "catch-up" affirmative action programs by actively recruiting and training. I do mean educating with tender loving care—and understanding—where minority/journalist interns like yourselves, can come aboard to help close so many of the gaps caused by insensitivity in News Rooms—and provide interpretive bridges to all segments of the communities they serve.

Look at the plight of the country today—and the entire world for that matter. Media, plays a large part of the communication negligence and abuse that deprives our society from learning about a just society.

Take for instance, what some of the leading newspapers and columnists are doing to get Ambassador Andrew Young fired by President Jimmy Carter.

"He talks too much", they say—"He should be more diplomatic"—"He's in bed with all the blacks in Africa." "And he always has to retract his controversial remarks—or have them clarified."

I say that "cousin" Andy—is right on the case. I think that he is telling the truth—and our State Department and nation, really are not prepared for this kind of honest conduct. The Ambassador, in my judgment, displays keen intellect.

Institutionalized racism is very much what America and the civilized world is about—Ambassador Young didn't create this environment—or even invent it! I happen to think that President Carter is fortunate to have Andy on his team, someone who is candid enough to deal with the stark reality and conditions, even if he has to retract a truthful comment for political reasons.

For those of us in this audience, who are classified "minority-member", I think it is clear that we want to participate and enjoy all the goodies of this society.

These young journalist interns—are going to have to fight for the right to present their beliefs and thoughts via the written word—about black issues, which are really "have-not" issues and are fundamentally the same for anyone that is being excluded.

Oh yes, there have been some social gains—the fact that this journalism workshop is being underwritten by a grant from the Newspaper Fund gives testimony that the industry is aware that minorities are far too absent from the mainstream of the newspaper profession.

Let's make it known loud and clear that the industry remains cheated of great talents of minorities who are denied the opportunity to contribute.

Many Americans, particularly black Americans—feel that they have been and are still being wronged by the press—that they cannot make their point of view known.

This is an abuse of press power.

We know of the petty ways the press can oppress—the misleading or damaging headline, and the slanted way news comes out to reinforce the publisher's bias or anger. It comes right into your lap, here—You have to move in and influence the changes that will truly make the fourth estate—an honorable and fourth member of Society.

Let's also understand that the establishment media—is controlled by powerful organizations that are committed fully to barring you from taking over without a real showdown war.

These same people are in tune with majority rule. And as majority-members, with lead-time advantage over his or her competition, they are not going to unselfishly handicap themselves by allowing the other guy a fair and equal chance at taking first place.

We can be real proud that a fellow journalist—Alex Haley with "Roots"—helped a lot of us to discover who we are and where we came from. I recommend that we now take another giant step forward—and plant the "seeds" for necessary replacement.

I thank you for inviting me here.

HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. YOUNG of Florida. Mr. Speaker, today I had the opportunity to testify before the Subcommittee on Social Security of the Committee on Ways and Means, in support of three bills that I have introduced in the 95th Congress. The problems facing our social security recipients are of long standing, Mr. Speaker, and the resolution of those problems is a primary responsibility of this Congress. So that my colleagues may be fully aware of the intent of my bills, and in an effort to encourage prompt and effective action on the bills by that subcommittee, I respectfully submit the full text of my testimony:

TESTIMONY—COMMITTEE ON WAYS AND MEANS

Mr. Chairman, thank you for the opportunity to appear before your committee today to testify on behalf of three bills that I have introduced in the 95th Congress. Regretfully, however, I must tell you that I also introduced these same three bills in the 94th Congress, and one of them in the 93rd Congress, and I am as frustrated, as I am sure most of our Social Security recipients are, that Congress has not taken the initiative yet, to correct the unjust situations that these bills were designed to correct.

Thousands, probably millions, of words have been spoken before the Members of this Committee on behalf of the plight of Social Security recipients . . . so many words that, as tragic as their individual situations are, their overall story sounds like a broken record. But just because a problem isn't a new problem, doesn't mean that it isn't an urgent problem. In fact its "longevity", in this instance, only adds to its urgency. The longer these injustices continue, the more devastating the results for elderly people who find themselves deeper and deeper in debt with every passing year.

The term "senior citizen", depending on who is using it, can refer to people ranging in age from 55 to over 100. This is a 50 year lifespan, and it is an age range into which some of us already fall, and many more will reach before very much time has passed. When we legislate for "senior citizens", Mr. Chairman, we are not legislating for some obscure group of people. We are legislating for our friends, our neighbors, our relatives, and, in some cases, even ourselves.

In many countries of the world, the nation's elderly are the most revered of their citizens. They are treated with the greatest respect, called upon when difficult decisions must be made to take the greatest advantage of their acquired wisdom and experience, and cared for revenently by their families and governments. Are America's elderly any less worthy? Of course not!

One of the most unfair sections of our present Social Security law, in my opinion, is the earnings limitation. My bill H.R. 1389 amends Title II of the Social Securtiy Act to

increase to $4,800 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is permitted each year without deductions from benefits.

Just for a minute, Mr. Chairman, I would like to ask you, and the Members of your Committee to mentally celebrate your 65th birthday, as it would occur if you were an American citizen employed in the private sector. You wake up this morning, and like to or not, you are retired. Your income from this day forward will come to you in the form of a Social Security check once a month . . . a check that will be considerably smaller than the one you've been accustomed to getting every month of your working life. The people in your office wave a hopefully sad "goodby", and caution you to catch those fish, hit those golf balls, and play with those grandchildren to your heart's content. "Never give us another thought", they caution, "from now on we'll take care of everything that is important."

How do you feel? Probably not very good. The prospect of 20 to 40 years with nothing to do but grow older is a very bleak picture. But, you are a resourceful person . . . there is plenty to be done, and there are plenty of good years in you left to do them. Do you devote your life to golf, fishing, the grandchildren, and a few charitable activities? Perhaps you do, until you find that your own income is so limited, your lifestyle so drastically reduced, and your mental stimulation so low, that if you are to be at least comfortable in your "retirement", you must do something to supplement your income. Having made this decision, you set out to find a job, and not only do you face the problem of being overage for most kinds of employment, but if you do find a job, almost certainly it pays more than the law allows you to make. If you take it, you lose your social security benefits, which you paid for all of your working life and should be entitled to for as long as you live. If you don't take the job, you are faced with years of boredom and a less than ideal income.

It is a vicious cycle, Mr. Chairman, and one that should hit home to all of us. And by allowing it to continue, we seem to be punishing our "senior citizens" for living more than 65 years. $4,800, Mr. Chairman, is $400 a month, or about 40 hours work a week at the minimum wage. If over your lifetime, you have invested enough money to earn $4,800 a year in interest, the government doesn't penalize your social security payment. You can have both with no argument from anyone. Why is the retiree who wants to work for his fiscal stability and mental sanity any less entitled to it than the one who "clips his coupons"? It is time for us to correct this injustice, Mr. Chairman.

It has been time for a long time, but the fact that we haven't done so to date, doesn't mean that we can't accomplish it now. It is my great hope that the 95th Congress will act to raise the earning limitation for retirees to at least a minimum wage, and give our retirees back the opportunity to earn their self respect, and the ability to provide for their own comforts in the years that they are perhaps most entitled to them.

Another small, but devastating injustice in our Social Security program can be eliminated by the passage of my bill H.R. 1390, a bill to amend Title II of the Social Security Act to provide that a beneficiary shall, if otherwise qualified, be entitled to a prorated benefit for the month in which he (or the insured individual) dies. Social Security payments are earned by our citizens during their working years and are supposed to be paid for the rest of their natural lives, but our law now reads that if the recipient dies during a given month, his Social Security check for that month must be returned in full to the government. My bill will at least allow retention of the money for the days of the month which the recipient lived, and surely the grieving family, with all of the problems and traumas involved, are entitled to that.

The final bill for which I offer testimony today, is H.R. 2897, a bill to amend Title II of the Social Security Act to provide that a marriage or remarriage of an individual entitled to a widow's, widower's, or parent's insurance benefits shall not terminate such individual's entitlement to benefits or reduce the amount thereof. The mental picture of a retired couple enjoying their leisure years, doing all the things they always wanted to do together when they were too busy raising their families, is a lovely picture which for some does come true. For many others, however, one partner outlives the other and is left alone in what can be a lonely, friendless and insecure world. After some period of adjustment, some find another partner who would like to share those lonely and idle years. For those who are fortunate enough to be in that situation, it is a shame that many must hesitate to take advantage of it because to do so would mean a drastic reduction in their already meager income.

My bill does not provide that a widow, for example, already receiving Social Security benefits, who then remarries, would continue to receive her widow's benefits plus benefits that she might receive as the spouse of her new husband—because no one is allowed to receive more than one Social Security benefit each month. What it does mean, is that a widow would receive either the amount she had been receiving as a widow, or the amount she would be entitled to on her new husband's earning record, whichever is greater. The effect is to guarantee that no qualified beneficiary will have their Social Security benefit reduced or terminated because of remarriage. I am deeply concerned, Mr. Chairman, that this inequity of the Social Security Act, in some cases discourages a retired couple from marrying, or forces them to adopt a lifestyle of coahabitation without the benefit of marriage that is distasteful to them and to society. To force such an alliance, or an alternative life of loneliness because of an unfair law, is unworthy of us as individuals or as legislators.

Our Government, and particularly this Congress, Mr. Chairman, spends a great deal of money for causes far less justified than those outlined before this Committee today. It is time we pay attention to the needs of our "senior citizens", and make the solution of their problems a priority in our society instead of an afterthought. I urge this Committee to consider favorably H.R. 1389, H.R. 1390 and H.R. 2897, and to recommend their passage by the House of Representatives as expediently as possible.

CONCERNING CAPTIVE NATIONS WEEK

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. CONABLE. Mr. Speaker, this week we observe the 19th anniversary of Captive Nations Week. As Americans we have been blessed with freedoms and liberty unknown to many nations throughout the world. Nations which yearn in vain for similar blessings should have our special remembrance this week.

Our Nation seeks better understanding with the Soviet Union and other Communist countries through trade, science, and negotiations as a contribution to lessened world tensions, but we cannot forget those who are denied basic civil rights. Forced deportations, broken families, and the lack of essential freedoms of speech, press, assembly, and religion are burdens our hearts cannot carry, sorrows our hearts cannot ignore.

As a privileged nation we should support the human rights of the oppressed people of the world and pray for their freedom. With our heritage as a free and open society goes the obligation of keeping hope alive among the downtrodden everywhere. The Helsinki accords, though controversial, cannot be ignored by the Communist world without people of good will drawing the obvious conclusions and basing their politics and their commitments on the lessons to be learned.

I join my colleagues today in dedicating myself to continued concern for the people of the captive nations of the world.

WORKFARE WORKS

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. FINDLEY. Mr. Speaker, I was intrigued by an article appearing in the July 18, 1977 issue of U.S. News & World Report which describes efforts now underway in at least 17 States to strengthen welfare work requirements. I was particularly impressed by the apparent success of Utah's "workfare" program.

I commend this article to the attention of my colleagues, and ask that it be included at this point in the RECORD:

LABOR—WHEN STATES TELL PEOPLE THEY MUST WORK FOR WELFARE

Utah's "workfare" program has blazed a new trail. Now many other States are testing plans aimed at the same goal: putting people on relief to work.

The idea that able-bodied people should be required to work for their welfare money is spreading rapidly across the U.S.

One such "workfare" program attracting nationwide attention is operating smoothly in Utah.

So successful is the Utah plan in moving people off relief rolls that half a dozen other States are taking a look at it as a possible model for programs of their own. Some believe it might even be useful to the Carter Administration in its search for national welfare reforms.

Besides Utah, at least 16 States have stiffened their work requirements or added new work incentives in the last two years. A number of other States and many cities have some kind of program aimed at putting relief recipients to work. And the Federal Government's Work Incentive Program—known as WIN—is steadily stepping up its pace in finding jobs for welfare recipients.

ON THE JOB, ON THE DOLE

The Utah plan is unique in several respects. It is sterner and goes further than most other programs. It is mandatory. And it doesn't just train people for future jobs. It actually puts them to work while they are still drawing welfare payments.

In most places, such work requirements apply only to people on programs financed by State or local funds, such as "general assistance" or "direct relief."

Utah's plan applies to those who receive Aid to Families with Dependent Children

(AFDC), a huge, nationwide program that draws heavily upon federal funds. Utah officials say theirs was the first work requirement approved by the Department of Health, Education and Welfare for application to AFDC.

"Utah is the first State where people earn their welfare grants," claims the program's co-ordinator, Usher T. West.

Officially, Utah's method is called a work-experience and training program. But its training is not the usual type done in classrooms. Trainees learn to work by actually working. If private employment cannot be found for them, they are put to work for public agencies, doing jobs that are needed by State or local governments. They serve as teachers' aides in their neighborhood schools or plant trees in public parks, for example. They work three days a week but remain on the welfare rolls until they find regular jobs.

Only ill, aged or disabled persons or mothers with children under 6 years of age are exempted. All others are told to take one of the jobs offered to them or lose all or at least a part of their welfare payments.

Those who participate in the program are helped by the State to find jobs in private industry. Many are doing so.

In one six-month period, from July through December of last year, 782 people were were assigned to the work program. Of that total, 311 were removed because they did not perform as required. But 11 people were hired by the sponsors who gave them their training jobs, and 218 found other kinds of employment. In addition, 109 mothers found enough work to reduce the amount of welfare funds needed to support their families.

"FEELING GREAT"

A 32-year-old mother of two children was hired recently as a full-time office worker in Salt Lake City's assistance-payments administration, the same office that handed her welfare checks for 13 years before she took job training for two years. During the instruction period, she says, "even though I was getting welfare I felt I was working for it." And now, she adds, "With my new job I am barely making ends meet. But I feel great because I am making it on my own."

Utah officials point out that communities as well as individuals benefit from the program. Some agencies, such as private nonprofit organizations that are constantly short of funds, report that the services of welfare recruits have been invaluable.

One self-help agency in Salt Lake City, for instance, had the funds to buy insulation for the homes of elderly poor people, but lacked money to hire workers to install it. Welfare trainees have been assigned to the job. Another self-help group put trainees to work repairing the homes of elderly Salt Lake City residents.

A QUESTION OF LEGALITY

Some critics charge that Utah's job-training effort is nothing more than a thinly disguised public-works program that uses underpaid welfare recipients in place of regular employes.

Legal-services lawyer Lucy Billings says she is considering filing a court suit against the program on the ground that it violates federal regulations that people cannot be required to work for their welfare payments.

It took Utah three years to get its program approved by the U.S. Department of Health, Education and Welfare. For 18 months, HEW withheld federal contributions to Utah's program for Aid to Families with Dependent Children. It cost the State almost a million dollars to make the AFDC payments entirely from State funds. But many Utah people feel that it was well worth the cost.

Utah officials concede that their program might not work so well in other parts of the country, especially in big cities where population is denser and welfare rolls are much larger. Of Utah's nearly 1.2 million residents, only 39,000 are getting money grants of aid. Also, it is suggested, labor unions in more-industrialized States might oppose welfare people being given jobs that might be sought by union members.

But in the view of Robert W. Hatch, a field director for the Utah assistance-payments administration, public acceptance of the idea that welfare recipients should work for their money is spreading throughout the nation. Says Hatch: "I think that in time, putting welfare clients to work will become a common practice."

In fact, a trend in that direction is already apparent.

Oklahoma has a 2-year-old work-experience program that was passed by the legislature at the urging of Governor David Boren. It requires that anyone 18 or older in a family receiving Aid to Families with Dependent Children must visit the local employment office and sign up for a job that's available.

In 1975, there were 2,300 persons participating in the Oklahoma program. Many worked in State institutions, hospitals or in county offices for $5 a day to offset expenses, plus their regular AFDC checks.

"They are usually placed in jobs where they can easily be trained and hopefully be picked up by the business community," says a State spokesman. Last year, more than 700 persons were placed in permanent positions outside the government.

THE RISK OF REJECTING WORK

The Texas legislature recently passed legislation to supplement the Federal Government's Work Incentive Program. Welfare recipients must register for work, and if they reject a job without a good reason, their benefits may be cut off after an administrative review.

North Carolina's legislature this year passed a law requiring welfare recipients to register for work.

As the law's sponsor, State Senator E. Lawrence Davis of Winston-Salem, explains it: A family head who fails to register is taken off the rolls. But aid to his or her children will continue as "protective payments" made through some other person or perhaps an agency, such as a church. Since the law did not take effect until July 1, it's too soon to tell how effective it will be.

A PART-TIME WORK FORCE

In the State of New York, all employable persons receiving general welfare-assistance payments have, since May 1, been required to work three days a week in a local-government agency if jobs are available.

There are about 60,000 such persons, and State Social Services Commissioner Philip Toia says: "We're hoping to develop jobs within local-government agencies for at least 30,000 of those employables within the next three months. We're hoping that, when faced with working three days a week, many will go out and get a full-time job."

One problem is that four fifths of the employables covered by the program are in New York City, where in the last two years thousands of public employes have been laid off in the city's effort to cope with a financial crisis. "I anticipate some complaints from the municipal workers' unions," says Assistant Welfare Commissioner Irwin Brooks. However, according to a *New York Daily News* poll published May 23, about 87 per cent of residents in the New York metropolitan area approve of the new workfare program.

Work-for-welfare bills similar to New York's are pending in several States, including Connecticut and New Jersey.

Massachusetts is one of the States studying the Utah plan of mandatory work for heads of AFDC families. Since 1975, Massachusetts has barred all employable persons from direct relief or general-assistance rolls. The State of Rhode Island followed suit last September, cutting its relief case load by more than 20 per cent.

MILLION-DOLLAR SAVINGS

Bridgeport, Conn., started last year a plan requiring employable people receiving welfare to work one or two days a week, depending on the amount of their aid. About 300 persons out of a case load of 1,330 are now working. If they fail to work for a period of two weeks, their benefits are automatically terminated.

Result: Bridgeport's case load has been cut 45 per cent in a year's time, with a million-dollar reduction in the city's welfare budget.

Milwaukee County, Wis., has a locally run pay-for-work program requiring all able-bodied welfare applicants to take specially created jobs in municipal or county departments. They are paid $2 an hour for a 32-hour workweek.

One experiment being watched closely is a "supported work" program run by the Manpower Demonstration Research Corporation, a nonprofit, tax-exempt organization set up with the support of the Ford Foundation and five Federal Government agencies—principally the Department of Labor.

It has 15 projects in 13 States that provide jobs, mostly with public or nonprofit agencies, for more than 2,000 marginally employable people, including AFDC mothers. Instead of welfare checks, they get paychecks at minimum-wage rates.

A mixture of welfare funds and grants is used to finance the program. The workers will be helped to find permanent jobs in private industry once they have developed the necessary skills.

Many towns and some States have found that the administration of work-for-aid programs is too costly to justify the small numbers put to work. But the search for practicable systems goes on—and widens.

In the words of Fritz Kramer, a manpower specialist with the Labor Department: "A number of States are exploring ways to provide jobs in either the public or the private sector to get people off the welfare rolls."

DISPLACED HOMEMAKER CENTER BILL IN TEXAS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. PICKLE. Mr. Speaker, on Thursday of this week at 9:30 a.m. the Education and Labor Subcommittee on Employment Opportunities will hold hearings on H.R. 28, the Displaced Homemakers Act. I am a cosponsor of this bill and I thought it timely to call to the attention of the Members of this House that Texas in May of this year passed the displaced homemakers' center bill that calls for the establishment of two pilot multipurpose service centers under the supervision of the Texas Rehabilitation Commission. These centers will provide specialized counseling for the increasing number of women who have devoted a number of years to child rearing and homemaking and suddenly find themselves needing a paying job. The attached story is from the Texas Women's Political Times, June 1977, "Caucus Assesses Lobby Effort."

The article follows:

CAUCUS ASSESSES LOBBY EFFORT

(By Jody Richardson)

The Texas Women's Political Caucus has now weathered three times the 140-day

whirlwind known as the Texas Legislature. The 65th session, which screeched to a sudden halt May 31 saw the Caucus garner a number of significant victories and warns of skirmishes sure to stir up again.

All five of the Caucus' top priorities were introduced as bills, two of which passed the Texas test. In defensive action, the Caucus helped block passage of two important anti-women's rights bills.

The Displaced Homemakers' Center bill, HB 444 by Sullivant, McFarland, and Miller, signed by Governor Dolph Briscoe May 11. calls for establishment of two pilot project multi-purpose service centers under the supervision of the Texas Rehabilitation Commission.

As mandated, one will be in the Dallas-Ft. Worth-Arlington area, the other in a county of under 100,000 population. Texas thus becomes the first state to address rural-urban differences which face middle-aged newcomers to the job market. Nearly 30 other states have legislation pending, and the federal government is considering a bill to provide 90/10 matching funds for state centers.

Because of the ever-increasing divorce rate and the earlier mortality rate of males, thousands of women are finding themselves "out of a job," often after over 15 years of marriage, and a career of child-rearing and homemaking.

The Centers will provide specialized counseling for those whose full-time job has been homemaker: assessing their past volunteer experience in marketable terms, and referring them to existing and cooperating job training programs. Once trained, the center staff will assist in job placement, calling largely on enthusiastic support from local business communities.

The Texas Rehabilitation Commission is now accepting proposals from not-for-profit organizations to operate the centers, which must be staffed with displaced homemakers themselves insofar as possible, according to the law. TRC staff will aggressively seek alternative sources of funding to supplement the modest $100,000 per year the two centers must share.

TEST OF CHARACTER

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. BOB WILSON. Mr. SPEAKER, an article appeared recently in Harpers magazine entitled: "The Persecution and Character Assassination of Howard (Bo) Callaway as Performed by Inmates of the U.S. Senate Under the Auspices of the Democratic Party."

Having read the Harpers article, it appears to be a valid criticism of the actions of the other body in ramming through an unfair and seemingly politically-motivated "investigation" during the last campaign.

An editorial which appeared in the July 7, 1977, Wall Street Journal, commenting on the Harpers article by Jim Hougan, succinctly explains the unfairness of the regrettable action of last year.

I include the article as a portion of my remarks:

TEST OF CHARACTER

Political life in democracies has always been known for chewing up the reputations of public figures. But in Washington in recent years the vilification has taken on an especially vicious character: Just about any associations with the private sector may now be hazardous to your political health. In the current issue of Harper's magazine, Jim Hougan has exhumed the story of Bo Callaway as a case in point.

Mr. Callaway, you may remember, was President Ford's first campaign manager in the 1976 election race. He "resigned under fire," as the papers put it at the time, when a Senate subcommittee began investigating charges that he had used an earlier position of his as Secretary of the Army to influence a government decision about developing a ski resort area in which he had an interest. The subcommittee later issued a report criticizing Mr. Callaway for his behavior and calling the whole incident a "sorry history of partiality and favoritism."

By then, the publicity surrounding the investigation and its hearings had already retired Mr. Callaway from public life, and the story had been lost in the rush of the presidential campaign. Mr. Hougan revives the story by reminding us just what Mr. Callaway seems to have done to merit his fate.

When he became Secretary of the Army back in 1973, he had—and the Senate that confirmed him allowed him to keep—an interest in a ski resort development company that wanted to develop Snodgrass Mountain in Colorado. Because the mountain was government-owned, the Department of Agriculture's Forest Service had to approve the development. The company first asked for this approval in 1971. Four years later, in 1975, the Forest Service issued a tentative plan for the area that proposed deferring development of the mountain for another 10 years.

When this happened, Mr. Callaway called Richard Ashworth, a Deputy Under Secretary of Agriculture and a personal friend from back home in Georgia, to complain that the Forest Service was refusing to judge his company's case on its merits. Five months later—literally during Mr. Callaway's last hours in office as Secretary of the Army—Mr. Ashworth came by to brief Mr. Callaway on the progress of the matter, and Mr. Callaway made his case again. Meanwhile, Colorado Forest Service officials were in fact reversing themselves and deciding to let Snodgrass Mountain be developed—but the people back in Washington seem to have done nothing during this whole process to influence them on Mr. Callaway's behalf.

But some of the folks around Snodgrass Mountain didn't like the idea of a ski resort expansion, and they thought Mr. Callaway's position must have something to do with it. They took their case to Colorado's Democratic Senator Floyd Haskell, who chaired a subcommittee with jurisdiction over the area and who may have had his own reasons for being interested in the man who by now had become Gerald Ford's campaign manager.

Senator Haskell had available to him the speculations of Mr. Callaway's opponents, and decided to hold public hearings. The Forest Service provided a detailed denial of the charges, but the Senator decided to continue with the full-dress, headline-grabbing procedure.

At the hearings, not a single witness could be found to say that any pressure on the Forest Service had been intended or responded to; the talking that Mr. Callaway seems to have done was the same kind Senator Haskell or any other Congressman had done for his constituents many times over. But the subcommittee's final report condemned Mr. Callaway for actions that were at least translatable into the appearance of improper pressure."

So Mr. Callaway was cashiered in the end not for things that were necessarily bad, but for making his case in a way that could have looked bad. And we suppose that judgment is correct, if what you mean is that the worst conceivable construction can be put on almost any action. But in between partisan advantage and personal publicity, there are getting to be a lot of incentives in American politics for thinking up that worst conceivable construction, and we might note where the trend seems to be taking us.

If the country's politics make it impossible for a public figure to have any connections with the private sector, we will get public officials who do not particularly care about the private sector. If politics becomes synonymous with the destruction of reputations, we will lose public officials who care for their reputations. If it becomes dangerous to interfere in the blind workings of bureaucracy, the bureaucracy will proceed unchecked.

And if the kind of proceeding that brought down Mr. Callaway remains the road to political profit, even the profiteers may not be very pleased in the end with the government they get.

THE UNITED STATES IN THE TWILIGHT OF HER YEARS?

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

The July edition of Imprimis, the Journal of the Center for Constructive Alternatives, comprised an article by Dr. James E. Dornan, Jr., associate professor and chairman of the department of politics at Catholic University.

It is an impressive piece not only for the clarity and skill with which Dr. Dornan writes but for the fearful implications of his theme and title: "The Decline of the United States as a World Power."

In developing his thesis, Dr. Dornan reaches the unavoidable conclusion that if the United States were to become involved in another crisis of the magnitude of Berlin in 1961 or Cuba in 1962, the United States would be unable to face down the Soviet Union. Moreover, if the trends now extant are allowed to continue, the United States will soon be unable to protect her allies, her vital interests and, finally, her own shores.

I commend this critically important article to my colleagues:

THE DECLINE OF THE UNITED STATES AS A WORLD POWER

(By James E. Dornan, Jr.)

During America's bicentennial year most of us became reacquainted with much of the lofty and often inspiring rhetoric associated with this nation's political past. A re-reading of that rhetoric reveals that it contains many themes and messages, but clearly among the most important of these is the assertion that the United States is a nation with a special mission to perform in human history.

Thus it was with John Winthrop's 1630 assertion that the new colony of Massachusetts Bay would be "as a city upon a hill, the eyes of all people are upon us." In a similar vein, John Adams told a friend in 1765: "I always consider the settlement of America with reverence and wonder, as the opening of a grand scene and design in Providence for the illumination of the ignorant and the emancipation of the slavish part of mankind all over the earth."

Such convictions as these have been expressed frequently throughout the nation's history: statesmen with political outlooks as

divergent as those of Alexander Hamilton and Woodrow Wilson have been seized by the belief that the American system would become the political model for the entire world, and that American power might be a key factor in the establishment of new and just political orders in every corner of the globe. In modern times perhaps the two most characteristic formulations of these convictions are F.D.R.'s call to the American people to join in an undertaking to "afford assurance that all men in all the lands may live out their lives in freedom from fear and want," and the stirring hyperbole of John F. Kennedy's first inaugural address, "let every nation know, whether it wishes us well or ill, that we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe to assure the survival and the success of liberty." Since the birth of the American nation, our statesmen and our people alike have viewed the United States as fashioning both a democratic political system which others could and should copy to their benefit, and a great nation capable of wielding the power requisite to assist in advancing the cause of freedom around the world.

It was no accident that I concluded the litany of statements proclaiming America's global mission with a quotation from John Kennedy. In many ways the early 1960s represent the high-water mark of the American spirit of mission, both with respect to the proclaiming rhetoric and the power which we were capable of wielding in support of that rhetoric. Concern over a "missile gap" favoring the Soviet Union which had so alarmed Americans in the late 1950s was quickly succeeded, after Kennedy's inauguration, by a growing awareness both here and abroad that the United States possessed overwhelming strategic superiority over our principal adversary. It was that superiority which enabled us to turn back the Soviet challenge to Berlin in 1961 and to face down the U.S.S.R. in the Cuban missile crisis of 1962, the latter in most respects a humiliating defeat for the Soviets.

But the early 1960s have become an almost forgotten memory. It is my thesis that the United States no longer possesses the power to face down the Soviet Union, should a crisis of the Berlin or Cuba type arise in the future. It is my further contention that if trends now extant long continue, the United States will lose its ability to protect even its vital interests in Europe and in Northeast Asia, and perhaps ultimately lose its ability to protect the nation's security itself. The United States, in short, is in decline as a world power, and that decline is more advanced than we would like to believe.

THE MILITARY BALANCE

Evidence concerning the decline of the United States as a world power is not difficult to discover. Let us first investigate the military balance between the United States and its principal adversary, the U.S.S.R., a topic which in recent years has received considerable media attention. It is worth remembering that the state of the military balance is not merely a matter of abstract calculations of interest only to the Pentagon, but rather, as we shall see, is of concern to us all, because it is directly related to the ability of the United States to protect its interests and fulfill its commitments abroad, and ultimately to protect its own security.

First, let us examine strategic forces. The American public repeatedly has been reminded during the past five years that under the force levels established by the SALT I Accords, the U.S.S.R. is guaranteed a substantial advantage over the United States in strategic missiles of both the land-based and the sea-launched variety. At present, the U.S.S.R. deploys more than 1,500 ICBMs to 1,054 for the United States, and 845 SLBMs in 78 submarines to 656 in 41 submarines for the United States. This should be compared with the situation which existed as recently as 1966, when the U.S. led 904 to 292 in ICBMs and 592 to 107 in SLBMs. While the United States possesses a substantial but diminishing lead in long-range strategic bombers—452—to approximately 210 for the U.S.S.R.—the Soviet Union has gained an even more substantial advantage over the United States in numbers of deployed sea-launched cruise missiles of all types, 600 to only a handful for the U.S. The Russian missiles are mostly short-range and were originally designed as anti-ship weapons; although they do not constitute a major part of the Soviet strategic arsenal, they can strike an area containing 60 percent of the U.S. population and a large portion of American industry, and we presently have no effective defense against them.

Moreover, it is often argued that significant U.S. advantages—numbers of MIRVed missiles, greater accuracy and reliability of the U.S. SLBMs, and greater numbers of manned bombers—compensate for the larger size of the Soviet strategic missile force. But these American advantages appear to be rapidly declining in significance. The Soviets have been testing and deploying their own MIRVed missiles since 1973. Due to the large size of the new generation of Soviet missiles and their huge payload, the Soviets will be able to deploy a substantially larger number of MIRVed warheads on land-based missiles than the U.S. Moreover, these warheads will be larger than their American counterparts, thus compensating in considerable measure for the superior accuracy of American reentry vehicles. The SS–18 alone can carry up to ten two-megaton warheads. The American Minuteman, by way of contrast, deploys only three warheads of 170 kilotons apiece. Furthermore, the Soviets are increasing the rate of production of their new swing-wing Backfire bomber, which, depending on the flight plan followed and the payload carried, can reach most strategic targets in the United States from bases in the Soviet Union. At current production rates, the Soviets will for the first time have more strategic bombers than the United States as early as 1982, whatever decision the Carter administration and Congress ultimately make about procurement of the B–1 bomber. Soviet air defense capabilities raise questions about the effectiveness of existing U.S. strategic bombers. The Soviets have more than 12,000 surface-to-air missiles in their inventory (the U.S. has none) and more than 2,600 interceptor aircraft as well.

The Soviets recently began testing of a new sea-launched strategic missile, the SS–N–18, which deploys MIRVed warheads substantially larger than their counterparts deployed on U.S. *Polaris* and *Poseidon* missiles. In this area as well, therefore, U.S. advantages are rapidly evanescing. Finally, while the Carter administration debates the future of the U.S. Navy's long-range *Tomahawk* cruise missile, the U.S.S.R. continues to test, and is apparently about ready to begin deployment of, its own long-range cruise missile, the SS–N–12, its range may extend to 2,000 nautical miles or more, although the Soviets claim that it should be exempted from the proposed SALT ban on cruise missiles.

Neither is it plausible to argue that any SALT agreement which will prove acceptable to the U.S.S.R. will improve the position of the U.S. in the strategic equation. The principal effect of the SALT I agreement of 1972 was to limit deployment of the highly-promising U.S. ABM system and freeze the Soviet numerical advantage in numbers of strategic missiles, especially large missiles, while at the same time permitting the U.S.S.R. to proceed with its massive strategic force modernization program. The Vladivostok Accord, should it become the basis for a permanent follow-on agreement, would not at all limit this Soviet modernization process, which, when completed, will provide the U.S.S.R. with a dangerously high confidence first-strike capability against the U.S. land-based missile force. While the Carter proposals for a comprehensive arms pact appear to include significant limits on the Soviet right to deploy new large missiles, these proposals have been explicitly rejected by the U.S.S.R. for exactly that reason. There is little likelihood that SALT II as finally concluded, therefore, will rescue the U.S. from the catastrophically deficient SALT I.

In any case, and perhaps most ominously of all, there are now solid indications, based not on textual analyses of Soviet military writings but on actual Soviet behavior, that the U.S.S.R. has definitively rejected the view commonly held by American defense intellectuals that no nation could survive a nuclear war. In recent years the Soviet Union has undertaken a civil defense program of highly significant proportions. Not only have the Soviets hardened their strategic communications centers, their nuclear weapons depots, and their military facilities in general, but underground bunkers are being provided for most industrial facilities in the U.S.S.R. as well. Of course it is possible to argue that this effort constitutes an exercise in futility—there is no doubt that if a nuclear war were to occur in the near future, every Soviet city could be burned to the ground, with population losses in the tens of millions—but the Soviet CD program nonetheless clearly demonstrates that the U.S.S.R. adheres to a philosophy of war and a strategy for the nuclear age which is startlingly different from our own. In sharp contrast to American strategists and statesmen, the Soviet leadership clearly believes that nuclear war might occur, and is preparing to fight such a war and win it should that happen.

This conviction doubtless explains the steady growth in the rate of expenditure for defense purposes in the U.S.S.R. over the past several decades. The increase in that rate of expenditure over a twenty-year period has amounted to three to five percent annually, regardless of external or internal conditions. In periods of "detente" and in periods of high international tension, during periods in which the Soviet domestic economy is functioning smoothly and during periods in which the Soviets have encountered severe economic difficulties, the rate of increase has remained the same. The poor Soviet harvests of the early 1960s and of the early 1970s, for example, coincided with massive deployments of new missile systems, and consequent increases in defense expenditures. Kissinger's 1973 prediction that "soon the economies of the two superpowers will be so intertwined that detente will become irreversible" was followed almost immediately by the onset of a Soviet missile deployment program which former Secretary of Defense Schlesinger characterized as "staggering in its extent and scope." Since 1964, Soviet defense spending has increased over 40 percent in real terms, while that of the United States has declined 18 percent in real terms.

The conventional military balance appears even more unfavorable for the United States than does the strategic balance. That should surprise no one, since the conventional balance has favored the Soviet Union overwhelmingly since the end of World War II.

One important measure of military strength is total men under arms. The United States currently has just over two million, while the Soviet Union has nearly four and one half million in uniform. To be sure, military personnel in the U.S.S.R. perform a variety of tasks which in the U.S. are handled by civilians; nevertheless, the gap is startling. A more specific indicator of the conventional balance is the number of combat divisions in the armed forces of each

superpower. The U.S. now has nineteen divisions, including the Marines, while the Soviet Union has 170—two more than a year ago. While it is true that Soviet divisions are somewhat smaller than their U.S. counterparts, the disparity is nonetheless a useful indicator of comparative conventional strength. During the past decade, the Soviets have added about one million men to their force structure—130,000 of which directly face U.S. and NATO forces across the central front on the Continent. They have, moreover, increased the size of their divisions by nearly 3,000 men, the density of tanks deployed in each division by nearly 40 percent, and the conventional artillery deployed with each division by at least 50 percent and in some cases even 100 percent. As a result, twenty Soviet divisions today are the equivalent of twenty-five to twenty-seven divisions of ten years ago. It is worth noting that the United States has a total of 11,600 tanks in active service, while the Soviet Union has at least 45,500. New assault and attack-type helicopters, improved infantry combat vehicles, self-propelled artillery, mobile rocket launchers, precision-guided antitank weapons, and T–72 main battle tanks are all presently being deployed by the U.S.S.R. in large numbers, especially in Europe.

A similar situation exists in the area of tactical air power. Not counting approximately 3,000 trainer aircraft and the 2,600 fighters previously mentioned, which are assigned to the air defense forces, the tactical air inventory of the Soviet Union—including fighters, attack aircraft, intermediate range bombers, and reconnaissance aircraft—now numbers more than 5,000 planes. A substantial proportion of these are assigned to the NATO theatre. Finally, Soviet tactical air power in Europe is backstopped by an intermediate-range missile force of 600 launchers, now being significantly upgraded through the deployment of the mobile and MIRVed SS–20 IRBM. As a consequence of these and similar deployments of new technology weapons the often-cited U.S.-NATO advantage in tactical nuclear systems is clearly declining.

There can be no doubt, therefore, that the overall conventional military balance between the superpowers has worsened appreciably during the past several years, especially in Europe. This situation does not markedly improve if Allied forces are added to U.S. theatre capabilities. And most serious commentators agree that should the U.S.S.R. launch an attack across the Central Front with a reasonable degree of tactical surprise, they would overwhelm NATO defenses and reach the English Channel within a startlingly short time. In the past, the West could rely upon its strategic superiority over the U.S.S.R. to deter such an attack. That superiority no longer exists.

In the area of naval strength, I note that ten years ago the Soviets had no missile-carrying cruisers; today they have 22. Ten years ago they had 12 missile-carrying destroyers and destroyer-like vessels; today they have more than 40. Ten years ago the Soviet Union had 45 nuclear-powered submarines; today they have more than 130. Finally, after a decade of determined shipbuilding effort, the Soviets have deployed their first true aircraft carrier and have under construction at least three more. The capability of the Soviet Navy has become so significant that the recently retired Chief of Naval Operations, Admiral Elmo Zumwalt, doubts whether the U.S. Mediterranean fleet could successfully deal with its Soviet counterpart in the event of war in Europe today. In an especially alarmist appraisal, General George Keegan, recently retired chief of Air Force Intelligence, asserts that in the event of war 75 percent of the free world's surface fleets would be destroyed by Soviet forces, naval and air, within a matter of hours.

In any case there is no longer any question concerning the Soviet ability to contest the American presence in any part of the world beyond our shores. The Soviet defense efforts that I have described have radically altered the nature of the U.S.S.R.'s military strength, transforming what was once essentially a continental force into one of global capabilities, capable of supporting Soviet foreign policy all over the world and directly intervening anywhere from Central Africa to the Caribbean. The observation of President Carter that "we're still by far stronger than they are in most means of measuring military strength" has nothing whatever to do with reality.

To be sure, it is possible to argue that I have presented in these remarks an overly alarmist view. There is no doubt that the United States still retains a mighty strategic striking force, which in fact has been improved in several important ways over the force we deployed as recently as five years ago. Neither can there be any doubt that under present circumstances a pre-emptive Soviet strategic strike upon the United States would be an act of folly.

Nevertheless, the analysis of extant trends in the strategic balance set forth above suggests that in the not distant future the U.S.S.R. may well possess the capability to destroy the bulk of the U.S. ICBM and bomber force in a first strike utilizing only a portion of its MIRVed heavy missile force. Most of its land- and sea-based missiles could be held in reserve to deter an American retaliatory strike in the unlikely event that it should be threatened. That possibility carries profound consequences for the stability of the international system and for American security. At the very least the likelihood of direct Soviet challenges to and threats against U.S. interests abroad will increase substantially.

It is worth recalling, as the German strategic thinker von Clausewitz reminded us 175 years ago, that power is not only the capacity to destroy, it is also the capability to influence, and that weapons have uses that far transcend the making of war. Not only is war a continuation of politics by other means, Clausewitz instructed us, but the acquisition and deployment of military forces in peacetime are—or should be—primarily governed by political considerations. From the time of Lenin down to the present day the leadership of the Soviet Union has closely studied Clausewitz. And from the time of Lenin down to the present day the exercise of influence in peacetime has been one of the primary purposes governing Soviet force deployments.

In recent years Soviet leaders have quite openly called attention to the political purposes which inspire the U.S.S.R.'s military buildup, informing us that the world correlation of forces has shifted irrevocably in the direction of the socialist world: the United States retreat from Vietnam, the abortive U.S. response to the Cuban invasion of Angola, and the American acceptance of Soviet numerical superiority in the SALT I Accords, all proved quite conclusively, they have asserted, that the United States is in the process of accommodating itself to the emergent international order in which the Soviet Union is the pre-eminent power.

American leaders from Kissinger to Carter, of course, have argued that the Soviet leaders are wrong, and that the United States, in the words of former President Ford, is still second to none in the primary indices of international power. In reaching your own conclusions as to who has the better of this debate, I ask you to reflect upon the attitudes and behavior of American decision-makers during two of the most important international crises of the postwar period, the Hungarian revolution and its aftermath in 1956 and the Cuban missile affair of 1962. If you investigate these events you will discover that, despite the overwhelming strategic superiority that the United States enjoyed over the Soviet Union on both occasions, U.S. decision-makers proceeded with considerable circumspection and even trepidation, fearful that vigorous U.S. action might set off World War III—a war which, under the prevailing circumstances, the United States could not possibly have lost. Reflect, therefore, upon the likely behavior of the United States during a future crisis after the strategic advantage has passed to the Soviet Union.

To be sure, some commentators have suggested that the Soviet Union is likely to behave as circumspectly as did the United States when it possessed the strategic advantage, and for the same reasons: the leaders of the U.S.S.R. are no more anxious than those of the U.S. to set off a nuclear holocaust. Moreover, it is argued, the Soviet have proceeded cautiously in the past in their efforts to translate military power into political advantage, and can be expected to behave similarly in the future.

These arguments appear to me to be singularly unpersuasive. As I have suggested above, there is no reason to believe that the Soviet leaders think about nuclear war or about the relationship between military force and foreign policy in the manner of most American defense intellectuals. Even more significant is the fact that until recently the Soviet Union has been distinctly inferior to the West in strategic power. The world has no experience with a Soviet Union which possesses substantial military advantages over the United States, and it would be dangerous in the extreme to assume that her growing military power will have little or no impact on Soviet behavior in international politics.

AMERICAN POLITICAL INFLUENCE DIMINISHES

I have laid such great stress on the state of the contemporary military balance between the United States and the Soviet Union because military strength is the most obvious indicator of national power. Ample portents of the decline of the United States as a global power, however, can be found in the political realm as well.

It is worth examining the view increasingly held abroad of the United States' power and influence. Since the defeat of the United States in Vietnam and our abortive response to the Angolan crisis, there has appeared in the European press, especially in France and the Federal Republic of Germany, an outpouring of concern about the willingness and ability of the United States to sustain a coherent foreign policy. European foreign correspondents now regularly speak of "the eclipse of American power," "the withdrawal of the U.S. from world politics," "the paralysis of American foreign policy," "the rise of neo-isolationism in America." Stern, West Germany's largest magazine, stated flatly in its special supplement honoring the American Bicentennial that "the American era is past."

According to a recent study by the United States Information Agency, doubts about the ability of the NATO alliance to protect Western Europe in the face of the growing Soviet threat have tripled in Italy over the past five years, nearly doubled in West Germany and France during a similar period, and drastically increased elsewhere in Europe as well. Even Western European officials, who customarily take an upbeat view of prospects for West in public pronouncements, are now having second thoughts, and are openly voicing their concern about the future of NATO and the prospects for a meaningful East-West detente. The growing malaise in Western Europe doubtless has had an impact upon the startling growth in the political strength of the left-wing parties in Italy and more recently in France, and the prospects for an accession to power of a government of

the left have increased substantially in both countries during the past eighteen months.

Even in the Eastern Mediterranean, where Greece and Turkey were formerly bastions of NATO strength with a long history of suspicion of Soviet motives and resistance to Russian imperialism, the situation in the past eighteen months has alarmingly deteriorated. Against the strongly-stated desires of its NATO allies, Turkey recently allowed the new Soviet aircraft carrier *Kiev* to pass through the Black Sea straits, in direct violation of the Montreux Convention—the latest in a series of Turkish attempts in recent months to build a more friendly relationship with its colossus to the north. In part, of course, recent Turkish policy is a result of dismay over U.S. policy towards Cyprus, but in part Turkey is simply accommodating itself to the prevailing winds in international politics, perceiving that as the power of the U.S. and NATO decline relative to that of the U.S.S.R., Turkey can hardly afford poor relations with the Soviet Union.

All over Europe the prospects for "Finlandization," as recently as two years ago widely considered to be a fantasy of American pessimists, are now being widely discussed. The term "Finlandization" refers to the prospect that the states of Europe, incapable of defending themselves in the face of overwhelming Soviet military superiority, will gradually modify their political behavior and even their internal political systems to suit the convenience and the desires of the Soviet Union, as has the nation of Finland throughout the postwar period. The facts concerning Finland's relationship with the U.S.S.R. bear recalling. When the term of Finnish President Urho Kekkonen legally ended in 1974, Soviet Secretary General Brezhnev publicly demanded that he remain in office lest the regularly-scheduled general elections result in the selection of a president of Finland less likely to submit to Soviet desires on significant domestic and international issues. As a result of Brezhnev's demand, the nationwide presidential elections were cancelled and Kekkonen's term was extended four more years by an act of Parliament. Reacting to both internal and external criticism, Kekkonen recently declared that elections will be held in 1978, but it has become apparent that this is a triumph of form over substance: already all major parties, including the Conservatives, have announced that Kekkonen will be their candidate. All this has occurred not because of the strength of the Finnish Communist party, which has never received more than 25 percent of the popular vote in any Finnish election, but because of direct external pressure by the Soviet Union. Once again, I ask you to reflect upon future possibilities.

How would a Communist-governed Italy behave in the face of similar Soviet pressure, or for that matter a Socialist-Communist coalition government in France? And should the dominoes begin to fall in the rest of Europe, how would the Netherlands behave? There a political party leader proposed that the Dutch army should be reduced to one man, Russian-speaking, whose sole task would be to telephone to Moscow the announcement of the Netherlands' surrender in the event of a Soviet invasion of Western Europe. He received nearly 20 percent of the vote in a recent parliamentary election.

The situation is only slightly more promising in the Far East. In Japan, for example, there is widespread confusion and alarm over continued evidence of U.S. determination to continue its military withdrawal from Asia. Discussion has begun on the alternatives open to Japan, including accommodation to Soviet and Chinese power and the acquisition of nuclear arms.

In the Third World, American influence is probably at an all time postwar low. Events at the meeting of "non-aligned nations" in Sri Lanka in the summer of 1976 offer an instructive illustration. Attendees at the conference included such well-known "neutral" nations as Cuba, North Korea, North Vietnam, Laos, Cambodia and Angola. The Philippines were accorded only guest status, and South Korea was not permitted to attend at all. The final statement of the conference called for withdrawal of all U.S. forces from South Korea and complete Panamanian control of the isthmus canal U.S. military bases in Latin America were condemned as "a threat to the peace and security of the region"; there was of course no mention of Soviet bases in the Middle East or along the edge of the Indian Ocean littoral. The member states called for an end to Puerto Rico's "colonial status," while of course not mentioning the colonial domination of the Baltic states by the Soviet Union, of Tibet by Communist China, and the like.

In the United Nations as well the developing world appears to be rapidly moving toward positions on world issues favored by the Soviet Union. On the twenty-six votes identified by the State Department as key issues during the past seven years, only thirteen nations voted consistently with the United States. More than 100 nations, about two-thirds of the total, voted with the Soviet Union and against the United States more than 50 percent of the time.

I could go on at length, but I believe the picture is clear. The era of American pre-eminence, in which the United States actively employed its military and economic strength to protect nations around the world against aggression and revolution, has passed. The United States is now hard pressed to defend its own vital interests beyond its borders. Should the military trends described above continue to develop as they have during the past five years, even that may be beyond us in the not-distant future.

THE REASONS FOR AMERICA'S DECLINE

What then explains the decline of the United States from a position of global preeminence to its present status? Needless to say, it is not possible to identify the reasons in detail or with precision within the space allotted to me here. Several factors, however, deserve mention. First, it is worth observing that to a certain extent the changes which have occurred in the global power balance have been beyond the capacity of the United States to alter. The breakup of the European colonial empires in the 1950s and 60s, the relative decline of Europe itself as a center of global power and influence, and the subsequent emergence of new power centers—particularly those of the emerging nations able to exploit for their own advantage rich natural resource bases or fortuitous geographic position—have all combined to change the structure of world politics in ways which have both reduced the relative power of the United States and complicated our security problem.

Moreover, the Soviet drive for world preeminence, and especially the attempt of the U.S.S.R. to acquire superpower military capability, would have occurred even if the United States had pursued the wisest of policies throughout the postwar period. Short of preemptive war, there was little that the U.S. could have done to prevent the Soviet Union from becoming a military superpower capable of offering serious challenges to United States interests.

In the final third of the twentieth century, however, it has become obvious that the American democratic system itself is in some respects an impediment to the development of a coherent and intelligent international policy. Commentators from Thucydides and de Tocqueville to Henry Kissinger have remarked upon the difficulties which democratic societies encounter in the foreign policy arena. Some of the problems stem from the dynamics of two-party competition, which appear to require that the out-party reject the policies of the party in office, whatever their merits; the abrupt shifts of personnel in top decision-making positions which occur as a result of the electoral process in democratic societies; the opportunities afforded interest groups to influence the policy process; and finally, the desire of the populations in democratic states to exploit the political process to improve the material conditions under which they live. The advent of welfare democracy and its increasing drain on the financial resources of democratic government has complicated matters by creating pressures to reduce expenditures during periods of relative peace.

These are problems, however, which all the democratic states of the West face in common. The American nation, as a consequence of its own special origins and political history, bears additional burdens. These burdens stem from the American political character itself, and from our traditional assumptions about the nature of world politics and the American role in the international political system. Not only has the United States assumed, as the rhetoric which I quoted at the outset clearly indicates, that as a new kind of society we are uniquely qualified and designed to help remake the world in the American democratic image, but we have tended to assume that ultimately force can be banished from history and that the United States can avoid continuing participation in what we have always disparagingly referred to as "international power politics."

These ideas and assumptions have been reinforced by the impact of modern liberalism on the American political outlook. The belief in the perfectability of man and in the possibility for the radical amelioration of the human condition which lies at the core of the liberal political outlook makes it difficult, if not impossible, for liberal statesmen to accept the permanence of conflict in world politics. Thus, when in power, liberals are reluctant to ascribe evil or aggressive intentions to the Soviet Union, and find it difficult to understand the continuing role of power, especially military power, in international politics.

CONCLUSION: CAN AMERICA BE "BORN AGAIN"?

The rather gloomy analysis set forth above should not necessarily lead to the conclusion that the United States is doomed, destined to follow Greece, Rome, and the British Empire into the dustbin of history. The long-term trends, nevertheless, are not encouraging. Neither is there any sign at the moment that the new administration possesses the grasp of international realities necessary to set the United States on a new path, although of course it is too early yet to draw any firm conclusions. Whatever the nobility of Mr. Carter's pronouncements on human rights, moral rhetoric is no substitute for policy, and it remains to be seen if the Carter human rights policy is more than rhetoric and if so, what its implications are. Although he has spoken out with a vigor which the world has not recently heard from an American president on the continued violations of the Helsinki agreement, the United Nations charter, and the elemental laws of human decency generally by the U.S.S.R., he has thus far said nothing about similar violations of human rights in such communist states as Cuba, Vietnam, and North Korea. In fact, he has proposed that the United States pursue a policy of detente with all three nations. Neither can we be certain that the relatively well-designed American arms control proposals presented to the Soviets in Moscow recently represent the administration's final position on strategic policy. Finally, Mr. Carter's stubborn determination to withdraw U.S. ground forces from Korea, in the face of clear evidence that his policy might seriously upset the strategic stability of Northeast Asia, is the most discouraging evidence to date that ideology rather than a realistic

grasp of the imperatives of world politics will be the primary animus of this administration's foreign policy.

More than a decade ago, in one of his most illustrious books, a well-known professor of international politics wrote cogently of the relationship between power, principle, and world order. "Whenever 'peace' conceived as the avoidance of war," he wrote, "has been the primary objective of a group of powers, the international system has been at the mercy of the most ruthless member of the international community. Whenever the international order has acknowledged that certain principles could not be compromised even for the sake of peace, stability based on an equilibrium of forces was at least conceivable." That professor was a man whom I am not accustomed to praising, named Henry A. Kissinger. The hour is now late, but there is still time for the U.S. to base its foreign policy on that insight, and to substitute for a policy of detente at almost any price the difficult decisions and sacrifices necessary if the American republic, and the civilization of the West of which it remains the acknowledged leader, is to survive and flourish.

RESULTS OF CONGRESSMAN BLOUIN'S 1977 FARM POLL

HON. MICHAEL T. BLOUIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. BLOUIN. Mr. Speaker, as you are well aware, the House tomorrow begins debate on the Agricultural Act of 1977. Without doubt, it is the single most important piece of agricultural legislation which we will consider this session and it rightly deserves the time and attention which the leadership has scheduled this week.

As you are well aware, the bill will establish loan and target price levels on major commodities and establish other programs and policies of vital concern not only to the Nation's farmers, but also to consumers. Farmers in eastern Iowa, as elsewhere, will depend on this legislation to provide them with a fair and adequate return on the risks they take if sudden market or natural disaster should strike. Consumers, for their part, must realize that the availability of abundant and economical food depends upon the survival and prosperity of the Nation's family farms.

In an effort to assess how farmers in eastern Iowa feel about the provisions of this year's Agricultural Act, my staff has just completed a scientific telephone survey of farmers in the Second Congressional District.

Although opinions—like needs—may differ from region to region and farm to farm, I think many of my colleagues might appreciate knowing how farmers in my district feel about the issues which are before us today. If there are no objections, Mr. Speaker, I enter the results of our poll in the RECORD.

RESULTS OF CONGRESSMAN MIKE BLOUIN'S 1977 FARM POLL

(Conducted by telephone during the week of June 27, 1977)

1. The House Agriculture Committee Bill set a $2.10 target price on corn and a $2.00 loan rate for 1978. Do you support these levels or would you favor something else?

(In Percent)

	Trade	Loan
Support House Bill	52.4	61.9
Lower	1.6	1.8
Higher	31.2	15.8
No Opinion	12.9	18.7
No Government	1.9	1.9

2. The House Agriculture Committee Bill set a $3.00 target price on wheat and a $2.35 loan rate for 1978. Do you support these levels or would you favor something else?

	Target	Loan
Support House Bill	31.4	31.4
Lower	3.7	2.9
Higher	5.8	4.7
No Opinion	56.7	58.6
No Government	2.4	2.4

3. Do you feel we should establish a grain reserves system?

Yes	21.6
Yes Qualified	42.4
Total	64.0
No	25.9

HOW JAPAN VIEWS OUR ROLE IN PEKING AND TAIWAN

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. DERWINSKI. Mr. Speaker, there is a growing body of opinion in the United States, reflected across the country, that the President's intention to recognize Peking is a mistake. In my opinion, this would be interpreted as a U.S. setback in the Pacific and would complicate rather than ease tensions in the area.

The argument against normalization of relations with Peking is very effectively made in a letter to the editor of the New York Times published in their July 13 edition:

HOW JAPAN VIEWS OUR ROLE IN PEKING AND TAIWAN

To the Editor:

Secretary of State Vance is going to China in August to advance normalization of relations with Peking.

Five years ago, the Japanese Government opened full diplomatic relations with Peking, severing formal ties with Taiwan while continuing to maintain economic and cultural relations. Some American politicians and scholars have urged the Carter Administration to take similar measures.

There are, however, several fundamental aspects involved in American recognition which the Japanese recognition did not have. These are the causes of deep concern to the free Asian peoples.

First, the American measures are tantamount to reducing the status of Taiwan, a *de facto* free independent land of 16 million people, to one of the provinces of a Communist country which totally disregards human rights. As the result, millions of Taiwanese will desperately flee their homeland to the United States and Japan to seek freedom.

Secondly, the U.S. abrogation of the mutual defense treaty with Taiwan and the pullout of ground forces from the Republic of Korea, together with President Carter's pledge to strengthen NATO, will badly shatter the free Asian peoples' confidence in the United States. The Japanese will be haunted by the idea that the next country adversely affected will be theirs. As a result, the pro-American Fukuda Government may face an even more uncertain future and opposition parties led by the anti-American Japan Socialist Party may take over.

Then the following could happen—Japan could make an accommodation with either the Soviets or the Chinese in order to lessen the Communist threat. Another option is to go nuclear.

The Japanese are firmly committed to nonproliferation of atomic weapons. However, when their faith in the United States is crushed, they will be obliged to have their own atomic weapons to defend themselves.

Nonproliferation cannot be realized by signing a treaty, crying out for it, or trying to impose it upon other countries. What is important is to maintain an international situation which does not require any country to go nuclear.

Thirdly, since the majority of the people on Taiwan are reportedly for independence in some form, the United States should give the chance of self-determination to them. If the Administration took the measures of recognizing Peking under the present circumstances, the chance will forever be denied the Taiwanese.

Lastly, from the point of view of respecting human rights, it should be noted that a democratic country like the Republic of China on Taiwan and a Communist country are essentially different. The government of a democratic country often limits people's freedom when it feels that peace and security are threatened. When the threats are removed, it usually restores full freedom. On the other hand, Communist governments offer no hope of freedom and human rights.

When the Carter Administration takes measures which affect the status of Taiwan, these important aspects should be carefully considered.

KIYOSHI NASU.

New York, *July 5, 1977.*

THE BLACKOUT: THE APPLE TARNISHED BUT STILL SHINING

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. RANGEL. Mr. Speaker, this morning an article appeared in the New York Daily News written by Pete Hamill. The article attempts to give some reasoning behind the terrible events which ensued as a result of the blackout, which struck New York last Wednesday evening. I am not saying that there is any rationale to the devastating events which took place. However, this article has some very interesting points in it, particularly the five suggestions to President Carter. Through the past few years my city has suffered in many ways, mostly in its self-image. Like human beings, a city has its pride. New York must and will recover from the latest attack on her image.

I ask my colleagues to always remember the many good qualities New York and its people have. I am inserting in the CONGRESSIONAL RECORD the article written by Pete Hamill in hopes that my colleagues on both sides of the aisle will take the time to read it. At the very least, I think they will find in it some interesting facts about the tragedy that struck New York last Wednesday night.

The article follows:

FIVE SOLID WAYS THAT JIMMY CARTER CAN HELP OUR CITY

(By Pete Hamill)

There is nothing left now but rubble and hope. More than property was ruined on the battlegrounds of Bushwick and Flatbush, Jamaica, Bed-Stuy, Harlem and the Bronx. Some illusions were destroyed, too. One illusion was that you could forever have one million human beings on welfare, and another 250,000 unemployed, and expect them to remain docile. Another was that you could treat such human beings with a policy of benign neglect and never reap the whirlwind.

And so the whirlwind arrived, and only the extraordinary discipline of the New York Police Department prevented widespread killing. More than 300 cops were injured on the Night of the Great Darkness, but they made more than 3,700 arrests, and did not have to fill the graveyards to do it. If a similar outbreak of looting and violence had taken place in a city like Los Angeles, where the grim legions of Police Chief Ed Davis would have gone out to do battle, they would still be counting the corpses. In New York, life still takes precedence over property.

It was also clear to anyone who moved around the city on Wednesday night that this was a riot against property, not against people. White civilians moved freely among blacks and Latinos without being attacked. Black, white and Latino businessmen were equally victimized. And in some cases, whites joined the looting. If there was ever any doubt that it is class that divides us, not color, Wednesday night should have provided the proof. In almost all cases, the goals of the looters were the same: They were taking those material things that they could not buy, and they destroyed what they could not take.

For a decade—since the heady days of the War on Poverty that was declared, but never fought—poor people have seen these material things sold on television. The purpose of television commercials is to make people want things enough to buy them. They never suggest that the items are junk or that even having all of them at once is no guarantee of happiness. Television commercials do not include cautions about morality or justice. They are as single-minded as hookers: First they get you to want the goods, and then they get you to buy.

But in most cases, poor people cannot buy. Welfare provides bare necessities: food, shelter, clothing. There is no margin in a welfare budget for air conditioners, remote-control TV sets, dishwashers, or cars. But the barrage of commercials are still being worked on poor people who feel, think and desire. Their hopes and desires are precisely the same as those of the middle class and they are subject to the same commercial manipulation. There should have been no surprise that people would pile into a store under cover of darkness to take those things they had been instructed for so long to want.

This is not to excuse the terrible things that happened last Wednesday night, but to attempt to explain them. Hopefully, Jimmy Carter has begun to understand that all of his concerns about weapons systems, all his declarations on behalf of human rights, all his pleas for national morality mean nothing if he does not deal with the poor of this country. Wednesday night cost New York ment had invested $1 billion in the creation of factories, some of that looting might never have happened.

Through every report of the dark night, the word "jobs" ran like a counterpoint to the main story. In the ghettos, unemployment among young people stands officially at 40%, and unofficially at 65%. That is outrageous. No society can contain that many idle people without risking self-destruction. Carter can look the other way, dismiss Wednesday's outbreak as an aberration in a city that itself is an aberration. Or he can move swiftly and decisively. Obviously, New Yorkers hope he will move.

Among other things, Carter can:

Order the Army in from Fort Dix and other Eastern bases and put them to work cleaning up the rubble-strewn slums. If New York was in China or France or Mexico, the blackout disaster would be recognized as a real responsibility of the central government. America's huge standing Army is doing absolutely nothing these days, aside from marching around drill fields and shining shoes. Let them leave their weapons home and come to this city with shovels and bulldozers and paint brushes and tools. Let them clean away the rubble and paint the buildings, let them go into the backyards and clean out the rotting garbage. Put them to work fixing boilers, broken plaster, smashed windows. Since New York helps to pay the salaries of these soldiers, New York should have the benefit of their labor in this emergency.

Ask Congress for immediate authorization to create 200,000 goods-producing jobs to be located in New York. Not make-work jobs, shoveling sidewalks or cutting grass. The Army can do that work. But building factories that employ New Yorkers in the creation of material goods that can be sold to other people. The government can do this in partnership with private enterprise. Tax breaks can be provided to make those goods competitive in the market place; what is lost in business taxes would be gained many times over in individual income taxes from people who would leave welfare. People who work pay taxes; people on welfare do not.

Tell the governments of Japan, Hong Kong, Formosa and South Korea that the honeymoon is over. If they want to continue selling goods in New York and other American cities, then they will have to build plants in those cities. We cannot continue losing jobs to other countries, particularly countries that we subsidize. A leader's first responsibility is to his own people. Imagine how de Gaulle would have reacted if Wednesday night's disaster had occurred in Paris. Jimmy Carter must consider the people of the South Bronx, Bushwick, Bed-Stuy and Harlem before he considers the feelings of foreign governments. It will do him no good to have relations with Japan, if New York isn't there any more.

Retrieve the Defense Department budget and chop big holes in it. Carter's decision on the B–1 was fine. But the defense budget still eats up an inordinate amount of this nation's taxes. We are not currently at war with anyone. We have no wars down the road that could possibly justify the disgusting amounts now being spent on armaments. We all know there can be no war with the Russians in the immediate future, because we would only destroy each other. A hunk of that defense money could be used to create a social-industrial complex. Put missile designers to work designing subway systems. Get all those generals to work building factories, instead of planning new forms of destruction. In short, use a hunk of that defense money on the needs of people, not the needs of a military bureaucracy in the Pentagon.

Go on television and make a speech that reminds the rest of America that New York has given them many things for many years, and that now the country will have to start giving something back.

New York has given America money, uncountable billions of dollars in taxes, that built highway systems all over the West, created space centers in Texas and Florida, paid subsidies to farmers, financed wars and research for wars. But more than money, New York gave America literature and art. It provided music for millions. It staffed America's hospitals with doctors educated in our free City University. New York gave birth to the movies. It gave America its greatest comedians. It trained America's finest actors. It nurtured America's greatest playwrights. It allowed America's finest dancers to shine. New York financed and built much of America's railroad system. In the years when nobody cared about such things, New Yorkers built America's first museums and libraries, and constructed a great public school system, and in doing so, this city benefitted all of America.

Carter could tell America about New York again: Remind the Americans that every kid saved from polio in the past two decades was saved by the discoveries of a New Yorker named Jonas Salk, who was educated by New York tax dollars. Remind them that New York took in wave after wave of the poor of Europe, gave them places to live, gave them jobs, and gave their children the freedom to leave, to go out into all the states of the nation, with skills acquired in New York, to help build a nation.

And he should remind them that even now, New York is doing for America what many American states will not do for themselves. We are housing America's poor. Not all of them. But far more than our share. We have tried to absorb the poor of the American South, the poor of Puerto Rico: People displaced by automation or bigotry. New York did not make them poor. They arrived in New York poor, at the very moment when our factories were moving to the Sun Belt, the Far East or South America.

If he told America those things, Carter would then have to add that it is time for America to do something for New York. This

city is hurting. Its ghettos are burning. Its poor fill the jails. Its streets are packed with idle people. This is a city that is getting rid of cops, firemen and teachers in a time when they are needed more than ever. This is a city that needs help.

NO HANDOUT, JUST JUSTICE

But this city does not want a handout. All it wants is simple justice. For most of this century, we gave. Now we need. The country that we helped make prosperous must respond, or be exposed to the world as a nation whose basic emotion is selfish indifference. An effective attack on our core problems will not be simple, and Carter and the Congress cannot take halfway measures. It was the halfway measures of the War on Poverty—helping a few people, widening the gap with others—that has led us to the perilous edge.

"The fellowship of suffering," said poet. W. H. Auden, "lasts only so long as none of the sufferers can escape. Open a door through which many but probably not all can escape one at a time, and the neighborly community may disintegrate . . ."

We can't do it a little a a time. We can't be conned by the gradualists. We have to do it all at once. Create 200,000 jobs in New York and you eliminate welfare entirely, because each job will take three or four people off the dole. Those people can clear the land, build the factories, and then work in factories they have built. They will thus become people who pay taxes. They will make things that bring in money. And they will then become people who buy things, instead of taking them. The neopessimists will tell you it cannot be done. I don't believe it. I think it can be done, if the will is there, and the time to start is now.

PROPOSED AMENDMENTS TO THE WHEAT SECTION OF THE 1977 FARM BILL

HON. GLENN ENGLISH

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. ENGLISH. Mr. Speaker, I will be offering three amendments tomorrow to the Agricultural Act of 1977 (H.R. 7171). The first of these amendments would simply raise the target price for the 1977 wheat crop to $2.90 per bushel—20 cents less than this body approved when it passed the 1975 farm bill.

My second amendment will seek to extend the 1977 target price provisions of H.R. 7171 to all harvested acres, in an effort to end the harsh inequities of the obsolete historical allotment system, which has not been revised since 1952.

The third amendment will seek to correct another inequity in the bill as it is currently written by eliminating the wheat loan rate as a factor in the determination of the target price.

Mr. Speaker, each of these amendments is aimed at one central problem in the 1977 farm bill. As it is written, this legislation gives only limited help to wheat producers—and it is estimated that thousands of wheat farmers will be forced into bankruptcy if the current market conditions continue.

In order that my distinguished colleagues may have the time to examine these three proposals before their consideration tomorrow, I ask unanimous consent that the text of these three amendments be included in the RECORD at the conclusion of my remarks.

It is my sincere hope that any of my colleagues who have questions concerning these proposals will feel free to contact me before their consideration:

AMENDMENT TO H.R. 7171, AS REPORTED, OFFERED BY MR. ENGLISH

Page 7, line 23, strike out "$2.65" and insert in lieu thereof "$2.90".

AMENDMENT TO H.R. 7171, AS REPORTED, OFFERED BY MR. ENGLISH

Page 7, line 18, insert after "(ii)" the following: "with respect to the 1977 crop, the acreage on the farm from which wheat is actually harvested and, with respect to the 1978 through 1981 crops,".

AMENDMENT TO H.R. 7171, AS REPORTED, OFFERED BY MR. ENGLISH

Page 7, strike out lines 10 through 16 and insert in lieu thereof the following: "multiplying (i) the amount by which the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary,".

ARE YOU A BERLINER, MR. PRESIDENT?

HON. SAMUEL S. STRATTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. STRATTON. Mr. Speaker, some time ago a very moving message appeared in the Wall Street Journal compliments of the West German newspaper, Die Welt. Die Welt had asked its readers to submit essays on timely topics relating to America's Bicentennial celebrations. One of the winners, Patricia Aden, a 26-year-old doctor, wrote an essay which brings back memories of the day John F. Kennedy made his electrifying "I am a Berliner" declaration at West Berlin's City Hall on June 26, 1963. I commend these few words to the attention of our colleagues, the American public, and freedom-loving peoples throughout the world:

MY PLEA TO THE NEXT AMERICAN PRESIDENT

Berlin, Mr. President, protect Berlin! Watch over the touchstone of detente; guard the memorial of liberty.

Berlin concerns us Germans for national reasons. Berlin concerns the American people for reasons of their history, self-respect and their destiny.

Berlin is the divided city of a partitioned country in a miserably divided world. As long as Germans desire a free country, Berlin is the key word. As long as tyrannical Communist rule keeps Germany partitioned, the Berlin Wall is the monument and proof of bondage.

You are an American. As America's President, you will hold the highest office that God offers to any one in the free world. Hence you are not only an American. You carry responsibility for the entire free world.

The daring and hopes of our common forefathers, founded the land of liberty. In the hopes of the disenchanted, Europe's best idea—liberty in religion and in the state—became linked with the name of your country. America's self respect has nourished itself on this hope of the oppressed since 1776. The abolition of slavery, the wars the United States fought—these were deeds of American self-confidence.

Were America not to recognize its destiny—what a fraud on history! America has been granted greatness to preserve the foremost blessing of its history and of mankind: liberty.

Mr. President, protect the world's symbol of man's determination to preserve and protect that freedom:

Berlin.

INSTANT-VOTER BILL

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. DEL CLAWSON. Mr. Speaker, the Washington Post of January 18 contains some perceptive commentary on the "Instant Voter" legislation which regrettably has the support of the administration. A moving target is always more difficult to hit, of course, and yet many is the hunter who has seen the prey after protracted zigging and zagging merely drop in its tracks. We can only hope that the remaining serious objections to this legislation, notably financial since it will be a costly and unnecessary exercise, will assure that it will meet a similar, justly deserved demise. The article from the Washington Post is included for the information of my colleagues in the House:

THAT INSTANT-VOTER BILL

At first glance, it may seem that the Carter administration and the House Democratic leadership have vastly improved their Election Day registration bill by agreeing to make the program voluntary. After all, the most persuasive and least partisan objection to the bill has been that it would compel every state to adopt by 1980, at least for federal elections, a new instant-registration system that could easily lead to widespread fraud and confusion at the polls. If the program is now to be optional forever, that criticism has been swept away. States with histories of Election Day problems, such as Rhode Island, Louisiana, Maryland and Illinois, will be free to go on requiring would-be voters to register in advance. States with less turbulent traditions may try out the new approach.

That sounds just fine . . . but wait a minute. If the program is to be optional, why is it needed at all? The states are free to adopt instant-registration or no-registration systems anv time. What would the legislation add? Just one thing: money. Federal money, to be precise, through grants for administrative overhead and fraud control and "voter outreach" programs and the like in states that do agree to open their registration rolls on Election Day.

That's why the bill is still alive—and why we still object to it. We have no quarrel with federal inducements in principle; the carrot is often more effective than the stick. But the idea of federal aid for state and local electoral activities has its own problems. Without careful supervision, "voter outreach" could quickly turn into voter roundups for the benefit of one party, faction or candidate. With federal monitoring, on the other hand, would come federal regulations and bureaucracy—and equal-opportunity rules for precinct workers would not be far behind.

It doesn't help that the federal largesse would go only to willing states. On the contrary, the states most cordial to Election Day registration are likely to be those with the

fewest voting problems—and the least real need for federal aid. One could argue, in fact, that if the aim is to shore up state and local election boards, the greatest help should go to those that don't dare risk instant registration at all. But bolstering election administration seems to be a secondary interest for the Democrats. Their first hope is to get more people to the polls. They ought to try to do that in the customary ways, through good grass-roots organizations, attractive candidates and issues, and strong campaigns.

FREEDOM FOR A COMPANY TOWN

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. EDWARDS of California. Mr. Speaker, the first hearing on the bill to provide voting representation in Congress for Washington, D.C. will be held by the House Judiciary Committee's Subcommittee on Civil and Constitutional Rights on July 25, 1977. It is hoped that the constitutional amendment will be brought to the floor shortly after the August recess.

The following editorial in the Los Angeles Times expressed well the logic of the proposed legislation:

[From the Los Angeles Times, May 10, 1977]

FREEDOM FOR A COMPANY TOWN

While President Carter concerns himself with human rights abroad, a serious abridgement of civil and political rights can be found on his own doorstep.

More than 700,000 District of Columbia residents—a number exceeding the population of 10 states—still are denied the right to govern themselves and to elect voting representatives to Congress.

Their disfranchisement mocks this country's claim to universal suffrage, and violates the United Nations' covenants on human rights, to which the United States is a signatory: "All peoples have the right of self-determination. By virtue of that right they freely determine their political status and cultural development."

No such rights exist for citizens of the nation's capital. They have only a token measure of self-government, and even that is subject to veto by Congress. They elect only one, nonvoting, member of the House of Representatives, and have no representation at all in the Senate. They did not win the right to vote for President and Vice President until the election of 1964.

Year after year, efforts are made in Congress to confer full citizenship on the residents of Washington, but a majority always prefers to keep it a "company town."

It is intolerable that residents of the district must pay taxes, serve in the military in time of war and be subject to all the enactments of Congress, yet have no voice in the decisions affecting their lives and welfare.

The district should have two senators and as many representatives as its population would entitle it to if it were a state—two under the last census. It should also have full local self-government.

Carter should take the lead in liberating the District of Columbia from its present vassal status. He was willing to risk the success of his first major foreign-policy initiative—his arms proposals to the Soviet Union—by speaking out against that country's violations of human rights. He ought to be just as wiling to stand up for the rights of his neighbors in Washington, D.C.

PRIVATE LIVES ON THE RECORD

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. KOCH. Mr. Speaker, I would like to bring to the attention of our colleagues an editorial from this morning's Washington Post. The editorial entitled "Private Lives on the Record," addresses itself to the problems investigated by the Privacy Protection Study Commission involving personal privacy in modern America. The recommendations as the Post suggests seek to insure "fairness for individuals in relationships that are no longer as private or personal as they used to be."

With the intention of applying safeguards to the information practices of State, local, and organizations in the private sector, my colleague, Congressman BARRY GOLDWATER, JR., and I introduced the following bills on July 12, 1977:

H.R. 8286, Public Assistance and Social Service; H.R. 8284, Social Security Number; H.R. 8282, Consumer Credit; H.R. 8285, Commercial Credit; H.R. 8280, Government Access; H.R. 8281, Banking and depository institutions; H.R. 8280, Insurance; H.R. 8287, Internal Revenue Records; H.R. 8283, Medical Records.

It is our hope that these bills will lead to the implementation of many of the Commission's recommendations which the Post commends as being thoughtful and thorough. I applaud the Post's understanding and perceptiveness of the problems that the Commission deals with. I agree with the Post that—

What is needed now is a serious response from Congress, the states and thousands of private organizations that collect, use and exchange records on individuals.

For the benefit of my colleagues, the Washington Post follows:

PRIVATE LIVES ON THE RECORD

Most citizens' private business is not really private any more. The day is gone when individuals could deal with their doctors, bankers, insurance agents and the like primarily face-to-face, with some assurance that their personal affairs would remain confidential. Now people have to cope increasingly with remote, impersonal organizations whose judgments are based largely on records that an individual may know little about and over which he has very little control.

How should organizations' needs for information about people be balanced against individuals' desires for fairness and privacy? Some thoughtful answers have emerged from a federal commission's two-year study of public and private record-keeping practices. The panel has recommended steps to minimize intrusions into people's lives by government and private investigators and to buttress citizens' expectations that the details of their financial and medical affairs will be treated as confidential. Those are traditional "privacy" issues that one might expect a group called the Privacy Protection Study Commission to focus on. The panel has gone further, however, and also suggested ways to insure fairness for individuals in relationships that are no longer as private or personal as they used to be.

Any person, the commission concludes, should be able to find out what information about him a financial institution, insurance company, medical agency or other such organization has, and how those records are being used. He should have some control over the release of medical records and financial files. Organizations should have to explain the basis for adverse decisions, such as a denial of credit, and allow people to challenge records that are inaccurate, incomplete or out of date. Those basic principles have been applied to federal record-keeping, however imperfectly, by the Privacy Act of 1974. They should certainly be extended to state and local governments and private institutions as well.

One tough question is how change in the private sectors should be achieved. Many businesses, notably in insurance, credit and finance, fear—with good reason—that federal regulation of record-keeping could bring on demands for new heaps of costly records and reports. Moreover, citizens will gain little if government intervention leads, even inadvertently, to greater official surveillance of citizens' affairs.

The commission is well aware of these problems. Instead of recommending an all-embracing, immensely detailed regulatory scheme, it has proposed approaches tailored to specific fields. Fairer credit practices, for instance, should be obtained largely by expanding existing laws. New policies on medical records, an acutely delicate and controversial subject, should be pursued partly by federal initiatives and partly by the states. Finally, the panel concluded that confidentiality and accuracy have to be assured in the burgeoning field of electronic funds transfers—but the financial information involved is so sensitive that government ownership or management of these networks should be prohibited.

As the whole report assumes, there is no quick, easy or technological fix for the dilemmas of an "information society." A better balance between organizational efficiency and individual rights and liberties can be reached only by many painstaking adjustments in the ways that public and private business is done. The panel has set forth some good ideas. What is needed now is a serious response from Congress, the states, and the thousands of private organizations that collect, use and exchange records on individuals.

COMMEMORATING THE 60TH ANNIVERSARY OF THE NATIONAL ALLIANCE OF CZECH CATHOLICS

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Ms. OAKAR. Mr. Speaker, founded on July 17, 1917, here in the United States of America to help a then struggling Czechoslovak nation, the National Alliance of Czech Catholics has remained a beacon for Czech culture in this country. During its early years it supported the efforts of the Czech nation to become independent after World War I. Food and material assistance were generously donated by Czechs in this country.

The alliance in its 60-year existence has worked not only to help Czechs overseas, but to preserve the Czech culture here, and to further the education of Catholic priests for the spiritual growth of the Czech people everywhere. Toward this end the alliance supports seminaries not only here in this country, but also one in Rome where Czechs and Slovaks study for the priesthood since there is no freedom of religion in Czechoslovakia.

One of the cofounders of the national alliance was the late Msgr. Oldrich Zlamal, who worked in my district as the pastor of Our Lady of Lourdes parish in Cleveland, Ohio. Monsignor Zlamal provided the leadership to many of the Czech people, working long and hard to raise funds for the less fortunate here and abroad. On the occasion of their 60th anniversary, I would also like to commend the president of the Cleveland branch of the national alliance, Vaclav Hyvnar, and all the other members of the national alliance for their dedicated and inspiring work.

H.R. 8359, A BILL TO RESTORE EFFECTIVE ENFORCEMENT OF OUR ANTITRUST LAWS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. RODINO. Mr. Speaker, on Friday, July 15, 1977, I introduced, on behalf of myself and the majority members of the Subcommittee on Monopolies and Commercial Law, H.R. 8359, a bill to restore the effective enforcement of our antitrust laws, by overruling the Supreme Court's recent Illinois Brick decision. Senator KENNEDY, on the same day introduced identical legislation, cosponsored by Senators DANFORTH and MORGAN.

The Illinois Brick decision, barred persons injured by price-fixing conspiracies from recovering treble damages, in cases where they did not purchase the price-fixed goods directly from the price fixer.

However, the ultimate consumers of price-fixed goods only rarely purchase them directly from a price-fixing manufacturer. Far more often, the person who in fact pays the bulk of any illegal overcharge buys a price-fixed item only after it has passed through the hands of a number of middlemen—wholesalers, distributors, retailers, et cetera. In these cases—for example, price-fixed bread, potato chips, sugar, milk, television sets, automobiles, and antibiotics—the ultimate or indirect consumer cannot now recover any damages whatever.

Three types of antitrust cases are adversely affected in this manner by Illinois Brick:

Actions by any person for treble damages under Clayton Section 4;

Actions by the U.S. Government for single damages under Clayton Section 4A; and

Actions by State attorneys general, as parens patriae on behalf of consumers in their States, for treble damages under Clayton Section4C(a)(1).

The substantive prohibition of these three statutes is identical: In each case, recoveries are limited to plaintiffs who are "injured in their business or property." It is this term of art that was narrowly construed in Illinois Brick to protect only direct purchasers; and it is this phrase that must be amended in order to authorize damage actions by indirect purchasers.

The bill does this by parallel amendments to each of these statutes, authorizing damage recoveries for plaintiffs who are "injured in fact, directly or indirectly, in their business or property."

We stress the importance of amending all three statutes, and doing so in a parallel fashion. Amending Clayton section 4 would restore effective antitrust enforcement by businesses, the States, and their public agencies, whenever these groups are the indirect purchasers of price-fixed goods, and in fact pay some or all of the illegal overcharge. In recent years, the States and public agencies have been repeatedly injured in this manner; and before Illinois Brick and the fundamental change it has now made in the law, the States and their agencies had recovered hundreds of millions of dollars for a wide variety of price-fixed goods they purchased through middlemen, such as:

Gymnasium bleachers purchased by schools;

Library shelving purchased by schools;

Tetracycline antibiotics purchased by public hospitals and welfare recipients;

Children's books purchased by schools and libraries;

Locks and other contract hardware installed in schools, hospitals, and other public buildings;

Diuretic drugs purchased by public hospitals;

Gasoline purchased by public agencies;

Wallboard used in the construction of schools, hospitals, and other public buildings;

Metal culverts used in State highway projects;

Concrete and steel conduit pipe used in road construction;

Generators purchased by public utilities;

Asphalt purchased from middlemen and incorporated in roads;

Structural steel for bridges; and

Brass tubing used in the construction of public buildings.

But an amendment only to Clayton section 4 would, however, give no remedy to the U.S. Government whenever it is an injured indirect purchaser—and the U.S. Government now stands to lose $205 million in single damages in just three pending cases—involving price-fixed steel bars, price-fixed cardboard boxes, and price-fixed antibiotics—simply because it purchased these goods from a middleman, and not directly from the price-fixing manufacturer.

Nor would an amendment solely to Clayton section 4 empower the States to bring parens patriae suits whenever their citizens indirectly purchase price-fixed bread, or other consumer goods—even though the clear intent of Congress, in the 1976 parens patriae legislation, was to authorize damage recoveries in precisely this kind of case.

It is true that Illinois Brick does permit the direct, first purchaser to recover the entire illegal overcharge. As a matter of antitrust enforcement policy, this is unjust and unwise.

It is unjust, because it denies compensation to the real victims of antitrust violations. It turns the law upside down, by permitting direct purchasers to recover everything—even though they often pass on the entire overcharge to their own customers, and thus sustain no damage whatsoever. At the same time that it gives this windfall to first purchasers, Illinois Brick totally denies any recovery to the businesses, Government agencies, and consumers who indirectly purchase the price-fixed goods—even when these indirect purchasers have, in fact, paid the entire illegal overcharge. The decision thus contravenes what should be a fundamental rule of our system of justice: If a violation, in fact, injures you, and you can prove your damages, then you should be entitled to recover them.

Not only is it inequitable to give first purchasers the sole right to sue, it is also highly unwise, for it limits the right to enforce the law against price fixing to those very plaintiffs who have the least incentives to sue and recover. First, the direct purchasers are often heavily dependent on their suppliers; in these cases, even the mere filing of a treble damage action could gravely impair their credit and financing arrangements with the alleged violator, and also invite the termination of their supply contracts. While they might ultimately win a long and costly damage action, they might not; and even if they do finally prevail, life could be very difficult for them in the interim. These plain realities will, unfortunately, deter many private lawsuits.

Second, in many other cases, the direct purchasers will not, in fact, be injured at all by the violation. Indeed, they may actually profit from it, as apparently happened in Illinois Brick—there, the first purchasers were subcontractors, who simply marked up the costs of the price-fixed brick in order to calculate their own profits. Hence, the bigger the price-fixed overcharge, and the higher the cost of the brick, the greater were the profits of the first purchasers. No one likes a lawsuit, of course, but this should be especially true when the violation does no harm to the plaintiff, and, in fact, boosts his profits. Experience bears this out: In the Master Key litigation, even though the case was pending for 7 years, and resulted in a substantial recovery—$21 million—not one single direct purchaser ever joined in it.

Third, in many industries—such as the construction industry—the direct purchasers who now have the sole right to bring an antitrust suit are themselves notorious antitrust violators. A staggering number of price-fixing and bid-rigging indictments and convictions against contractors of various kinds have been returned and obtained in recent years. These contractors can hardly be expected to initiate antitrust actions against their suppliers, thereby exposing themselves to broad civil discovery, and thus increasing the chances that their own violations will be detected.

Hence, under Illinois Brick, there will be many instances in which no one will ever sue the price fixers. Once again, the injured businessmen, Federal and State agencies, and consumers will be defenseless. There will be no compensation to most victims of these costly, "white-collar" crimes; there will be no punishment for those who perpetrate these felonies; and there will be no deterrence against

future price-fixing violations. The impact of this decision upon the public interest in effective antitrust enforcement is therefore likely to be grave and serious indeed.

Moreover, the Illinois Brick opinion completely nullifies the clearly expressed intention of the 51st Congress, which enacted the Sherman Act in 1890 together with the original private treble damage statute, precisely in order to give a remedy to consumers who purchased illegally price-fixed consumer goods like bread, sugar, beef, matches, pencils, and the like.

The opinion also nullifies the clear intention of the 63d Congress, which reenacted that treble damage statute in 1914, as section 4 of the Clayton Act.

This opinion also contravenes the plain language of Clayton section 4, which authorizes recoveries for "any person" injured by reason of antitrust violations—not just "direct purchasers."

And as the dissent in Illinois Brick notes, the opinion flouts the clearly expressed intention of the 94th Congress, which enacted the parens patriae legislation last year precisely in order to give consumers a real remedy whenever they purchased price-fixed bread, potato chips, and other consumer goods. As I stated on the floor of the House last year, during the final debate on parens patriae:

The compromise bill expressly gives "standing to sue" to the State attorney general. And the compromise bill squarely grants "standing" in cases where consumers have purchased price-fixed products—such as bread, potato chips, milk, eggs, gasoline, automobiles, and the like. Thus, assuming the State attorney general proves a violation, and proves that an overcharge was "passed on" to the consumers, injuring them "in their property"—that is, their pocketbooks—recoveries are authorized by the compromise bill whether or not the consumers purchased directly from the price fixer, or indirectly, from intermediaries, retailers, or other middlemen. The technical and procedural argument that consumers have no "standing" whenever they are not "in privity" with the price fixer, and have not purchased directly from him, is rejected by the compromise bill. Opinions relying on this procedural technicality . . . are squarely rejected by the compromise bill.

First, if this bill means anything, it means that the State may recover damages for purchasers of price-fixed bread, potato chips, and the like. To argue that consumers must be direct purchasers from the price fixer is to deny recovery in these cases—for the consumer rarely if ever buys potato chips directly from the manufacturer, or bread directly from the bakery. In these cases, the manufacturer invariably sells through wholesalers and retailers—grocery stores, drug stores, and the like—and if the intervening presence of such a middleman is to prevent recovery, the bill will be utterly meaningless. In any event, most courts have recognized this fact.

And the Illinois Brick opinion also flatly reverses the considered rulings of no less than nine U.S. Courts of Appeal, which in recent years had upheld the rights of indirect purchasers to recover treble damages from price fixers. Worse, it is a clear departure from the many past Supreme Court opinions which had squarely ruled that a broad and liberal construction of this fundamental remedial statute was mandated by the vital public interest in maintaining the vigor of our free enterprise system.

I expect the subcommittee will act expeditiously on this remedial legislation, so that we can restore the effective enforcement of our antitrust laws.

TOO MUCH GOVERNMENT AND CONGRESSIONAL SPENDING

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. COLLINS of Texas. Mr. Speaker, this morning's mail brought a letter from one of my good constituents. He feels like the forgotten man because he is not a part of any of the special interest groups that apply to Congress for special benefits.

He is Arthur O. Miller of 10141 Chesterton, Dallas, Tex. 75238. Mr. Miller is the kind of guy that has kept this country moving forward. He feels that we have too much Government and too much congressional spending. He is right. Read this part of his letter as he is voicing the sentiments of many, many of the finest citizens of Texas:

I am a member of the largest, most unwanted, unrepresented, unpopular, un"protected" majority in America—a white, male, Anglo-Saxon, protestant, law-abiding, tax paying, loyal American citizen who is forced to contribute the equivalent of 3 months out of every year in involuntary forced labor toward the support of the persons mentioned above.

I am in the forgotten, disfranchised group that is ignored on tax rebates, tax relief, low interest loans, college scholarships, promotions based on merit instead of "goals" (quotas). I am first considered in new sources of taxation, United Fund drives, Red Cross contributions, and as cannon fodder for wars.

I am one of a vast army of unorganized nonpersons who have pleaded in vain for years for the following:

Get some control of the wild, inflationary spending by Congress and the federal bureaucracy. Stop buying votes with my tax dollars!

Give us some relief from Big Brotherism. Quit talking about it and do it!

Stop federal judges from making laws! They are not elected and have no right to set themselves up as our governors.

Stop taking my tax dollars and sending them to overseas political cronies such as Korea, India, etc., under the guise of foreign aid. Cut out Foreign aid! You can't buy friends.

Stop all the talk about a negative income tax. All this means is taking my tax dollars and giving them to someone who won't work. All this talk about a shortage of jobs is pure political hog wash!

Wipe out EEOC! In fact, wipe out the whole HEW outfit. They have ruined our schools, forced hiring and promotions on a quota system, forced discrimination against whites in favor of blacks, and now they are trying to force college entrance quotas by percentages instead of by entrance exam scores.

Stop Carter from granting amnesty to draft dodgers, Cuba, Vietnam, Gay Activists and Mexicans. Our country can't stand much more of this!

If it takes a constitutional amendment to stop HEW from forced busing—then do it.

HUMAN RIGHTS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. HAMILTON. Mr. Speaker, as the House of Representatives was not in session on July 6, 1977, I would like to insert my Washington Report for that date into today's CONGRESSIONAL RECORD:

HUMAN RIGHTS

The advancement of human rights occupies a central place in President Carter's foreign policy. He has adopted "an undeviating commitment to human rights everywhere."

The policy of outspokenness on human rights is not without its problems. Should the United States make military aid to South Korea dependent on the release of opponents to President Park's regime? Should the United States tell President Marcos of the Philippines that it will not sign a new defense agreement until martial law is lifted? If the United States does not raise its voice against the Philippines and South Korea will it not appear hypocritical when it attacks violations of human rights in South America or South Asia? What steps can the U.S. take to improve the well-being of a Soviet citizen and yet not create undue tensions between our two countries?

The dilemma for the United States is to acknowledge that we cannot police the whole world, and that we cannot ignore the obvious power of the United States to improve the condition of people in some areas. In pursuing a human rights policy there are limits to what the United States can achieve and to what the United States can impose upon other nations. The question is really how far the United States can go in promoting human rights without producing undesired results. Americans want a foreign policy which contains a strong moral component, but it is necessary to distinguish which expressions of moral concern are useful and which are not. Americans want to pursue policies which will enhance human rights, but, if the only action their government takes is to issue public criticism of other nations, the situation may not improve and could become worse.

The answer to this question involves linkage, that is, the resolution of one issue depends on progress toward the resolution of another. In the conduct of our foreign policy, can we link the help sought from the United States (aid, trade) to the record of the particular country on human rights?

Proponents of a human rights policy, led by the President, make several points. They emphasize the strong support of the American people for human rights. Americans are proud of their democratic heritage and they want to spread democratic values. Most Americans view the United States as a moral force in the world, and they are pleased when its leaders speak forthrightly about human rights and use leverage to advance those rights. Supporters of the President's strong stand on human rights also argue that his outspokenness will not adversely affect resolving most important international agreements. For example, they contend that the Soviets are not likely to allow their annoyance with the President's human rights campaign to deter them from reaching agreements on SALT and other important matters.

Opponents of this view contend that there are sharp limits to what the United States can accomplish by expressing publicly its concern for human rights. By doing so, the United States will only inflame emotion, create unfulfilled expectations, and in the

end accomplish very little. They argue that the United States will retain influence in a country only if there is a minimum of confrontation. In their view the Soviets are apt to perceive the human rights offensive, not as an expression of America's moral values, but as a move by the United States to stir up trouble inside their country. They say that improvements in the lives of Soviet citizens are more likely to evolve from forces within the Soviet society under prolonged conditions of reduced tensions than from pressure from the United States for change.

It seems to me that although the President continues to express his concern about the issue of human rights, he has taken a quieter, more conventional approach to the human rights issue in recent weeks. Apparently he is swinging around to the view that more can be accomplished by quiet diplomatic pressures than by public criticisms. More and more he seems to be reserving the right to speak out on the issue of human rights without criticizing violators of human rights by name.

My own judgment is that the best way to pursue the course of human rights is not loudly and ostentatiously, but quietly, discreetly, and persistently over an extended period. Certainly the promotion of human rights is a legitimate goal of foreign policy, but it has plenty of pitfalls and, if carried too far, it produces arrogance. If mishandled, it could hurt the U.S. badly; if handled well, it could boost freedom around the world and lift the stature of the U.S.

So I applaud the policy and urge that we continue to pursue it, but with great care. The question whether an official statement will improve the situation for repressed people is a hard judgment that has to be made on a case by case basis. In most circumstances my guess is that much can be accomplished through quiet diplomacy behind the scenes.

CONGRESS HONORS BENJAMIN TAYALE OF PHILADELPHIA

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. LEDERER. Mr. Speaker, I call upon my colleagues in Congress to join with me today in honoring Mr. Benjamin Tayale for his 25 years of volunteer service to the citizens of Philadelphia.

Mr. Tayale has a long and distinguished record of hard work within the community. In his 25 years of volunteer work with the American Red Cross, Mr. Tayale has been at the scene of many tragic emergencies, such as fires and hurricanes, to render assistance and offer consolation to the victims. He is a member of the Philadelphia Fire Prevention Committee, community representative of the police department's community relations division, chairman of the North Philadelphia Civic Committee which combats poor housing, community and juvenile problems, and is chairman of the parish Public Affairs Committee of the Jesu Roman Catholic Church.

Mr. Tayale has received 54 civic and community awards for outstanding dedication to helping others. Among them is the 1977 United Fund Silver Anniversary Award for Volunteer Service. He was also the recipient of the American Red Cross Distinguished Service Award in 1976, and the Chapel of Four Chaplains 25th Year Silver Anniversary Award for Outstanding Volunteer Service on June 9, 1977.

All Philadelphians know Ben as a dedicated friend who is always nearby in times of need or hardship. In these trying times for many of us, Ben's dedication to his fellow man is a beacon of light to all of us. It is entirely fitting that the U.S. House of Representatives honor him today.

"RED" CLOWARD RETIRES FROM 30 YEARS OF SERVICE TO WORKING PEOPLE, HIS COMMUNITY

HON. JOHN J. McFALL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. McFALL. Mr. Speaker, those of us who believe that organized labor has been a major contributor to the well-being of the American people, can appreciate the work of countless individuals to help bring about the prosperity we enjoy today.

Among those who stand tall in the labor movement is "Red" Cloward, of Modesto, Calif.

During the evening of July 29, many of Red's friends, colleagues and admirers will gather at the Sportsmen of Stanislaus Club in Modesto to express their appreciation to him as he embarks upon a richly deserved retirement.

Today, Mr. Speaker, I would like to spend a short time to bring the Members' attention to the work of this fine man who is retiring from 30 years of service to the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry.

As one has observed, Red has performed his responsibilities with "dignity and integrity." He has given many hours of his own time to help his brother members and has been a concerned and understanding friend as well as holding the positions of financial secretary and business manager.

In his professional career, Red also served as district vice president to the California State Building Trades Council for 27 years, and president of the local Stanislaus, Merced, Tuolumne, and Mariposa Counties Building and Construction Trades Council for 19 years.

He was instrumental in organizing the valley group negotiating committee through which District Council No. 36 was established, followed by the formation of the health and welfare and pension trust funds of Pipe Trades District Council No. 36.

For many years Red has been active in civic organizations and contributed much of his time to the Greater Modesto Committee, Modesto City Charter Committee, the Salvation Army, and the county central committee of his political party.

His work to improve job benefits and working conditions of his tradesmen has been a great source of guidance and assistance for his local, and to others throughout the State of California.

I am glad to express my appreciation to him and for having known him as a good friend for many years.

Grateful working men and women, his community and others wish him and Marie, his wife of 45 years, the very best of health and happiness during the years to come.

THE AMERICAN ENTERPRISE INSTITUTE'S IMPORTANT NEW PUBLICATION ON THE EFFECTS OF GOVERNMENT REGULATION

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. KEMP. Mr. Speaker, the American Enterprise Institute for Public Policy Research under the leadership of Bill Baroody, Sr., and Executive Vice President Bill Baroody, Jr., has long been known as one of the most respected organizations in its field. Its studies of legislation, defense, foreign policy, health, energy, economics, and Government regulation are all of uniformly high quality, and are constantly cited in both scholarly and congressional debate.

In particular, AEI's studies of Government regulation have had a substantial impact on the Congress understanding of the costs of such regulation, which are now estimated to run into the tens of billions of dollars.

Now AEI has begun a new publication, called Regulation, which will continually examine issues in Government regulation, for the benefit of those both inside and outside the Government. As editor Anne Brunsdale put it in her introduction to the first issue:

This journal is a response to the extraordinary growth in the scope and detail of government regulation. Surely this phenomenon is one of the two or three most significant political facts of our times. Yet, because the extension of regulation is piecemeal, the sources and targets diverse, the language complex and often opaque, and the volume overwhelming, much of this activity escapes public notice and therefore public debate. Partly in consequence, old regulatory agencies and programs remain and new ones are frequently launched with little analysis of the problems being addressed, of costs and possible side effects, and of alternative methods for achieving the same ends.

The editors of this journal recognize that, in a complex industrial society, a substantial measure of regulation may be necessary. We are committed, nonetheless, to the ideal that this regulation should be sensible, cost-efficient, and as unburdensome as the nature of its objectives will allow. In the coming years, we hope to advance that ideal by stimulating informed public discussion.

The first issue of Regulation is highly impressive, and contains an especially interesting article by Prof. Irving Kristol on the growth of regulation in our society. I commend this article to my colleagues and I hope they will also examine future issues of this fine publication from AEI.

The article follows:

[From Regulation, July–August 1977]

A REGULATED SOCIETY?

(By Irving Kristol)

No reasonable person is in principle opposed to all government regulation. None of

us wants to coat our walls with a paint that slowly poisons the air we breathe, just as none of us wants our kids to wear pajamas that have been treated with a carcinogenic chemical. It is true that, in theory, a free market can cope with problems such as these. The manufacturers of lead-free paint or Tris-free pajamas should simply be able to take the market away from the others. But this involves creating and disseminating to the entire population an enormous amount of accurate information (some of it highly technical) about a vast range of products—information, moreover, which changes rapidly. There really is no efficient way to achieve this. It is absurd to expect consumers to become experts in such matters, when most of them have neither the capability nor the time. They can compare prices easily enough, and can roughly compare the quality of competing items—but when "quality" involves fairly arcane scientific knowledge, the communications system represented by a free market breaks down, so far as the ordinary person is concerned.

It is for this reason that all nations regulate their medical professions at least to the degree of certifying who is a doctor and who is not. The assumption behind such regulation is that the consumer is in no position to make the certification decision for himself—as most of us know and freely admit. And it is for this same reason that the drug companies would be the first to oppose the idea that drugs should go completely unregulated. They fear, quite properly, that such havoc would be wreaked as to result, in the end, in a state-owned monopoly to protect the consumer against his own vulnerable ignorance.

So there is no argument about regulation in principle, and the polar distinction between the regulation of commercial transactions and the free market, so often heard, is not very meaningful in practice. Moreover, it is reasonable to expect that in a more densely populated society, consuming an ever-greater variety of technically sophisticated goods, there would be more regulation rather than less. People will want greater protection against their own incapacities as consumers. They will also, of course, want protection from the side effects (the "externalities") of other people's activities as producers, which now are observed to affect them to an ever-increasing degree. Such observations themselves are often the result of more sophisticated scientific inquiry, which uncovers externalities we were not previously aware of.

But the same complexities that give rise to more government regulation also make effective regulation a very difficult enterprise. The hard questions are: what kind of approach should be used, where, and to what degree—questions that merit sober, informed, and prudent judgment. And one may wonder: can such judgments be made by people who are eager, as many among us are, to use the regulatory mechanism as a lever for transforming the social and economic order as a whole? I have in mind the people—the "New Class" as they have come to be called—who do not, on balance, like a free, commercial society: that is, a society shaped by voluntary commercial transactions among consenting adults, in short, one whose central economic institution is the marketplace. They sincerely believe that a powerful government, in which they have positions of authority, can order things better. If one designates them, in a short-hand way, as "Naderites," one would not be far off the mark.

I must be careful here, because I do not want to be understood as suggesting some nefarious, secret conspiracy to transform the American social and economic system. There is no such conspiracy—in large measure because there is no need for one. When we create a vast regulatory apparatus, with goals sanctioned by law and public opinion, we have also created a whole set of power centers to which people of the New Class naturally gravitate.

And here we must be candid as well as careful. Though officialdom will deny it—sometimes naively, sometimes not—it is a fact that most of those holding career jobs in EPA, OSHA, and other newer regulatory agencies have an ideological animus against the private economic sector.* This is a fact evident to anyone who has had any dealings with them, or who has ever had the opportunity to meet with them socially. They are not in those jobs because they could not find any others. Most of them, in truth, are sufficiently educated and intelligent to find better-paying jobs in the world of business. But they are not much interested in money. They are idealistic—that is, they are concerned with exercising power so as to create "a better world."

It is interesting to note that there is one subject toward which these intelligent people, with an above-normal intellectual curiosity, show a positive distaste—and that is the subject of economics. Ask them to contemplate the economic implications of their regulatory actions—in the form of economic impact statements, say—and they exude a cold hostility. Why? One explanation, frequently heard, is that they are merely displaying a bureaucratic distortion of vision. Having been given the mission of regulating, they resent the intrusion of any *modus operandi* that will distract them from doing this one thing that defines their role. This explanation is unsatisfactory. These "bureaucrats," far from being bureaucratically myopic, are full of opinions on many matters, and are really not much concerned about their futures in the bureaucracy or even about the future of the bureaucracy itself.

No, the plain fact is that these are people who are discontented—often in a vague and unfocused fashion—with modern technological civilization, and especially with the economic system that they see as the progenitor of this civilization. They are inclined to believe that a "planned" economic system would create a superior way of life for all Americans. They detest the individualism so characteristic of a free society, which is why they will speak so favorably of "mass transit" and "planned communities" and so contemptuously of the private automobile and "suburban sprawl." They also, therefore, have little use for private economic enterprise, and are utterly indifferent to the costs they load upon it.

Some critics have called these regulators elitist. The accusation never hits home because the members of this New Class are absolutely convinced that they are protecting "the people" against the iniquities of "the system." A better term might be "liberal paternalists," understanding "liberal" to mean something like what "social democratic" means in Europe.

But however labeled and defined, they are incontestably there, wielding an immense power that Congress is reluctant to check or balance. After all, what congressman wants to be publicly excoriated by a host of "experts" for spreading cancer among his constituents? In any case, the staffs of many congressmen—and of many congressional committees—are composed of these same people of the New Class.

Sooner or later, however, checks and balances will have to be provided, if we are not to slide into a regulated society, one in which the scope for individual decision-making (in our personal lives as well as in business) is increasingly narrowed. A vast net of paternalistic protectionism, cast over all of our activities, will lead to economic, social, and political tensions of the most grievous kind. Americans want reasonable regulation, but it is highly unlikely that they are so risk-averse as to wish to be protected against all possible risks, particularly if it means a radical dilution of their powers of self-government. We have never been that kind of people and it is hard to believe that our national character has changed so drastically over these past fifteen years.

*The older regulatory agencies (the ICC, CAB, and so on) are in a different category altogether. They were born out of fear of monopoly, not a distrust of business enterprise per se. They have no ideological animus against business—though they tend to stifle competition, for fear of its leading eventually to monopoly.

SLAUGHTER IN CAMBODIA

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. ABDNOR. Mr. Speaker, on June 29, 1977, the American Conservative Union Forum featured Mr. John Barron, senior editor of Reader's Digest and author of the best-selling book entitled "The KGB: The Secret Work of Soviet Secret Agents."

Mr. Barron spoke on his experiences in Thailand, where he was doing research on his book, "The Murder of a Gentle Land," just released on the Reader's Digest Press. A major portion of his research consisted of interviews with hundreds of Cambodian refugees who gave him an extrordinarily detailed account of the mass murder and brutal oppression of the Cambodian people by their Communist rulers.

Mr. Speaker, this is a horrifying account and one that would shock the world if it only knew. The Congress and the Carter administration have been expressing major concern over human rights, but Cambodia has been summarily overlooked and neglected.

Mr. Barron stated that it is easy for America to remain mute in the face of this senseless massacre because we have no diplomatic relationships with Cambodia, but this silence is illusory and suggests a lack of imagination, effort, and concern.

True, the United States may have no formal diplomatic relationships with Cambodia, but I would like to draw attention to the mass effort of Americans to deal with human rights violations in Russia, stemming largely and simply from information and public statements which have resulted in the publicity that has aroused and enraged the citizens of our country. And this type of public exposure is precisely what we as a country can do to help put an end to the Cambodian struggle. In short, attention must be drawn to Cambodia before we can expect action to be taken.

Such action can stimulate those that do have relationships to Cambodia, specifically the United Nations. It is significant that even to other Communist countries, the Khmer Rouge regime is a disgrace. It is long past the time that this Nation can continue to ignore the terrible tragedy that has been inflicted

once again upon an innocent people, and it is time the problems of these beleaguered people of Cambodia come to the forefront, in the White House and in the United Nations.

A SENSITIVE AND DESPAIRING LOOK AT LIFE IN URBAN AMERICA BY CLAYTON RILEY

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. WEISS. Mr. Speaker, the looting that resulted from last week's blackout in New York City was a painful reminder of how desperate the lives of ghetto residents have become. For most of the young people in our Nation's ghettos, as Clayton Riley's excellent article in the New York Times of July 17 makes clear, there is no tomorrow—

There is, in short, very little to look for in life, except the swift, dangerous opportunities that flash across town when America is temporarily blinded by a technical darkness.

The looting itself, is, of course, deplorable, a sad commentary on how people hurt rather than helped a city in crisis. But what is more deplorable, as Riley so movingly points out, is that we have as a nation done little to change the conditions that lead to looting. We have learned little from the riots that ravaged our ghettos in the sixties. More regrettably, it may be, as Riley says, that "tomorrow is already far too late."

When the lights went out in New York City, the only thing that was still visible was a very bleak side of America. It is incumbent on us to make sure there is a better view ahead.

The article by Mr. Riley follows:

[From the New York Times, July 17, 1977]

"TIME IS NO LONGER RUNNING OUT; IT'S GONE"

(By Clayton Riley)

"When the lights went out," a teenaged Harlem youngster is saying outside a Lenox Avenue food shop, "I did my natural thing. I hit the streets, looking to get over."

Getting over is an uptown process, an ad hoc, improvisational system for coping with the catastrophe that is current in the lives of so many young people who live in what we now call, with self-deluding indirection, The Inner City.

The power failure that swept across New York wasn't 30 seconds old, according to one upper Broadway resident, "when they swarmed all over the place, running like rabbits, and stealing from the stores like there was no tomorrow."

Which may, after all, be the point. For kids in Harlem and other I.C.'s around the metropolitan area and beyond, there simply aren't any more tomorrows. There are no plans to make, few events or holidays to anticipate. There is, in short, very little to look for in life, except the swift, dangerous opportunities that flash across town when America is temporarily blinded by a technical darkness. All of us have become completely vulnerable to the rages of those hungry enough to risk police guns or arrest procedures while breaking and entering any place containing items of immediate value.

"I lost it all," a young Hispanic jeweler tells me. "I worked and saved and opened my own place over near Third Avenue. And when it went dark, I just knew my store was dead."

The stories, these and others, will accumulate rapidly. They will be told throughout the summer, by people with new bicycles and sport shirts they didn't buy, and color television sets they will try to sell when things are cooler. And by people who tried to operate small businesses on the shoestring of cheap iron gates across their windows and nonexistent insurance policies on their goods and leased properties

But the bikes will be stolen again: Thieves will be victimized by other thieves. And sport shirts that looked magnificent in the display windows will shrink and tear and be thrown away. People who had finally come around to believing in the American Dream of capitalist free enterprise will have to bury their murdered little shops and go back to dancing to someone else's music from 9 to 5.

To walk the sidewalks in Harlem is to feel—beyond seeing or hearing it—the grip of desperation that has too many strong, healthy people sitting around for months at a time, waiting for jobs that will never materialize, looking for chances America now admits it cannot provide.

What then is going to happen? Where will the massive energy that Con Edison doesn't control, the human force that seeks a channel, go in search of space?

We are reminded—if not instructed—by the acts of violence, the fires and confrontations between the law and outlaws in the city the other night, reminded that America is failing. We are building sports complexes and increasing our manufacture of luxury automobiles while failing to provide substance to the dreams we have told everyone to believe, the dreams of nothing more than shelter, clothes, food, and some occasional fun.

This is what has been promised, by Presidents and other politicians, by planners and thinkers and visionaries. But inside the cities, the systems don't work. And so, in Harlem, when the street lamps die, no one takes time to be surprised. There are stores to rob, or cash registers to protect with licensed guns against the fists of 16-year-olds looking for new shoes.

And when the running and the stealing begin, when the police guns are out and men are slashing each other with bread knives while brawling over floor lamps in a wrecked furniture showcase, we accept in America that the most important thing to do is to report the news quickly: somber-faced on television, stern and avuncular in our editorial columns.

But the larger point is that while we know how to describe and we know how to observe, how to argue and how to draw conclusions, we don't know, three-quarters of the way through the 20th century, still don't know what to do.

And time is no longer running out; it's gone. We stood around and watched the warning fires of the late 1960's, learned nothing, and are now applying our burgeoning ignorance to the present and the future. I say "we" to mean all of us, black and white, male and female, who think that watching and wishing will ever be enough to certify and maintain life in this country.

People steal, or loot, or riot, because they do not have the money to buy what they want. The welfare agencies may buy what people need, but in a nation of such conspicuous consumption as this one, such measures are just not adequate.

Telling poor people who live within whistling distance of the richest people in this country to accept the principle that because they have dark skin there are other things they cannot have, is to structure an equation that cannot pass for common sense in the modern world.

And so long as we refuse to use that particular kind of sense, all of our university training and educational-development fellowships are going for naught.

We are living in a country without a national personality, without a real sense of what the term "American" is supposed to mean, or whom.

To the kids who picked a blackowned men's boutique clean of every stitch of clothes in the place on Wednesday night, there is probably no meaning whatever to the notion of a black brotherhood pitted against the white establishment. There are simply three-piece suits to be copped, along with big hats and ascot scarves—the attire of gentlemen who live in the comfort of distant suburbs.

And to the New York police, whose restraint in these tense circumstances was remarkable, there is probably no longer any reason to believe that a black kid's life is to be traded for a pilfered sack of flour. Somewhere in those emergent and shifting attitudes, there is a mutual groping to understand something about who any of us really are in the melting pot that has never melted anything.

It is time we began to define ourselves, black and white, as the same people: Americans. So that there doesn't remain the slightest emotional reason for allowing Harlems to exist as living cemeteries because "they" occupy the territory.

Pretending that this is a "white" country, with ties extended to the political destines of those who currently rule South Africa and Rhodesia (how similar to our own are the street battles in those two places), is to accept the dead host of colonialism as a spiritual mentor.

Because there will be no more Native Quarters in the true New World. There can be no tomorrow if it brings forth in this country an identity for Harlem's kids that is totally separated from the identity of those who grow up in Scarsdale.

Right now, in "Black America" the loss of light is largely The Man's problem, a malfunction to capitalize on with raids instead of the effort to bring a system back to life as quickly as possible. Meanwhile, all that blossoms uptown is decay, buildings with windows gouged out, and streets with week-old garbage.

Tomorrow is already far too late. Harlem has exploded for the last time, the next sound from here will be a whisper and a gasp. Maybe if America knew how many Americans will die in this war—not how many blacks, how many ex-cons, unemployed, urban poor, underprivileged ghetto-dwelling and socially deprived underdogs, but how many Americans are perishing—then we might move collectively to at least forestall the approaching devastation.

ROBERT M. STANLEY—AVIATION PIONEER

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mrs. SCHOEDER. Mr. Speaker, America has lost one of its aviation pioneers that helped make this country the world leader in aviation with the untimely death of Robert M. Stanley.

Robert Stanley, 65, had a distinguished career as a test pilot, engineer, and aviation recordholder.

He was a personal friend of Amelia Earhart and was aboard the U.S.S. Lexington, an aircraft carrier in the Pacific

when she disappeared in 1937. He participated in the search for Miss Earhart.

Stanley was the holder of the American altitude and distance record for motorless aircraft and was the first American pilot to fly a jet airplane across the country north to south.

He was the inventor of the modern-day mach airspeed meter and was chief engineer of the company that designed and built the first supersonic airplanes, the X–1 and the X–2.

He was a naval aviator from 1937 to 1939 and was a test pilot, engineer, and executive for Douglas Aircraft Co., United Airlines, and Bell Aircraft Corps., before founding Stanley Aviation in Buffalo, N.Y., in 1948. He moved the firm to Denver in 1954.

Among the accomplishments of Stanley Aviation was the development of the Yankee escape system which has been used in Air Force and Navy planes for a number of years.

The Yankee system uses a rocket to propel a pilot and his seat from a crashing aircraft.

His loss will be felt very heavily by the Denver community and I salute him for all the contributions he made to his country's aviation successes.

HIGH STAKES IN LAW OF THE SEA

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. FRASER. Mr. Speaker, the U.N. Law of the Sea Conference involves a complicated set of interrelated issues. One important relationship is that between congressional mining legislation and the negotiations on the International Seabed Authority. Mr. Marquis Childs in his "High Stakes in the Law of the Sea," Washington Post, July 5 outlines the serious consequences of the United States adoption of deep seabed mining legislation now pending. He correctly points out that the result of such legislation would be chaos. Third World nations are likely to declare a 200-mile territorial sea and prohibit passage through their waters as well as overflight to all foreign planes. The resulting confrontation between the United States and the Third World would increase the potential for sabotage and terrorism. We must understand these long-term consequences as mining companies press their short-term advantage in Congress. The real issue is whether we want world chaos or world order governed by a multilateral treaty on the Law of the Sea. As a congressional adviser to the U.S. delegation to the U.N. Law of the Sea Conference I believe such a treaty is not only in the best interests of the United States, but the international community. I insert Mr. Child's article in the RECORD:

HIGH STAKES IN LAW OF THE SEA

(By Marquis Childs)

UNITED NATIONS.—The Conference on the Law of the Sea has been going on intermittently in one place or another for more than four years and the end is nowhere in sight. While the American public could hardly be less concerned, even a brief dip into this ocean of exchanges lets one realize how much turns on the outcome.

The head of the American delegation is Elliot Richardson, a patient man with a finely honed legal mind. He needs all the patience he can muster as he tries to steer a course between two extremes in this unwieldy body of 110 delegations.

On one side are the American and Western European firms, many in consortiums, that want to exploit the seabed to mine manganese, nickel and other minerals increasingly in short supply on land. On the other side are the developing nations, at least those who don't produce these minerals. They are lumped here as the Group of 77, demanding a share in any exploitation and in the technology making it possible.

They favor a U.N. seabed authority with power over access to sites for exploitation. Far-out delegations such as those of Algeria, Kuwait, Mozambique, Libya and India would give ultimate and unrestricted power not to the U.N. Security Council with its veto right for the United States and other great powers but to the General Assembly where the rule of one nation, one vote prevails.

In Washington the Congress is threatening to pass a bill that would require private American companies merely to get a license from the government for exploitation of the seabed. It would also provide compensation for losses sustained from political causes in the operation. Four consortiums involving American firms have so far spent $1.5 billion for improving the essential technology.

If such a measure is passed, the Conference on the Law of the Sea will go down the drain. So what? This could be the reaction of a public little informed about and indifferent to this marathon conference.

But it should be understood that the consequences can be extremely serious and particularly for nations such as Norway, Japan and Britain, dependent on trade and shipping for their existence.

A 200-mile off-shore limit is being imposed by virtually every country, including the United States. Ostensibly this is only to protect fishing rights and prevent the depredation of the big fishing factories like those of the Soviet Union that, until the United States passed its own 200-mile law, made heavy inroads into the marine resources off the New England coast.

The Third World nations could, however, declare the 200-mile limit a territorial extension of their shores rather than a protection of fishing rights. They could then prohibit passage through these waters except on their own terms, which might well be excessive. Moreover, they could deny the right of overflight to all foreign planes whether civilian or military.

The result would be chaos. It would not be the maritime nations alone that would suffer. Take one example of how it would affect this country. Tankers from the Persian Gulf, with a large proportion of the oil the United States is now importing, would have to pass through 17 territorial zones. The charges levied by 17 nations could greatly increase the cost of imported oil.

Yes, but couldn't the U.S. Navy escort U.S. ships through these zones and damn the consequences? That sounds too much like the gunboat diplomacy of the past. It would be a classic confrontation with the Third World. And it would probably not work, given the potential for reprisal by sabotage and terrorism.

Nor could the United States, on a go-it-alone course, count on the backing of other developed nations. One sea-law authority, Jonathan I. Charney, points out that self-interest and the fear of international condemnation would lead the developed world to stand aside from American unilateral action.

Richardson, the patient Griselda of this drama, believes some progress has been made at the current session. He hopes that agreement will be reached shortly on the composite text of a treaty that the several delegations will then take home to be combed over by their respective governments. Richardson has had the active cooperation of Norway's Minister of the Law of the Sea, Jens Evension, whose concern is understandable since failure could cost his country $800 million.

Then next spring still another round of the conference will begin. But there is no guarantee of agreement on a compromise text and still another attempt must be made to pull together the unravelled threads.

U.S. RETIREMENTS TRENDS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. PICKLE. Mr. Speaker, one of the vital issues that this Congress must concern itself with is the question of retirement. Should we force people to retire at an arbitrary age which may have been considered "old" 20 or 30 years ago but has been made relatively obsolete through medical advances and other technological improvements.

It is my firm opinion, and I think that there is strong evidence to support this belief, that "senior" citizens are among the most productive and reliable workers this Nation has. Our esteemed colleague Hon. CLAUDE PEPPER has impressed us greatly by his work in this field.

In the July 10, 1977, edition, the New York Times carried an interesting article on the trend toward earlier retirement. I think that this is a good contribution on this topic and insert it for the edification of the House:

EARLY RETIREMENT IS GROWING IN UNITED STATES

(By Jerry Flint)

"I was working since I was 10 years old," says Jimmy Kilpatrick, who touches up paint on new Cadillac cars in Detroit. "I thought of all the years I've been working, and I want a rest."

At 51, Mr. Kilpatrick is going to take a rest. On Aug. 31 the husky auto worker will retire with a monthly pension of $634. That won't match the $300 a week he earns on the assembly line at Cadillac, but the mortgage payments on the house he bought 15 years ago on Detroit's northwest side are only $127 a month, his two sons are grown and supporting themselves, and his wife, Vera, might even go to work.

If money gets a little short, he says, "I'm not bragging, but I'm pretty good with paints."

Mr. Kilpatrick is part of what may be a significant trend in the work style of Americans—early retirement. Growing numbers of workers are being offered a chance to quit the job early, and many are taking it.

POTENTIAL IMPACT

The trend cannot be measured precisely. Stastics are scarce. Actuaries, economists and union researchers disagree on the numbers and even definitions are debatable. If a pensioneer is working parttime or has begun a second, low-keyed career, has he really retired? What's early? 62? 55? 49?

But there are enough statistics to indicate that something important is happening, and

there is no question about the potential impact. Earlier retirement can mean more job opportunities for the young; it can put more strain on the already troubled Social Security fund; it can create a new kind of worker—experienced, easygoing and willing to work for less. But the biggest change could be in attitudes and styles.

"They used to be senior citizens," said David Weeks, a research director at the Conference Board in New York, a major business organization. "The old view was one of dependence. They were the chronically ill, the nonfliers."

But, he added, the departure of masses of people in their 50's from the work force could have profound political and social implications: "These younger retirees are interested in education, in traveling, in spending more and more of their money on themselves," he said. "For five or 10 years they may come closer to living the Playboy like style than the 30-to-38-year-olds."

"There's a good deal of truth in that," said John Zalusky, an economist for the American Federation of Labor-Congress of Industrial Organizations in Washington. "They are going for the good life at that age."

HAPPY RETIREMENT

At General Motors Corporation, Victor M. Zink, director of employees benefits has been noticing the change.

"There used to be a stigma to going out," Mr. Zink said, "He was over the hill. But now it's a looked-for-status. Those retirement parties, they used to be sad affairs. They are darn happy affairs now. The peer pressure is for early retirement."

In 1954 the average G.M. hourly-paid worker retired at 67 and the salaried worker at 63; today they both retire at 58 or 59, he said.

A handful of statistics give some indication of the size of the movement. Among part-time workers, for example, women outnumber men 7 to 1 in the 25-to-54 age bracket, but only 3 to 2 in the over-55 group. "We think that's the effect of early retirement," said Robert Bednarzik, an analyst at the Bureau of Labor Statistics.

Mr. Bednarzik also notes that the proportion of men in the labor force—that is, working or seeking work—was 95.5 percent of those 45 to 54 years old in 1947; in 1976 it was 91.6 percent. In the 55-to-64 age bracket it was 89.6 percent in 1947 and 74.5 percent in 1976.

DISABILITY STANDARDS

"Every year there's a decrease in the labor force statistics," he said. "First it was among the 65-year-olds and over. Now you see it in the 55's, and we're beginning to see some decline even at 45 and over. You wonder what the 49-year-old is doing."

A good number of the very early dropouts may be tied to disability retirement. "It looks like the health of the American male is deteriorating," Mr. Bednarzik said, "but probably it's the easing of disability standards."

The easy availability of early retirement under disability has been criticized recently with revelations, for example, that one Federal pensioner who had been classified as totally disabled ran a jiujitsu school and another earned $76,793 in a single year in addition to his Federal pension.

Of 79,500 Federal employees who retired last year, 31,500 were out on disabilities and their average age was in the middle 50's, according to Edwin Hustead, chief actuary for the Civil Service Commission. Those under Federal Civil Service who do not claim disability may retire with an unreduced pension at age 55 after 30 years of work and get a pension equal to about 56 percent of their best years' salaries. Government retirees also get a cost-of-living adjustment twice a year.

The Social Security Administration predicts a sharp slowdown in the trend toward early retirement. For example, for males in the 50-to-54 age bracket, labor force participation was 93.1 percent in 1970 and 89.9 percent last year, an impressive drop. But it will still be at 88.7 percent in the year 2000, according to Social Security projections. In the 55-to-59 age group, labor force participation for men was 89.5 percent in 1970 and 83.6 percent last year but will fall only to 82.1 percent by 2000, according to these projections.

But not everybody accepts the projections. "Social Security is very concerned about the cost of early retirement, but they are shoveling against the tide," said Mr. Zalusky of the A.F.L.-C.I.O.

"There is a definite trend toward early retirement," he insisted. "It is part of a movement toward a decreasing work career, starting work later, added holidays, longer vacations, early retirement."

J. Roger O'Meara, former pension expert at the Conference Board, said, "Companies told me in general that in a decade or two hence they expect young people will come into the company with the understanding they'll retire at 55."

LIMITS ENVISIONED

But the process can go only so far, in the opinion of James Savarese, director of public policy analysis at the American Federation of State, County and Municipal Employees. In the next century, he says, "You'll need 60 workers to support 40 retirees. That means a payroll tax rate of almost 25 percent, and American workers won't stand for it."

"The most significant social trend causing higher than necessary Social Security costs in the next century is the trend toward earlier retirement," agrees Robert Hall, the former Social Security Administrator.

In New York City, early retirement provisions for teachers have been reduced. For those hired before 1973, it was half pay after 20 years of service at age 55. For those hired from 1973 to 1976, it was more than half pay for 30 years at age 55. In both cases, payments are not to be reduced when Social Security begins. For teachers hired now, the plan calls for a reduction of half the Social Security benefit pension for those who retire before 62.

But such reductions are not common, and the trend appears to run in the other direction. The United Electrical Worker Union, for example, says it set a new mark in a contract with a Dayton, Ohio foundry. The pact includes a "30 and out" full pension with $250 extra until Social Security payments begin, or $730 a month after 30 years.

Inflation can slow the trend, says Jerome M. Rostow, president of the Work in America Institute and a former Undersecretary of Labor, because private pensions usually do not keep up.

In addition, he says fewer than half the workers covered by such pension plans "will ever draw a penny," because they change jobs.

WORKING CONDITIONS

Auto workers and steelworkers who have won generous "30 and out" retirement plans "are an elite group," according to Mr. Rostow, and their gains may not be picked up by employees in other industries.

Some believe the kind of work is the key to whether workers retire early. "Auto workers, steelworkers in foundries, women toting trays in restaurants want to retire as early as they can," says Bert Seidman, director of the A.F.L–C.I.O.'s Social Security department. "But there are jobs with more satisfaction."

Mr. Zink of G.M. disagrees: "Nothing we can ascertain indicates the nature of the work has anything to do with it," he says. At G.M., salaried workers in air-conditioned, carpeted offices are quitting as early as those on the assembly line. Last year, of 216 salaried employees who voluntarily retired at G.M., 32 were between 47 and 50 years of age, and 130 were 51 to 55.

The United Auto Workers reports that 30 percent of those eligible are retiring under the auto industry's "30 and out" option.

What does encourage early retirement, students in the field say, is the amount of pension money available.

Pension experts such as Mr. Weeks of the Conference Board and Charles Selinske, vice president of the Bankers Trust Company, say that there is a tendency toward a decreasing pension penalty for those taking early retirement, full pensions at an earlier age and special pension supplements to those quitting early, such as the auto industry plan.

REVOLUTION ON THE FARM: PART IV

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. ALEXANDER. Mr. Speaker, I would like to share with my colleagues the fourth in a series of articles that appeared in the Arkansas Gazette that deal with emerging trends in Arkansas agriculture. I commend this article to my colleagues:

[From the Arkansas Gazette, May 18, 1977]

REVOLUTION ON THE FARM—IV: TECHNOLOGY, DELTA TOWN CO-EXIST

(By Tom Hamburger)

WILSON.—There is an English Tudor village in the middle of the Arkansas Delta.

The town of Wilson comes upon you with little warning. Before you get there on Highway 61, you're shooting across the Delta passing through rather forlorn farm communities. The impression changes suddenly when you hit Wilson.

The streets of Wilson are lined with stately cottonwoods, and the houses, unlike those in some Arkansas farm communities, are well-kept.

While many small farm communities look deserted, with stores boarded up and town centers extinguished, Wilson (population, 1,048) is thriving.

Its town center has been remodeled in English Tudor style. Moss is growing on the old-style roofs now, and the wood has aged. Wilson looks like an English village.

At noon time, the town square is busy as town folk and farmers head to the Wilson Tavern (the menu features quail, steak and shrimp daily) and its adjacent club, Ye Olde Pub.

Around the square, all the businesses at Wilson have Wilson in their name: Wilson Tavern, Wilson Insurance Agency, Wilson Motor and Implement Company, Bank of Wilson, Wilson Drug Store, Wilson Construction Company, Wilson Service Station.

It isn't that the businessmen at Wilson lack imagination or desire consistency. All the Wilson businesses are named for their owners, the Robert E. Lee Wilson family.

BARONIAL TRADITION

The third, fourth and fifth generations of Robert E. Lee Wilsons are living at Wilson and are carrying on a baronial tradition. The town was founded in the 1880s by "Boss Lee" Wilson (Robert E. Lee Wilson Sr.), a lumberman, who wrested what later became the world's largest cotton plantation from the swamp and virgin forest.

Today, Robert E. Lee Wilson III, 63, and three of his four sons, Robert, 24 (called Bob), Steve, 29, and Mike, 34, operate the

Wilson holdings (1976 sales: $12 million), which, besides the companies mentioned above, include a 33,000-acre farm (the largest family farm in Arkansas), two Mississippi County towns (Wilson and Marie) and a good portion of a third (Keiser), two planting seed plants, most of the stock of a seed oil mill, a railroad, a petroleum company and a 13,000-acre ranch in Nevada.

In the late 1950s, Robert E. Lee Wilson III, the chairman of the Board of the Lee Wilson Co., changed what was a company-owned town into an incorporated city with an elected mayor and five aldermen.

Robert E. Lee Wilson III was elected mayor, and he has been re-elected ever since. His middle son, Steve, is assistant mayor. The director of the railroad, Mack Davison, is director of the Wilson Housing Authority.

At the time the city was incorporated, Wilson gave the city its four parks, a fish-stocked lake and eight-hole golf course.

Believing that ownership provided "a sense of pride," the Wilsons have begun selling the company-owned houses to the residents, most of whom are former employees, at give-away prices. (A large, handsome 3,300-square foot home near the town center sold two years ago for $10,000.)

LIBRARY CLINIC

The family also established a library and put up $65,000 in 1969 for a dental-medical clinic. In the last five years, the town has been without a doctor or dentist, a victim of a doctor shortage in eastern Arkansas. Mike Wilson continues to interview candidates to fill the vacancy "but they want us to guarantee too much money," he said.

The Wilsons are concerned with other social needs as well. The Wilsons made it their goal in the early 1960s to provide housing for the town's poor, some of whom are former company employees.

"This has become kind of a retirement center," Mike Wilson said, "because we have such active housing and social service programs."

In 1940, there were at least two families living in red-roofed Wilson Co. plank houses on every 40 acres of land at the Wilson plantation. There are few plank houses left. Now, three people work every 1,000 acres.

SHACKS DISAPPEARING

The red-roofed houses, once landmarks in the 50 square miles of Mississippi County owned by the Wilsons, are disappearing fast.

"Our goal is to get rid of those shacks," Mike Wilson says. "We plan to have a big party when we burn the last shack, and I hope it will be soon."

In 1962, the Wilsons decided to seek federal aid to develop low-income housing at Wilson. In 1969, they rented their first 28 units. The apartments are small, neat, desegregated and look more attractive than most government projects. Average rent is $51 a month.

Since 1969, the Wilsons have built 40 more housing units at Wilson, several at Keiser and Marie. The company is currently building 40 duplex homes using an energy-saving design, the first in the Southwest built with Housing and Urban Development funds.

The Wilson Housing Authority apartments are all built by the Wilson Construction Company and the sites are purchased from the family firm.

A nonprofit corporation was formed by the Wilsons to lease low-income rental units to the housing authority at the two nearby towns of Keiser (population 900) and Marie (72).

'NOT FOR PROFIT'

"They [the Wilsons] are not into it for profit," Davison says. "They are just interested in housing for the people that work for them." Out of the 68 units, Mike Wilson estimates two dozen are present or former company employees.

The school at Wilson was one of the first in the state to have an indoor swimming pool and all-weather track. Inside the main door of the modern, air conditioned Wilson Elementary School is a large portrait of Robert E. Lee (Boss Lee) Wilson Sr.

Boss Lee traded his 160 acres of cleared farm land in the 1880s for 2,100 acres of swamp timber land to get wood for the mill at Golden Lake. As he made money on the timber, he bought more swampland, cleared it of timber and reinvested.

Unlike most timber interests in the area, Boss Lee held on to the cleared land.

RICH, BLACK LOAM

It was a good decision. For thousands of years the flooding Mississippi had laid down layer upon layer of rich black loam carried from its northern drainage basin. The land that Wilson cleared is among the richest in Arkansas. Hudson Wren, former executive vice president of Lee Wilson Co., says that no one knows how deep the rich loam soil is. Some authorities say it may be hundreds of feet deep. A lot of farmers elsewhere make do with less than one foot.

In the late 1890s, to drain the swamps, Boss Lee organized the first drainage district in Mississippi County. In doing so, he incurred the wrath of other lumbermen who wanted the flooding to float logs to the river.

The plantation grew to 65,000 acres, plus cotton gins, stores, a bank and all the houses and other real estate at Wilson and five nearby communities. These properties were gathered in Lee Wilson Co. When Boss Lee died, he left the estate to his son, Robert E. Lee Jr. (called Roy), and a trusted employe, James H. Crain.

During the next 15 years, the two made the first moves toward mechanized farming, and ventures into new business. In the mid-1930s when timber supplies diminished, they turned over big chunks of acreage to soybeans and established the Wilson Soya Company to process the beans into oil and meal. To make fuller use of their cotton crop they helped put together Delta Products Company, a co-operative cottonseed oil mill near Wilson.

* * * * *

After the split-up Lee Wilson Company was left with 22,500 acres and the neighboring towns of Keiser and Marie. Roy's sisters got the remaining acreage. A few years later, Crain resigned, and Bob Wilson III took over management of the company.

Under Wilson III's leadership, the Wilsons began diversifying into several areas. The company began growing alfalfa and established an alfalfa dehydrating facility at Wilson. The soya mill was closed in the early 1970s, but the company's seed operation was expanded. Today the company's seed division handles 4,000 tons of cotton seed annually and processes more than 1,000,000 bushels of registered and certified soybean and wheat seed. The company's international sales have expanded recently.

POLO PLAYERS

Robert Wilson III went to Yale, was captain of the polo team, and until recently kept a stable of race horses. Wilson III and his sons were active polo players and until two or three years ago, Steve played occasionally at Memphis.

Mike attended the Citadel. Steve the University of Arkansas and Bob the University of Virginia.

WHY DO THEY RETURN?

Why do they return to Wilson?

Mike: "It's an inheritance."

Steve: "I love farming."

Bob: "I thought of law school but decided to come here."

Bob Wilson, son of Robert E. Lee Wilson III, is legally named Robert E. Lee Wilson V because his eldest brother, Robert E. Lee Wilson IV, died of leukemia at age 7.

* * * * *

Judging by the English Tudor architecture and the old south manners, this Mississippi County city might appear to be a vestige of two lost cultures.

The appearances are deceiving. The Wilson company has kept close watch on changing agricultural conditions and has been in the forefront of major developments in agriculture during the revolution of the last three decades.

HERBITS ANALYSIS OF THE KING REPORT—PART V

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. STEIGER. Mr. Speaker, in this fifth of seven extensions containing the analysis prepared by former Special Assistant to the Secretary of Defense, Stephen E. Herbits of the report done by Dr. William King, "Achieving America's Goals: National Service or the All-Volunteer Armed Force?", I am inserting Herbits' response to chapters 6 and 7 of the report and his summary.

Herbits concludes that "Dr. King's report is one of the most academically weak and biased studies to bear the stamp of a congressional report." King did his work for the Senate Armed Services Committee's Subcommittee on Manpower and Personnel.

According to Herbits, King "is very often factually incorrect, he is deliberately misleading, he is selective in the material he cites, and he has no compunction about making arguments exactly counter to one another in an effort to justify invalid points."

All who have read the four parts of the Herbits analysis and who read the one today will know why he reached that conclusion. The next 2 days, I will place into the RECORD supporting charts which Herbits included as an appendix to his analysis.

The Herbits analysis follows:

HERBITS ANALYSIS OF THE KING REPORT—PART V

CHAPTER 6

In the first paragraph of his chapter, "Alternatives to the AVF," Dr. King once more makes reference to the "nation's pursuit of its broad national goal," and he once more clearly indicates his feeling that the AVF is not compatible with those national goals. We need to ask whose goals King is talking about. The only obvious message from this 121-page report is that King feels national service is the only means of fulfilling the goals he imputes to the nation, and he will rely on any device at his disposal in an attempt to discredit efforts not compatible with his preconception. Unfortunately for the AVF, it happens to be the most visible one.

In the first sentence in his subsection on a return to the draft, Dr. King should add politicians to defense scholars and managers. It is unfair to assume that somehow scholars and managers accomplish something of this momentum without the political leadership of the country participating. Dr. King's brief "analysis" is so devoid of a sense of history or of reality that it is difficult to discuss

reasonably. He would have us believe there is new AVF data spurring renewed debate, when in fact only those who have opposed the AVF since its inception have been vocal in recent months in restirring the debate on the AVF versus the draft. Policy debate is always welcome, and can be beneficial, but it must be viewed in the proper perspective and it must be conducted in a fair, factual, unbiased manner.

The first sentence of the last paragraph on page 48 is probably more revealing than Dr. King would have hoped. He says this: "A return to the draft would therefore seem to be feasible only in the face of a national emergency, or after a *substantial public 'educational program' which would reveal the difficulties to be expected from the AVF and the limitations it places on national policy.*" Perhaps the term "national policy" should be replaced with the term "Dr. King's perceived desirable policy."

Dr. King's discussion of a reserve-only draft on page 49 bears close scrutiny. How does he expect such a draft to rectify present and future problems of the reserve forces? Would he use quotas? Has he given any thought to the implications in light of the regional nature of the reserves? Would we not be creating a superfluous bureaucracy? There is a constitutional issue because reserves are essentially local organizations. In addition, there's a question of equity. How does one determine the problems of drafting in some areas of the country and not in others—or in having to move some people from one part of the country to another because of insufficient reserves in that particular area? Where are these people going to live? What are they going to do when they are not in the reserves at the new location? These questions—which are essential and in fact determinative factors about the reserve draft—are left unaddressed.

The heart of his section on "A 'Better Managed' AVF" concerns responsibilities of Senator Nunn's subcommittee, for which the report was prepared and to which all too little attention has been paid. Whether the volunteer force can continue successfully rests to a considerable degree on the extent to which the appropriate Congressional committee exercises its oversight duties to assist Pentagon managers in undertaking the proper initiatives.

On page 52, in the initial paragraph about reenlistment programs, Dr. King makes yet another error. He says that a change in the restricting of reenlistments would cause a consequent increase in retirement costs. Simply permitting individuals to stay for two or three or even four enlistments is not necessarily going to entail additional retirement costs under the current structure. Under the current system, one has to stay in the service for 20 years to receive a pension, and no one is suggesting that 170,000 people who come into the Army in a single year be permitted to go all the way through the ladder to the 20-year enlistment point. The section is filled with rhetoric and has no relation to realities of military personnel policy.

Dr. King at points strains the reader's credulity. His summary on page 58 is an excellent example. Once more we have to endure his reference to "enhancing our nation's ability to pursue its goals." Dr. King is so determined to ascribe his goals for the nation to the nation's best interests that he will stop at nothing to try to justify his apparently long-held conclusion.

It is dismaying to many, I'm sure, to discover that "national service is the alternative which is innovative, comprehensive, and reasonable in today's environment." The proposal has been around for a long time and is popular in some circles. It has not attained great popularity, however, because of its cost and, more so, because of the level to which it would be a direct intrusion into the lives of America's young men and women and their families. A comprehensive, far-reaching program of the sort endorsed by Dr. King, with all its "minimally coercive" implications, is one unsuited to a nation with our tradition of democratic ideals.

When the draft debates began in 1966 and continued through the 1971 extension, proponents of all concepts were heard. Congressional testimony is replete with discussions about national service, compulsory and voluntary, the volunteer force and modified selective service systems. The debate went on within the Executive branch, with three national commissions (Marshall, Gates, Defense Manpower); in scholarly journals, in conferences (The National Youth Service Workshop in 1966, Sol Tax's in 1966, the White House Conference on Youth in 1970, and the National Service Conference at the FDR Library, 1976); editorials, newspapers and magazines (there are over 1,000 clips at the Hoover Institution at Stanford University on this subject alone); in think tanks (RAND, CNA, HumRRO, IDA, Brookings); in military associations (such as AUSA, ROA, American Legion, etc.); in national opinion polls (Gallup, Harris, Michigan Youth Survey's); as the National High School Debate topic; in several books (besides those mentioned earlier there are Miller, et al., *Why the Draft*, Penguin, 1968; Reeves & Hess, *The End of the Draft*, Vintage, 1970; Bliven, *Volunteers, One & All, Reader's Digest Press* 1976; and Marmion, *Case Against a Volunteer Army*. Quadrangle, 1971); and prolific writings by Don Eberly, Morris Janowitz, Charles Moskos, and Willard Wirtz on national service. The list is endless: hundreds of thousands of words and pages, meetings and speeches. And after all of this, the national decision was to institute a volunteer armed force.

There is certainly nothing wrong with stimulating a new national debate on an old subject. But let there be no confusion about whether national service has been given a fair shake in the American political process. It is not "innovative," nor, as the public has determined, "is it reasonable in today's environment."

CHAPTER 7

In Chapter 7, "The Rationale for a National Service Program," Dr. King makes still another misguided comparison and "analysis." He finds it "startling in the absolute" and "more meaningful through comparison with statistics from other nations" to discover that 31 percent of males aged 17–21 are ineligible for military service. His comparison with the 10 percent figure of the Swiss is one of the most meaningless in the entire paper, since American standards for military service are set much higher than those of almost any other nation. Dr. Cooper has pointed out that the French claim only 7 percent are found ineligible for military service and notes that it is simply because they do not reject people for all the reasons that we reject them. It strains credulity to suggest, as Dr. King does, that a universal national service system would "rectify" these problems by identifying and treating the medical deficiencies of these young persons.

On page 63, Dr. King again brings dismay to the thoughtful, informed reader. After earlier expressing sharp criticism of the military for providing, voluntarily, vocational aptitude tests for high school students, he contradicts himself when he says: "There is evidence that youths not only lack vocational training, but they also lack the vocational aptitude testing that national service would provide for all. A recent survey showed that less than 50 percent of American 17-year-olds have taken an aptitude test and that only 16 percent had discussed the results with a counselor." How does he reconcile this statement with his conclusion that the Army had exerted too much of an influence on these students because it allowed them to take the ASVAB test at their option? He seems very confused.

Furthermore, there was a great public uproar years ago—and rightly so—when the suggestion was made that uniform, nationally-controlled testing of grade school students be undertaken. Undue intervention by the state was feared by many, and they were correct in that judgment. Is it any more palatable to have such a program at the high school level?

On page 70, Dr. King somehow concludes that there are no reasonable grounds to conclude that a national service program would not have a beneficial effect on the nation's military forces. This is an uninformed, unanalyzed and ill-considered assumption. There are many grounds to assume there would be negative effects on the military. If Dr. King intends to pay poverty-level wages for military service, as he apparently advocates, under a national service program, how does he propose to maintain quality equivalent to the existing level when the best individuals, as he perceives them, are likely to volunteer for environmental services and other programs he proposes under the national service umbrella?

SUMMARY

In summary, Dr. King's report is one of the most academically weak and biased studies to bear the stamp of a congressional report. The professor is very often factually incorrect, he is deliberately misleading, he is selective in the material he cites, and he has no compunction about making arguments exactly counter to one another in an effort to justify invalid points. His conclusions were apparently reached before he even began the "study" so that those elements of research and analysis which are legitimate and have some credibility are obscured by the manipulative manner in which he uses the bulk of material in his work.

It is important to reiterate that Senator Nunn spoke correctly in the transmittal letter in referring to the need for a serious debate on the AVF. This "study" is a disservice to Senator Nunn and to the goal he had in mind.

STATEMENT ON CAPTIVE NATIONS

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. BROOMFIELD. Mr. Speaker, the commemoration of this year's Captive Nations week assumes a special significance, particularly in light of the United States' revitalized efforts in the areas of human rights and European security.

Only several weeks ago, the first major post-Helsinki Conference on Security and Cooperation in Europe began. Among the issues being discussed at the Conference is the need for the freer movement of people, ideas, and information—and thus human rights—within and among European countries, including those nations captive to communism.

For many years, the issue of human rights has been at the heart of the "Captive Cause." In the European captive nations, as well as in Laos, Cambodia, Vietnam, the Soviet Union, and Red China, millions of people, entrapped by communism, have been yearning for the rights of self-determination, freedom of

speech, freedom of worship, freedom to visit friends and relatives.

Over the decades, the oppressed people of the captive countries have persevered in their struggle for national and individual rights. At the same time, however, the Communists have continued to suppress the captives' efforts to be free.

Most important to the struggle for human rights in the European captive countries has been the idea that some of the signatory states to the historic Helsinki agreement may never have intended to fully implement the Helsinki provisions. For this reason, citizen groups were formed in some of the signatory states including the Soviet Union in order to better monitor full compliance with the terms of the Helsinki accord. These groups have tried to better acquaint the captive public with the Helsinki agreement and provide for a freer flow of information and ideas.

Often, however, the Soviets have arrested and persecuted many members of these groups. Recent arrests have become indicative of the continued Communist harassment of dissidents and in particular the persistent Soviet repression of stubborn opposition to "russification," the long term goal of Soviet authorities to homogenize the many captive nations into one "Soviet Nation."

Through terror and deceit, the Communists have been ruthless in their efforts to control the captive peoples of Central and Eastern Europe. In particular, the Soviets have attempted to impose the conditions of "russification" and persecution upon the countries in that part of the world—and with some measure of success.

Although conditions in the captive nations are disturbing—they are not without hope. The captive countries continue to struggle against oppression and cry out for help—and they particularly look to our Nation whose concerns have always been the preservation of freedom and human rights.

Since the founding of our Nation, the concerns for freedom and individual rights have been an important part of the "American Belief System" and in particular, an important part of American foreign policy. From the beginning, we Americans have believed that our country should profess political and ethical principles—principles concerning the rights of human freedom and dignity—that can be used, to some extent, as examples throughout the world. Moreover, we Americans have always believed that we have a moral as well as political commitment to stand up for those particular values and principles.

Clearly we must continue to maintain our values and principles—to stand for freedom and human dignity throughout the world. The United States should continue its efforts to promote and advance human rights in all captive nations of the world. In this way we can, in a spirit of compassion and determination, help to provide new hope and encouragement for those who yet remain the captives of communism.

AFTER THE GLORY DAYS

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. TEAGUE. Mr. Speaker, of the many people who contribute to our society today none make a more diverse and interesting contribution than those astronauts who pioneered in the Mercury, Gemini, and Apollo programs. Today, these early space travelers contribute to many fields using the same exceptional talents that were devoted to our space program. An article by Jim Schefter in the July issue of "Passages" describes what these astronauts are doing today. Mr. Schefter was formerly with "Time-Life" and currently is with the Midwest Research Institute. For the benefit of my colleagues and the general public I am including the article in the RECORD:

AFTER THE GLORY DAYS

(By Jim Schefter)

Remember Charlie Duke? Ed Mitchell? Al Bean? How about Walt Cunningham? Tom Stafford? Frank Borman? No? Then surely the guessing game comes into focus with Wally Schirra, Gordon Cooper and John Glenn?

Of course. They're astronauts. Duke, Mitchell, and Bean walked on the Moon. Cunningham, Stafford and Borman orbited Earth, the Moon, or both. And Schirra, Cooper and Glenn are from the Original Seven, America's first spacemen and international heroes in the early 1960s.

Whatever happened to these astronauts—yesterday's heroes of the Space Age?

The answers are as diverse as the astronauts themselves. For despite their public image as Boy Scouts . . . cosmic good guys . . . the astronauts are only human. And like many other groups of working folks, they relate more to a job-task than to a job-thrill, to the challenge of getting something done rather than to the emotional impact of what they've done.

Ask an astronaut: "How did spaceflight change your life?" Almost certainly, he'll answer: "I haven't changed. I'm the same guy I was before." And with few exceptions that's true.

To the rest of us, orbiting the Earth or going to the Moon seems somehow mystical. How can anyone experience that magic without suddenly being transformed into a new person? But to an astronaut, going to the Moon is a job. It's better than most, but a job just the same.

As a group, America's astronauts—there have been 65 or so—are hard-driving go-getters. They're not usually introspective. They're not poets or philosophers. They're test pilots, and a trip to the Moon doesn't make a pilot a poet.

The best of the good days, the glory days, came in the 60's. The space program was full of life, and roaring to that rendezvous with the Moon. Then Neil Armstrong took that "one small step" and the adventure ended. Apathy set in, and the astronaut corps splintered as its members drifted away.

Of the Original Seven—Al Shepard, Gus Grissom, John Glenn, Scott Carpenter, Wally Schirra, Gordon Cooper and Deke Slayton—only Deke remains with the National Aeronautics and Space Administration. The rest are gone—to the U.S. Senate, to Walt Disney, to jobs they had never dreamed of. And Grissom is dead, a victim of the 1967 Apollo fire.

Of the 12 moonwalkers—Neil Armstrong and Buzz Aldrin, Pete Conrad and Al Bean, Al Shepard and Ed Mitchell, Dave Scott and Jim Irwin, John Young and Charlie Duke, Gene Cernan and Jack Schmitt—only Bean and Young are still astronauts. Scott is a NASA executive. The rest are gone—again to the U.S. Senate, to Coors beer distributorships, to jobs in aerospace and out. Some are real winners. Some are just doing okay.

There's a third category of yesterday's heros, the orbiters. Walt Cunningham is one, who, after five years of astronaut training, made one Earth-orbital spaceflight. "It's hell," he says. "Whatever else I do, I'm remembered for 11 days of my life."

For those 11 days, Cunningham circled the Earth with Wally Schirra and Donn Eisele in Apollo 7. Now he's a senior vice-president and director of engineering for Diversified Design Disciplines, a Houston firm that specializes in designing plumbing, electronics and other innards for commercial buildings.

In his astronaut days, Cunningham was an outspoken, sometimes argumentative, "my way" kind of guy. NASA doesn't like its astronauts to be too headstrong—innovative, yes; argumentative, no. "It caused me some problems," Cunningham admits. For instance, he was not offered a second space mission. But did he change? No. "That's just me," he says.

Now Cunningham may soon be remember for something other than those 11 days in space. He's written a book that he calls "a slightly irreverent look at space and spacemen." And stubborn still, he won't say what's in it beyond revealing the title: *The All-American Boys*. "Anybody who was there will appreciate the title," he says.

They *were* all-American boys. Some were lusty, some were straitlaced, but as a group they drank, smoked, cussed and got the job done. There's never been a group like them, and may never be again.

Al Shepard parlayed the early money from *Life* Magazine, which had a contract for the astronauts' personal stories, into millionaire status. After moonwalking on Apollo 14, he stayed with NASA awhile, then went into private business. His firm, the Windward Company, distributes Coors beer in Houston.

Charlie Duke walked on the Moon with John Young on Apollo 16. Today, Duke's Orbit Corporation is a major Coors distributor in San Antonio.

Young stayed on. His four space missions, along with backup assignments, cost him a marriage, but catalyzed another. From February 1964 through mid-1972, he was assigned to one space crew after another. He was never home—when he wasn't training in a simulator in Houston or Florida, helping redesign spacecraft parts in California, or keeping his reflexes sharp by flying an acrobatic jet, he was orbiting the Earth or walking on the Moon. His kids grew up without him; he and his wife drifted apart.

But did it change the real John Young? A laconic, underspoken kind of pilot, he shakes his head. "Heck, I'm still the same guy," he grins. "I like all this stuff." So now he's chief of the Astronaut Office at the Johnson Space Center and figures to fly a Space Shuttle in 1979 or 1980.

Young's soft humor and drawl can't hide his whipcrack intellect. And he wants that Shuttle flight: "To fly out of orbit and go from mach 27 to mach 0 is gonna be one of aviation's most thrilling experiences," he says. "I gotta try that."

As chief astronaut, Young will have a lot to say about which astronauts fly the Shuttle. There are still 30 or so in Houston, working, waiting, training. "These guys wake up running," Young says. "Astronauts are goal-oriented. You gotta get up early just to keep even with 'em."

Drive and energy are some of the astronauts' few common factors. Al Bean flew three times in space—a short Gemini mission where he took a space walk, a moonwalk on Apollo 12, then 59 days up there as commander of the second Skylab crew. He too, is waiting for the Shuttle.

Bean is one of the few astronauts who admits that spaceflight changed his personality. "I was always introspective, and I though I knew myself pretty well. After going to the Moon, I loosened up." He took on the long-duration Skylab flight as a personal challenge. "Anybody can take a 10-day trip to the Moon and give it their best effort," he observes, perhaps too generously. "On Skylab, it was tougher to keep up a high-output level because you operated a lot closer to your physical limits."

In NASA or out, astronauts aren't sitters. They only have one speed—fast.

Jim Irwin walked the gorge-like rim of the Moon's Hadley Rille on Apollo 15. That experience led him to leave the space program and establish High Flight, a semi-evangelistic organization. He travels the world delivering inspirational messages.

Last year Irwin had a heart attack, which doctors say is not related to his lunar excursion. Then early in 1977, he underwent open-heart surgery in Houston. Just six weeks later, Irwin went skiing. "Can you imagine that?" Al Bean says incredulously: "He's out there on the slope and he has another heart attack.'"

Irwin paid for the indiscretion. He spent more than two months hospitalized, and even now his physical activity is sharply restricted. But even more intensely than Bean, Irwin says that walking on the Moon did, in fact, change him. "On the Moon the total picture of the power of God . . . became abundantly clear to me," he wrote in his biographical book *To Rule the Night*. "I felt an overwhelming sense of the presence of God on the Moon." When his heart heals, Irwin will be back on the evangelist circuit, carrying that message to all who will listen.

But in the area of spiritual reawakening. Irwin is the exception. The reactions of the Apollo 13 astronauts, who are lucky to even be around at all, are more typical.

Apollo 13 was disabled by an explosion halfway to the Moon. For nearly three days, the ship limped out and around the Moon to swing back home. Astronaut Fred Haise is still in Houston as the No. 1 Space Shuttle pilot. Jim Lovell and Jack Swigert found careers elsewhere—and proved that astronauts feel more strongly about changes from business than changes from a lunar flight.

Like most astronauts, Lovell's life had been military, then aerospace. Two of his four space trips were to the Moon, he was on the historic Christmas Eve lunar orbit narrowly escaping with his life on Apollo 13. His transition to the world where the rest of us live wasn't easy. "But you have to move on," he concedes. "I miss the excitement, and I'd like to fly the Shuttle, but there are guys there still waiting to go." (Three astronauts who joined up in 1966 are still considered rookies. They won't get an orbital chance until 1979.)

When Lovell got out, he got way out. He's under contract as spokesman for Mutual Benefit Life Insurance Company and gives motivational talks to agents. He's done television commercials for a breakfast drink, Tang. And for several years, this man who went to the Moon ran a barge company in Houston. Now he's president of Fiske Telephone Systems, a small firm that provides equipment to companies that want to own their own system, not lease from Ma Bell. "Civilian life is a lot different than working for the government," says Lovell, "and it's a rude awakening. There's a profit motive; no profit and you don't get paid."

Lovell looks back at the glory days and wonders what happened. Just 10 years ago, he agrees, everyone thought that an ex-astrounaut could name his position and salary in the aerospace industry. It didn't happen. "I'd like to be back in aerospace," Lovell muses, "but its amazing. There just wasn't much there."

Only Frank Borman, Eastern Air Lines president, and Pete Conrad, marketing vice-president for McDonnell-Douglas, are in the industry.

Jack Swigert is on the fringes. In some ways, his job—staff director for the U.S. House of Representatives Committee on Science and Technology—is one of the best. "I've got it all," Swigert grins. "When I came here four years ago, this was a sleepy little committee that only looked at NASA and the National Science Foundation. Now we've got science, space, energy, environment, aviation. We're overseeing a $12 billion budget this year."

Swigert has built a reputation on Capitol Hill for recruiting top-quality people to advise the Congress on science and technology issues. And though he's technically on leave from NASA, he doesn't expect to go back. "I miss the space program as we had it," he says. "I miss the people, even the people cleaning the offices. We were part of a team, and we did something for the country. We gave it a lift when it needed one."

Swigert resisted suggestions in 1976 that he run for Congress himself. But the idea still has appeal. "Congress needs more technical people to deal with the problems we're facing," he insists. "One of the reasons we have an energy problem today is because we didn't have enough technical people in Congress 20 years ago."

Across the Hill, two other ex-astronauts are doing their bit to help. U.S. Senator John H. Glenn (D-Ohio) was the first American to orbit the Earth. Senator Harrison H. (Jack) Schmitt (R-New Mexico) was the last American to set foot on the Moon.

Jack Schmitt was among the most intense astronauts. A geologist by profession, he was something of an outsider among test pilots. And he worked hard. His idea of a relaxing evening was to curl up with a flight plan. And for an exciting weekend, he invited engineers over to discuss unsolved problems of exploring the lunar surface.

Then he went to the Moon, and Schmitt changed, although he really doesn't know why. His intense, tunnel-vision personality vanished; his perspective ballooned. He ran for the Senate and won.

"I'm going to be an advocate for science and space," Schmitt says. "I see no reason to change my opinions; they're based on some solid evidence." So Schmitt, who calls his brand of politics "imaginative conservatism," takes on other senators in technological debate. "I can use the perspective of space in debates," he says. "This place needs a broader view, and I have it."

Schmitt, whose outgoing enthusiasm affects everyone around him, carries the message outside the Senate chambers, too. "I don't have any problem attracting a crowd when I'm talking," he grins. "I can talk about the future of the republic or the future of the Republican party, but when I get to space, people really brighten up. They want to know what it's like on the Moon."

With astronauts spread coast to coast, the space program moving into new maturity, and the glory days gone, here's where some others are today:

Scott Carpenter, Original Seven, president of Pyro Sol, Inc., a small company specializing in using waste products to generate energy; Gordon Cooper, Original Seven, vice-president for R&D at WED, Inc., a Walt Disney subsidiary in Glendale; Wally Schirra, Original Seven, director of technology purchase for Johns-Manville in Denver; Deke Slayton, Original Seven, NASA executive in Houston.

Buzz Aldrin, moonwalker, after overcoming alcoholism and depression, is a consultant in Los Angeles. Bill Anders, Moon orbiter, is U.S. Ambassador to Norway; Dave Scott, moonwalker, is director of the Dryden Flight Research Center in the Mojave Desert; Gene Cernan, moonwalker, is vice-president of Coral Petroleum in Houston; Mike Collins, Moon orbiter, is director of the Smithsonian's Air and Space Museum in Washington; Neil Armstong, first man on the Moon, is an engineering professor at the University of Cincinnati—and does not grant interviews.

Time, like space, moves on.

ASSISTING FBI AGENTS AND FEDERAL OFFICERS

HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. ZEFERETTI. Mr. Speaker, the Federal Bureau of Investigation, the backbone of this country's law enforcement agencies, has been shaken to its foundation by the recent indictment of one of the most respected special agents, John Kearney. He stands accused of using illegal wiretaps and mail tampering tactics during an investigation of the Weathermen, a radical organization responsible for many terrorist bombings and deaths in recent years.

I certainly do not condone the illegal acts that occurred. We cannot and must not tolerate law enforcement agencies breaking the law, and we should take the necessary actions to prevent such abuses in the future. The House of Representatives took a major step in this direction by approving the creation of the Select Committee on Intelligence, which will assist in policing our intelligence agencies.

The question is not on the legality of these covert operations, but whether indictments should be issued to agents who were performing their assignment in the line of duty, under orders from their superiors. It now appears that the Justice Department will continue with its investigation and indict a number of other agents. These agents allegedly involved in the illegal activities did so in good faith, apparently with the approval of their superiors and believing that their work was critical to the security of the Nation.

It is common knowledge that this type of operation has occurred many times in the past. Just 3 months ago the Justice Department decided not to prosecute CIA officials involved in illegal mail tampering operations. Last year former Attorney General Edward Levi, in a decision not to prosecute Federal agents for mail tampering, stated:

> Whatever can be said about the law now, the department believes at the time the potential defendants acted, there was substantial basis for thinking that the law was otherwise.

In other words, this type of activity was common among our law enforcement agencies during that period, and it appears that the law itself was unclear.

For these reasons, I am introducing a bill that would provide for the payment

of any costs incurred by Federal officers for legal counsel prior to their indictment, when the charges are a result of their routine investigative, law enforcement functions. This legislation applies to both criminal and civil cases stemming from Federal charges, and in the case of charges brought by a State, it would indemnify a Federal officer for both legal counsel and for any money damages that may result from his trial on civil charges.

Let me reiterate that the FBI—and its agents—is not above the law. However, I feel that these agents are being made scapegoats for activities that they believe constituted the normal performance of their duty and were authorized at high levels of the Government.

My major concern is that a series of indictments and other legal actions will hamstring the work of the FBI and weaken its effectiveness. The prosecution of these agents will hinder future intelligence operations. Agents, despite orders from superiors, will be afraid to carry out the directives. Certainly the least we can do is pay for the cost of their counsel prior to their possible indictment.

The outcome of the Kearney indictment could determine whether the FBI will survive as a formidable law enforcement agency, and I trust that my colleagues will actively consider this legislation so that we can assist in preventing the further destruction of this invaluable institution.

DAVIS-BACON ACT AND MINORITIES

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. HAGEDORN. Mr. Speaker, the Davis-Bacon Act is a perfect example of special interest legislation which is detrimental to everyone outside of that special interest. It imposes costly and time-consuming paperwork burdens upon contractors who do work on public projects. It is costly to the taxpayer, resulting in increased public construction costs of 5 to 15 percent. It imposes heavy financial burdens upon local and State governments which use Federal matching funds. And it insures that the intended beneficiaries of public spending receive less for their money. Public works projects, for example, put fewer people to work, HUD interest subsidies are consumed by exorbitant wage rates, and the costs of school construction and water resources projects are driven up.

As with so much other well-intended regulatory legislation, one group particularly impacted by Davis-Bacon have been racial minorities. In many respects, it was the itinerant black laborer from the South who prompted the original passage of the act and who was its first victim. One Member arguing in behalf of the bill in 1931 stated:

Reference has been made to a contractor from Alabama who went to New York with bootleg labor. That is a fact. That contractor has cheap colored labor that he transports, and he puts them in cabins, and it is labor of that sort that is in competition with white labor throughout the country.

Since that time, the discriminatory effects of the act, while more subtle, have continued unabated. Through the promulgation of union wage rates on virtually all projects, regardless of actual prevailing wages, the act discourages the participation of open-shop contractors on Federal and federally assisted projects. Since a far higher percentage of white than nonwhite craftsmen and laborers in the construction industry report union membership, it is clear that a direct effect of the Davis-Bacon Act is to artificially restrict job opportunities for black workers.

Prof. Walter E. Williams, a young black member of the economics department at Temple University, made the following observations at a recent conference at Howard University in Washington, D.C.:

One effect of the Davis-Bacon Act was that it discouraged non-union contractors from bidding on Federal projects because of the pay differential problems that would result from having some workers, in a non-union shop, working at a federal project receiving higher wages while others working on private jobs receive lower pay. To the extent that non-union contractors are discouraged from competition on a substantial part of federal construction, it has economic consequences for minorities and younger workers who are excluded from unions and hence are more likely to work in the non-unionized sector of the construction industry. (SEO data shows that only 27% of non-white craftsmen and 35% of non-white laborers in the construction industry reported union membership.) Furthermore, the high apprenticeship rates required by the Davis-Bacon Act discourages the usage of apprentices and other low skilled people on Federal projects which acts to counter federal efforts to train minorities through manpower training programs. (Davis-Bacon also hampers efforts to stimulate low- and moderate-income housing. Higher labor costs offset the government interest subsidy.)

As Professor Williams notes, the high apprenticeship rates set by the Department of Labor under Davis-Bacon, as well as its failure to recognize special rates for helpers and trainees has forced many contractors and subcontractors to sharply limit numbers of apprentices, helpers, and trainees employed. This has worked a particular hardship upon minority group members. One contractor testified before the Senate Subcommittee on Housing and Urban Affairs in 1972—

In Alabama, we have been an open-shop contractor for a number of years and there are no certified apprenticeship training programs in the State except those that are union-oriented and union dominated, and they are not open to . . . open-shop members. As a result, in Alabama, on Davis-Bacon projects, we have not been able to use any apprentices whatsoever. We can't use helpers unless we pay helpers the prevailing standard for the journeyman . . . It just happens that I favor strongly upgrading the minorities in our company. We work at it actively and with some success. But if we bid on a job that comes under Davis-Bacon, that upgrading is stopped in that work.

The policies of the Department of Labor in administering the Davis-Bacon Act harm minority contractors in much the same way that they harm minority workers. High prevailing wage determinations, by making nonunion contractors less competitive, seems to have a substantial impact in discouraging nonunion contractors from bidding on Federal projects. The National Association of Minority Contractors has recommended suspension of Davis-Bacon Act requirements for this reason, and notes that—

Unemployment among blacks in cities with populations over 100,000 is 19.7 percent. In these same cities, construction requirements are not being met . . . the large pool of idle labor cannot be used and/or trained because of the restrictions of the Davis-Bacon Act.

Mr. Speaker, reform of the Davis-Bacon Act is not going to solve all of the employment problems that minority groups face in this country, but, until it is reformed, the act is going to continue to serve as a major impediment toward increased minority participation in this country's construction industry. The act limits black employment opportunities, black entrepreneurial opportunities, and frustrates the ability of public programs to improve opportunities for them. Numerous academic studies have developed the evidence to back up the claims of those, such as Arthur Burns, who believe that the Davis-Bacon Act "effectively hinders the number of hardcore unemployed persons who could be absorbed on Government projects due to the high wages which would have to be paid to them."

EXTENSION OF CHILD DEVELOPMENT PROGRAMS UNDER THE APPALACHIAN REGIONAL COMMISSION

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 18, 1977

Mr. APPLEGATE. Mr. Speaker, amidst the loud and resounding complaints about big government and bureaucratic inefficiency, I am proud to direct your attention away from this and toward a significant number of public programs which do work, and in fact are a tremendous reflection of just how well government can operate.

I am referring particularly to the Appalachian Regional Commission's child development program. Through more than 325 projects, serving more than 300 out of 397 counties in Appalachia, in excess of 200,000 individuals are being served. These programs are immunizing and nourishing America's children, providing prenatal care and education for young mothers, allowing thousands of parents to enter the labor force in Appalachia—all in fact due to the provision of the child development programs in Appalachia.

The Appalachia Regional Commission deserves a sincere note of praise for the cooperative and dynamic progress it has made through the design and implemen-

tation of these fine progams over the past few years. But the task has only partially been tapped and the life of a child in this region of the country is by no means easy. In the central part of the region, intestinal parasites infect an estimated 50 percent of all children. True, the infant mortality rate has declined significantly since the creation of the ARC, but it is still 6 percent higher than the rest of the Nation. Surely with this information, you will agree that this is not the time to abandon a fine-tuned and smooth-running program, but rather this is the time to continue the program so that all the gains we have made will not be lost.

However, unless we act quickly, many of these fine programs will indeed fold. ARC funding was a 5-year-only demonstration grant program for child development, at the end of which the program was supposed to be self-sufficient. It is now clear that, for many programs, self-sufficiency is an impossible goal. Title XX provides the main source of substitute funding, but it requires matching amounts which are often prohibitive and unrealistic. The people working in our local ARC programs are trained to provide the needed services, not to engage in the full-time task of raising funds for operational purposes. But more importantly, we cannot expect them to be fund raisers. Although the large majority of the programs have, each year, reduced their dependence on ARC funding, many of those cannot do without the ARC portion of their funding. To lose that portion of their funding means either reducing the number of individuals served or shutting down that program entirely.

My dear colleagues, can we allow this to happen? Accordingly, I have introduced legislation today which would extend ARC funding at 1975 levels until 1979, while charging the ARC with the complete task of investigating the difficulties in turning over complete sponsorship of the programs to State or private agencies and reporting their findings to the Congress. Some programs have achieved self-sufficiency and it is time that we all found out just how this was done and if the turn-over was 100 percent successful.

These programs represent one of the soundest uses of our Federal dollar. A Columbia University study showed that each $1 spent on child development programs prevents 94 cents of public dependence aid. The cost to the Government per year per child is roughly $119. The local people of Appalachia have discovered a new sense of pride and a new resourcefulness, they are really not asking much. But they refuse, and quite rightfully, to be treated as an experiment whose time has ended, and to be ignored while we move on to new projects.

My esteemed and distinguished colleague in the Senate, Mr. HOWARD METZENBAUM, is planning on introducing matching legislation on the Senate floor. As we have both researched this situation and given it considerable thought and thus concluded that only legislation, extending the funding during this transition period and mandating the Appalachia Regional Commission to investigate these specific problems, will be the rightful and reasonable solution.

The individuals we have been talking about are people, not laboratory test subjects, people in need of our help. I am hopeful that you, my esteemed colleagues, will not disappoint them.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, July 19, 1977, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JULY 20

8:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S.J. Res. 1, 8, and 18, proposing amendments to the Constitution to provide for the direct popular election of the President and Vice President of the U.S.
1202 Dirksen Building

9:30 a.m.
Foreign Relations
To hold hearings on the Tax Convention with the United Kingdom of Great Britain and Northern Ireland (Exec. K, 94th Cong., 2nd sess.), and the Protocol to the 1975 Income Tax Convention with the United Kingdom (Exec. Q, 94th Cong., 2nd sess.).
4221 Dirksen Building
Human Resources
Health and Scientific Research Subcommittee
To continue hearings on biomedical research programs.
Until 1 p.m. 4232 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue to consider recommendations to the Energy and Natural Resources Committee on energy conservation in residential areas, as contained in Part A of S. 1469, the proposed National Energy Act.
5302 Dirksen Building
Budget
To continue hearings on the second concurrent resolution on the Congressional Budget for fiscal year 1978.
357 Russell Building
Commerce, Science, and Transportation
To resume hearings on S. 1381, setting standards for State no-fault benefit plans to compensate motor traffic accident victims.
5110 Dirksen Building
Commerce, Science, and Transportation
Business meeting to further consider the matter of regulatory reform of the air transportation industry.
235 Russell Building
Energy and Natural Resources
To consider pending calendar business.
3110 Dirksen Building
Finance
Public Assistance Subcommittee
To continue hearings on H.R. 7200, dealing with the programs of supplemental security income, social services, child welfare services, aid to families with dependent children, and child support. 2221 Dirksen Building
Judiciary
To hold hearings on the nominations of Edward L. Filippine, to be U.S. district judge for the eastern district of Missouri, and T. F. Gilroy Daly, to be U.S. district judge for the district of Connecticut. 2228 Dirksen Building
Select Indian Affairs
To resume oversight hearings on the current organization of the Bureau of Indian Affairs, Department of the Interior. 1318 Dirksen Building

10:30 a.m.
Judiciary
To hold a business meeting.
2300 Dirksen Building
Conferees
On H.R. 7555, making appropriations for the Departments of Labor and Health, Education, and Welfare. S–128, Capitol

1:00 p.m.
Conferees
On H.R. 692, authorizing funds for fiscal year 1978 for activities of the Small Business Administration.
S–146, Capitol

2:00 p.m.
Select Intelligence
To hold a closed business meeting.
6226 Dirksen Building
Conferees
On S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
H–140, Capitol

2:30 p.m.
Conferees
On H.R. 7555, making appropriations for the Departments of Labor and Health, Education, and Welfare.
S–128, Capitol

JULY 21

8:30 a.m.
Foreign Relations
Foreign Economic Policy Subcommittee
To hold a closed business meeting.
S–113, Capitol

9:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Credit and Rural Electrification Subcommittee
To hold hearings on S. 1729, to permit the use of the Rural Electrification and Telephone Revolving Fund to repair and replace certain electric power and telephone lines and equipment damaged or destroyed in rural areas by natural disasters.
322 Russell Building
Finance
Health Subcommittee
To receive testimony from representatives of the GAO office concerning the reorganization of the medicare and

medicaid programs within the Department of HEW.
2221 Dirksen Building

*Judiciary
Antitrust and Monopoly Subcommittee
To hold hearings on proposed legislation to amend section 4 of the Clayton Act so as to allow recovery for damages by direct or indirect purchasers of goods.
2228 Dirksen Building

9:30 a.m.
Budget
To continue hearings on the second concurrent resolution on the Congressional Budget for fiscal year 1978.
357 Russell Building

Commerce, Science and Transportation
Communications Subcommittee
To hold hearings on S. 1866, making the State of Hawaii a domestic point for purposes of international communications.
5110 Dirksen Building

Human Resources
To hold hearings on the following nominations: Patricia Albjerg Graham of New York, to be Director of the National Institute of Education; Earl Oliver, of Illinois, to be a member of the Railroad Retirement Board; Mary Frances Cahill Leyland, of New York, John Robert Lewis, of Georgia, and Irene Tinker, of Maryland, each to be an Assistant Director of ACTION; Sar A. Levitan, of the District of Columbia, to be a member of the National Commission on Employment and Unemployment Statistics; and John B. Gabusi, of Arizona, Robert Stern Landmann, of New Mexico, and Robert Nathaniel Smith, of Michigan, each to be an Assistant Director of the Community Services Administration.
4232 Dirksen Building

Judiciary
Criminal Laws and Procedures Subcommittee
To hold hearings on domestic terrorism and the need for action to prevent future activities of terrorist groups.
457 Russell Building

Select on Small Business
Government Regulations and Small Business Advocacy Subcommittee
To resume hearings jointly with the Economic Growth and Stabilization Subcommittee of Joint Economic on S. 1726, to declare a national small business economic policy.
424 Russell Building

Banking, Housing, and Urban Affairs
To mark up S. 1594 and H.R. 5959, to revise and extend the Renegotiation Act.
5302 Dirksen Building

Commerce, Science, and Transportation
Business meeting to further consider the matter of regulatory reform of the air transportation industry.
235 Russell Building

Energy and Natural Resources
To consider pending calendar business.
3110 Dirksen Building

Governmental Affairs
Permanent Investigations Subcommittee
To resume hearings on the present status of the Department of Labor Task Force investigation of the Teamsters Central States Pension Fund.
1114 Dirksen Building

Select Intelligence
Intelligence and the Rights of Americans Subcommittee
To continue hearings on a proposal to establish procedures for electronic surveillance in the area of foreign intelligence (embodied in S. 1566).
6226 Dirksen Building

10:30 a.m.
Finance
Health Subcommittee
To hold hearings on proposed legislation to expand medicare coverage of services provided in rural health clinics.
2221 Dirksen Building

Conferees
On H.R. 7589, making appropriations for construction at certain military installations.
S-126, Capitol

2:00 p.m.
Human Resources
Health and Scientific Research Subcommittee
To mark up S. 1391, establishing a transitional system to slow the escalating costs of hospital care.
Room to be announced

Conferees
On H.R. 6689, proposed Foreign Relations Authorizations Act for fiscal year 1978.
S-116, Capitol

2:30 p.m.
Conferees
On S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
S-207, Capitol

JULY 22

8:00 a.m.
Judiciary
Separation of Powers Subcommittee
To hold hearings on constitutional issues associated with negotiations for the disposition of the Panama Canal Zone and of U.S. facilities located therein.
6202 Dirksen Building

8:30 a.m.
Judiciary
Constitution Subcommittee
To continue hearings on S.J. Res. 1, 8, and 18, proposing amendments to the Constitution to provide for the direct popular election of the President and Vice President of the U.S.
235 Russell Building

9:00 a.m.
Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To resume hearings on S. 1264, Federal Acquisition Act of 1977.
3302 Dirksen Building

Judiciary
Antitrust and Monopoly Subcommittee
To continue hearings on proposed legislation to amend section 4 of the Clayton Act so as to allow recovery for damages by direct or indirect purchasers of goods.
2228 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To consider the nomination of Robert H. McKinney, of Indiana, to be a member of the Federal Home Loan Bank Board, and H.R. 5675, to authorize the Treasury Department to make short-term investment of any portion of its excess operating cash balance.
5302 Dirksen Building

Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings on S. 1077, to assure that essential maritime transportation is provided to Alaska, Hawaii, and certain U.S. territories.
5110 Dirksen Building

Energy and Natural Resources
To consider pending calendar business.
3110 Dirksen Building

Foreign Relations
Arms Control and Disarmament Subcommittee
To receive testimony on the results of the recent Law of the Sea Conference.
4232 Dirksen Building

Foreign Relations
Foreign Assistance Subcommittee
To receive testimony from Administration officials on the proposed sale of AWACS aircraft to Iran.
4221 Dirksen Building

Governmental Affairs
Permanent Investigations Subcommittee
To continue hearings on the present status of the Department of Labor Task Force investigation of the Teamsters Central States Pension Fund.
1114 Dirksen Building

Judiciary
To hold hearings on the nomination of Harold L. Murphy, to be U.S. district judge for the northern district of Georgia.
2228 Dirksen Building

*Veterans' Affairs
To consider pending calendar business.
412 Russell Building

3:00 p.m.
Joint Economic
Priorities and Economy in Government Subcommittee
To hold hearings on the status and function of women in the military.
5302 Dirksen Building

JULY 25

9:00 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on estate and gift tax problems arising from the Tax Reform Act of 1976.
2221 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To resume oversight hearings on the Railroad Revitalization Act of 1976 (P.L. 94-210) and amendments proposed thereto.
5110 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on S. 1724, to establish a Neighborhood Reinvestment Corporation.
5302 Dirksen Building

Joint Economic
To receive testimony on a mid-year review of the economy.
1202 Dirksen Building

2:00 p.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on S. 1514, to extend the dates during which the transitional rules of the Tax Reform Act of 1969 postpone the applicability of Section 4941 of the Internal Revenue Code.
2221 Dirksen Building

JULY 26

8:00 a.m.
Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold hearings on S. 1078, S. 1622, and 1857, providing improved authority for the administration of certain National Forest System lands in Oregon.
3110 Dirksen Building

Judiciary
Hearing Panel
To hold hearings on S. 1503, to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel and fabric.
2228 Dirksen Building

9:00 a.m.
Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To resume hearings on S. 1264, Federal Acquisition Act of 1977.
3302 Dirksen Building

Human Resources
Labor Subcommittee
To hold hearings on bills to amend the Age Discrimination in Employment Act of 1967 to protect the employment rights of older workers (S. 481, 1583, 1768, 1773, and 1784).
4232 Dirksen Building

Select on Nutrition and Human Needs
To receive testimony from representatives of the egg industry concerning a report on "Dietary Goals for the U.S.".
322 Russell Building

9:30 a.m.
Human Resources
Health and Scientific Research Subcommittee
To resume oversight hearings on the cost of drugs.
Until Noon 6202 Dirksen Building

Joint Economic
To hear OMB Director Bert Lance on a mid-year review of the economy.
318 Russell Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To resume mark up of H.R. 5294, S. 918, and S. 1130, to amend the Consumer Protection Act so as to prohibit abusive practices by independent debt collectors.
5302 Dirksen Building

Commerce, Science, and Transportation
Business meeting to consider pending calendar business.
235 Russell Building

*Energy and Natural Resources

8:00 a.m.
Energy and Natural Resources
Energy Conservation and Regulation Subcommittee
To hold hearings on part E (Electric Utility Rate Reform) of S. 1469, proposed National Energy Act.
3110 Dirksen Building

9:00 a.m.
Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To continue hearings on S. 1264, Federal Acquisition Act of 1977.
3302 Dirksen Building

Human Resources
Labor Subcommittee
To continue hearings on bills to amend the Age Discrimination in Employment Act of 1967 to protect the employment rights of older workers (S. 481, 1583, 1768, 1773, and 1784).
4232 Dirksen Building

Veterans' Affairs
Health and Readjustment Subcommittee
To hold oversight hearings on a study by the National Academy of Sciences on health care for American veterans.
6226 Dirksen Building

9:30 a.m.
Human Resources
Health and Scientific Research Subcommittee
To continue oversight hearings on the cost of drugs.
Until noon 1318 Dirksen Building

Human Resources
Alcoholism and Drug Abuse Subcommittee
To hold hearings on the role of the halfway house in the rehabilitation of alcoholics.
Until noon 1202 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Business meeting to consider pending calendar business.
Room to be announced

JULY 28

8:00 a.m.
Energy and Natural Resources
Energy Conservation and Regulation Subcommittee
To continue hearings on part E (Electric Utility Rate Reform) of S. 1469, proposed National Energy Act.
3110 Dirksen Building

9:00 a.m.
Governmental Affairs
Federal Spending Practices and Open Government Subcommittee
To continue hearings on S. 1264, Federal Acquisition Act of 1977.
3302 Dirksen Building

Human Resources
Labor Subcommittee
To hold hearings on S. 1871, to increase the Federal minimum wage.
4232 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs.
To mark up S. 695, to impose on former Federal procurement personnel and extended time period during which they may not work for defense contractors.
5302 Dirksen Building

Commerce, Science, and Transportation.
Business meeting to consider pending calendar business.
Room to be announced

Foreign Relations
To hold hearings on proposed Threshold Test Ban and Peaceful Nuclear Explosions Treaties with the U.S.S.R. (Exec. N, 94th Cong., 2d sess.)
4221 Dirksen Building

10:00 a.m.
Foreign Relations
To continue hearings on proposed Threshold Test Ban and Peaceful Nuclear Explosions Treaties with the U.S.S.R. (Exec. N., 94th Cong., 2d sess.).
4221 Dirksen Building

HOUSE OF REPRESENTATIVES—*Tuesday, July 19, 1977*

The House met at 12 o'clock noon.

Rev. Mervin S. Eyler, St. Paul's Evangelical Lutheran Church, the Bronx, N.Y., offered the following prayer:

Gracious Lord, we pray for ourselves and for all people.

Deal with us as we reflect on and contemplate the world as we find it, and on those things we can do to improve the lot of all about us. With Your help and the mutual support of contemporaries, may this Nation be provided with understanding, knowledge, and strength for the living of each day.

Fill us with concern for the welfare of all Your people, with compassion for those suffering from whatever hurt, with love shared as we know and share Your love.

Lord, "Let us not grow weary in well doing, for in due season we shall reap, if we do not lose heart."

We pray in His name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Chirdon, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 248. Concurrent resolution requiring an investigation by the Joint Economic Committee of certain economic changes.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 7932. An act making appropriations for the legislative branch for the fiscal year ending September 30, 1978, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 7932) entitled "An act making appropriations for the legislative branch for the fiscal year ending September 30, 1978, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HUDDLESTON, Mr. MCCLELLAN, Mr. SASSER, Mr. PROXMIRE, Mr. SCHWEIKER, Mr. WEICKER, and Mr. YOUNG to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 717) entitled "An act to promote safety and health in the mining industry, to prevent recurring disasters in the mining industry, and for other purposes," agrees to a conference requested by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. WILLIAMS, Mr. RANDOLPH, Mr. PELL, Mr. NELSON, Mr. RIEGLE, Mr. JAVITS, Mr. SCHWEIKER, and Mr. STAFFORD to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 9. An act to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes;

S. 1496. An act to amend title 18, United States Code, to make a crime the willful destruction or attempts to destroy the trans-Alaska pipeline system;

S. 1502. An act to amend title 18, United States Code, to make a crime the willful destruction of any interstate pipeline system; and

S. 1522. An act to increase the appropriations authorization for fiscal years 1977 and 1978 and to authorize appropriations for fiscal year 1978 to carry out the Marine Mammal Protection Act of 1972, and for other purposes.

REV. MERVIN S. EYLER

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, the opening prayer this morning was delivered by Rev. Mervin Eyler, pastor of St. Paul's Evangelical Lutheran Church which is located in my home district of the Bronx, New York, N.Y. It is my pleasure to welcome Reverend Eyler and Mrs. Eyler, Virginia Levy, and Josephine Adams to the U.S. House of Representatives.

Reverend Eyler has been in dedicated service to our Lord for more than three decades. He was schooled at the Lutheran Theological Seminary in Gettysburg, Pa. For some 28 years, Reverend Eyler served as an Army chaplain. In this capacity, Reverend Eyler provided needed spiritual guidance and assistance to thousands of servicemen including many on the front lines of battle. He

retired from the Army in 1970 with his last assignment in Frankfurt, Germany.

For almost 8 years, Reverend Eyler has served as pastor for the 500-member St. Paul's Evangelical Lutheran Church, located in the Parkchester section of the Bronx. Under Reverend Eyler's leadership, St. Paul's has become one of the city's most outstanding congregations. Reverend Eyler is a widely respected member of the New York City theological community. It is a personal honor for me to welcome Reverend Eyler, a spiritual leader of exemplary stature. I extend to him the thanks and best wishes of all my colleagues.

APPOINTMENT OF CONFEREES ON H.R. 7932, LEGISLATIVE BRANCH APPROPRIATION ACT, 1978

Mr. SHIPLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7932) making appropriations for the legislative branch for the fiscal year ending September 30, 1978, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Illinois. The Chair hears none, and appoints the following conferees: Messrs. SHIPLEY, BENJAMIN, GIAIMO, MCFALL, MURTHA, TRAXLER, MAHON, ARMSTRONG, COUGHLIN, and CEDERBERG.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

JENNET JUANITA MILLER

The Clerk called the bill (H.R. 1405) for the relief of Jennet Juanita Miller.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PATRICIA R. TULLY

The Clerk called the bill (H.R. 2661) for the relief of Patricia R. Tully.

There being no objection, the Clerk read the bill as follows:

H.R. 2661

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding section 212(a)(23) of the Immigration and Nationality Act (8 U.S.C. 1182 (a)(23)), Patricia R. Tully may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of such Act.

SEC. 2. The exemption granted by the first section of this Act shall apply only to grounds for denial of a visa and exclusion from admission into the United States of which the Secretary of State or the Attorney General of the United States had knowledge before the date of the enactment of this Act.

With the following committee amendment:

On page 1, beginning on line 7, strike out the word "Act." and the remainder of the bill through page 2 and substitute in lieu thereof the following: "Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CHRISTOPHER ROBERT WEST

The Clerk called the bill (H.R. 2662) for the relief of Christopher Robert West.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

MRS. CHONG SUN YI RAUCH

The Clerk called the bill (H.R. 3081) for the relief of Mrs. Chong Sun Yi Rauch.

There being no objection, the Clerk read the bill as follows:

H.R. 3081

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 212 (a)(23) of the Immigration and Nationality Act, Mrs. Chong Sun Yi Rauch may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissable under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MILOS FORMAN

The Clerk called the bill (H.R. 3085) for the relief of Milos Forman.

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

FIDEL GROSSO-PADILLA

The Clerk called the bill (H.R. 3090) for the relief of Fidel Grosso-Padilla.

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

CATHY GEE YUEN

The Clerk called the bill (H.R. 1777) for the relief of Cathy Gee Yuen.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PAZ A. NORONA

The Clerk called the bill (H.R. 1787) for the relief of Paz A. Norona.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER. This concludes the call of the Private Calendar.

RESOLUTION TO CREATE SPECIAL COMMISSION TO STUDY KOREAN INFLUENCE-BUYING.

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, this House of Representatives, in order to operate efficiently and responsibly, must have the public trust of the American people. Without it, our work is meaningless. But public trust is a fragile thing, and in my judgment, it has been tested to its limits by the series of incidents and revelations known as "Koreagate."

Calls for a special prosecutor make little sense. The Justice Department is proceeding with its criminal investigation as it should. A special prosecutor would only duplicate the Justice Department's work. But we have more than a criminal problem here. We have an ethical problem. And as members of the House we must deal with this problem squarely.

Therefore, I have today entered for our consideration a resolution which would create a special commission to study the Korean influence-buying in the House. I have proposed that this commission have eight House members, four from each party, selected by the caucuses, and five "citizen" members, recommended to us by the American Bar Association.

This formula is not inviolate. Any similar formula would work. What is important is that we create a bipartisan commission, which will include House Members and non-House members alike, to get to the bottom of this situation immediately. This new commission would have the mandate to report back to us by January 15. It would take over the staff work done by the Standards and Operations Committee and would go from there.

It is my judgment that any investigative committee made up solely of House Members will be suspect in the public mind. Yet, because matters of ethics are so important to this House, it is critical that House Members be intimately involved in the investigation. Nothing short of a bipartisan commission along the lines I have suggested will, on the one hand, restore the confidence of the American people in this House, and on the other, allow us to aggressively clean our own House.

COMMENTARY ON THE PRESIDENT'S PROPOSAL TO AMEND TAFT-HARTLEY ACT

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, yesterday the President transmitted to Congress his proposal to amend the Taft-Hartley Act.

He stated in his message that he is "pledged to make Federal regulatory agencies more responsible to the people they serve."

Unfortunately, President Carter has not examined the labor laws of this country with the public's interest foremost in mind. I say this because he has overlooked one of the most serious deficiencies of the Taft-Hartley Act by not establishing the machinery whereby a national emergency labor dispute can be brought to a settlement in an orderly and fair manner without having to resort to special legislation on an ad hoc basis.

Four times—in 1963, in 1967, and twice in 1970—the Congress was obligated at the 11th hour to enact special legislation dealing with an impending railroad strike. The Congress is a political body. For it to be called upon to legislate on a specific labor dispute can never be a satisfactory procedure, and particularly when the emergency pressures are more conducive to emotion than reasoned judgment.

The President has chosen to ignore one of the most serious deficiencies of the Taft-Hartley Act—those provisions with Presidential powers and national emergency labor disputes.

If there is a strike affecting all the people and imperiling the national health or safety, we need more than a board of inquiry by the President. We need to establish a procedure for obtaining a settlement of national emergency labor disputes.

We cannot wait for the next emergency with its devastating cost to millions of innocent bystanders and to the Nation itself. If we desire labor reform for the people, I urge that we not wait for the next emergency, but rather join together in acting upon it now before another crippling emergency arises.

H.R. 5400, ADMINISTRATION'S SO-CALLED UNIVERSAL VOTER REGISTRATION ACT

(Mr. DEL CLAWSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEL CLAWSON. Mr. Speaker, on Thursday of this week the House will be asked to consider H.R. 5400, the administration's so-called Universal Voter Registration Act that has languished for weeks in limbo status waiting for support to be whipped into line. When that support lineup failed, "compromise-compromise" became the slogan. Optional election day registration is nothing more than subterfuge for the original proposal. All that is left is the better to leave the skeletal remains in the legislative desert for the political old carrot versus the stick gimmick—vultures to pick over.

The Justice Department has already warned that H.R. 5400 would provide a tremendous potential for fraud. It is widely believed, and rightly so, that this measure will set back the cause of honest elections many years. It is a self-serving vehicle for President Carter's reelection efforts. As noted in yesterday's Washington Post editorial:

> It doesn't help that the Federal largesse would go only to willing States. On the contrary, the States most cordial to Election Day registration are likely to be those with the fewest voting problems . . . and the least real need for Federal aid.

And further quoting:

> If the aim is to shore up State and local election boards, the greatest help should go to those that don't dare risk instant registration at all.

Obviously this legislation is not just unnecessary, it is costly and damaging to the election process. The Republican policy committee is on record strongly opposing H.R. 5400 and I urge my colleagues to do the same when it comes before us on Thursday of this week.

CONFERENCE REPORT ON H.R. 7554, HOUSING AND URBAN DEVELOPMENT-INDEPENDENT AGENCIES APPROPRIATION ACT, 1978

Mr. BOLAND. Mr. Speaker, I call up the conference report on the bill (H.R. 7554) making appropriations for the Department of Housing and Urban Development, and for sundry independent executive agencies, boards, bureaus, commissions, corporations, and offices for the fiscal year ending September 30, 1978, and for other purposes and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of July 12, 1977.)

Mr. BOLAND (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER. The gentleman from Massachusetts (Mr. BOLAND) is recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. COUGHLIN) is recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, each year when we bring back to the House a conference report on the HUD and independent agencies appropriation bill, I have always stressed that the foundation of the democratic process rests on the ability of its people and its institutions to make reasonable accommodations. Of course, reaching reasonable accommodations is simply another way of saying that we seek various shades of compromise with the other body—because the essence of a conference meeting is compromise.

I have also pointed out in past years that we always face difficult issues—and, generally, we resolve those issues in the spirit of compromise. In this bill, we resolved every issue save two—one, a highly charged emotional problem—and the other, dealing with a question that goes to the heart of what priorities the Congress will establish for our national space program.

Before I discuss those two exceptions, I want to take a moment to sum up what the bill contains.

The total amount of this conference report is $69,352,854,000.

The House passed this bill on June 15, with a total of $70,241,683,000.

The Senate passed the bill on June 24, and approved a total of $67,648,491,000.

The conferees have brought back a report that is $1,421,558,000 under the budget request. The total budget requests for the bill amounted to $70,774,412,000.

Turning to specifics, the conference agreement has approved $37,388,644,000 for the Department of Housing and Urban Development. We are recommending that $1,159,995,000 of new annual contract authority and $31,483,563,000 of new budget authority be made available for HUD's subsidized housing programs. Current estimates are that this bill be sufficient to reserve an additional 380,000 subsidized housing units in fiscal year 1978.

In other major program areas within HUD, the bill includes $3,600,000,000 for community development grants; $400,000,000 for urban development action grants; $57,000,000 for the section 701 comprehensive planning program; and $750,000 for the section 202 housing for the elderly and handicapped activity.

I am pleased to report that on the last item, the section 202 program, the House conferees prevailed, and the entire $750,000,000 has been placed back on budget where it can be weighed against other housing subsidy programs. In view of the other body's strong objections to this approach, I feel that we have scored an important victory for the underlying spirit of the Congress new budget procedures.

Mr. Speaker, for the past 2 years we have been faced with a tough issue on what level of funding should be provided for the National Science Foundation. Last year, we were about $52,000,000 apart, and this year roughly $40,000,000 separated us.

The conferees have settled on a total of $861,300,000 for support of the Foundation in 1978. That is $23,700,000 below the budget request—but, and I want to emphasize this, it is $85,389,000,000 above the amount enacted in 1977.

The bill also includes $848,803,000 for the Environmental Protection Agency, including $6,000,000 of the $10,000,000 the House added for health and ecological effects; $39,144,000 for the Consumer Product Safety Commission; $4,000,240,000, for the National Aeronautics and Space Administration; and $17,770,282,000 for the Veterans' Administration.

One point I would like to make is with regard to the $10 million general reduction in the VA construction-major projects account agreed to by the conferees.

It is the intent of the conferees that this reduction be applied to all of the hospitals for which construction funds have been or will be provided in fiscal year 1978—and those are Martinsburg, Little Rock, and Portland/Vancouver.

In connection with the EPA, Mr. ECKHARDT and Mr. GAMMAGE have asked me about congressional intent with regard to the $6 million for EPA's health and ecological effects program agreed to by the conferees. They asked if it was the intent of the conferees that a portion of the $6 million be earmarked for application to gulf coast air pollution efforts.

I agree that it is the intent of the House conferees on the fiscal year 1978 HUD-Independent Agencies Appropriation bill that a portion of the $6 million appropriated by the amendment for health and ecological effects be utilized for air quality research in the gulf coast region. I feel that such research will have a promising nationwide impact.

As I am sure most of you know by now, the conferees were not able to reach an agreement on two important matters. Let me discuss those briefly at this time.

To begin with, we were unable to reach agreement on the Jupiter Orbiter Probe mission, which NASA had requested in the 1978 budget. The House deleted $20,700,000 for the initial funding of this program and the Senate restored those funds. I will shortly offer a motion to accept the House's position. Let me tell you why. In denying the Jupiter Orbiter Probe, we were and are continuing to make an effort to strike a budget priority choice. This year's budget includes $36,000,000 to initiate funding of the space telescope which will ultimately cost the American taxpayer at least $800,000,000. Over the past 2 or 3 years, the committee has raised a number of questions about that telescope project—principally whether it was the right project, at the right cost, at the right time. The scientific community has described it as the No. 1 astronomy project of the 1980's. But not every project that the scientific community wants can have first priority—and that is why we made the budget priority choice—we provided the space telescope—but we denied the Jupiter Orbiter Probe.

Jupiter will be there 5 or 10 or 15 years from now when this project can be reinstituted. In all of the 20 years that this Nation has been involved in a major space effort—in all those years—the Congress has never, never, made an attempt to deny funding for a major space mission. I think it's time that we did that.

The other item which the conferees could not agree on concerns the amendment offered by the gentleman from Tennessee (Mr. BEARD) when this bill was before the House on June 15. That amendment prohibits the use of any fiscal year 1978 VA appropriation for adjudication of claims or payment of benefits to veterans discharged from the military under less than honorable conditions who received a general or honorable discharge as the result of the President's revised standards implemented on April 5 of this year. As we all know, the amendment carried 273 to 136. I opposed the amendment when it was offered, but I felt an obligation to support the House position in conference. The Senate conferees were equally adamant in their position—and in view of this, I felt that the only course open was to bring the issue back in disagreement for another vote.

Mr. Speaker, I would have hoped that we could have settled all the differences between the House and the Senate on this bill. But that was not to be the case. Some issues require further instructions and guidance from this House and from the other body. These two questions fit that mold, and I am sure both of them will be discussed further when we get into the amendment stage.

Mr. Speaker, I will include in the remarks a table showing the action taken on each item, the comparison with 1977 and the actions of both the House and the Senate.

COMPARATIVE STATEMENT OF THE NEW BUDGET (OBLIGATIONAL) AUTHORITY, HUD—INDEPENDENT AGENCIES APPROPRIATION BILL, 1978 (H.R. 7554)

Comprehensive planning grants	37,500,000
Salaries and expenses, Department of Housing and Urban Development	3,970,000
Total, Department of Housing and Urban Development	9,522,070,000
Department of the Treasury: Office of Revenue Sharing, salaries and expenses	1,616,000
National Aeronautics and Space Administration: Research and development	15,000,000
Total, H. Doc. 95-93	9,538,686,000

H. Doc. 95-97:

Environmental Protection Agency:	
Agency and regional management	$986,000
Research and development	1,760,000
Abatement and control	36,755,000
Enforcement	2,089,000

The preceding four amendments reflect administrative changes to the original individual proposals but have no net effect. These actions were taken to properly distribute $15,000,000 initially included in abatement and control for 600 additional Agency positions. The amendments originally proposed reductions of $404,000 in agency and regional management, $704,000 in research and development, and $633,000 in enforcement; and an increase of $43,441,000 in abatement and control.

Total, H. Doc. 95-97	41,590,000
H. Doc. 95-142: Veterans' Administration: Readjustment benefits	−580,000,000
Total, budget amendments	10,551,287,000

[3] The Senate bill carried this item as "off-budget."

[4] Includes $2,076,000 requested in the fiscal year 1978 Government Printing Office budget estimate.

[5] The House bill deferred $56,700,000 for production of Space Shuttle flight vehicles for subsequent consideration.

[6] Excludes $17,700,000 which was added by an amendment on the House floor.

[7] Excludes $139,100,000 of the budget estimate for construction of a hospital facility in the Portland/Vancouver area which is being deferred for subsequent consideration. The Senate bill included this item.

Mr. COUGHLIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the chairman, the gentleman from Massachusetts (Mr. BOLAND) has very ably pointed out the results of the conference. It was a good conference. The bill that we bring back to the House very substantially upholds the House position on a vast majority of the bill. The chairman, as he always does, handled the conference well. He hung in there for the House position and, as I say, handled that position very well.

I would point out, just to reiterate a few important things, that in assisted housing the conference is at $1,159,000,000 which is under the posiiton of the House originally of $1.2 billion.

For housing modernization there is $42.5 million in the bill, which is $7.5 million over the House figure. Assisted housing is under the House figure.

The 202 program is on budget as proposed by the House.

So, Mr. Speaker, throughout the bill we have maintained pretty much the position of the House.

We did insist on putting language in the conference report indicating that the conferees expected the Department of Housing and Urban Development to provide a full competitive opportunity for cities and urban counties to qualify for urban development action grants, including the use of preapplications in accordance with OMB circular 74–7.

There was some evidence during the period before the conference of the potential political use of these urban development action grants, and that was not what was intended. There should be a procedure under which all communities can apply and can receive equal consideration for this. These are not meant to be used politically in any way.

In the two areas in which we did come back in disagreement with the Senate, as has been pointed out by the chairman, which included the Jupiter Orbiter Probe which the House had denied funding for and the Senate included funding for, that will be back here in disagreement, as well as the amendment by the gentleman from Tennessee (Mr. BEARD) that was adopted prohibiting the use of funds to implement President Carter's upgrading of the discharge program. Those two areas were in disagreement. The rest of the bill was a good bill.

Mr. Speaker, I reserve the remainder of my time.

Mr. AuCOIN. Mr. Speaker, I have a profound sense of regret as I look at this bill before us—not for what is in the bill, but because of what is not in it. For more than 15 years, the need to replace the antiquated, deficient buildings of the VA hospital in Portland, Oreg., has been an urgent concern at the Federal level. Years of study have been involved in determining how best to serve veterans from the Northwest now served by the hospital, and last year the Veterans' Administration finally announced its plans for Portland, and asked Congress for the funds to build a new hospital.

Today we could be voting to give the VA the money to get the job done, but we are not. Funds for the Portland hospital are not in this bill.

Why? Because of a local political battle over where to build the hospital. The worthy members of the HUD-Independent Agencies Subcommittee were subjected to a withering barrage of conflicting testimony. There was simply not enough time for the committee to sort out the mass of material supporting and opposing the VA's plans. I would have to admit that if I were in their shoes, I would do exactly as they have done. The committee chose to assign a staff of investigators to develop an independent reading of the facts.

But even this investigation takes time—too much for us to have its determination before we vote today.

Mr. Speaker, I certainly intend to vote for this bill despite my personal disappointment. It is my hope later this year to rise in enthusiastic support of a supplemental appropriations bill that will finally make the urgently needed new Portland VA hospital a reality.

Mr. BOLAND. Mr. Speaker, the majority has no further request for time.

Mr. COUGHLIN. Mr. Speaker, I have no further request for time.

Mr. BOLAND. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 379, nays 30, not voting 24, as follows:

[Roll No. 433]

NOT VOTING—24

Ambro	Ertel	Marriott
Armstrong	Flippo	Mitchell, Md.
Badillo	Ford, Mich.	Nix
Brademas	Holland	Roncalio
Burke, Mass.	Howard	Seiberling
Dent	Jenrette	Teague
Dickinson	Koch	Trible
Eckhardt	McKinney	Wiggins

The Clerk announced the following pairs:

Mr. Burke of Massachusetts with Mr. Dickinson.
Mr. Teague with Mr. Marriott.
Mr. Dent with Mr. Wiggins.
Mr. Brademas with Mr. McKinney.
Mr. Ambro with Mr. Eckhardt.
Mr. Mitchell of Maryland with Mr. Ertel.
Mr. Nix with Mr. Badillo.
Mr. Ford of Michigan with Mr. Jenrette.
Mr. Howard with Mr. Koch.
Mr. Roncalio with Mr. Seiberling.
Mr. Flippo with Mr. Holland.

Mr. KETCHUM changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENTS

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 9: Page 6, after line 9, insert:

SPECIAL ASSISTANCE FUNCTIONS

The aggregate amount of purchases and commitments authorized to be made pursuant to section 305 of the National Housing Act, as amended, out of recaptured Special Assistance Purchase authority may not exceed $2,000,000,000.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 9 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 24: Page 17, line 11, strike out "$2,943,600,000" and insert "$3,013,000,000".

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,995,300,000".

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. BOLAND) is recognized for 30 minutes and the gentleman from Pennsylvania (Mr. COUGHLIN) is recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this motion and another motion I will offer later on in the bill are the only two controversial parts of this conference report.

Mr. Speaker, the House conferees were unable to reach agreement on the Jupiter Orbiter Probe which NASA had requested in the 1978 budget. The House deleted $20,700,000 for the initial funding of this program, and the Senate restored the funds.

The motion that is now before the House accepts the original House's position. Let me tell the Members why. In denying the Jupiter Orbiter Probe, we were and are continuing to make an effort to strike a budget priority choice. This year's budget includes $36 million to initiate funding of a space telescope which will ultimately cost the American taxpayer at least $800 million. Over the past 2 or 3 years the HUD-Independent Agencies Subcommittee and the full Committee on Appropriations have raised a number of questions about that telescope project—principally whether it was the right project, at the right cost, at the right time. The scientific community has described it as the No. 1 astronomy project of the 1980's. But not every project that the scientific community wants can have first priority. That is why we need a budget priority choice. We provided $36 million in this bill for the space telescope, but we denied the Jupiter Orbiter Probe. Jupiter will be there 5, 10, or 15 years from now when this project, if desired, can be reinstated. In the 20 years that this Nation has been involved in a major space effort, the Congress has never, never made an attempt to deny funding for a major space planetary mission. I think it is time that we did. That is precisely the position of the Subcommittee on Housing and Urban Development-Independent Agencies.

Mr. COUGHLIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona (Mr. RHODES), the distinguished minority leader.

Mr. RHODES. Mr. Speaker, I rise to express my opposition to the motion which has been made with regard to amendment No. 24. The committee motion will have the net effect of eliminating money for the Jupiter Orbiter Probe program. I believe that deletion of the funds for this program would seriously set back our balanced space efforts.

Jupiter is the largest planet of our solar system and is itself a miniature solar system. Study of its satellites and environment is fundamental to understanding the origin and evolution of the solar system and, consequently, understanding our own planet. The Jupiter Probe provides the first in-depth opportunity for exploration of the planet's atmosphere and is expected to advance our knowledge of atmospheric processes.

In addition, the program is a key link in maintaining our leadership in planetary exploration and dedication to expanding knowledge of the universe. As has been pointed out by other Members, the program is now designed to take advantage of the optimum launch date in 1982. The next optimum launch time will not come until 1987, and any interim effort would require a greater launch energy.

Another important aspect of the Jupiter Orbiter Probe program is the NASA-university-industry team which is working on the project. Any delay in the funding of the program would not only delay our space efforts but would cause the disruption of this highly coordinated effort and could result in the loss of very specialized personnel.

I urge my colleagues to vote against the committee motion on amendment in disagreement No. 24. Instead, I urge them to support funds for this essential space program.

Mr. WYDLER. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from New York.

Mr. WYDLER. Mr. Speaker, I want to congratulate the minority leader on the statement he has just made and say that as the ranking minority member on the Committee on Science and Technology, I agree with the thrust of his statement.

I believe the Jupiter probe is an important part of our continuing space program; I believe it is important to the future of our Nation and the world. I certainly support the position taken by the minority leader in this case.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I rise in opposition to amendment 24 reported in disagreement in the HUD-independent agencies appropriation bill (H.R. 7554). Funds for the Jupiter Orbiter Probe—JOP—must be restored. This very important program, the first new planetary mission that has been authorized since Pioneer Venus in 1975, represents a landmark step in this Nation's effort to explore and understand the solar system. Present and future generations are watching us in this effort.

The JOP spacecraft would be launched in January 1982 the first planetary mission to be carried aboard the Space Shuttle. As many of my colleagues are aware, timing of the mission is critical since the orbiter and the probe incorporate several devices that require reasonably long lead times for design and construction. By launching in January 1982 mission personnel can continue the orderly and progressive exploration of the planets. Viking is still exploring Mars. Pioneer Venus will be launched in 1978 to our nearest planetary neighbor. Pioneer II will fly past Saturn in 1979. Voyager 1 and 2 will arrive at Jupiter in 1979 and Saturn in 1980 and 81. Unfortunately, however no further

missions are currently funded and the Nation's planetary exploration program is near stagnation levels.

The benefits that accrue to all of us as a result of this Nation's planetary exploration program are enormous and far-reaching. Our initial landings on the planet Mars and our closeup photographs of Jupiter have added immensely to our knowledge of basic physical phenomenon on the Earth as well as providing us invaluable knowledge regarding our own solar system. Future planetary exploration activities are certain to yield even greater benefits not only to science, but also to technologies of great importance to mankind.

Mr. Speaker, restoration of NASA's $20.7 million request for the new start of the Jupiter Orbiter Probe will represent an important commitment by this country to continue a budgetary sound and scientifically promising program of unmanned planetary exploration. The potential for a better understanding of the universe which the JOP represents can bring better answers to the problems which challenge us here on Earth and I urge my colleagues to join me in voting down amendment 24 and approving full funding for the Jupiter Orbiter Probe.

Mr. BURGENER. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from California.

Mr. BURGENER. Mr. Speaker, I, too, wish to join with the gentleman in the well, our minority leader, in this effort, and I associate myself with his remarks. I think this is a vitally important issue.

Mr. Speaker, I rise in opposition to amendment No. 24 which would deny the NASA Jupiter Orbiter Probe program in the fiscal year 1978 budget:

The program is meritorious. It is recommended by the National Academy of Science. It has been submitted in both President Ford's and President Carter's budget requests. It has received endorsement of the House authorizing committee, the Senate authorizing committee, and the Senate Appropriations Committee. Yet amendment No. 24 would have the effect of denying this program which has been well received.

There are sound reasons to proceed now. Delay in starting the development program would mean missing the time in December 1981–January 1982 when the planetary alinements are such that the smallest amount of energy will be required to launch the payload on its 3-year flight to Jupiter. Launching at another time requires more energy and would be more expensive—even in 1987, when the next "low energy" launch could be made.

More importantly, we need to recognize what flows from these highly complex, NASA scientific programs: First, it is a training ground for our highest skilled scientists and engineers who bring this sophisticated technology to the marketplace and into our home. Second, as a nation ever more dependent on gathering sources of raw materials from around the world, we must be able to barter our only salable commodities in exchange—high technology and agricultural products. The high technology derived from our space program in such programs as the proposed Jupiter Orbiter Probe is a direct contributor to improving our balance of payments in an ever increasing competitive situation for scarce raw materials.

We can cite many other compelling reasons for proceeding in this budget with the Jupiter Orbiter Probe program but it should be pointed out that its inclusion in the NASA budget this year will not cause the total to exceed the budget request.

The Jupiter Orbiter Probe program requests a logical, well-planned follow-on to the NASA planetary effort which leads the world in the field. I urge defeat of amendment No. 24 and subsequent adoption of an appropriate amendment by this body to include the Jupiter Orbiter Probe in the NASA program.

Mrs. SPELLMAN. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentlewoman from Maryland.

Mrs. SPELLMAN. Mr. Speaker, I thank the gentleman for yielding.

It makes me happy to say to the minority leader that today he is right on target. I fully agree with every word that he has said.

Here we have an opportunity at an optimum moment to do what needs to be done. Delay is not going to save money; it is going to cost a great deal of money, because we will never again have the same opportunity—in our lifetimes, at any rate—to be able to send a probe to Jupiter as cheaply as we can do it today.

Mr. Speaker, this is the time, this is the moment to act. It would be shortsighted and penny foolish not to fund the Jupiter Orbiter Probe mission in this budget. Besides, the exploration of our solar system has potential benefits in areas of energy and new technology which we cannot afford to delay for 10 years. Again, Mr. Speaker, I wish to commend the gentleman from Arizona (Mr. RHODES) for his statement.

Mr. RHODES. Mr. Speaker, I thank the gentlewoman from Maryland (Mrs. SPELLMAN), and I expect and hope that this will be the first in a long series of agreements that the gentlewoman and I will have.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from Maine (Mr. EMERY).

Mr. EMERY. Mr. Speaker, as a former member of the Committee on Science and Technology and a former member of the Subcommittee on Space, Science, and Applications, I rise in full support of the Jupiter mission and against the pending amendment.

Unfortunately, all too many people view space travel and space exploration as a wasteful attempt to shoot billions of dollars of taxpayers' money into outer space, that money never to be seen again. But in my personal opinion—and this is an opinion which is backed up by a vast amount of information available to us—the world and the United States in particular have probably gotten more value back from the money we have put into space programs than we have from most other efforts this Congress has subsidized over the years.

Jupiter is especially interesting for a number of reasons. First of all, as the body of scientific evidence indicates, Jupiter may be a protostar that was not really big enough to become a star.

There is also indication that certain organic materials may exist in the atmosphere of Jupiter that may give us some clue to the origin of life on Earth.

It is very important that we probe these theories and understand more about the universe in order that we may, in fact, know more about ourselves and our own destiny as beings on this planet.

The space probe we are now trying to fund is unique because of the positions of the various planets in the solar system in 1982, and the fact that we can take a unique advantage of gravitational forces that are available at that time.

Therefore, Mr. Speaker, I think it would be very shortsighted if we did not fund this mission, and I think we ought to get on with its scientific mission, which is to learn more about our universe and ourselves, as well.

Mr. BOLAND. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Speaker, I rise in opposition to amendment No. 24.

The effect of this amendment would be to deny the Jupiter Orbiter Probe program which has been approved by three of the four committees making reviews for authorizing and appropriating funds for NASA for fiscal year 1978.

Increasing the amount by $17.7 million to the Senate conference recommendation of $3.013 billion would be $13 million below the administration request for NASA research and development in fiscal year 1978 and allow a timely start on this planetary exploration program. A timely start requires that the launch take place in December 1981–January 1982 to minimize the energy needed hence minimizing the cost. The next low energy opportunity will not occur until 1987 and even then a larger launch vehicle and higher costs will be incurred. The lead time is sufficient to develop the Jupiter Orbiter Probe if started in fiscal year 1978. Delay will prevent this from happening and will further disrupt the small highly skilled group who maintain U.S. leadership in planetary exploration.

Mankind's exploration of worlds other than the Earth, for Earth's benefit, will probably be the single most important legacy of the 20th century. It is significant that the United States has been the leader in this endeavor. Continuation of planetary exploration should remain a national goal.

The Jupiter Orbiter Probe is a planetary exploration mission that will take 3 years to build, will take another 3 years to reach Jupiter, and will circle the planet for almost 2 years measuring and investigating its mysteries. The new scientific insights—on energy generation, on chemistry, on chemical pre-life forms, on massive weather mechanisms—are

directly applicable to understanding the Earth's environment and will allow some of the best scientific minds of the world to contribute to a better understanding of our world over the next decade.

Earlier exploration of Venus and Mars has already taught us much about our own atmosphere, its circulation, its susceptibility to damage from things such as freons, and the effects of pollution on climate. At Jupiter, we can explore the solar system's largest atmosphere, a gas giant some 90,000 miles across, that contains at least one storm 10 times the size of the Earth that has raged unabated for more than two centuries. We can send measuring instruments from orbit into this atmosphere. We can take close-up pictures of the planet-sized moons of Jupiter and perhaps begin to understand why this huge planet acts like a small star at the center of its own solar system; we can relate Jupiter to both Earth and our entire galactic environment.

When built in 5 years, the Jupiter Orbiter program will have cost less than $1.50 per person. In the meantime this program will have represented nearly 10,000 man-years of direct employment here on Earth—important jobs in the instrument industry, in aerospace companies, in electronics, in universities across the country. The typical return to the economy—the economic multiplier—is 7 to 1 or $10.50 for every $1.50 invested in Jupiter Orbiter Probe. The new technologies—miniature independent computers that require little power, compact television cameras that are 3 times sharper and 10 times more sensitive than those available today, instruments that can survive penetration of the Jovian atmosphere, lightweight nuclear electric generators—will have enormous important future applications on Earth in commerce and industry.

As I pointed out, not to begin the Jupiter Orbiter Probe mission this year means a delay of 5 years before Jupiter could again be reached with a significant payload; it means reducing the U.S. teams that have led in planetary exploration and giving up this field of science and technology to the aggressive Soviet space effort; it means losing contributions from overseas worth nearly $40 million and from the Energy Agency of some $30 million; it means additional unemployment; it means loss of fundamental knowledge important to the life of man on Earth; and it means that America has turned its back on a heritage of exploration and challenge.

I urge defeat of amendment No. 24 and subsequent provisions for sufficient funds to start the Jupiter Orbiter Probe in fiscal year 1978.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I thank the chairman of the Subcommittee on Space Science and Applications for yielding to me.

What the gentleman is saying is that the exploration mission of Jupiter Probe has a real relationship to our ability to judge our own weather conditions here on Earth. So what we learn from those probes will demonstrate how that exploration data can be applied to our own conditions here on Earth; is that not correct?

Mr. FUQUA. The gentleman is absolutely correct. By learning from other planets, we can better understand the weather phenomena that we have on this planet, Earth.

Mr. ROUSSELOT. I appreciate the gentleman's comments. This probe does relate to our own conditions here on Earth. I appreciate the fight the gentleman is waging to make sure that this money is restored, which the other body already has included.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Washington.

Mr. McCORMACK. Mr. Speaker, I commend the gentleman from Florida (Mr. FUQUA), the chairman of the Subcommittee on Space Science and Applications, for the outstanding leadership he has provided in preparing legislation for an orderly space program.

I associate myself with the gentleman's remarks and oppose the motion before us.

I do not think it is possible to overestimate the potential value of the basic research associated with the Jupiter Probe. Over and over again we ask ourselves: "What is the value of basic research?" It is always difficult to know for certain. I think the same answer holds today as provided by Benjamin Franklin when he was asked about the value of a new hot air balloon. Franklin replied, "What is the value of a new baby?"

The fact of the matter is that the planet Jupiter is literally pregnant with potential information relating to all aspects of science, from cosmology to microbiology; from meteorology to basic energy physics. I suggest that we do support the probe. It is well worth the cost, but we must keep on schedule to optimize the benefits of the program.

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. COUGHLIN. I yield 2 additional minutes to the gentleman from Florida (Mr. FUQUA).

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from California.

Mr. BROWN of California. Mr. Chairman, I rise in support of the position taken by the gentleman from Florida.

Mr Speaker, I rise in opposition to the amendment (amendment 24) and support restoration of funds for the Jupiter Orbiter Probe program. I believe the Jupiter Orbiter Probe will contribute substantially to our understanding of planet Earth.

It has often been stated that scientists learn more about Earth when they have other planets to compare it with. Until the planetary-exploration program began, man had a single data point for any study of Earthwide phenomena—the Earth. Our only view of the solar system was dim, cloudy, and far away—through telescopes manned by astronomers who really did not think of the other planets in terms of Earth.

An example of the importance of comparative planetology may be worth citing: Project Viking, which landed on Mars in the summer of 1976 and will now force the revision of every textbook about astronomy, planetology, geology, soil chemistry, biology, meteorology, and other science disciplines.

Dr. Seymour Hess, leader of the Viking meterology team, told colleagues that, based on data he has received from the Viking meteorology instruments, he is now able to advise other meteorologists who are wrestling with Earth's weather:

I tell some, "Your theory doesn't work on Mars. Look for something else." I tell others, "That works on Mars, so it must work on Earth; keep digging at it because it's worth studying."

Mars' weather is much simpler than Earth's. Mars, therefore, is a good laboratory to test theories of weather on Earth—which is more difficult because of its complexity.

Another example: Until Pioneer 10 and 11 reached Jupiter in 1973 and 1974, there were almost as many theories for the Jovian Great Red Spot as there were scientists who studied it. But the Pioneers photographed the spot in sufficient detail to provide a startling new statement; the Great Red Spot looks very much like an enormous hurricane.

That hurricane has been continuously observed through telescopes for almost 200 years; nothing of its magnitude, in size or lifetime, has been observed on Earth. The Jupiter Orbiter will provide long-term, extremely close-up information on this monstrous storm. Might that not contribute to greater understanding of the hurricanes that so often reduce much of this Nation's shorelines to rubble?

Another example: No one knew that Earth was surrounded by belts of trapped radiation—that protect us from high-energy atomic particles streaming from the Sun—until Professor van Allen's experiment aboard the spacecraft Explorer I found those belts in 1958.

Jupiter is encircled by belts of radiation that are similar, though vastly greater in size and intensity. These belts, like Earth's, are related to the planet's magnetic field. Oceanographers and geologists have recently discovered that the polarity of Earth's magnetic field has changed many times. They understand nothing of how this occurs: does the change occur instantly? Does it take many years or even decades? Are there periods when the magnetic field disappears completely, allowing high-energy atomic particles to bombard the surface of the Earth and its occupants?

Long-term studies of Jupiter's magnetic field and trapped radiation belts will give us one more data point than we have. We will have another planet to compare ourselves with.

The JOP mission is also important by itself; it is important in the orderly, continuing exploration of the new frontiers of our solar system. If the solar system is, indeed, to be "ours" then we need to know where we stand in it. Jupiter is a vital piece of the puzzle.

Mr. WINN. Mr. Speaker, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from Kansas.

Mr. WINN. Mr. Speaker, I would ask the gentleman from Florida if it is not true that the program will only cost $1.50 per U.S. citizen?

Mr. FUQUA. The gentleman from Kansas is correct. Also the multiplier effect on the economy is 7 to 1 so that for every $1 we spend, we get back $10.50.

Mr. WINN. If we do not take this opportunity now to proceed with the program, what will it then cost?

Mr. FUQUA. The cost will be exceeding what it is now because of the larger booster that will be needed, it will take more time to get there. Also the backup team that we have today is one of the most capable in the world, and if we do not proceed with this now then we will have to recruit the members of that team again at a later time, at a greater cost and with the effect of increased inflation to the project.

Mr. WINN. Mr. Speaker, I wholeheartedly support the gentleman from Florida (Mr. FUQUA) in his efforts to defeat this.

Mr. BOLAND. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. GAMMAGE).

Mr. GAMMAGE. Mr. Speaker, I rise in favor of the remarks made by my distinguished colleague, the gentleman from Florida (Mr. FUQUA).

Mr. Speaker, we must maintain strength and continuity in our efforts to explore mankind's most challenging frontier—space. In particular, exploration of our planetary system yields unique information on the origin and early history of the Earth. Comparison of our planet with its neighbors provides new and stimulating viewpoints from which to diagnose the ills of our environment and chart their solution. At the same time, this exploration appeals to humanity's basic urge for new knowledge and wider perspective, and lays foundations for the eventual utilization of space resources, and perhaps ultimately the large-scale colonization of space.

The Jupiter Orbiter is not an isolated undertaking. It is the logical next step in a systematic exploration of the solar system, which began some years ago. Viking is still out there looking at Mars. Voyagers and Pioneers are scheduled to leave during the next 3 years to explore Jupiter, Saturn, and Venus. The Jupiter Orbiter, designed as the next in a series, is scheduled for launch in early 1982 for a 20-month-long look at that planet. Dropping it out of sequence, or postponing it, disrupts the orderly scheduling and effective use of skilled personnel which this research requires.

The restoration of funds for the Jupiter Orbiter Probe will not exceed congressional budget ceilings for fiscal year 1978 and will keep the total NASA research and development funds to less than the administration request. Starting the Jupiter Orbiter Probe program now will continue the gathering of scientific planetary data which has improved understanding of atmospheric processes and weather forecasting, and contributed to better atmospheric environmental monitoring essential to our quality of life. This Nation ought to use its space capabilities to gain more basic knowledge of the universe, as well as engage in practical—and exciting—applications of Earth orbiting satellites.

Mr. BOLAND. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. KRUEGER).

Mr. KRUEGER. Mr. Speaker, I rise in support of the amendment.

Mr. BOLAND. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. ROYBAL).

Mr. ROYBAL. Mr. Speaker, I rise in opposition to the motion offered by my distinguished colleague, Mr. BOLAND, because it would deny funding for the Jupiter Orbiter Probe. I urge instead that we support the motion which will be offered momentarily by Mr. FUQUA, chairman of the Science and Technology Subcommittee on Space Science.

Mr. FUQUA's motion will enable the United States to continue planetary exploration by including $17.7 million for the Jupiter program.

Exploration is the essence of American history. The Jupiter Orbiter Probe, which you are being asked to support, is the product of years of engineering and scientific preparation. Many planetary missions are technically achievable, and scientifically justifiable, but to make the best possible use of our resources, NASA, in collaboration with science and industry, selects only the best flight opportunities. The Jupiter Orbiter Probe is the product of this exacting selection process.

Jupiter is the largest planet, the prototype of the gas giants that dominate the outer solar system. Its 12 planet-size satellites constitute a miniature solar system and Jupiter, with its awesome magnetic field and belts of charged particles, generates more energy than it receives from our Sun. This "mini solar system" offers unique opportunities to gain new knowledge, not only about the origins of our solar system, but also about weather patterns and other natural phenomena on Earth as well.

Planetary dynamics have focused the attention of the space science community on a unique launch opportunity. Calculations indicate that a 2-month period from December 1981 through January 1982 presents the best opportunity for a Jupiter launch for the remainder of the 20th century. The orbital alinements of Jupiter and Earth at that time will be such that a maximum payload can be transported to Jupiter. This increased payload translates into a highly efficient spacecraft with the greatest possible payload of scientific instruments.

To forgo forever the exploration of Jupiter would be foolish, and to postpone it to a later time would only result in a higher cost.

The next practical, though not as favorable, date for a Jupiter launch will not occur until 1987. Just imagine what 5 years of inflation will do to the price tag of the program. Far more serious, however, is the fact that a 5-year delay of the Jupiter Orbiter probe will force NASA to disband its justifiably famous network of highly trained and experienced personnel. A similar network would have to be reconstructed 5 years later at a tremendous increase in cost. Paying a lot more for a lot less is no way to save money, especially in our space program, which operates on a very restricted budget.

There is no doubt that a combination of factors have singled out the Jupiter program as a mission whose time has come. The mission has survived keen competition from other highly valuable planetary missions. Four separate space science working groups have formulated the detailed scientific goals of the mission and more than 500 individual scientists have proposed to participate individually or as part of investigator teams. The Government of West Germany has made a commitment to provide the $20 million propulsion system for the Jupiter spacecraft. The 1981–82 launch window is unique. We will look long and hard for similar conditions and pay a dear price if we fail to take advantage of this ideal opportunity to study the largest and most mysterious planet in our solar system. I urge all my colleagues to defeat this motion and support the Jupiter program by voting for Mr. FUQUA's motion.

Mr. BOLAND. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Michigan (Mr. TRAXLER), a member of the subcommittee and the full Committee on Appropriations.

Mr. TRAXLER. Mr. Speaker, I thank the gentleman from Massachusetts for yielding me this time.

Mr. Speaker, I would like to say that those of us on this subcommittee have thoroughly enjoyed our relationship with NASA and with the very fine personnel that are in that agency.

Their presentations to us and their documentations in support of their positions are of the highest possible professional levels. I am sure that the Members can appreciate that we on this subcommittee have decisions to make as to where the taxpayer' money is going to be spent. It is a very difficult task.

I agree with much of what the proponents of the Jupiter Orbiter Probe have said on the floor of the House today.

Let me tell the Members that in my mind a reservation exists, and it is a question of money and priorities.

We have to prioritize, as we approach this period of zero-based budgeting. It becomes important that we examine the requests of agencies and place them in some kind of logical order based upon, with their help, what we perceive and what they perceive to be some of the immediate needs of this Nation. Unfortunately, we do not have enough money to take care of the problems of the Veterans' Administration, which is one of the jurisdictions of this subcommittee. We do not have enough money to fund all the programs of the Environmental Protection Agency and our clean waters program. Unfortunately, we do not have enough money to meet the housing needs of America, and HUD is part of this committee's jurisdiction.

It is very painful for us to say to NASA, an agency that is one of our favorites, that we do not believe that this ought to be a priority item in 1978 budget. That is why we did it. I believe that the project is worthwhile, the project does have scientific value. The problem is, where do we get all the money to do all the things we want to do? The Jupiter Orbiter Probe will cost in the area of $275 million to $295 million. They are seriously considering the Halley rendezvous in 1982. That is $200 million to $250 million. They have a Mars follow-on. We are not sure how much that will be. They have a Venus orbiting imaging radar. That is in the area of $200 million to $250 million. They are thinking of the lunar polar orbiter. They do not have any launch window requirement there. That is $120 million to $125 million. They are considering the Saturn-Uranus probe. That is in the area of $275 million to $325 million. They are talking about a run-out cost on just these missions that they have got under serious consideration in the sum of at least $1 billion to $1,240,000,000. I am not telling the Members each one of these is proper or improper. What I am saying to them is we have looked at the Jupiter Orbiter Probe. We have said on the basis of the money that we believe is available now and will be available in the next couple of years, this is a place we can forego and compromise and not go.

We gave them the large space telescope. They do have the space shuttle. We are supportive of their other kinds of science inquiries. This is not a turndown to NASA; it is a forced examination of spending choices by the subcommittee.

We can only tell the Members that we will examine NASA requests in the future in light of the same economic needs and requirements on the part of our country. I hope the Members will agree with this. I hope they will say no to Jupiter.

Mr. COUGHLIN. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD of California. Mr. Speaker, I rise in opposition to the amendment No. 24 and support restoration of funds for the Jupiter Orbiter Probe program. Failure to appropriate funds for this important program will have greater effect than slowing down planetary exploration. We are considering here the dismembering of significant national capability in planetary science. In particular, we should be concerned with losing the highly specialized people established at Jet Propulsion Laboratory over the years.

JPL's main assignment as a part of NASA is to carry out unmanned planetary exploration missions using remotely controlled automatic spacecraft. We are certainly very proud of the people at JPL who have carried out the assignment with dedication and expertise.

The institutional impact on JPL of no Jupiter Orbiter Probe in fiscal year 1978 would include loss during that year of 212 scientists and engineers and more than 100 administrative and support people involved in electronic, logic, communication, data and system design, and development. This reduction would add to the 200 capable technical people being lost during this fiscal year due to the general slowdown of the planetary program.

The people at JPL represent a most valuable capability—one extremely difficult to rebuild. In some cases, these people are virtually unique specialists. Their loss would leave JPL and the space program without vital synthesis and design capabilities. They constitute a group of expert specialists trained to work as an effective and efficient team capable of all required skills to carry out automated spacecraft missions.

Even if a major planetary new start should be approved later, it is most unlikely that JPL would be able to rebuild the lost expert capability to manage such a planetary project.

We cannot allow the country to do without this capability for the indefinite future nor incur the cost of rebuilding this capability some time in the future.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD of California. I yield to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, I appreciate the gentleman yielding.

Mr. Speaker, it is also true, is it not, that Members have supported the space program and space shuttle program and that the space shuttle will be utilized in the Jupiter effort. So this is one more offspring, so to speak, or related program in the space shuttle effort. Consequently if an individual is a supporter of the space shuttle program he clearly should support this Jupiter probe; is that not correct?

Mr. MOORHEAD of California. That is correct.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. WYDLER).

Mr. WYDLER. Mr. Speaker, I just want to make clear to the Members of the House that we ought to vote "no" if we want to continue the Jupiter program, and I am asking all the Members of the House to vote "no" on this proposition. I think it is the correct vote.

Mr. Speaker, I yield to the gentleman from Maryland (Mr. LONG).

Mr. LONG of Maryland. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding.

Mr. Speaker, I also oppose this amendment and support the funding of the Jupiter Orbiter Probe program.

Why are we funding this program? Why should we fund it? It is claimed that we have projects much closer to Earth that we ought to be giving priority to. But let me point out in this appropriation there is funding—and nobody is opposing it—for twice as much money for a telescopic probe of outer space. So, if we want to put things on the basis of the closer to Earth we get the more important it is, then this Jupiter program should have a higher priority than some of the projects that are being funded in this bill.

Let me point out that planetary explorations provide important data that can explain conditions on Earth. The Venus Probe provided the information which has shown the danger of the fluorocarbon aerosols to the Earth's ozone layer.

Jupiter is not only the largest body in the solar system, composing 97 percent of its planet mass, but also with its dozen moons, it is a microcosm of our solar system and will provide information about solar mechanics.

The Jupiter Probe will provide answers to key questions about atmospheric conditions and behavior and also significant new information on varying properties of matter under extreme cold conditions.

Why fund the probe this year? Why does it have to be done in fiscal 1978? If the program is started now, Jupiter will be in position for a timely "minimum energy" launch in December 1981. The next launch "window" would be in 1987.

There is presently a highly developed team of scientific, business, and industrial personnel which would remain intact to work on the project. If the Orbiter Probe is not funded, the "team" can be expected to start disintegrating within 2 to 3 years, as a "lull" in planetary explorations begins.

If the Orbiter Probe is not funded until the next launch window, in 1987, costs can be expected to double—from about $300 million to about $600 million over the life of the project.

At least, one important "spinoff" technology would suffer from the delay as well. The Advanced Selenide Radioisotope Thermoelectric Generator (a power system capable of operating in space with high reliability) is to be developed by Teledyne Energy Systems for this flight. The performance of this system as part of the Orbiter Probe will give needed data on the scientific concepts behind the generator and will provide for even further refinement of these independent power systems. Teledyne has the only remaining national capability for producing these systems, which already have important potential as power systems for a variety of remote sensing devices and military hardware.

In summary, because planetary explorations have provided invaluable scientific information, because it is already possible to identify important knowledge we can expect from the Jupiter Orbiter Probe and, because we can already anticipate significant benefits from mission-related technology, I urge that the House reject the conferees' recommended $2.995 billion funding and vote for a $3.013 billion NASA research and development budget, which will include funding for the start of the Jupiter Orbiter Probe.

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, obviously the horses are out of the barn and have been all lined up. We have California, where the Jet Propulsion Laboratory will be working on the Jupiter Orbiter Probe. We have, as practically everybody knows, the colleges and universities, which may be or actually are involved in the space program.

We also have all the contractors all over the Nation who have any part or parcel of the space program calling Members saying, "You ought to put the $20.7 million back in for this program."

The gentleman from Maryland makes

the point that we provided $36 million for the large space telescope. We asked people in the field of astronomy what priority they would attach to the large space telescope and the Jupiter Orbiter Probe missions. Without exception, they indicated that they would prefer the large space telescope which is launched by the Space Shuttle.

That was one of the problems we had, whether or not we would fund the large space telescope. Most of the Members on the Committee on Science and Technology agreed that funding the large space telescope would be preferable to funding the Jupiter Orbiter Probe, if they had to make a choice.

The argument has been made with respect to the increased cost down the road if the project is delayed. I cannot buy that argument at all. When the National Aeronautics and Space Administration slide-ruled the cost of the Space Shuttle back in 1971, the cost was estimated to be $5.1 billion. They do not buy the argument of the GAO and they paid no attention to the cost of inflation factor during all the plans for the Space Shuttle program. The total estimated cost of the Shuttle is now around $12 billion to $14 billion, but that does not bother NASA. They are always talking about the cost of the program in 1971 dollars. Well, you cannot argue both ways. We are talking about the cost of the Jupiter Orbiter program in 1977 dollars and that cost comes to around $320 million, including the launch costs. It will not be double that cost as the gentleman from Florida and other Members from the Committee on Science and Technology claim on this floor today. It will cost roughly the same in 1977 dollars if we put the mission off to 1987. So they cannot have the argument both ways.

Now, there as been some question here whether the Congress ought to be able to work its will in this area and ought to have some say in the direction in which the space program is headed. Our concern here, the concern of the subcommittee, and it should be the concern of the Committee on Science and Technology, too, is that we are spending four times as much in planetary probes as we are in the applications program. The fact of the matter is that the estimated costs for projects that have been planned by NASA for planetary probes combined with what we have already spent in working on such projects for 1982 totals $8.5 billion, far more than the amount of money that is projected for spending in the applications program—programs that directly benefit mankind. They have more direct relation to problems on Earth. The amount of money spent in the applications area comes to about $2 billion or $3 billion; so we are spending something like three or four times as much in planetary probes and physics and astronomy missions as we are in the applications areas.

I think we ought to hold NASA's feet to the fire in determining what its priorities are. But, it always comes to what the "next logical step" is. Last year the "next logical step" was the space telescope. This year it is the Jupiter Orbiter Probe.

Now, let me tell the gentleman from New York (Mr. WYDLER), we are not stopping the Jupiter Orbiter Probe. We are not starting it. When we start these programs, we cannot stop them. It is $20 million this year, $30 million or $40 million next year, and by the year 1982 we will have spent some $320 million.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Speaker, I want to say that the gentleman has been very kind to the NASA program; but this request was made, not only by President Carter, but by President Ford and it still will be $13 million under the NASA budget request, so it is not a budget buster.

Mr. Speaker, I plead with the House to vote down the gentleman's motion.

Mr. BOLAND. I am pleased that the gentleman does call the attention of the House to the fact that this subcommittee has dealt rather generously with NASA over the years. I have been serving on this subcommittee since the time the agency was known as the National Advisory Committee on Aeronautics, the predecessor to the National Aeronautics and Space Administration. I have been in on the space program ever since its start.

On the Apollo program we spent $25 billion. There was no objection to that spending. It was a glorious and glamorous program. Everybody agreed with it.

I have no problems with the Space Shuttle program. That was the direction in which the Nixon administration indicated we ought to go, and the Apollo program was the direction in which the Kennedy administration felt we ought to go. But, the problem is that NASA is lining up all of these programs year after year. We have the rendezvous with Halley's Comet; we have the Mars follow-on; we have the Venus Orbiting Imaging Radar program; we have the Lunar Polar Orbiter; and we have the Saturn/Uranus Probe—all neatly laid out down to 1984. We are spending billions of dollars in this area.

All I am saying is that we have not yet started the Jupiter Orbiter Probe; we can put it off. We have got the large space telescope. There is $4 billion in here for NASA, and if taking $20.7 million out of this budget is going to really harm or injure NASA, then there is something wrong with NASA and there is something wrong with the space program.

I do not say there is. All I am saying is that the Congress, the taxpayers of America whom we represent, ought to make some judgment on what the priorities ought to be. In the judgment of this subcommittee, which has looked at this program, we think that this program can be delayed. Jupiter will be up there 5 years from now; it will be up there 10 years from now. It is not going to move very far. With the launch windows that will occur again, there is no reason in the world why we have to put it in the fiscal year 1978 budget.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from New York.

Mr. STRATTON. The gentleman says that there is no reason why this cannot be postponed, but my information is that if we do not get the program started this year, we cannot get the probe off in 1981 or 1982. And, if we do not get it off in 1981 or 1982, we will not be able to get it off at all until 1987. Then, it will be so far away that we will not be able to carry any meaningful instruments along. So, it is this year or not at all.

Mr. BOLAND. The gentleman is exactly correct. If we do not get started on it now, we will not be able to launch it in 1981. But, what difference does it make whether it is 1981 or 1987? What difference does it really make? Jupiter will still be there. It is not going to go anywhere.

Mr. STRATTON. I thought the gentleman supported the idea of our making an effort to get into space proposed by President Kennedy. Why should we discontinue it now? There are other opportunities to gain additional knowledge.

Mr. BOLAND. Let me give the gentleman an idea of what we are spending in this area so that he will understand and so that the Members of the House will understand that NASA is not going to be short-changed in planetary probes—which is all we are concerned about. I know the Members are receiving all kinds of letters indicating that this cut would cause all kinds of irreparable damage to the U.S. space program. That is a lot of nonsense. We spent roughly $1.7 billion on 18 missions that have flown to Venus, Mars, Mercury, Jupiter, Saturn, and the Moon. This very year, NASA is going to launch the Mariner Jupiter-Saturn mission—two satellites that will fly by Jupiter in 1979 and 1980. Next year, we will launch two satellite probes to Venus. Those two missions will cost a total of $510 million.

I repeat again, just so that none of the Members think that by denying the Jupiter Orbiter Probe mission that the world will fall apart, let me give the Members some idea of the planetary missions which are under serious consideration: the "next logical step" that NASA likes to use.

There is a rendezvous with Halley's Comet planned for launching in 1982. There is a Mars Viking follow-on mission, which may cost as much as $1 billion. There is a Venus orbiting imaging radar satellite mission, which will cost in the range of $250 million. There is a Saturn Uranus probe planned in 1984, which will cost about $325 million. There is a lunar polar orbiter mission, which will cost about $120 million. These are all "logical steps." The question is whether or not those of us in the Congress who represent the taxpayers, who pick up the tab for the expense of the space program, should vote for all of these "logical steps." I have no objection to them. I have been voting for them for over 22 years. But I think we ought to at least, in this particular instance, make NASA establish some priority as to where we are heading in the planetary programs. For planetary probes and physics and astronomy missions we have spent and will spend $8.5 billion by 1984. We ought to look at it. That is exactly what we are doing in this motion, and I hope that the Members of this body will follow the judgment of the subcommittee.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, this Jupiter Orbiter program is a relatively low cost item, as these missions go and as most Government programs go. The startup costs are some $20.8 million. The estimated total cost is around $280 million or perhaps, as the gentleman said, $380 million. One thing is true. If we wait until 1987, which is the next time we could launch this orbiter, it is going to cost double that. Contrary to what the chairman has said, although Jupiter will still be there in 1987, it will be much further away and will, of course, cost more to reach. This Jupiter Orbiter is not an isolated undertaking. It is a logical next step in the exploration of the solar system which began some years ago. We still have Viking out looking at Mars. Voyagers and Pioneers are scheduled to leave in the next 3 years to explore Jupiter, Saturn, and Venus. This Jupiter Orbiter program is designed as the next in the series to take a 20-month look at Jupiter. If we drop it now not only will it cost double the money we are talking about here today, but it will disrupt the orderly scheduling and effective use of skilled personnel that this kind of research requires.

Mr. Speaker, I urge my colleagues to examine this issue very carefully and to vote against this amendment.

Mr. COUGHLIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, when the subcommittee deleted the funds for the Jupiter Orbiter Probe, it was done after very careful and painful consideration. NASA came to our subcommittee and they asked not just for the Jupiter Orbiter Probe, they asked for five new starts—five new starts. The subcommittee funded four of the five new starts. These are new programs that NASA wants. Of course, NASA all of the new starts that they ask for. They want all new starts. They want the sun and the moon and everything to go with it. But our subcommittee looked at the new starts and tried to rank them in order of importance in priority. All of the others ranked above the Jupiter Orbiter Probe, in terms of priorities, and we funded all of those.

Now, it is said that there is an optimum launch window time, and that is essentially correct. But as the chairman of the subcommittee points out very correctly, Jupiter will still be there when the next good launch window comes up.

It is said that we need something for people to do out at the Jet Propulsion Laboratory in California. That is a heck of an argument, that we have to start a program just to give people something to do. We have to look at a program on its merits. Is it going to be worthwhile?

Yes, we can get back some very nice pictures of Jupiter. We had some beautiful pictures of Mars, and we can have this done for Jupiter. But the question is: Is it, in the whole scheme of things, worthwhile? Does it have to be done now?

This is the next step, as the subcommittee properly points out, in the long, drawn-out exploration of our solar system. That is, of course, an important thing for us to do, but we do not need to start this program now.

I would remind the Members that the subcommittee funded four out of five new starts. This is the only one we did not fund.

Mr. Speaker, I urge that the Members support the position of the House on the Senate amendment.

Mr. WYDLER. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from New York.

Mr. WYDLER. Mr. Speaker, I have no argument with the motives of the committee and the conferees in bringing in this report. I know that these are tough decisions that have to be made.

I want to make it clear, however, that although I personally know of no interest that I or anyone else in my district has in this project, I feel it is important. I think it is a mistake to take the attitude that because we have had the Apollo program and it is completed, our exploration of space is somehow over. There is always going to be a logical next step. I think that is always going to be the case until the time comes when we fully understand everything about our universe. We will have other programs, one following on another, and I do not think we should become discouraged and turn our backs on space exploration.

The only thing I object to is what I see as the attitude that we have carried out a lot of space exploration and, therefore, we do not have to do any more of it. I do not think we as a Nation should adopt that attitude.

Mr. COUGHLIN. Because we are not funding the Jupiter Orbiter Probe this year does not mean we are terminating our space program. We approved the other new starts, all four of them.

We approved the space telescope, which is part of the space program; we approved the new space shuttle orbiter which is part of the space program; we approved the Mars follow-on mission, which is part of the space program; and we approved the new landsat satellite, which is part of the space program.

The Jupiter probe is one small part of the space program, and that can be deferred.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding. Mr. Speaker, let me ask the gentleman this: Is it not true that NASA still considers this probe as a top priority project?

Mr. COUGHLIN. Of course, they consider it as a top priority project. They consider every program of this type as a top priority project.

Mr. ROUSSELOT. I believe the gentleman and I have both seen tremendous results from other probes into space. There have been all kinds of spinoffs from these programs. I am sure the gentleman recognizes the question of weather satellite activity is involved.

The gentleman recognizes what this probe might do toward that effort, does he not?

Mr. COUGHLIN. Every single program that NASA institutes is to them a top priority program. This is one that the committee looked at carefully.

Mr. McDADE. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Speaker, I want to aline myself with the position of my colleague, the gentleman from Pennsylvania (Mr. COUGHLIN), and say that I think the conferees, under the leadership of the gentleman from Massachusetts (Mr. BOLAND) and the gentleman from Pennsylvania (Mr. COUGHLIN), have made a logical decision. It is a very difficult decision.

For the very first time the House has said to NASA, "We would like you to do some prioritizing, that's all." We have said to NASA, "We don't want to stop your program, but we think it should be deferred."

Let us just ask ourselves what $4 billion will buy. That is about what this program would cost.

What is involved here is one mission and one mission only. It does not involve weather satellites, communication satellites, or any of the other extraordinary programs.

I do not know of a committee that has been more generous with NASA than this particular committee during the roughly 10 years I have served on it. For the first time we have said, "Wait a minute. We want you to tell us what you are going to do in space applications that are more intimately affecting people's lives. We want to know what you are going to do with these resources, in the overall context of the American budgetary deficit, which is now running somewhere around $60 billion."

Mr. Speaker, that is all that is involved here, and I hope the Members will see fit to support the subcommittee of the Committee on Appropriations in this instance and say this one time, "We want to see what you are going to do as we go further down the road."

Mr. COUGHLIN. Mr. Speaker, I thank my distinguished colleague, the gentleman from Pennsylvania (Mr. McDADE), a member of the subcommittee.

Mr. JOHN T. MYERS. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Indiana.

Mr. JOHN T. MYERS. Mr. Speaker, I thank my colleague, the gentleman from Pennsylvania (Mr. COUGHLIN), for yielding. I rise in opposition to the Senate amendment.

Mr. Speaker, going forward with the Jupiter Orbiter Probe will not cure cancer or solve the energy crisis, but being the first analytical mission to the outer planets of our solar system, JOP is certain to provide a huge increment in our knowledge of the entire solar system.

In order for us to know the substantial and practical problems of our Earth, problems such as earthquakes, internal composition and structure of the Earth, and the origin and dynamics of the atmosphere, we must understand the Earth not as an individual body, but as one of nine bodies in our solar system. Jupiter, with its moons, is a miniature planetary

system which needs exploration. The proposed mission will visit three or four of the larger moons and we are hopeful that synoptic studies of the Jovian system will greatly aid our understanding of the origin and evolution, not only of Jupiter or Earth, but of our entire solar system.

Furthermore, the timing of this mission is crucial. JOP must be started this year and this is a fact which has been foreseen for so long that the planning is currently in excellent order and detailed experimental strategies have been worked out. The most favorable launch date in this century will occur in December 1981, but preparation for the launch on that date must begin during fiscal 1978. Although the Probe could be delayed until 1987, such a delay would result in a tremendous increase in the cost of the project.

Mr. Speaker, for these reasons, I rise in support of the funding for Jupiter Orbiter Probe in fiscal 1978.

Mr. COUGHLIN. Mr. Speaker, I urge the Members to support the position of the House on the Senate amendment, and I reserve the balance of my time.

The SPEAKER pro tempore (Mr. MINETA). The gentleman from Pennsylvania (Mr. COUGHLIN) has consumed 6 minutes. The gentleman from Massachusetts (Mr. BOLAND) has 4 minutes remaining.

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, for the benefit of all the Californians on the floor, let me say that I have no illusion as to how this vote is going to come out. Let us not worry about that.

But let me say that a number of the members of the subcommittee were called by the Governor of California, Governor Brown, who, of course, along with the California delegation, is concerned about the impact a cut like this would have upon some particular installation in California, specifically the Jet Propulsion Laboratory in Pasadena. The Jet Propulsion Laboratory in Pasadena is run by Cal Tech, which is a great national asset and a great and magnificent technical engineering school.

Therefore, when the Governor of California calls and expresses his concern, we get concerned about the impact that cuts may have upon such things.

However, I do not think Cal Tech is going to fold up, nor will the Jet Propulsion Laboratory fold up because of this cut. The moneys being poured into JPL in fiscal year 1978 will come to around $130 million.

The Governor was also concerned about the deferral of $56.7 million for the fourth and fifth orbiters on the Space Shuttle, so the other body put in the $56.7 million, and we agreed to it in conference. We did not agree to the $20.7 million for the Jupiter orbiter probe.

In any event, Mr. Speaker, the Californians ought not to be too distressed. There is a considerable amount in this budget for the items that California is concerned about; and I just thought that perhaps the other Members of the House would like to know that.

Mr. BROWN of California. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. Yes; I am delighted to yield to the gentleman from California.

Mr. BROWN of California. Mr. Speaker, I want to pay tribute to the chairman of the subcommittee, the gentleman from Massachusetts (Mr. BOLAND). He has been generous with the space budget. He has been generous with California, but I want to assure him that in these funds there is money for Massachusetts also; and I hope that he will continue to fight for the full funding for Massachusetts.

Mr. BOLAND. Mr. Speaker, I can agree with the gentleman from California.

As a matter of fact, several institutions of higher learning in my area have been concerned. The phones have been ringing off the hook, because the whole scientific community gets together, and they say, "Let us help them on this one, because we will need help on the next one."

As a matter of fact, my understanding of the way NASA builds up its program for the future—and I would be delighted to be corrected if I am wrong—is that NASA circulates within the scientific community, gets in touch with all of the people in the astronomy field, and says, "What is the next logical step?" They build up support for the next logical step. They build up support for the future, and I have no objection to that except that I do think we ought to have some say in the matter.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from New York.

Mr. WEISS. Mr. Speaker, I appreciate the gentleman's yielding.

I just want to say that I think the entire House really owes a debt of gratitude to the chairman of the subcommittee, the distinguished gentleman from Massachusetts (Mr. BOLAND), and to the entire subcommittee.

It seems to me that for far too long we have more or less looked at what NASA has asked for and have said, "All right. If you ask for it, it is worth it."

It seems to me that it is a shocking thing for the gentleman from California (Mr. ROUSSELOT) to suggest that whatever NASA asks for ought to be granted automatically. I wish he was as concerned as the subcommittee chairman is about what is happening to people here as he is about what is happening on Jupiter.

Mr. WYDLER. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from New York.

Mr. WYDLER. Mr. Speaker, I also have the greatest respect for the gentleman from Massachusetts (Mr. BOLAND). However, I think he should consider one further fact. There is a priority in this request.

The SPEAKER pro tempore (Mr. MINETA). All time of the gentleman from Massachusetts (Mr. BOLAND) has expired.

The gentleman from Pennsylvania (Mr. COUGHLIN) has 8 minutes remaining.

Mr. COUGHLIN. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Massachusetts (Mr. BOLAND).

Mr. WYDLER. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from New York.

Mr. WYDLER. Mr. Speaker, as I was saying, there is a priority in this request. I think everybody should understand that NASA's budget has been reduced from its height by about 50 percent. It operates on pretty much of a steady budget figure and is held very tightly to it by OMB. Therefore, they have to come to the Congress for a certain degree of funding, and they have to make in-house decisions on what programs they are going to go ahead with.

Therefore, Mr. Speaker, I think that when they come in with a program like this, they have considered very carefully its priority in the order of things, and they have had to set certain programs aside so that they could ask for the funding for this program. Consequently, I do not think it is quite accurate to say that they more or less just ask for anything they want. I do not think that that is a fact at all. They are held very tightly to their budget restraints.

Mr. BOLAND. Mr. Speaker, let me interrupt the gentleman from New York (Mr. WYDLER).

I do not think that the decisions of NASA and the decisions agreed to by OMB with respect to some of the NASA programs are sacrosanct. I just happen to believe that the people who serve in this House and who serve on various committees should have something to say with respect to how some of these funds are spent. That is all we are asking here.

It is a very small start.

Let me repeat again, we have never denied or ever cut any major program out of the NASA budget, or asked them to really set priorities. That is all we are doing here. If we can do that, I think that we will have accomplished a great deal.

I believe perhaps we can get the scientific community—and I am talking about the people outside of NASA—to finally realize that this is not a bottomless pit; that there is an end to the flow of funds into programs that NASA has established or that the scientific community believes ought to be done which do not have sufficient priority.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the distinguished chairman of the subcommitee.

Mr. FUQUA. Mr. Speaker, I would like to make two points to my distinguished friend, the gentleman from Massachusetts (Mr. BOLAND) and that is that three committees out of four of the Congress, both authorizing committees of the House and Senate, have approved this as well as the Senate Appropriations Subcommittee. So three out of four have said that this is a worthwhile project that we should provide in the bill. We have had ongoing hearings for this project also.

The second point is priority. As has been pointed out several times, there is

an optimum time in which we must launch this probe.

Also, I believe that the benefits to this country and to the world, there are also international implications, will be of great significance and, therefore, we should move with the program at the most optimum time and at the most cost effective time.

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield 1 minute to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, I served on the Committee on Space and Technology for a period of time before I took a new assignment on a new committee and I was impressed with the work they had done and are doing, and particularly with the letter the gentleman from Texas (Mr. TEAGUE) wrote to me, and also the gentleman from Florida (Mr. FUQUA), both of whom have been so very interested in this particular program. I might add that this is the only NASA program for space exploration that we have had in several years and I believe it ought to be carried on, and I will support the program.

Mr. McDADE. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield such time as he may consume to the gentleman from Pennsylvania (Mr. McDADE).

Mr. McDADE. Mr. Speaker, would my chairman just reiterate a few of the deep space probes that NASA has conducted during the last 4 or 5 years?

Mr. BOLAND. Mr. Speaker, in response to the inquiry of the gentleman from Pennsylvania, let me say that I would like to do it but they are too numerous to detail right now. I have done this two or three times before.

I would like to know from any member of the Committee on Science and Technology, and I might point out that they are all here, if in the years that the Member who responds has been on that committee, whether or not that committee has ever eliminated any major project start by NASA?

Mr. WYDLER. Mr. Speaker, if the gentleman will yield, yes. The answer to that question is yes.

Mr. BOLAND. On what?

Mr. WYDLER. I will be glad to pick out one that I think the gentleman from Massachusetts (Mr. BOLAND) will recall, and that is the MOL, the Manned Orbiting Laboratory. That was a multibillion dollar program and our committee took that program out of the budget.

I would also be glad to give the gentleman a further illustration, since the gentleman asked that question, and that is that we had a request from NASA for a series of satellite ships and the committee turned it down.

I will give the gentleman a further illustration, if the gentleman will yield.

The SPEAKER pro tempore. The Chair will state that the gentleman from Pennsylvania (Mr. COUGHLIN) has control of the time.

Mr. McDADE. Mr. Speaker, will the gentleman yield further?

Mr. COUGHLIN. I yield further to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Speaker. I believe there was the so-called Grand Tour.

Mr. BOLAND. Yes, there was the so-called Grand Tour to Jupiter, Saturn, and Uranus. I would add that it was not even recommended by the OMB.

Do you know who put it in? The Science and Technology Committee. Do you know who took it out? We did.

Mr. McDADE. I just want to say further that there is about $4 billion left in this bill to do the good work that we all want to see NASA do. There is over $150 million, I believe, for the JPL, to continue work in that area.

Mr. LLOYD of California. Mr. Speaker, before we vote on the amendment to delete the Jupiter orbiter probe mission, I would like to point out some factors which should be considered in this decision.

As a member of the Science and Applications Subcommittee, I have considered possibly deleting this mission and have voted to authorize funds for this program. I had a second opportunity to review the mission when considering the NASA authorization in the joint House-Senate conference committee. Again, I supported the authorization of funds for this mission. The Senate has backed up the authorization with their approval of appropriations for the Jupiter orbiter probe, and the House should do the same.

To completely delete the project at this time would not only undermine the efforts of the authorizing and appropriating bodies in the Senate, as well as our own work in authorizing the program, but it would also be saying that our Nation has decided to abandon one of its greatest achievements—planetary exploration.

The United States has gained international prestige, as well as many practical benefits, from our exploration of the solar system. I think that we must consider the important discoveries that have been made as a result of space exploration before we deal this blow to the program. Our achievements in space have led to technological advances in such crucial areas as energy and energy conservation, innovations in medical care, aids for the handicapped, protecting the environment, transportation safety, and many other achievements that will aid our industrial productivity.

In addition, the Jet Propulsion Laboratory, NASA's prime center for exploring the planets, would be rendered ineffectual should we say no today. This center already stands to lose 200 highly skilled people by the end of this fiscal year. If the Jupiter Orbiter Probe mission does not begin this year, that laboratory stands to lose an additional 212 scientists and engineers, as well as 100 support personnel. Their loss would threaten our Nation's capability to organize missions and design aircraft for future missions.

It is the time to act in a strong and positive manner. We should restore funds for the Jupiter Orbiter Probe.

Mr. WINN. Mr. Speaker, I rise in opposition to amendment No. 24 to H.R. 7554 which would eliminate the Jupiter orbiter probe program. The technical merits of this program more than justify the expenditure of these funds. This probe, which will concentrate on the exploration of the Jupiter moons and its atmosphere, will allow our scientists to quantify and describe some very basic aspects of our universe. Armed with this knowledge, those same scientists may be able to unlock many of the secrets related to weather prediction and control and even energy sources. This potential of being able to improve our weather prediction capability is especially important to me. As a Representative from Kansas, where we average over 40 tornadoes a year, this is sufficient justification in itself.

The time for the program is right. A more optimum time will not occur in this century.

Another aspect that must be considered is the loss of a highly skilled and coordinated team of scientists at the Jet Propulsion Laboratory. Rejection of this program will result in disbanding and throwing to the wind the entire technological capability this Nation has for lunar and planetary exploration.

This program also represents some international aspects. Discussions have been held with the Federal Republic of Germany concerning them providing equipment for the Jupiter orbiter probe mission. These discussions will be concluded early in fiscal year 1978.

Mr. Speaker, any one of the aspects I have mentioned is sufficient to justify this expenditure. As a ranking minority member of the Space Science and Applications Subcommittee, I can testify to the unequivocal support that body and the full committee expressed for the Jupiter orbiter probe. In addition, the Senate Authorization and Appropriations Committees also supported this program. Consequently, I join my colleagues in support of the Jupiter orbiter probe and will vote against the amendment 24.

Mr. TEAGUE. Mr. Speaker, I rise in opposition to amendment No. 24 which has been reported in disagreement by the House and Senate conferees. The amendment which has been offered would prevent NASA from beginning the Jupiter Orbiter Probe program. Now many of you may ask—What earthly good can come from exploring the planet Jupiter? That is a fair question and one which those of us who favor continued planetary exploration should be prepared to answer.

I am told by many scientists that Jupiter represents a miniature "solar system" whose study will tell us much about our own planet and its place in the total solar system. Meteorologists believe studying Jupiter's giant storms and massive atmosphere should help us better understand and predict our own weather.

We have already learned much from planetary exploration which is helping to solve problems here on Earth. Here is what the record shows.

Some 12 years ago, Mariner 4 revealed that solar radiation played an important part in the weather on Mars. Until then, radiation had been regarded as negligible in our weather. Now radiation effects are added to our Earth weather models and improve the accuracy of our predictions.

A little later on, Mariner 9 orbited Mars and this data is helping to understanding scientific questions concerning the Earth's ozone layer. It is significant

that many of the leaders in the field of Earth atmospheric effects have attained their expertise in the study of the atmospheres of other planets. Without this expertise developed in the quest for new knowledge, we would have been ill-equipped to tackle the potential hazard of ozone depletion in the upper atmosphere.

Additionally, Pioneers 10 and 11 gave us photographic proof that the great red spot on Jupiter was a howling nonstop hurricane. Closeup observations by the Jupiter Orbiter Probe are needed to tell us more. Hurricanes wreak havoc on Earth; we need all the understanding that Jupiter can give us.

I have summarized the expected benefits and now we should ask: What will it cost? This 5-year program will only cost $1.50 per U.S. citizen. Additionally, economic studies reveal that for each dollar NASA spends, $7 are returned to the economy over a 10-year period.

I believe the benefits of this program are worth the cost and that it is important to maintain our leadership in planetary exploration. Just a year ago, this country achieved a most challenging technological endeavor in landing spacecraft on Mars. Are we to turn our backs on the expertise which has been developed or will we move forward building on what we already know? We have approved only one new planetary exploration program since 1972. It is important to support the Jupiter Orbiter Probe to continue our world leadership in planetary exploration.

Mr. DORNAN. Mr. Speaker, I would like to state the reason why I voted in opposition to amendment No: 24 to H.R. 7554 which would have eliminated the Jupiter Orbiter Probe program. The technical merits of this program more than justify the expenditure of these funds. This probe, which will concentrate on the exploration of the Jupiter moons and its atmosphere, will allow our scientists to quantify and describe some very basic aspect of our universe. Armed with this knowledge, those same scientists may be able to unlock many of the secrets related to weather prediction and control and even energy sources.

The time for this mission is now. This is not the type of program that can be delayed. If the appropriations are not available this year, it will be impossible to meet the 1982 launch opportunity. Another comparable opportunity will not occur in this century.

Another aspect that must be considered is the loss of a highly skilled and coordinated team of scientists at the Jet Propulsion Laboratory. Rejection of this program would result in disbanding and throwing to the wind the entire technological capability this Nation has for lunar and planetary exploration.

This program also represents some international aspects. Discussions have been held with the Federal Republic of Germany concerning them providing equipment for the Jupiter Orbiter Probe mission. These discussions will be concluded early in fiscal year 1978.

Mr. Speaker, any one of the aspects I have mentioned is sufficient to justify this expenditure. As a member of the House Science and Technology Committee, I can testify to the unequivocal support that body expressed for the Jupiter Orbiter Probe. In addition, the Senate Authorization and Appropriations Committees also supported this program. Consequently, I commend my colleagues who concurred with that support and voted against the amendment.

The SPEAKER pro tempore. All time has expired.

Mr. BOLAND. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Massachusetts (Mr. BOLAND).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. BOLAND. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 131, nays 280, not voting 22, as follows:

NOT VOTING—22

Badillo	Ertel	McKinney
Bolling	Fenwick	Marriott
Brademas	Flippo	Nolan
Burke, Mass.	Ford, Mich.	Seiberling
Clay	Holland	Teague
Dent	Horton	Trible
Dickinson	Howard	
Early	Koch	

The Clerk announced the following pairs:

On this vote:

Mr. Brademas for, with Mr. Teague against.

Mr. Koch for, with Mr. Ford of Michigan against.

Until further notice:

Mr. Badillo with Mrs. Fenwick.

Mr. Burke of Massachusetts with Mr. Horton.

Mr. Dent with Mr. McKinney.
Mr. Early with Mr. Marriott.
Mr. Ertel with Mr. Flippo.
Mr. Clay with Mr. Howard.
Mr. Nolan with Mr. Holland.
Mr. Selberling with Mr. Dickinson.

Messrs. RISENHOOVER, CORNWELL, WIRTH, and METCALFE changed their vote from "yea" to "nay."

Messrs. DELLUMS, STARK, QUIE, and Ms. HOLTZMAN changed their vote from "nay" to "yea."

So the motion was rejected.

The result of the vote was announced as above recorded.

MOTION OFFERED BY MR. FUQUA

Mr. FUQUA. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. FUQUA moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein.

The SPEAKER pro tempore. The gentleman from Florida (Mr. FUQUA) is recognized for 30 minutes, and the gentleman from Massachusetts (Mr. BOLAND) is recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the amendment which I propose is simple. It will resolve the disagreement between the House-Senate conference on the HUD-independent agencies bill with respect to NASA research and development funds by providing $17.7 million for the Jupiter Orbiter Probe. Both authorizing committees have approved the program. The Senate Appropriations Committee has approved the program. By this amendment the House would approve the Jupiter Orbiter program while not exceeding the Senate figure for NASA and, in fact, the total—$3,013,000,000—will be $13 million less than the NASA request for research and development for fiscal year 1978.

The strong merits of the Jupiter Orbiter Probe program have been thoroughly covered in earlier debates. I urge adoption of this amendment.

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, what the motion does is recede to the Senate amount for NASA which is $3,013,000,000. And, of course. it includes funding for the Jupiter Orbiter Probe. However, in receding to the Senate amount, I want to make it clear that the agreement reached in the conference report covering other items that were in contention with the Senate stands and must be adhered to by NASA.

Mr. FUQUA. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The motion was agreed to.

The SPEAKER pro tempore. The clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 28: Page 20, line 2, strike out all after "*Provided,*" down to and including "*further,*" in line 20.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 28 and concur therein with an amendment, as follows: Restores the matter stricken out by said amendment amended to read as follows: "That not more than $63,000,000 shall be available for Research Applied to National Needs: *Provided further,*".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 40: Page 30, strike out: lines 17 to 23, inclusive.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 40 and concur therein with an amendment, as follows: Restores the matter stricken out by said amendment amended to read as follows:

"No part of the foregoing appropriations shall be used for the adjudication of claims or the payment of benefits for any individual who was discharged from the military under less than honorable conditions, and who received an honorable or general discharge as the result of revised standards for review of discharges as implemented April 5, 1977, by the Department of Defense's special discharge review program."

The SPEAKER pro tempore. The gentlemen from Massachusetts (Mr. BOLAND) is recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. COUGHLIN) is recognized for 30 minutes.

The Chair recognizes the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, this is the so-called Beard of Tennessee amendment that was offered when the committee brought this bill to the floor on June 15.

Mr. Speaker, after a long and rather emotional debate, this provision was added to the bill at that time by a vote of 273 to 136. I opposed the provision at that time, and I must say that I oppose it now. However, the Senate conferees would not recede to the House position. Clearly, as the chairman of the House conferees, I felt an obligation not to recede to the other body.

I also did not feel that we were in a position to compromise, and consequently we brought this amendment back to the House in disagreement. We will let the House work its will on the motion.

Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, today we are going to discuss for the next hour the issue of the Beard amendment.

I would like to point out to my colleagues that a lot has happened in the House of Representatives and in the Senate since the Beard amendment was attached to this appropriation bill to prohibit the funds in this legislation from being used to pay for veterans' benefits for anyone who is upgraded under the President's special discharge review program.

First, both the House and the Senate have held extensive hearings on this important issue. One of the comments made by my colleague, the gentleman from Tennessee (Mr. BEARD), was that the House needed to act, and in fact the Committee on Veterans' Affairs held 4 days of extensive hearings, bringing before it the major veterans' organizations, Clifford Alexander, the Secretary of the Army, and several other witnesses to testify as to how the program is working.

Second, we have discovered that the legislation that is now before this House is not necessary at this point because the Senate and the House Veterans' Affairs Committee are about to act.

Third, we have a better understanding now of how the program is working.

What in fact the President did when he put forward his special discharge review program was to say that the present discharge review process was needlessly clogged with many veterans who would have received upgrades had they gone through the regular program. So he, as well as the Joint Chiefs of Staff and the Secretary of Defense, suggested that we dislodge that clogged program by setting forth six criteria.

Those six criteria are these:

First. If a veteran was wounded as a result of military action;

Second. Received a military decoration other than a service medal;

Third. Successfully completed an assignment in Southeast Asia or in the Western Pacific in support of operations in Southeast Asia;

Fourth. Completed alternative service or was excused from completion of alternative service under the clemency program instituted on September 16, 1974;

Fifth. Received an honorable discharge from a previous tour of military service; or

Sixth. Had a record of satisfactory active military service for 24 months prior to discharge.

In these instances he would receive an automatic upgrade of his discharge provided he did not fall within four compelling areas. There are four reasons why he should not be upgraded, and these four reasons are as follows:

First. His discharge was for desertion or absence in a combat zone;

Second. His discharge was based on an act of violence or violent conduct;

Third. His discharge was based on cowardice or misbehavior before the the enemy; or

Fourth. His discharge was based on an act or conduct that would be subject to criminal prosecution if it had taken place in a civilian environment.

Basically, Mr. Speaker, what we are dealing with is a program that in fact is dislodging the present system, a system that as been in place since 1944. We are talking about 17,000 or 18,000 veterans—which is estimate given by Secretary Alexander—who will be upgraded through the program in a 6-month period.

There have been exaggerated cost estimates of how much this is going to cost the Veterans' Administration.

Secretary Alexander indicated that the cost would be no more than $20 million,

the total cost for those who legitimately receive an upgrade.

Mr. Speaker, I hope that we will reverse the action of this House, and that we will today recognize that each of the committees is working. If they are already bringing forth legislation that makes sense before the House and if we can move through the regular process, there is no need to place this very destructive amendment in this bill at this time.

Finally, Mr. Speaker, I would mention that the chairman of this subcommittee, a chairman who has distinguished himself before this House many times, is opposed to this amendment, but he feels impelled to support it in conference because of the size of the vote on the House side.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. EDGAR) has expired.

Mr. BOLAND. Mr. Speaker, I yield 3 additional minutes to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. DOWNEY. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from New York.

Mr. DOWNEY. First of all, Mr. Speaker, I would like to compliment the gentleman from Pennsylvania (Mr. EDGAR) for the outstanding work he has done as a member of the Committee on Veterans' Affairs.

Is it not true that the other body has already taken this matter under consideration and that Senators CRANSTON and THURMOND have offered language that would, in a way, address some of the concerns of the gentleman from Tennessee (Mr. BEARD) with respect to the carte blanche granting of benefits in this instance?

Mr. EDGAR. That is true. The Senate Veterans' Affairs Committee has acted and has worked on the Cranston-Thurmond compromise; and as the gentleman well knows, there probably will be some compromise in this area soon.

I feel that the present system is working; but if, in fact, the legislative process is to work its will, we may have to agree to a suitable compromise.

Mr. DOWNEY. If the gentleman will yield further, I offered a compromise to the Committee on Veteran's Affairs which is similar to the Cranston-Thurmond language, to wit, that the veterans under this special program would have an opportunity to have their veterans' discharges reviewed, and the Department of Defense would retain the option of rereviewing those people for the purposes of determining whether or not they should receive veterans' benefits.

I did that in a spirit of compromise because I thought, considering the political climate in this House, that that was a viable alternative.

Can the gentleman suggest to me whether or not the Committee on Veterans' Affairs would possibly be reporting this or similar language out of its committee?

Mr. EDGAR. It is my understanding that the Committee on Veterans' Affairs, after 4 days of extensive hearings, is planning to mark up legislation introduced either by the gentleman from Arkansas (Mr. HAMMERSCHMIDT) or the gentleman from Mississippi (Mr. MONTGOMERY), which will be a compromise similar to the Cranston-Thurmond legislation.

Mr. DOWNEY. Therefore, there really is no need, then, for this broad language, when both Houses have already taken up this issue and are prepared to work out a compromise that is suitable to both sides; is that correct?

Mr. EDGAR. That is the point I am making here today, that a lot has taken place since we passed the Beard amendment. We need to back off from the Beard amendment, and we need to allow the committees to work.

Mr. DOWNEY. Mr. Speaker, I thank the gentleman. I compliment him for his outstanding work.

Mr. EDWARDS of California. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Speaker, I, too, want to compliment the gentleman for the work he has done on this important issue.

The Committee on Veterans' Affairs of the House of Representatives, of which I am a senior member, has been working very hard on this issue.

The Committee on Veterans' Affairs is the authorizing committee for legislation such as this, and in the other body Senator CRANSTON is the chairman of the Senate committee that has authorizing authority.

Mr. Speaker, as I recall, the gentleman from Tennessee (Mr. BEARD) offered his amendment in lieu of waiting for the two authorizing committees to come forward with their proposals. Now the authorizing committees are coming forward with their proposals, so I should think it would be unnecessary to have this very hard language of the Beard proposal in the appropriation bill.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. EDGAR) has expired.

Mr. BOLAND. Mr. Speaker, I yield 2 additional minutes to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I thank the gentleman for yielding.

I would like to compliment the gentleman from California (Mr. EDWARDS), who is a senior member of the Committee on Veterans' Affairs for his comments.

It is very true that we are at a point different from where we were when we passed the Beard amendment. We have had extensive hearings.

I placed in the CONGRESSIONAL RECORD on Friday, July 1, a group of profiles provided to me by Colonel Webber, one of the persons who testified before our committee, and who is responsible for the discharge review process. He indicates in his profiles the kind of young people we are dealing with.

There also appeared before our committee Mr. Addlestone, who put together a report of the kinds of individuals being affected.

I took the liberty of placing that in the CONGRESSIONAL RECORD on June 16.

Mr. Speaker, we are trying to provide a forum whereby all of the issues could be dealt with in a logical way. They were dealt with in a logical way, and I expect that the committee will work its will and will bring forth legislation. Although it will, perhaps, be legislation that I will not agree with because I believe that the President's discharge review program is working.

I think it is really detrimental to the legislative process to support the Beard amendment.

Mr. EDWARDS of California. Mr. Speaker, will the gentleman yield further?

Mr. EDGAR. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Speaker, I would hope that the ordinary day to day legislative process of the House of Representatives and of the Senate will continue.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding to me. I would point out that I too was one of those Members who voted in favor of the Beard amendment before when it was on the floor of the House, but it was done under rather impassioned rhetoric and was not a very reasoned vote, I do not believe, in retrospect. So I would hope that the Members would be able to change their minds also and vote against the amendment.

Mr. EDGAR. Mr. Speaker, I thank the gentleman from Kansas (Mr. GLICKMAN) for his comments.

Mr. COUGHLIN. Mr. Speaker, I yield 4 minutes to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I rise in support of the Beard amendment.

Mr. Speaker, I have the privilege of serving on the special committee looking into the upgrading of discharges in order to provide those veterans with benefits. I would also like to say, Mr. Speaker, that I had the privilege of chairing, as the gentleman from Pennsylvania (Mr. EDGAR) knows, those 4 days of hearings, and I still support the Beard amendment.

In effect, what the Beard amendment does—and if I say it wrong, I hope the gentleman from Tennessee will correct me—it says that no funds can be spent in fiscal year 1978 on discharges that have been upgraded by the Carter program for veterans benefits unless they go through the normal procedure.

We have had a procedure in the Defense Department for a number of years where less than honorable discharges were looked at by appointed boards in the Defense Department, if they were upgraded, then they became eligible for veterans benefits, but it was done on a case-by-case basis in the Veterans' Administration.

What we are doing in this special subcommittee—and the gentleman from Pennsylvania (Mr. EDGAR) is correct, we will meet on July 28, and we hope we can come up with a bill in the Veterans' Affairs Committee basically the same as the Cranston-Thurmond bill, and maybe we will have an additional amendment which will say, in effect, that discharges

under the Carter program that have been upgraded from less than honorable, will be taken up case by case by the administrator of the veterans programs and if he thinks that these people are eligible for veterans benefits, then they will be given benefits.

So we are basically doing the same thing under the Beard amendment today, if we keep the language in that no veterans will be given these benefits unless it is handled on a case-by-case basis.

So I do hope we will support the Beard amendment. We will bring out this legislation, I hope, before the 1st of October, and they will be handled on a case-by-case basis.

We found out in these hearings that the Department of Defense was paying for a deserter to come back from Sweden, who went to the Embassy in Sweden and said he did not have any money to get back. So this deserter, who had been gone for a year and a half, was given a ticket by our taxpayers to come back from Sweden and apply for the upgrading of his discharge under the Carter proposal.

So I believe we are moving too quickly in this situation. The Beard amendment will work now and will give us time to come up with legislation.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

I think the gentleman makes an interesting point that the authorizing committee is going to meet on the 28th of July and is going to look at legislation which may have one or two or three or four amendments. The language that we are looking at, the amendment offered by the gentleman from Massachusetts (Mr. BOLAND) which he does not support, says, "No part of the foregoing appropriations shall be used for the adjudication of claims or the payment of benefits for any individual who was discharged from the military under less than honorable conditions, and who received an honorable or general discharge as the result of revised standards for review of discharges as implemented April 5, 1977, by the Department of Defense's Special Discharge Review Program."

Mr. MONTGOMERY. One of the problems we have, if the gentleman will let me take back part of my time, is that we have no assurance if we pass this enabling legislation that the President will not veto the bill. So we have that danger, that President Carter would veto this legislation.

Mr. EDGAR. If the gentleman will yield further, the point I was going to make is that if the committee comes out with a program that does provide the Veterans' Administrator the opportunity on a case-by-case basis to give benefits to anyone upgraded by the President's special program, he will be ineligible if this amendment succeeds.

I think if the authorizing committee is going to work its will, then it has got to have the latitude during the following year to grant benefits to those persons who may be wounded in action.

Mr. MONTGOMERY. This is a matter of opinion. I think the Beard Amendment basically does the same thing as legislation we will hope to pass. If President Carter vetoes this legislation, then the gentleman will admit that we made a mistake by not adopting the Beard amendment; is that correct?

Mr. EDGAR. No.

Mr. BOLAND. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Pennsylvania (Mr. MURTHA).

Mr. MURTHA. Mr. Speaker, right after I spoke on the floor about this amendment the last time, I went back to my office, and there was a fellow who was a platoon leader in Vietnam. He said,

I appreciate very much the comments that you made on the floor about the Vietnam veteran, and I agree with you completely.

The next day I had lunch with a platoon leader that I served with in Vietnam, and he agreed with my position—we felt that this upgrading program of the President's was working and that it was important and that the Vietnam war was different from World War II or Korea.

I received an extensive letter from a Dr. Charles R. Figley of Purdue University who heads a "consortium of veterans' studies," which includes a list of eminent medical doctors and Ph. D.'s. They have done an extensive study of the psychological readjustment of the Vietnam veteran. They feel that there were significant problems when the Vietnam veterans came back. I know that it is hard to convince some members of World War II who were in the war and saw the devastation of the war that there was a difference when these young men came back.

I know the distinguished gentleman from Mississippi has a reservation about whether there was a difference when the young men came back from this war, but this study reaffirms the position that I took several weeks ago. This study says there were several factors that were very important in their study. One is that the men who served were much younger in the Vietnam war. For instance, some of our distinguished Members volunteered at a much older age. The gentleman from Oklahoma (Mr. STEED) was 38 years old when he went into the service as a private. Many other distinguished Members of this Congress volunteered in World War II at an older age and went into the service and then came back at the same time as all the others after the war was over. The scenario in the Vietnam war was very different. These men came back individually. They came back from a war area where they saw people bombed and killed and found death each day.

Many did not have friends and buddies to talk to. Instead, in many cases they talked to people who did not serve.

As I brought out before the committee the gentleman from Mississippi chaired, only about one-third of the eligible men between 18 and 35, the people who were eligible for the draft, actually served in the Armed Forces. We have people who evaded the draft and those people got blanket amnesty. I do not think there is anybody in this Chamber who can agree that it is right to give amnesty to an individual who did not even serve and then to resist upgrading the discharge and giving those young fellows benefits because they want to go to school and correct their life.

There was one story I told the last time which I think is so important, the story of the young fellow who served in Vietnam and came back, served honorably, was wounded, was in the hospital, and his father was dying of cancer, and the young fellow went home and just never went back to the service for the last 30 days. He was finally picked up and got an undesirable discharge several years later.

It seems to me we have a double standard in this country when we give blanket amnesty to people who did not even serve and yet refuse to give benefits to people who were upgraded and who served honorably under the criteria of the President's program.

I know this. We have some of the most distinguished people in the country on this Veterans' Affairs Committee. I know they are studying this problem very carefully. I would ask that this House recede from its position and that we would allow the Veterans' Affairs Committee, which has had 4 days of extensive hearings, to expand these hearings and ask people who served to come in and ask people like Dr. Charles R. Figley, who has had such extensive experience with veterans who are trying to adjust psychologically, to come in, and have the committee go into detail to find out exactly what can be done.

Mr. TRAXLER. Mr. Speaker, will the gentleman yield?

Mr. MURTHA. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Speaker, I know the very fine military record the gentleman in the well has. He is the only Vietnamese veteran who saw combat experience who is serving presently in this House, if I understand the record correctly. I must say to the gentleman my views differ from his, but as I listen to him describe the present situation, I have to decide to go along and support the gentleman. I hope the committee will bring up a bill to take care of the problems the gentleman and I are aware of.

For various reasons some of the veterans have less than an honorable discharge and this amendment could harm them. I do not want to hurt these men. I hope we proceed in an orderly fashion and allow the legislative committee to do its work, and we will attend to a problem many of us recognize, and at the same time treat fairly the problem the gentleman is so well aware of.

I support the case-by-case approach and support the position of the gentleman from Pennsylvania. I appeal to my colleagues not to vote the way the press will write this up but to vote the way we know it is and support the gentleman.

Mr. MURTHA. I appreciate the comments of the gentleman. I would say one thing. Even the American Legion in the letter they sent to the Members of Congress were very, very reasonable in the letter they wrote—in other words, they do not agree with the program and since this is the only vehicle before Congress, then they endorse the amendment. But

they certainly, and I am sure everybody here would have to agree, the better way of doing it would be by the Veterans Committee handling this and having an opportunity to speak to fellows like Dr. Figley from Purdue that has had such extensive experience in this particular field.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. MURTHA. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, I appreciate the gentleman yielding.

I have great respect for the gentleman in the well, as he knows, and I know all about his experiences in Vietnam and the great service he did for this country.

I think the gentleman and I basically are on the same track. We ran into each other the last time and I wish maybe we could go parallel this time.

Mr. Speaker, I wish we could maybe go parallel to them. The gentleman speaks the language I like to hear about a draft evader. The gentleman felt very strongly that person should not be given a blanket pardon; is that correct?

Mr. MURTHA. That is correct and I voted against the funds for that particular program.

Mr. MONTGOMERY. In the case the gentleman mentioned, the person who had a fine combat record.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania has again expired.

Mr. BOLAND. Mr. Speaker, I yield 2 additional minutes to the gentleman from Pennsylvania.

Mr. MONTGOMERY. Mr. Speaker, if the gentleman will yield further, this person had a fine combat record in Vietnam. He came home and got in trouble. His father was sick. That is understandable. My point is that under the present procedure that we have in the Pentagon for upgrading discharges, this person, in my opinion, would have had his discharge upgraded and he would have been eligible for veterans' benefits: so really, I do not think we are too far apart; does not the gentleman agree?

Mr. MURTHA. Mr. Speaker, let me say to the distinguished gentleman, I am embarrassed by the fact that I am pointed out as the only combat veteran from Vietnam. We do have one other, the gentleman from Tennessee (Mr. GORE); but the point is that we have many combat veterans who served under war conditions and I know the gentleman speaking is one of the distinguished Members; but it seems to me that the way we should do it is by the committee.

There is a tremendous difference when a young 22-year-old came home, with violence on TV, with unrest, with leaders condemning the war which he had just been facing and he comes home, not to his friends, not to victory, but to actual defeat and we can see he needs some sort of help.

Mr. MONTGOMERY. Mr. Speaker, if the gentleman will yield further, under the Carter proposal an individual who was a.w.o.l. for 2,300 days, will be eligible for veterans' benefits.

Mr. MURTHA. Mr. Speaker, let me say to the gentleman that the individual I was talking about was a.w.o.l. for an extended period of time, because they did not catch up with him until the end.

I understand there are individual cases that would not fit into the program, but it seems to me that we must give some consideration to the people who served.

I would urge this House to reconsider its position on this very important amendment.

Mr. Speaker, I include Dr. Figley's letter and an article which appeared in the Chalotte Observer at this point in the RECORD.

CONSORTIUM ON VETERAN STUDIES,
June 21, 1977.

Hon. JOHN P. MURTHA,
Representative from the State of Pennsylvania, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN MURTHA: On behalf of the Consortium on Veterans Studies I would like to commend you on your speech made on the House floor on June 15th on behalf of the veterans of the Vietnam war.

Enclosed are some materials which support your contention that Vietnam was a different war and that the Vietnam veteran is unique in American history. Please let me know what the Consortium and I can do to assist you in any way. I have already written Rep. Don Edwards in support of a bill he introduced on psychological readjustment.

I would appreciate a copy of your remarks and any other items related to the Vietnam veteran.

Thank you again for your service, your faith, and your devotion.

Sincerely,

CHARLES R. FIGLEY, Ph.D.,
Director.

[From The Charlotte Observer, May 29, 1977]

THE INVISIBLE WOUND

Tomorrow is Memorial Day. For more than half a century, it's been a special day when Americans honor their war veterans, the fallen in combat. Parades and flag waving . . . a time for remembering. Argonne Forest, Battle of the Bulge, Iwo Jima fade into names like Hue and Khe Sanh.

Vietnam. A war many Americans opposed, a war they've tried to forget. But the scars cut deep, into a nation and its young. That alone, that they fought an unwanted war, makes Vietnam veterans unique . . .

(By Penny Muse)

They jauntily stepped off the commercial jets that lofted them over the Pacific and back to America. They had survived a year in Vietnam's perilous jungles and highlands without any visible scars.

Or so they thought.

Then the nightmares began.

At night when they closed their eyes. Gunfire. Blood. The contorted face of a friend, yelling as he fell, "I'm hit. I'm hit."

Stark memories for those so young, many still in their waning days of adolescence. The war was over, and yet, they were dogged by an enemy they couldn't escape, a war they couldn't forget.

"The mine that sent me home has blown a thousand times in my mind," said soft-spoken Rudy Dye as he sat on the edge of the bed in the Salisbury (N.C.) Veterans Administration Hospital, where he is undergoing tests for a limp. "And my five friends, who were blown up two weeks before I got hit. I've seen them die over and over again."

Drafted at 22, Dye was sent to a world far removed from the Taylorsville, N.C., textile mill he worked in after graduating from high school. "You knew," he remembers, visibly agitated, "it was just a matter of time before you went down." Dye went down at Chu Lai with a shattered leg. That was in 1967.

In the hospital at Fort Gordon, Ga., where he was sent to recuperate, Dye found insulation from a nation in racial turmoil—Watts, Detroit and other U.S. cities were burning.

Dye also found companionship. "Most of the guys there had been to Vietnam. They understood what it was like, how when you return it feels like you're so free, but in your mind, you're still there at war. We'd talk about our dreams and in time we learned to joke about what we'd seen."

Today, the 32-year-old Dye, who is married and works on the assembly line at the General Electric plant in Hickory, is rarely haunted by his Vietnam memories. "I always was an easy-going guy," he says with a shrug.

But even now, "Sometimes when I've talked about the war during the day, the dreams will come back. Once you've lived through something like that, you're never the same, deep down inside."

Dye has made his own peace with Vietnam. But other veterans haven't been so fortunate.

The war may have ended for most Americans more than five years ago, but as many as 2 million of the 10 million veterans who served in that decade-long war are still nursing emotional wounds.

In World War I psychologists called it "shell shock," in World II, "combat fatigue." Today it's "post-Vietnam syndrome."

But few Americans know of its symptoms, or apparently care, and psychologists like Dr. Charles Figley are worried that the emotionally scarred Vietnam veteran still in need of help may be forgotten.

So from his office in Purdue University's child development and family studies department, Figley is organizing a one-hour symposium on Vietnam veterans to be presented in August at the American Psychological Association's annual meeting in San Francisco.

A Vietnam veteran who, like Dye, was haunted by combat nightmares for more than a year after he came home in 1966, the 32-year-old Figley seems the perfect candidate for such a mission.

His main concern isn't so much with severely disturbed veterans—most of whom have gotten help, he believes—but with "the million or so people who seem, normal but still have nightmares and are afraid to admit it for fear people will think they're crazy."

Dr. Charles Stenger, associate director of psychology with the Veterans Administration (VA) in Washington, D.C., believes as many as 20 per cent of Vietnam's veterans need counseling.

"But when I say as many as one in five veterans need psychological counseling, I don't mean all of these people are psychotic," he cautions. "Most of the people don't need formal psychological help. What they need is a kind of rap session."—where they can talk with other Vietnam veterans, admit their nightmares without fear of being looked on as strange.

"The problem now is that you have to be diagnosed as psychotic or psychologically ill before you can receive care at a VA hospital."

As a result, only 87,000 (or less than 1 per cent) of 10 million Vietnam era veterans receive psychiatric care at the country's 70 VA hospitals.

In the Carolinas about 100 of 264,000 veterans receive psychiatric care at the states' seven hospitals. About 65 of the patients are at the Salisbury Veterans Administration Hospital (about 50 miles east of Charlotte), which is primarily a psychiatric hospital.

Who is most likely to have been scarred by the war?

"People who have difficulty adjusting to traumatic changes," answers Stenger. "Most people can go through change—like being in a combat zone for a year—and then you put

them back in their old environment, and they begin to respond in the same ways.

"But in order to readjust completely, you have to like your old environment, to have felt comfortable with it before you were uprooted and sent off to join the military."

Not surprisingly, Figley, who has completed a study of 900 Vietnam veterans, finds that people who saw heavy combat are more likely to be scarred permanently by war than those who didn't "because they were under a great deal more stress."

But other psychologists are quick to point that even Vietnam veterans who didn't see combat also have had difficulty readjusting to a civilian world that "despised them for fighting in a dirty war," as Dr. C. E. McParland, a psychologist at the Salisbury Veterans Hospital, puts it. "Even their friends, their peers, looked on them with distrust."

THE DIFFERENCE

Unlike World War I and World War II veterans who came home in glory, Vietnam veterans come home in ignominy. And this, say psychologists, makes them unique among veterans of other American wars.

Just how unique?

Psychologists can't seem to agree.

Various studies and theories during the past few years have held that the Vietnam veteran is unique because:

He is more likely than the World War II veteran to have become addicted to drugs.

However, a study by Dr. Lee Robbins of Washington University in St. Louis shows that the drug problem may not have been as severe as expected. Many soldiers became addicted simply because drugs were readily available. In a more normal environment, they have kicked their addiction, she says.

Unfortunately, Dr. Stenger of the Veterans Administration points out, even Vietnam veterans who never used drugs still have to live down the reputation. "It's guilt by association."

He tended to be younger than veterans of World War I and II. Uprooting young men at 19 and 20, when they were forming their adult personalities, considerably complicates their adjustment back to the "real world," according to initial findings of a study of 300 Ohio veterans by Cleveland State University.

He lacked the camraderie that many World War II veterans enjoyed after their return from combat. According to the same Cleveland State study, World War II veterans returned to America with their units, while Vietnam veterans came back individually. World War II veterans debriefed themselves, talked out their problems with friends who also had been in combat and understood. The Vietnam veteran returned to friends and family who didn't understand or care about combat.

He is more violent than most people. This is perhaps the most controversial theory. A couple of recent studies have debunked this as myth. "But despite such studies, television still portrays the Vietnam veteran as a walking time bomb. This sets the veteran apart and makes it hard for society to accept him as a normal human being," says Dr. McParland.

He is more likely than veterans of other wars to be racially prejudiced. Racial tension at home spilled onto the battlefield where soldiers already under stress found it difficult to deal rationally with the problem. Five years after they have returned, many soldiers still haven't resolved their prejudices, according to the Cleveland State study.

He returned to an "extremely fast-moving" society. Growth was swift during World War II but much swifter during the 1960s. So while only 10 percent of the returning World War II veterans needed psychological counseling, between 13 and 20 percent of Vietnam's veterans need it, according to Stenger.

Dr. L. B. Lamm, chief of psychiatry services at the Salisbury VA Hospital, minimizes the uniqueness of the Vietnam veteran. "As the years go by, we are learning that in general, the needs of the Vietnam veteran are not greatly different from the World War I and II veteran. Whenever you return from combat, you face unusual stress adjusting to new times, climates and life in the civilian world."

IGNORED?

But this attitude, predominant at many VA hospitals, can hamper treatment of the Vietnam veteran, contends Dr. Leonard Neff, a psychiatrist who practiced for three years at a VA hospital in Los Angeles.

"The diagnosis of 'combat fatigue' was taken out of the diagnostic book used by VA psychiatrists (and by members of the American Psychological Association) during the 1960s. This made it awfully easy to ignore the problem," he says.

"A diagnosis of combat stress is being put back in the book being published now and this is perhaps a hopeful sign."

It's easy to make the VA the scapegoat, says Figley, "but to a degree the VA isn't any more to blame than the rest of us. It's at the mercy of the law. It depends on congressional legislation to offer most of what is needed."

What exactly is needed?

Most important, says Figley and Stenger, money for the VA to offer "transitional counseling," or "rap sessions" to Vietnam veterans. Money for such counseling was cut last year when the Veterans' Omibus Health Care Act was passed. However, Sen. Alan Cranston, D-Calif., plans to introduce it again.

The VA needs to offer similar counseling to the veteran's family, they add. Currently, such counseling can only be given when a veteran is admitted to a VA hospital.

More research is needed. "There have been very few studies on the long term effects of the war," says Figley. "Right now it's easier to get money and attention for a research project on the eye-blink behavior of 3-year-olds than for a study on Vietnam veterans."

And, says Figley. "Everyone from the president down needs to realize that soldiers were wounded emotionally as well as physically by the war. The Vietnam veteran isn't going to simply fade away if we ignore him. Until everyone has recovered the war isn't over."

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to the gentleman from Tennessee (Mr. BEARD).

Mr. BEARD of Tennessee. Mr. Speaker, there has been much said about the amendment and a lot of emotion has been interjected into the debate, emotion that I believe I am not totally deprived of. My distinguished colleague whom I respect very highly, a former Marine from Pennsylvania. stated there should have been a better way of handling this through the legislative process. I find myself in total agreement with my colleague, the gentleman from Pennsylvania. There should have been a better way to handle this. It should have been handled through the legislative process.

I think it is tragic that I had to interrupt the legislative process with an amendment to bring it back to the legislative process.

I find it somewhat offensive, or let me say that I find it somewhat irresponsible to come out with such a significant program by the President, without even having notified or having gone over the plans with the Committee on Veterans' Affairs. I question this whole process. I cannot agree with it.

We can say we are dealing with quite a bit of money; but I do not look at it that way. We are dealing with young men's lives, without any question, and their futures.

The gentleman mentioned the former Vietnam veterans that said, "Thank you for your support and the way you voted."

Let me say, my office has received hundreds of letters and responses from individuals saying "thank you," because I served my time in an honorable fashion. I was over in Vietnam. I did walk through those paddies. I was shot at. I was wounded. I find it somewhat offensive for so many young men to be thrown into a whole group and really, for all practical purposes, automatically have their discharges upgraded and start to receive the same benefits that I received for being in combat.

Mr. Speaker, we tend to forget, and I do not think it is so unreasonable, but we tend to forget that this amendment does not deal totally with the young men that were over there and placed their lives on the line.

As a matter of fact, the figures show that approximately 80 percent of these young men, who would be upgraded and who would receive veterans benefits, never even saw Vietnam.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. BEARD of Tennessee. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Is it not also true that the 80 percent figure the gentleman is using also relates to the number of veterans who were in the service? The fact is that only 2.5 million veterans saw action in Vietnam, and the rest of the veterans who are receiving benefits did not spend any time in Vietnam.

Mr. BEARD of Tennessee. I will reclaim my time. I can play with numbers also. I can play with graphs and charts, but the fact of the matter is that over 80 percent of the young men eligible for upgrading—my amendment does not even approach the upgrading of discharges; it does not touch it. They can still be upgraded.

My amendment says, no veterans' benefits on the automatic upgrading. My amendment is a temporary restraining order until we do have authorization legislation from the veterans' committees of both the House and the Senate.

We can say that the Senate has made a great deal of progress, that the House has made a great deal of progress, but show it to me in black and white. Show it to me in the form of a bill. As a matter of fact, there is a hold at this particular time in the Senate, and it has been so rumored that there has been an instruction by the White House because they are looking at this vote today to decide on whether or not they will have enough votes to veto the Roberts-Hammerschmidt bill on the House side or the Cranston-Thurmond bill on the Senate side. So, it is not there yet.

I do not understand, for all the people that stand and talk about the legitimacy of these pieces of legislation, I do not understand why we are so impatient or so eager to eliminate any back-up position until these bills actually be-

come enacted legislation. Why not? To me, this will say to President Carter, "You had better accept the Cranston-Thurmond bill; you had better accept the House bill." But, if my amendment were to go down, then there is nothing that would keep the President from vetoing the Senate and House bills.

Mr. BOLAND. Mr. Speaker, I yield myself such time as I may require. I do not want to cut off debate on this, but we discussed this at considerable length in the middle of June.

Mr. BEARD of Tennessee. Mr. Speaker, will the gentleman yield for one comment?

Mr. BOLAND. I yield.

Mr. BEARD of Tennessee. I would like to say at this time how greatly appreciative I have been of the relationship with the chairman of this committee, with his straightforward attitude. I do commend the chairman of the committee, knowing of his opposition to my amendment. It has been an honor to work with him because he has been aboveboard and straightforward with me in every way. I commend the chairman.

Mr. BOLAND. I thank the gentleman.

Mr. MURTHA. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Pennsylvania.

Mr. MURTHA. Mr. Speaker, I would like to make just one point. As the gentleman says, many of these people did not serve in Vietnam, but it is important to say that they served. That is my point. They had blanket amnesty, people who evaded the draft, and here we have a program for people who served honorably under certain criteria. Certainly, in many instances they should receive benefits if they are upgraded.

Mr. BEARD of Tennessee. I will say that two wrongs do not make a right. I think it is time this country started living by rules. We have got rules, and we ought to live by them. I think the House should start showing that this is the direction we need to go in.

Mr. COUGHLIN. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. JOHN T. MYERS).

Mr. JOHN T. MYERS. In response to the remarks of the gentleman from Pennsylvania, we had some disagreement or misunderstanding the last time this issue was discussed. The upgrades continue. This amendment does not stop the upgrading of discharges. The only thing we do, by this amendment, if an individual is going to qualify under this amendment, they must qualify for the benefits by going individually before the board.

At that particular time each individual case is evaluated. So the veteran upgraded must pass one more test, which I think is altogether fair. I am sure none of us can know what the authorizing committee will come up with. But in any event, in the interim period, until they do come up with something, this requirement to earn benefits on an individual basis will stand. They have to come up individually. What is wrong with that?

I think we will agree that, yes, if they can justify, if they can warrant the benefits, the Appeals Board will grant that, and they could be qualified under this amendment, but they would earn the benefits on an individual basis rather than the blanket grant.

Mr. TRAXLER. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Michigan.

Mr. TRAXLER. I thank the gentleman for yielding.

Mr. Speaker, I just want to say to the Members that what we have here is about $600 million or $700 million which is already in the pipeline that this amendment does not even touch. In other words, with the upgrading system, those persons who receive it are going to be eligible for benefits in spite of this amendment and until that money runs out, $600 to $700 million. We ought to have a case-by-case opportunity for them to be reviewed, so that a great injustice is not done to the deserving.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. I thank the gentleman for yielding.

Mr. Speaker, first of all, in response to the comments of the gentleman from Tennessee (Mr. BEARD) about statistics, I just want to clarify that there were 8 million people who served during the Vietnam era. Only 2.5 million of those served in action in Vietnam itself. I think the 80-percent figure the gentleman is quoting is misleading.

The second point is that one of the problems the President faced when he took office was that the regular discharge review process was very clogged because during the Vietnam era most of the people were discharged from the service under an administrative process, not a court-martial process. The regular program takes 2 years for a case-by-case review. We are suggesting that those who fit within the six criteria will be automatically upgraded and that the others, who do not fall within that regular criteria, are looked at on a case-by-case review. It is not a blanket amnesty or a blanket pardon. It is a review of each individual case, unless they have some experience which gives them an automatic upgrade.

Mr. RISENHOOVER. Mr. Speaker, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Oklahoma (Mr. RISENHOOVER).

Mr. RISENHOOVER. I thank the gentleman for yielding.

Mr. Speaker, I would like to ask the gentleman from Tennessee (Mr. BEARD) a question concerning the gentleman's amendment.

Do I understand correctly that after the authorizing Committee on Veterans' Affairs comes forth with the legislation, the gentleman's amendment simply stops expenditure of these funds until the action is taken by the authorizing committee, by the House and the Senate? Is that correct?

Mr. BEARD of Tennessee. If the gentleman will yield, I am so instructed that if they would amend the wording of this amendment, then their language would take precedence.

Mr. BOLAND. If the gentleman will yield, I am sure the authorizing committee would probably put in the caveat notwithstanding any other act or provision of law.

Mr. RISENHOOVER. If I understand correctly, what the amendment does is just force the issue. I am not opposed to upgrading discharges, but I think we should bring this to a head and decide who is going to be upgraded and who is not.

Mr. BEARD of Tennessee. If the gentleman will yield, as I said, I think it forces the issue. I think we have seen a great deal more activity on the Senate side and on the House side than we possibly would have otherwise.

Mr. RISENHOOVER. I think something ought to bring this whole thing of blanket amnesty and blanket pardon for not only the people who went AWOL and deserted, but for those people who, like the gentleman from Pennsylvania said, just completely disregarded the draft altogether, the whole thing ought to be brought to a head. If this is the only vehicle which can bring it to a head and bring it before the President, I think this is what we ought to do.

Mr. BEARD of Tennessee. At present this is the only vehicle.

Mr. BOLAND. Mr. Speaker, so that there will be no confusion on the part of the membership of the House, let me state precisely what my motion is.

My motion is that the House recede from its disagreement to the amendment of the Senate numbered 40, which struck out the Beard amendment. But then my motion goes on to say: "and concur therein with an amendment as follows:".

The amendment that follows is precisely the Beard amendment, except that we change the word, "appropriation," to "appropriations."

So that there will be no confusion, those who favor the Beard amendment will vote yes for this amendment, those who oppose the Beard amendment will vote no, and the chairman of the subcommittee intends to vote no.

Mr. OTTINGER. Mr. Speaker, I am opposing the Beard amendment today because I think it is poorly and too broadly drawn, despite my strong conviction that persons who did not do substantial Vietnam service or who deserted under circumstances that might have jeopardized others on the battlefield, or for whom there are no overriding mitigating circumstances, should not receive veterans benefits.

The problem with the Beard amendment is that it denies veterans benefits to all persons whose discharges are upgraded under the President's review program, regardless of the circumstances. According to Congressman BEARD's own statement as appeared in his letter to the editor of The Washington Post of June 27, 1977, 60 percent of those who did combat or combat support duty in Vietnam and are subject to the discharge review program were not deserters; half of the persons whose discharges have been reviewed would have received upgraded discharges under normal procedures, without the President's program. What this means is that there are a lot

of people being considered under the President's program with substantial service to their country in Vietnam, who were discharged because of fights, drunkenness or other problems and whose discharges would have been upgraded under normal procedures, who would be unfairly deprived of benefits under the Beard amendment.

The Veterans' Affairs Committee is presently considering legislation to deal in an orderly manner with this precise question of veterans benefits for those whose discharges are upgraded under the President's program. It is wrong, I believe, to deal with this question simplistically, as the Beard amendment does, in an amendment attached at the last minute and without hearings to an appropriations bill.

I am a cosponsor of one of the bills on this subject being considered by the Veterans' Affairs Committee, H.R. 7885, authored by Congressman JOHN PAUL HAMMERSCHMIDT of Arkansas, which requires the Special Discharge Review Board to make two separate determinations: first, whether a discharge should be upgraded under the special discharge criteria, and second, whether the discharge would have been upgraded under generally applicable criteria and whether it is appropriate that the applicant receive veterans' benefits. This approach has many positive aspects. It allows a person to "clear his name" by having his discharge upgraded under the President's criteria. At the same time, it preserves existing standards with regard to veterans' benefits entitlements.

I feel strongly that the all-encompassing broad brush of the Beard amendment sweeps away the rights of too many deserving veterans, and that the Veterans' Affairs Committee should be allowed the opportunity to report out the Hammerschmidt bill or other legislation that will deal with this matter more equitably—denying benefits to those who are undeserving, but permitting them to those who served their country and whose discharges were unjustified or unrelated to the benefits question.

Mr. BOLAND. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Massachusetts (Mr. BOLAND).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. BEARD of Tennessee. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 251, nays 160, not voting 22, as follows:

[Roll No. 435]

NOT VOTING—22

Badillo	Flippo	Rahall
Brademas	Goldwater	Staggers
Burke, Mass.	Holland	Stockman
Clay	Horton	Teague
Davis	Howard	Wilson, C. H.
Dent	Koch	Young, Alaska
Dickinson	McKinney	
Ertel	Madigan	

The Clerk announced the following pairs:

On this vote:

Mr. Rahall for, with Mr. Burke of Massachusetts against.

Mr. Davis for, with Mr. Brademas against.

Mr. Dickinson for, with Mr. Badillo against.

Mr. Young of Alaska for, with Mr. Koch against.

Mr. Teague for, with Mr. Clay against.

Mr. Horton for, with Mr. Howard against.

Until further notice:

Mr. Dent with Mr. Ertel.

Mr. Flippo with Mr. Goldwater.

Mr. Madigan with Mr. Holland.

Mr. Staggers with Mr. McKinney.

Mr. Charles H. Wilson of California with Mr. Stockman.

Mr. EARLY changed his vote from "yea" to "nay."

Mr. ROSE changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 45: Page 39, after line 10, insert:

"SEC. 408. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of a consultant (wheher retained by the Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law."

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of

the Senate numbered 45 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment insert:

"SEC. 409. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of a consultant (whether retained by the Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS–18, unless specifically authorized by law."

The motion was agreed to.

The SPEAKER. The Clerk will report the last amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 46: Page 39, after line 16, insert:

"SEC. 409. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitations."

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BOLAND moves that the House recede from its disagreement to the amendment of the Senate numbered 46 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment insert:

"SEC. 410. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitations."

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

GENERAL LEAVE

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include tables, charts, and other extraneous matter on the conference report (H.R. 7554) just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 3722, SECURITIES AND EXCHANGE ACT AUTHORIZATION FOR FISCAL YEAR 1978

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3722) to amend the Securities and Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal year 1978, with Senate amendments thereto, disagree to the Senate amendments, and request a conference with the Senate thereon.

The SPEAKER pro tempore (Mr. MINETA). Is there objection to the request of the gentleman from West Virginia? The Chair hears none, and appoints the following conferees; Messrs. STAGGERS, ECKHARDT, METCALFE, KRUEGER, CARNEY, DEVINE, AND BROYHILL.

PERMISSION FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO FILE REPORT ON H.R. 6831, NATIONAL ENERGY ACT

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce may have until midnight tonight to file a report on the bill H.R. 6831, the National Energy Act.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

PRINTING OF COPIES OF HOUSE REPORT 95–496, PART IV, ON H.R. 6831, NATIONAL ENERGY ACT

Mr. STAGGERS. Mr. Speaker, I offer a resolution (H. Res. 693) and ask unanimous consent for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 693

Resolved, That there shall be printed for the use of the Committee on Interstate and Foreign Commerce of the House of Representatives the maximum number of copies of House Report No. 95–496, Part IV, to accompany the bill H.R. 6831 entitled "National Energy Act" which may be printed at a cost not to exceed $1,200.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PERMISSION FOR SUBCOMMITTEE ON ECONOMIC OPPORTUNITY OF COMMITTEE ON EDUCATION AND LABOR TO MEET DURING 5-MINUTE RULE ON JULY 21 AND 22, 1977

Mr. ANDREWS of North Carolina. Mr. Speaker, I ask unanimous consent that the Subcommittee on Economic Opportunity of the Committee on Education and Labor may be permitted to meet during the 5-minute rule on July 21 and July 22 to receive testimony on H.R. 7577 and H.R. 1988, bills to extend and amend the Economic Opportunity Act of 1964.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

CONFERENCE REPORT ON H.R. 4088, NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION, FISCAL YEAR 1978

Mr. FUQUA. Mr. Speaker, I call up the conference report on the bill (H.R. 4088) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the statement.

(For conference report and statement see proceedings of the House of June 21, 1977.)

Mr. FUQUA (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida (Mr. FUQUA) is recognized for 30 minutes and the gentleman from New York (Mr. WYDLER) is recognized for 30 minutes.

The Chair recognized the gentleman from Florida (Mr. FUQUA).

Mr. FUQUA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the committee of conference on the bill—H.R. 4088—authorizing funds for the National Aeronautics and Space Administration for fiscal year 1978 has successfully concluded its work. The conference report before you includes nine changes in the NASA research and development program line items, and one change in the construction of facilities line items. The net result of these actions is a $14,640,000 increase in amount requested—$4,034,789,000—for fiscal year 1978. An increase of less than four-tenths of 1 percent—0.36 percent—in the amount requested by the administration.

To summarize the recommendations of your conference:

Funds were added to:

First. Support cost-effective scheduling for Space Shuttle production ($5 million);

Second. Initiate studies for space industrialization ($2 million);

Third. Provide funds for fundamental space research eroded by inflation and upper atmosphere research ($4 million);

Fourth. Increase work in ocean pollution monitoring, severe storm research ($4 million) and provide for increased Landsat–D instrumentation ($2 million);

Fifth. Augment efforts in aeronautical research and technology ($3 million);

Sixth. Provide funds for increased emphasis on advance concepts for space propulsion ($2 million); and

Seventh. Increase effort to define the technology necessary for solar satellite power systems ($3 million).

HOUSE SENATE CONFERENCE—NASA AUTHORIZATION, FISCAL YEAR 1978

[In dollars]

	Budget request [1]	House	Senate	Committee of conference
Research and development:				
Space Shuttle	1,349,200,000	1,349,200,000	1,354,200,000	1,354,200,000
Space flight operations	267,800,000	270,800,000	265,800,000	267,800,000
Expendable launch vehicles	136,500,000	129,500,000	136,500,000	134,500,000
Physics and astronomy	224,200,000	229,200,000	226,200,000	228,200,000
Lunar and planetary exploration	158,200,000	161,200,000	150,200,000	153,200,000
Life sciences	33,300,000	33,300,000	33,300,000	33,300,000
Space applications	233,800,000	221,900,000	239,800,000	239,800,000
Earth resources operational systems	0	26,900,000	0	0
Aeronautical research and technology	231,000,000	236,500,000	231,000,000	234,000,000
Space research and technology	97,700,000	101,700,000	97,700,000	99,700,000
Energy technology applications	4,500,000	9,500,000	4,500,000	7,500,000
Tracking and data acquisition	281,700,000	278,700,000	281,700,000	280,200,000
Technology utilization	8,100,000	9,100,000	9,100,000	9,100,000
Total	3,026,000,000	3,047,500,000	3,030,000,000	3,041,500,000
Construction of facilities	161,800,000	158,340,000	161,800,000	160,940,000
Research and program management	846,989,000	847,989,000	846,989,000	846,989,000
Grand total	4,034,789,000	4,053,829,000	4,038,789,000	4,049,429,000

[1] Includes Carter amendments to original fiscal year 1978 budget request.

Funds were decreased to:

First. Account for economies derived from industrial initiatives to provide upper stage vehicles without NASA development ($2 million);

Second. Take advantage of opportunities to reduce supporting costs in repetitive procurement of expendable launch vehicles ($2 million);

Third. Reduce study efforts for a Mars follow-on to the Viking mission ($5 million);

Fourth. Provide a general reduction in tracking and data acquisition effort ($1.5 million); and

Fifth. Delete construction of a crew training facility ($0.86 million).

I am including a summary of the action taken for the record.

The conference report before you reflects the need to exercise prudent economy while encouraging full utilization of the potential of space.

I urge the adoption of this report.

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. WYDLER).

Mr. WYDLER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conference report on the NASA authorization bill is a just and fair compromise of the House and Senate versions of H.R. 4088. The total authorization presented in this conference report of $4,049,429,000 is $4,400,000 less than what was authorized by the House-passed bill. The Senate version of H.R. 4088 authorized $4,038,789,000 which is $10,640,000 less than the conference report authorization. The total budget presented in the conference report is broken down as follows:

Research and development	$3,041,500,000
Construction of facilities	160,940,000
Research and program management	846,989,000

I was quite pleased with the fact that total agreement was reached by the conferees. Admittedly, we have modified the House position somewhat, but in a constructive manner.

The aeronautics research and technology line item has been increased this year at a reasonable rate. In the past the House Committee on Science and Technology has stressed the importance of strengthening this area. Aeronautics, for sometime, seemed to be in the shadows of the space activities.

Consequently, this Nation's aeronautics technology base has begun to face very severe competition. The fiscal year 1977 Authorization for "Aeronautics Research and Technology" was $191,100,000, as compared to $234,000,000 for fiscal year 1978. This represents approximately an 18-percent increase.

The budget item "Space Applications" was of special significance to me because of the down-to-earth utilization of our space technology. The House version had increased this line item by $5,000,000 for enhancing the weather and climate research program. The Senate version increased this category by $6 million for three specific purposes: One, $2 million for addition of multispectral scanner to Landsat-D; two, development of a satellite system for monitoring the 200-mile coastal limit; and three, development of a system to monitor oilspills. All of these programs, both in the House and Senate versions, are in my opinion very worth while and practical. Consequently, I am pleased with the compromise that included the $6 million increase and incorporated the weather and climate, multispectral scanner, 200-mile coastal monitor, and ocean coastal pollution monitoring programs. This last aspect will be especially valuable in detecting waste disposal and similar forms of coastal pollution.

One issue within the compromise which was extensively debated was in the construction of facilities budget. The House had eliminated $860,000 for construction of a water immersion facility at the Johnson Space Center. The Senate version authorized that expenditure. The compromise was to eliminate the funding but allow NASA to justify the facility at a later date for construction.

Mr. Speaker, I wholeheartedly support this conference report, and urge my colleagues to do the same.

Mr. WEISS. Mr. Speaker, I would like to share with you and my colleagues a copy of a letter I recently received from the Honorable Bert Lance, Director of the Office of Management and Budget, which responds to a request for clarification of OMB's view on the preparation by NASA of an overall program plan for the development of a new SST or so-called AST—advanced supersonic transport.

The conference committee report on H.R. 4088—the NASA authorization—includes $15.2 million for the preparation of such a plan as a result of a mandate in House Report 95–67 calling for technology readiness for a new SST by the early 1980's.

In his excellent letter—printed below—Mr. Lance makes it clear that this authorization is not interpreted by OMB to be an open-ended authority for redevelopment of the SST; that such development is more appropriate as an undertaking for the private sector and that this authorization approves only limited study by NASA on the technical facets of supersonic aeronautics.

OFFICE OF MANAGEMENT
AND BUDGET,
Washington, D.C., June 29, 1977.

Hon. TED WEISS,
House of Representatives,
Washington, D.C.

DEAR MR. WEISS: This letter responds to your letter of May 23, 1977 in which you requested additional clarification of our views on Federal sponsorship of an advanced supersonic transport aircraft.

In considering the implications of the House Committee's action on the FY 1978 authorization for the National Aeronautics and Space Administration, we believe it important to draw a distinction between the $15 million authorized for supersonic transport research by NASA and the Committee's request for an overall program plan to achieve technology readiness for such an aircraft by the early 1980's.

The $15 million, authorized in FY 1978, was included in the President's FY 1978 Budget and was to permit the National Aeronautics and Space Administration to examine, at a constrained funding level, some of the high risk technology areas involved in the design of an economically and environmentally acceptable supersonic transport. These funds, in our view, do not constitute a commitment to achieving technology readiness for such an aircraft. As stated in our previous letter, such future budgetary commitments would have to be considered on the basis of our long-range transportation needs and overall national budget priorities.

Concerning agency preparation of an overall program plan, we believe that the final formulation and any future implementation of such a program should be the product of the normal budgetary review process, involving both executive branch and congressional review of specific program proposals in the context of our national goals and priorities. In this regard, we believe that in responding to the Committee's request, the National Aeronautics and Space Administration could develop a series of program options to serve as possible future input to the normal budget review process. Such a study could describe for each general option the efforts needed in major technology disciplines and the associated cost and schedule considerations. Such an approach we believe

could meet the House Science and Technology Committee's requirements for its FY 1979 pre-authorization hearings without committing the Administration to any particular future course of action.

We could expect, moreover, that the agency reply to the congressionally-requested study would make clear that the long-term program options addressed in the report are in the nature of planning assumptions and do not represent agency or Administration recommendations for the future direction of the NASA aeronautical research and technology efforts. Specific recommendations or requests for any future funding, if appropriate, would be addressed by the President in the formulation of his future budget proposals to the Congress.

We would further expect that such an approach would focus on those aspects for which the National Aeronautics and Space Administration could make the largest potential contribution, namely the advancement of aeronautical research and technology. As stated in our previous letter, the private sector is the appropriate arena for assessing and determining the economic viability of an advanced supersonic transport. We, therefore, would not expect the National Aeronautics and Space Administration study to include an economic analysis covering the investment or return aspects of such a commercial venture.

We hope this letter clarifies our position on this matter. Please contact us should you need additional information.

Sincerely,

BERT LANCE,
Director.

Mr. WINN. Mr. Speaker, I am pleased to be able to again rise in support of the conference report on the fiscal year 1978 NASA authorization bill, H.R. 4088. I feel that the conferees made relevant and practical compromises in the budget line items. The total budget for research and development, construction of facilities and research and program management is $4,049,429,000. This amount is $14,640,000 greater than the NASA request and $4,400,000 less than the House authorization. The opponents of funding for basic research will decry this huge sum of $4 billion. However, compared to the total welfare cost in this Nation it is a rather meager sum. HEW spends the equivalent of the total fiscal year 1978 NASA budget in approximately 9 days. What is more important in regard to the expenditures in basic research is that there is a tremendous return on investment. Some economic studies have shown that for every dollar spent in basic research, $14 are returned into the economy within 10 years.

The largest and most impressive program at NASA is the Space Shuttle program. Both the House and Senate strongly support the research and development and the five Orbiter production of the Space Shuttle. In fact, the Senate version increased this line item by $5 million. The conference version of the Space Shuttle line item is $1,354,200,000 which is $5 million greater than the House version and the NASA request.

A new concept in energy production, solar satellite power system, has been enthusiastically supported by the House for 2 years. To enable further study in this area the House version of H.R. 4088 included an additional $5 million in the line item "Energy technology applications." The Senate version agreed with the significance of a satellite solar power system, however, they did not agree to the budget increase. The conferees agreed to a total budget of $7,500,000, with $4,000,000 dedicated to satellite solar power system research.

Space applications at NASA is a very gratifying endeavor or program because this is where the American taxpayer can see the obvious return on his investment in the space program. One specific area within the space applications budget line item that is of special significance to me is the severe storm research program. Our society is still at the mercy of the forces of nature, such as tornadoes and hurricanes. Millions of dollars of damage are sustained each year due to these violent storms. One storm this May in my home district resulted in approximately $30 million of damages. As a consequence, I am pleased to see a reasonable level of research funding that will allow us to understand, predict, and maybe even control the severe storm phenomenon.

The research and program management category of the NAAS budget was left at the original NASA request level of $846,989,000. The House had recommended an increase of $1,000,000 for travel. However, the Senate did not agree with this position. I feel, however, that NASA should be commended for keeping the lid on the R. & P.M. funding. In light of rising personnel and utility cost this is remarkable.

In conclusion, I would like to say that this is a good bill that will allow NASA to adequately carry out its mandated charter. I urge my colleagues to lend their support.

Mr. TEAGUE. Mr. Speaker, before us today is the result of a successful House-Senate conference on the fiscal year 1978 NASA authorization bill (H.R. 4088). This conference report recommends $4,049,429,000 for NASA in fiscal year 1978. This total is comprised of $3,041,500,000 for research and development, $15.5 million more than the NASA request; $160,940,000 for construction of facilities, $860,000 less than the NASA request; and $846,989,000 for research and program management which is the same as the NASA request.

The funds provided in this bill (H.R. 4088) will allow NASA to proceed with current programs of space utilization and exploration. It will allow for new effort in a space telescope program, Landsat satellite, search and rescue satellite, and a planetary orbiter and probe—Jupiter Orbiter Probe. At the same time, the Space Shuttle program continues within cost and on schedule.

Because of the continued major NASA contribution to our Nation, I urge adoption of the conference report.

Mr. FUQUA. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MOTTL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 379, nays 29, not voting 25, as follows:

Dickinson	Howard	

The Clerk announced the following pairs:

Mr. Burke of Massachusetts with Mr. Broyhill.
Mr. Addabbo with Mr. Dickinson.
Mr. Brademas with Mr. Findley.
Mr. Zeferetti with Mr. McKinney.
Mr. Teague with Mr. Stockman.
Mr. Rooney with Mr. Flippo.
Mr. Howard with Mr. Diggs.
Mr. Dent with Mr. Ertel.
Mr. Holland with Mrs. Heckler.
Mr. Davis with Mr. Horton.
Mr. Clay with Mr. Bonker.
Mr. Russo with Mr. Koch.

Messrs. REUSS, BONIOR, VOLKMER, RAHALL and MURPHY of Illinois changed their vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 1474, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1978

Mr. NEDZI. Mr. Speaker, I call up the conference report on the Senate bill (S. 1474) to authorize certain construction at military installations, and for other purposes, and ask unanimous consent that the statement of the manager be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of July 12, 1977.)

Mr. NEDZI (during the reading). Mr. Speaker, in view of the fact that the conference report designated as Report No. 95–494 is available to the Members and was ordered printed on July 12 and is also available in the RECORD of Tuesday, July 12, on page 22513, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. NEDZI) and the gentleman from Virginia (Mr. WHITEHURST) are recognized for 30 minutes each.

The Chair recognizes the gentleman from Michigan (Mr. NEDZI).

Mr. NEDZI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on May 13, 1977, the Senate passed S. 1474, the Military Construction Authorization Act for fiscal year 1978, which provided new construction authorization for the military departments and the Department of Defense in the total amount of $3,726,633,000.

On June 6, 1977, the House considered the legislation, amended it by striking all language after the enacting clause and wrote a new bill. As passed by the House, S. 1474 provided new construction authorization in the total amount of $3,508,560,000.

As a result of a June 10 conference between the House and the Senate on the differences in S. 1474, the conferees agreed to an adjusted authorization totaling $3,724,718,000.

This compromise total is $148,201,000 above the amount requested by the Department of Defense. However, it should be pointed out that this larger figure includes $122,126,000 in authorization provided in H.R. 5502, the fiscal year 1977 Supplemental Military Construction Authorization Act passed by the House on April 4, 1977. The purpose of that bill was to authorize $57.1 million in energy conservation and pollution abatement projects and $65 million for repairs of military family housing in an effort to bolster job-producing Federal programs. Therefore, the net increase over the Department's request, as contained in S. 1474, is only $26,075,000.

There were 84 differences between the House and Senate bills. However, we were able to reach agreement on each of these differences. I will not go into great detail because House Report 95–494, the conference report on S. 1474, explains the actions of the conferees.

Two items stimulated the most discussion during the conference. One centered on a House proposal to individually meter energy consumed in military family housing units in the United States and its possessions. The other dealt with a Senate proposal to establish a minor construction program for the individual services.

In its bill, the House authorized $161.2 million for the metering program which, through energy savings, would pay for itself in 2 years or less. Under the program, the Secretary of Defense is directed to establish reasonable energy consumption ceilings for family housing and to assess occupants for any consumption in excess of that established ceiling. The Senate conferees argued that such a program would affect the entire pay and compensation question and before implementation a test should be conducted to determine its feasibility.

The conferees agreed to retain the House language found in section 507 with an additional provision making the excess consumption assessment effective only upon completion of a test program and after a review of the test findings by the Congress. The conferees further agreed to authorize $70 million to meet the estimated Defense Department obligational capability for the program during fiscal year 1978. This action will enable the Department of Defense to proceed with the installations of meters during the test program so that implementation will be possible once feasibility is demonstrated.

The Senate provision on minor construction provided the Department of Defense with the authority and flexibility to program projects costing up to $1 million without specific annual authorization. The House conferees, however, expressed concern over the unknown impact of the process and recommended a study to determine its effects.

As finally approved by the conference, the new minor construction authority is to be effective beginning with fiscal year 1979 and will apply to projects costing less than $500,000. The Department of Defense is required to notify the Armed Services Committees in writing of any approved project costing more than $300,000 at least 30 days before funds are obligated for the project.

The Department of Defense is expected to develop implementing guidelines for the new minor construction authority before the fiscal year 1979 budget submission to Congress and to report to the Armed Services Committees at that time regarding the procedures that will be used to effect the new authority. This will enable the Congress to determine whether this newly conceived program is workable.

The conferees have brought to the House a good bill that will adequately provide for the construction needs of the military establishment during fiscal year 1978. I want to assure the House that all amendments adopted by the conference are germane to the bill and I urge its adoption.

Mr. WHITEHURST. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I wish to support the statement of the gentleman from Michigan, regarding the conference report on S. 1474.

The conference bill includes initiatives of both the House and Senate which should improve the overall construction programs of the three services and defense agencies. Of particular note is the $122 million for which supplemental appropriations have already been approved by the Congress. This means that these projects will be able to go to contract immediately, producing new stimulus to the economy by providing jobs in the construction trades.

The conference has written a good clean bill which I urge the House to adopt.

Mr. WHITEHURST. Mr. Speaker, I have no requests for time.

Mr. NEDZI. Mr. Speaker, I have no requests for time.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 370, nays 34, not voting 29, as follows:

Howard	Pritchard	Zeferetti
Jacobs	Rooney	

The Clerk announced the following pairs:

Mr. Burke of Massachusetts with Mr. Dickinson.
Mr. Addabbo with Mr. McKinney.
Mr. Brademas with Mr. Stockman.
Mr. Zeferetti with Mr. Ertel.
Mr. Rooney with Mr. Horton.
Mr. Teague with Mr. Madigan.
Mr. Dent with Mr. Davis.
Mr. Russo with Mr. Jacobs.
Mr. Koch with Mr. Goldwater.
Mr. Howard with Mrs. Pettis.
Mr. Runnels with Mr. Pritchard.
Mr. Hefner with Mr. Holland.
Mr. Giaimo with Mr. Flippo.
Mr. Fountain with Mr. Shuster.

Mrs. FENWICK, Mr. WEISS, and Mr. YATES changes their vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 6138, YOUTH EMPLOYMENT AND DEMONSTRATION PROJECTS

Mr. PERKINS. Mr. Speaker, I call up the conference report on the bill (H.R. 6138) to provide employment and training opportunities for youth, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. McFALL). Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of June 22, 1977.)

Mr. PERKINS (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the statement.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER pro tempore. The gentleman from Kentucky (Mr. PERKINS) and the gentleman from Minnesota (Mr. QUIE) are recognized for 30 minutes each.

The Chair recognizes the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conference report we are bringing back to the House today deals with a problem which has now become an international issue. H.R. 6138, the Youth Employment and Demonstration Projects Act of 1977, provides for programs aimed at exploring methods for dealing with the severe and persistent

levels of unemployment among our Nation's youth.

The problem of youth unemployment is now the subject of international discussions and conferences. Other nations are beginning to recognize that the problem of structural employment among young people is so severe that it must be addressed as a matter of national policy. H.R. 6138 is the culmination of efforts by the Congress and the administration to address this problem for our own Nation's youth in a comprehensive and responsible way.

We have approached this issue in a bipartisan manner from the beginning. H.R. 6138 passed the House on May 17 by a vote of 334 to 61. That bill originated in the Subcommittee on Employment Opportunities, chaired by my good friend and distinguished colleague, GUS HAWKINS.

We have had the complete cooperation of AL QUIE, the ranking minority member of the full committee, and RON SARASIN, the ranking minority member of the subcommittee. We have also had the complete cooperation of Secretary of Labor Ray Marshall, who I believe, incidentally, will be one of our great Secretaries of Labor.

The conference we have just concluded with the Senate has left the House bill substantially intact. We gave in on some issues and they gave in on some issues. The final product of the conference has the enthusiastic support of the conferees on both sides of the aisle, and the enthusiastic support of the administration. I believe it is a landmark piece of legislation, and deserves the support of every Member of this body.

Title I of the bill sets up a year-round Young Adult Conservation Corps program. It will put approximately 35,000 youths between the ages of 16 to 23 to work on resource management projects in our National and State parks. The bills originally passed by both bodies contained different versions of a YACC. The Senate bill provided a far stronger role for the Secretary of Labor than the House bill did, but contained only a 1-year authorization period, as opposed to a 3-year authorization in the House-passed bill.

At the urging of Secretary Marshall, the House conferees accepted the Senate's version with a strong role for the Secretary of Labor, and the Senate in turn agreed to the 3-year authorization period provided in the House bill. We agreed to do this with reluctance, because the House version was closely modeled after the YACC bill passed by the House last year. The substance of both bills was the same, however, and we felt that we should give due weight to the administration's wishes, since it is charged wtih the responsibility of carrying out this program.

We expect the Secretary of Labor to move expeditiously to establish this program, using funds previously appropriated in the Economic Stimulus Appropriations Act of 1977. It is his responsibility, for example, to select candidates for the corps for referral to the Secretaries of the Interior and Agriculture, and we expect the Secretary to move immediately to establish selection procedures for this purpose.

We also expect the Secretary to take the lead in promptly completing the interagency agreements with the Secretaries of the Interior and Agriculture which are called for in the bill. This is a very important program, not only for our Nation's young people, but for our Nation's public lands, where the badly needed resource management work is waiting to be done. We hope that it can be started up very quickly.

Title II of the bill sets up five different programs, all with a 1-year authorization, to test different methods of dealing with the problem of youth unemployment.

The approach of the House, which the Senate accepted, is that a number of pilot programs should be launched and tested to see how we can best deal with this problem.

Quoting from the statement of purpose in the bill:

> It is the purpose of this part to establish a variety of employment, training and demonstration programs to explore methods of dealing with the structural unemployment problems of the Nation's youth. The basic purpose of the demonstration programs shall be to test the relative efficacy of different ways of dealing with these problems in different local contexts, but this basic purpose shall not preclude the funding of programs dealing with the immediate difficulties faced by youths who are in need of, and unable to find, jobs.

While we know that the problem of youth unemployment is a long-term problem, we are not sure what the long-term solution is. We have thus put those programs in as amendments to title III of the CETA legislation to emphasize that we will try these programs out, we will evaluate them, and will decide next year what the permanent program will look like.

The first program is what we refer to as the Sarasin projects. This section of the bill is taken in toto from the House bill and authorizes $172.5 million for 15–20 demonstration projects, to provide guaranteed jobs for economically disadvantaged youth between the ages of 16 and 19 who stay in school and get their high school diploma or its equivalent. The youths in the demonstration area will get jobs for up to 20 hours per week during the school year, and 40 hours per week during the summer.

A youngster is at a great disadvantage in the labor market without his high school diploma. This program will allow needy youngsters to stay in school, complete their education, and gain valuable work experience while doing so.

This proposal was the brainchild of the ranking minority member of the subcommittee, RON SARASIN, and has already drawn praise as one of the most innovative and promising features of the bill. It is a good example of the bipartisan nature of this bill, and an example of the contributions my friend from Connecticut has consistently made to the work of the committee.

I want to emphasize that the Secretary of Labor has the discretion to use a wide variety of mixes in testing this idea, and that we do not intend that he adhere to any regional allocation scheme in doing so. It should be tested in rural and urban areas, and can be done within subparts of a prime sponsor's area.

We do not expect that the program will be open to youths who move into an area only for the purpose of participating in it.

We also expect maximum use of the funds provided for the Sarasin projects. If the Secretary finds after 3 or 4 months, for example, that the number of participants has been underestimated, then additional, shorter-term projects should be funded.

This is a pilot project, and we expect that the Secretary will send out a request for proposals and otherwise expedite the launching of the various projects.

The second program authorizes $172.5 million for a wide variety of community conservation and improvement projects. Any prime sponsor is eligible to apply for funds for these projects.

This program encourages youths to remain in school while working on weatherization projects, repairs to low-income housing, neighborhood and local parks rehabilitation, cleanup projects, and other worthwhile projects.

This program was proposed in the Senate by Senators STAFFORD and RANDOLPH. We thought it was a good approach, and in fact had authorized these same projects under a different section of the House-passed bill. The House conferees agreed with the Senate that it should appear in the bill as a separate and distinct program.

The third program provides $100 million for discretionary projects to be selected by the Secretary of Labor. The Secretary has the ultimate responsibility for carrying out the Nation's employment and training programs, and, as we move into this difficult area of trying to come up with solutions to a very severe problem, we felt we should give him the flexibility to test out additional ideas.

The fourth program provides for a formula allocation of $603.7 million to prime sponsors to operate special youth programs for youths aged 14 to 21 who come from families whose income is less than 85 percent of the lower living standard budget, roughly $8,500 for a family of four.

Section 342(a) of the bill details a wide variety of approaches which can be tried with funds provided under this formula allocation.

The fifth program provides that 22 percent of the funds provided for each prime sponsor shall be used for work experience programs for in-school youths, to be jointly operated by prime sponsors and local education agencies. This proposal originated with Senators JAVITS and HUMPHREY, and the House conferees accepted it in the belief that the basic concept of trying to strengthen the relationship between manpower programs and educational institutions at the local level was a sound one.

In summary, Mr. Speaker, I believe we have brought back to the House a flexible

bill, and a bill which reflects the best thinking of the House, the Senate, and the administration. The conferees on both sides of the aisle are pleased with the results of the conference, and I urge my colleagues to support the conference report.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. HAWKINS), the distinguished chairman of the subcommittee.

Mr. HAWKINS. Mr. Speaker, on June 16, 1977, conferees from the House and Senate reached agreement on legislation to authorize youth employment and training programs. H.R. 6138, the Youth Employment and Demonstration Projects Act of 1977 amends the Comprehensive Employment and Training Act by adding a new title VIII and a new part C to the title III. The Economic Stimulus Appropriations Act—Public Law 95–29—signed into law on May 13, 1977, provided $1 billion for year-round youth programs in anticipation of this legislation. The economic recovery package the President sent to Congress on January 31 requested $1.5 billion to be spent on the programs authorized in this bill. It is my understanding that the Labor-HEW appropriations bill did not contain the additional $500 million required for these programs as the committee was awaiting authorization legislation. As the apportionment of funds in the bill under consideration today was designed on the assumption of $1.5 billion in funding requested in the President's message, I anticipate that the supplemental appropriations bill for Labor-HEW will include the additional funds required for effective implementation of these programs.

Title I of H.R. 6138 creates a new title VIII to CETA and establishes a Young Adult Conservation Corps authorized for 3 years to employ young adults age 16–23 inclusive. These young people will be employed year-round to reduce the volume of labor intensive resource management work on our Nation's public lands, Federal, State and local. This program will be administered by the Secretary of Labor pursuant to interagency agreements entered into with the Secretaries of Interior and Agriculture. It is the intent of the conferees that these agreements will address all aspects of the administration of this program. It is clear that the Secretaries of Interior and Agriculture along with agencies affiliated with the U.S. Employment Service, CETA prime sponsors and other appropriate agencies will refer applicants to the Secretary of Labor. However, the Secretary of Labor has sole responsibility for referral of eligible applicants to the Corps centers. Corps members will be hired by the Secretaries of Interior and Agriculture from the list of eligible applicants referred by the Secretary of Labor from the original applicant pool. The YACC shall be open to youth of all economic backgrounds who are capable of carrying out the duties of the Corps and may be employed for up to three periods not to exceed a total of 12 months. They may receive academic credit for their participation if applicable.

The YACC Corps centers will be established by the Secretaries of Interior and Agriculture after consultation with the Secretary of Labor. The interagency agreements should address this procedure in detail to avoid any possible conflicts. It is also the intent of the conferees that the funds required by the Secretaries of Interior and Agriculture will be transferred to them in an expeditious manner to assure prompt implementation of the YACC program in the field.

Thirty percent of the funds available for this program are set aside for grants to States or local governments. The conferees expect that in most cases arrangements will be made with the States and that the States will coordinate arrangements with other eligible entities.

Although grants to State and local governments are the responsibility of the Secretaries of Interior and Agriculture, the bill provides certain labor standards which: First, will result in an increase in employment opportunities; two, will not result in displacement of currently employed workers; three, will not impair existing contracts or substitute Federal funds for work that would otherwise be performed; four, will not substitute YACC jobs for existing federally assisted jobs; and five, will not result in the hiring of a youth when any other person is on layoff from the same or any substantially equivalent job. The interagency agreements should provide for the active role of the Secretary of Labor in the stringent application of these provisions.

Title II of H.R. 6138 amends title III of CETA and creates a new part C with three major programmatic subparts authorized for 1 year. Although the youth unemployment problem is acute in nature and chronic in duration, these programs are authorized for short-term duration to demonstrate the effectiveness of a variety of approaches to the problem. The House Education and Labor Committee and the Senate Human Resources Committee intend, in the conduct of our general oversight of the CETA program, to examine the experience and information provided by these programs and to attempt a more comprehensive approach to the youth unemployment problem for the next fiscal year.

Youth incentive entitlement program. This subpart authorizes a pilot program in areas selected by the Secretary of Labor to test the efficacy of assuring employment and/or training to economically disadvantaged youth age 16–19 who are in school or willing to return to seek a high school diploma or its equivalency. The Secretary is given broad discretion to design the program to test a variety of models. It is certainly not intended that the Secretary should allocate funds on a purely regional basis but rather that he will select a variety of geographic areas, both urban and rural, experiencing different economic circumstances. An area selected for this pilot program need not be the entire jurisdiction of any one prime sponsor but may be only part of that jurisdiction. After the initial selection of areas to receive a pilot youth incentive entitlement, any funds remaining may be utilized for short-term projects lasting less than 1 year.

The eligible employment and training opportunities under this program shall be part-time during the school year for an average of 20 hours per week and full-time during the summer. In selecting prime sponsors to conduct pilot programs of this nature, the Secretary shall take into consideration the extent to which they will devote funds available under title I and the summer youth program under section 304(a) for the entitlement program. This subpart also describes the information to be included in a prime sponsor's proposal including assurances that local institutions and organizations have been consulted and that regular workers will be protected. The Secretary is required to report to Congress on the effect of this program. The conferees do not expect the report required on March 15, 1978 to be definitive in nature but to provide as much information as possible to assess the effectiveness of the program and to assist in the development of comprehensive youth legislation next year.

Youth community conservation and improvement projects program. This subpart authorizes the Secretary to approve community projects such as rehabilitation or improvement of public facilities, neighborhood improvements, weatherization and basic repairs to low-income housing. Youth to be employed shall be age 16–19 without regard to income but shall be youth who are experiencing severe handicaps in obtaining employment including but not limited to those who lack credentials such as a high school diploma or basic skills, women, minorities and veterans, those who are handicapped, those with dependents or those who have otherwise demonstrated special need. Seventy-five percent of the funds available for this subpart will be allocated to the States on the basis of the relative number of unemployed persons within each State with one-half of one percent assured to each State, Guam, the Virgin Islands, American Samoa, the Northern Marianas and the Trust Territory of the Pacific. The remaining funds are to be allocated as the Secretary deems appropriate.

Youth employment and training programs. This subpart authorizes employment and training and necessary supportive services to demonstrate the effectiveness of a variety of approaches to the youth unemployment problem. The majority of the funds available for this subpart are to be allocated to prime sponsors by formula with 22 percent of each prime sponsor's allocation to be available for programs for inschool youth pursuant to agreements between the prime sponsor and the local education agency. The remaining funds available for this subpart shall be available for the Secretary of Labor's discretion. Youth eligible for these programs shall be age 16 to 21 inclusive, shall be unemployed, underemployed, or in school and shall be from families whose gross annual income does not exceed 85 percent of the BLS lower living income standard. However, 10 percent of the funds may be used for identifiable programs open to youth of all

economic backgrounds to test the desirability of such a mix. The funds available for this subpart shall be distributed to CETA prime sponsors on a formula basis; 37.5 percent based on the total number of unemployed persons in the prime sponsor's jurisdiction; 37.5 percent based on the relative number of unemployed persons residing in areas of substantial unemployment and 25 percent based on the number of low-income persons in the prime sponsor's jurisdiction. Five percent of the funds available for this new part C to title III are set aside for Governors for special statewide services. Two percent is set aside for Native American programs and 2 percent for migrant and seasonal farmworker programs.

Attached to my statement for inclusion in the RECORD is a breakdown of the distribution of funds for the programs authorized by H.R. 6138.

Included in the conference agreement are three minor amendments to CETA. We have waived the provisions of section 4(e) which limits funds for titles III and IV to 20 percent of the total CETA appropriation. This waiver applies to part C of title III, the summer youth employment program under section 304(a) of title III and title IV. This waiver is required if we are to take this initiative to deal with the youth unemployment problem.

We also have included an amendment to insure the increased participation of Vietnam-era veterans under the age of 35 in CETA programs and an amendment that provides for special consideration for those with previous teaching experience when filling teaching positions with title II and VI funds.

Also included is an amendment which clarifies the eligibility requirement for the title VI program.

This measure is truely a bipartisan effort and I trust that Members from both sides of the aisle will join in its final passage.

The material follows:

TITLE I—MAINTENANCE OF EFFORT

The language of H.R. 6138 and the Statement of Managers clearly express the intent of Congress that new monies available for youth programs represent an addition to programs now supported under CETA. Section 346(2) states that applications for receipt of funds under subpart 3 must "include assurances that services to youth under (Title 1) should not be reduced because of the availability of financial assistance under this subpart."

Whereas substitution should be avoided, the Secretary of Labor, in writing regulations, may desire to allow some flexibility in cases where changing economic conditions may warrant changes in the local title 1 plan. The burden of proof must rest with the prime sponsor, however, contingent on approval of the Secretary.

Distribution of $1.5 billion under youth employment legislation

[Dollars in millions]

	Compromise
Young Adult Conservation Corps	$350
Other youth programs:	
Youth incentive entitlement (Sarasin) (15%)[1]	$172.5
Community improvement projects (Stafford) (15%)[1]	$172.5
Secretary's discretionary grants (12.5%)[1]	143.7
Native Americans 2% set-aside and migrants 2% set-aside	43.7
Subtotal: Secretary's programs (42.5%)[1]	[488.7]
Governors' statewide services (5%)[1]	57.5
Prime sponsors' allocations (52.5%)[1]	603.7
(Jointly administered in-school program Javits)	(132.8)
Subtotal: State and local programs (57.5%)[1]	[661.2]

Assumes $1.5 billion appropriation and distribution in accordance with the administration's budget request.

[1] Showing percentages of remaining $1.150 million budget request.

Mr. MEEDS. Mr. Speaker, will the gentleman yield?

Mr. HAWKINS. I will be glad to yield to the gentleman from Washington.

Mr. MEEDS. Mr. Speaker, I rise in strong support of this conference report.

At the outset I would like to express my commendation to the gentleman from California (Mr. HAWKINS), who is the chairman of the subcommittee and who has worked tirelessly on this legislation. The gentleman has for quite a number of years been extremely interested in this very perplexing, chronic problem of youth unemployment.

I would also like to commend the chairman of the full committee, the gentleman from Kentucky (Mr. PERKINS), who has also been very helpful, and also the ranking minority member, the gentleman from Minnesota (Mr. QUIE), who has worked shoulder to shoulder with the other gentleman I have mentioned on these very difficult problems.

I would like, for the purpose of establishing or continuing legislative history, to ask the gentleman from California (Mr. HAWKINS) a question.

As the gentleman is well aware, the Young Adult Conservation Corps, which is in title I of this act and which is a part of this conference report, is patterned after the Youth Conservation Corps, which has been tremendously successful and which has been operated by the Forest Service in the Interior Department. In this legislation the Young Adult Conservation Corps is now operated, managed, or administered by the Labor Department through contracts or interagency agreements with the Department of the Interior and the Forest Service.

While establishing that this is the case as a result of this conference, the conference report, in the middle of page 34—and this incidentally was the Senate's proposal—states this:

The conferees intend that the two land management agencies, the Departments of the Interior and Agriculture, will have the responsibility for the day-to-day operation of the program.

It is certainly my hope—and I hope this is the intent of the gentleman from California (Mr. HAWKINS), the gentleman from Kentucky (Mr. PERKINS), and the gentleman from Minnesota (Mr. QUIE)—that the full thrust of this be given, and that indeed the management of these programs be handled through Interior and through the Forest Service, since they have so successfully in the past administered the Youth Conservation Corps.

What I am concerned about is that they might lose the thrust of this type of program. The Youth Conservation Corps is a program which shows a mix of social, economic, and racial backgrounds, and it is primarily a work program. It is my fear that this may be taken over by the Labor Department and be made into something it was not really intended to become.

Mr. Speaker, can the gentleman from California (Mr. HAWKINS) give me the assurance that he feels the same way I do about this matter?

Mr. HAWKINS. Yes. This means, may I say, that the language in the conference report is taken almost literally from the position that the gentleman intended in his testimony before the Subcommittee on Employment Opportunities.

I would quote the gentleman's language on March 31, 1977, which I think is exactly the position, certainly, of the chairman and of the committee of conference and their intent.

The language, quoted verbatim, says as follows:

I think there is a role in this program for the Department of Labor, which is the lead agency with regard to youth unemployment and which has indicated that it expects to fill a lead role, that is to say, to in effect ask for the funds, to disburse them to the other agencies, which will carry out the program.

I am fully in accord with that role for Labor, but I would suggest, indeed, very strongly suggest, that these programs can best be run on a day-to-day basis; and decisions with regard to what projects should be carried out, where they should be carried out, when they should be carried out, and the basic decisions with regard to these programs on the ground should be made by the Department of the Interior and the Department of Agriculture.

I think that, in essence, is the position of the conferees; but the actual management and the lead role and responsibility must be with one agency. That will be the Department of Labor because that is the lead agency with regard to employment of youth. However, the day-to-day management will be carried out by the other two departments; and I think that is the intent of the conferees; and certainly I think that conforms to the gentleman's intent in the original sponsorship of this program.

Mr. MEEDS. Mr. Speaker, I thank the gentleman.

Mr. QUIE. Mr. Speaker, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Minnesota.

Mr. QUIE. Mr. Speaker, the gentleman from Washington (Mr. MEEDS) raised a point I was very concerned about in the conference as well as here.

In the agreed-to conference report, I should point out that an interagency agreement will be reached between Interior, Agriculture, and the Department of Labor. In the writing of that interagency agreement, the Departments of

Interior and Agriculture at least have the opportunity to insist, for instance, that the candidates' list, the development of it, will be one that they can live with. It is true under the act that the only people who can go into the Young Adult Conservation Corps will come out of the list that will be provided by the Department of Labor; but in establishing that list, the Departments of Agriculture and Interior can have a voice in the interagency agreement; and I understand that they have been negotiating with the Department of Labor and perhaps right now are ready with their understanding as to that agreement.

Mr. HAWKINS. My understanding of the act and of the conference report is that the Department of Agriculture and the Department of the Interior can participate in referring applicants to the Department of Labor and that along with those two Departments, the employment service agencies and prime sponsors can likewise make such reference. The actual handling, however, of the list of applicants is by the Department of Labor, and I think that takes care of that responsibility.

When the Department of Labor makes the reference of these applicants, then, to the site under the management of the Department of the Interior or the Department of Agriculture, obviously they have the selection of those persons from the list of those who are referred to them by the Department of Labor, so that the simple responsibility is with the Department of Labor. However, the others may participate in the referral of applicants to the Department of Labor.

Mr. QUIE. Yes, but is it not true, I ask the chairman of the subcommittee, that before any of that is done, an interagency agreement has to be entered into?

Mr. HAWKINS. That is true. An interagency agreement would incorporate this broad policy into detailed procedures so that the policy would be carried out through an interagency agreement which must be entered into by all three Departments.

Mr. QUIE. That is right. Therefore, before they sign it, as far as I am concerned, does not the gentleman agree that it is up to the Departments of Agriculture and Interior to agree to make certain that anything they feel ought to be a part of it is presented, and once they sign the agreement, of course, they have no recourse then but to go along with the agreement?

Mr. HAWKINS. That is true. I believe the gentleman will remember that the testimony before the subcommittee was to the effect that these three Departments have worked rather cooperatively on the program. I think there is really no reluctance on the part of either the Department of Agriculture or the Department of the Interior as to this procedure. I feel strongly that the interagency agreement has already been worked out although it has not been signed. I think on the adoption of this conference report that it will be satisfactorily settled. I believe there is no objection to this procedure.

Mr. MEEDS. Mr. Speaker, will the gentleman yield?

Mr. HAWKINS. I would be glad to yield to the gentleman from Washington.

Mr. MEEDS. Mr. Speaker, as the gentleman from California (Mr. HAWKINS) knows, one of the great strengths of the Youth Conservation Corps—and portions of that are adopted here—is that the Youth Conservation Corps is composed of a socio-economic and a racial mix. It was never intended to be a program for all rich youth or all poor youth or all black youth but to be a good mix of all of these things. It is certainly my intent, and it was my understanding of the intent of the gentleman from California and the gentleman from Kentucky and everybody else involved in it that the young adult conservation corps contained in this report today, or in this legislation, is to be that kind of a program. It is not to be a poverty program and it is not to be a program of all one kind or another of young people, but to be a good mix.

Is that the understanding of the gentleman from California?

Mr. HAWKINS. That is exactly our understanding. The criteria on eligible applicants spells it out, and it is open to all regardless of income. It is certainly the desire of the sponsors of the legislation as well as the conferees that this is a program that will be open to all youth regardless of socio-economic backgrounds.

Mr. MEEDS. Mr. Speaker, again I thank the gentleman from California (Mr. HAWKINS) for the efforts he has put forth in this very important legislation.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. HAWKINS. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank the gentleman for yielding.

I think all of us are terribly concerned about the youth unemployment, and particularly in our cities, the picture of unemployment of the youth in our country is tragic.

Has the committee considered how many more youths we might have employed had we not insisted on the minimum wage for all employment of these young people?

Mr. HAWKINS. We went thoroughly into that, and I am afraid an answer might be a very long one. I do not want to be facetious but may I say that there is a conflict between keeping activities at a minimum wage level in many programs and actually building into them careers, trying to make the work useful and not having the young people doing that which merits only a minimum wage.

It is certainly our feeling that the minimum wage will practically prevail at all times. There may be a few instances in which the activity may be that type which will get into construction activities, in which you may have young people who may be in a competitive position with other workers. We try to avoid that.

Mrs. FENWICK. But it is tragic that we cannot give employment to all the young people who want it. One of the reasons for that is that we use the money up in this more extravagant manner. Why could we not lower the amount of pay? Many of our young people live at home and have no rent to pay, and who are not in the position of maintaining a household, who could work for less.

Mr. HAWKINS. May I say that the gentlewoman from New Jersey (Mrs. FENWICK) is portraying a stereotyped kind of youth. However, 25 percent of the youth under the CETA program at the present time have dependents, and they are the heads of families. They are not just young people that may be pictured as merely a member of the family picking up a few extra bucks—if I may use that phrase. We are talking in many instances about the heads of families.

Mrs. FENWICK. How old are they?

Mr. HAWKINS. We are talking also about those who have dependents.

Mrs. FENWICK. What will the ages run to?

Mr. HAWKINS. The ages are 16 to 24. Twenty-four is the outside age limit under this bill, so we are getting up into the upper age limit. The gentlewoman says that there are some youths who may in some instances not be worth more than the minimum wage, and I would agree with the gentlewoman from New Jersey. I believe that throughout the bill that most of the activity will be confined to that which will pay certainly near the minimum wage. However, we must draft a bill to meet the situation of a youth who is approaching adulthood, who has dependents and who we hope will be led into some type of career and where that individual then will not depend on these programs.

Mrs. FENWICK. But for the 25 percent who have dependents, I agree with the gentleman entirely, one wage for 75 percent, and another one for those who have dependents because there are too many who are left out, too many who could not get in.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I thank the gentleman for yielding.

Could my colleague, the gentleman from California, indicate to the membership what the maximum pay would be for any youth under this bill, or is there any such thing as a maximum?

Mr. HAWKINS. I am sorry; I did not hear the question.

Mr. ASHBROOK. I am wondering if the gentleman from California can indicate to the membership what the maximum pay is that a recipient under this program could receive.

Mr. HAWKINS. The maximum would be for an individual who might conceivably be employed alongside of an individual earning the prevailing wage. I do not envision that happening very often, but let us say that it did happen. That individual obviously working for same employer, doing the same type of work alongside the other one, would be paid an equal wage. As I say, that is an unusual case. The bill provides generally for the minimum wage. It provides in some instances in which a construction worker might be engaged where an arrangement could be made by the union

involved and the prime sponsor or the employer, where he could happen to be under the Sarasin program, for example, that a new classification could be set up, and that individual could be paid less than the prevailing wage. So it works both ways, but it depends entirely upon an agreement that would be worked out.

Mr. ASHBROOK. If the gentleman will yield further, I guess what the gentleman is saying is that there is no real assurance of what the top wage could be. It could be conceivably within a certain percentage of what any prevailing wage would be in an area in that particular industry or for a particular job.

Mr. HAWKINS. I am saying only in an instance—and these would be very few instances—in which an individual would be paid the prevailing wage, it must be done by an agreement worked out with the union involved by agreeing to it, as well as the prime sponsor, and subject, of course, to the approval of the Secretary of Labor. We certainly hope that if the experience in the next 6 months indicates any abuse in that regard that we can tighten up on it, because this is only a temporary program, a stopgap program, until such time as we have an opportunity to really bring back to the Members a comprehensive youth bill. We had to work within the limitations of the administration's proposal, and I think we have tightened up extremely well from the administration's proposal that was introduced. I think we have given new direction to it. So I think from the gentleman's point of view as well as the point of view I would express that we have more protection by adopting this conference report than we would have by allowing the administration to proceed under the existing authority that it has in CETA to do so. So I think we are adding protection.

Mr. ASHBROOK. I thank my colleague. I hope when the program has run its course and we are looking back on it that that is the case. I thank the gentleman for his observation.

Mr. HAWKINS. I thank the gentleman for his comments.

Mr. QUIE. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I rise in support of the conference report on H.R. 6138, the Youth Employment and Innovative Demonstration Projects Act, I do so with some reluctance because of my deep concern about placing the Young Adult Conservation Corps under the authority of the Secretary of Labor. As many of us can recall, last session we passed a very similar program that unfortunately failed to meet the budget deadline in the Senate. This bill, like the conference agreement, established a Young Adult Conservation Corps. However, it placed the Corps under the authority of the Departments of Interior and Agriculture. It has long been my view that this is where the program ought to be located. It is as much designed to reduce the Nation's serious and massive backlog of conservation projects as it is to provide the Nation's young with employment opportunities. In many ways, the House bill of last session was an excellent solution to the combined problems of youth unemployment and our serious conservation needs. And it was to be operated in agencies which had the experience in operating both a conservation program and a program designed to involve youth in conservation. It was the House position again this year that the Departments of Interior and Agriculture, which now run the Youth Conservation Corps, would do a superior job in running an expanded effort.

Unfortunately, we were not too successful in holding our position.

While the conference agreement places the program under the authority of the Secretary of Labor, the language of the report specifically provides that the Secretary operate the program pursuant to interagency agreements with the Secretaries of Interior and Agriculture. Section 802 explicitly states that the "Secretary of Labor shall administer this title through interagency agreements with the Secretaries of the Interior and Agriculture."

All of the Secretary's administrative functions are, therefore, subject to interagency agreements, and, conversely, no part of the administration of the program can be done unilaterally, and no administrative function can be excluded, except by agreement, from this requirement.

For example, the conference report specifies that the selection of candidates be made from a list developed by the Secretary of Labor. However, section 802 requires that the procedure for selecting these candidates and their referrals will be made pursuant to an interagency agreement since this is, in every way, an administrative function. The law also specifically states that the Secretaries of Interior and Agriculture have the ultimate authority to select and place those referred from the Secretary of Labor's list of candidates in the various Corps centers.

I expect this arrangement to work out. This view does not come from the track record of previous administrations, however. The only experience we have in a similar interagency agreement has been the operation of the Job Corps, some of which has been worked through the Departments of Interior and Agriculture. The headaches that have resulted from disagreements between Labor, Interior and Agriculture makes me wonder why we have included the Department of Labor in this at all, and clearly we have not learned our lesson from the problems that have resulted from the operation of the Job Corps. However, I have been assured that this will not occur, but I will say that if we find that these agreements cannot be worked out then this House should revisit the Young Adult Conservation Corps a year from now and relocate it if necessary.

Outside of this one concern, I am pleased with the action of the conferees on the Youth Employment and Demonstration Projects Act. I believe the bill represents the House view that we ought to experiment and test certain assumptions before enacting a full-blown program. I am also pleased with the agreement arrived at on the application of the prevailing wage standards and I do believe that this conference report more clearly spells out the options available to local prime sponsors on the wage question. We have worked on this language for a considerable length of time, and I now believe that it is a fair and equitable solution to the problems of substitution and the need to make jobs available to young people.

Mr. Speaker, I would also like to take a moment to discuss a program now being completed by the Opportunities Industrialization Centers, Inc., of Philadelphia entitled the Career Internship Program—CIP. CIP has been operated by OIC under the auspices of the Office of Education and the National Institute of Education, and has operated out of an OIC-sponsored center in Philadelphia. The program has involved more than 250 of Philadelphia's hardest-core dropouts—ages 16–21—and has provided them with intensive motivational and career and job counseling, as well as intensive basic education and high school equivalency instruction.

This past May, NIE released its final report on this program. I have rarely seen such an enthusiastic evaluation. Of the 250 youths involved, more than 67 percent went on to continue their educations either by receiving a high-school equivalency certificate, or completing their regular high school, or going on to college. This was compared to a control group where only 13 percent accomplished similiar results. These promising results were achieved at a cost only slightly above the regular per-pupil cost in the Philadelphia school system or in the local vocational education program.

One of the important ingredients of this program has been the involvement of parents. One of the failings of our local urban school systems has been the negative attitude of parents toward the schools and their unwillingness to bear the responsibility of sound, basic education. The career intern program has succeeded in involving parents by producing results for their children whom they feel have been failed by the local school systems.

A second ingredient which is important is the involvement and cooperation of the local education agencies and the local school boards. It shows that local school officials are willing, if approached in the proper fashion, to look to alternative ways of approaching a very serious problem.

Clearly, the career intern program in Philadelphia has been the product of first, good planning. Second, good management, and third, high motivation of those involved. Obviously, it is not a program which can easily and readily be extended at the drop of a hat throughout the country. Nevertheless, prime sponsors who have the capacity and the interest to look at this approach, which is well documented in materials supplied by the National Institute of Education, ought to consider the possibility of establishing similar programs in their local communities with the help and advice of the

national office of the OIC and the Institute of Education.

It should be pointed out that OIC is not the only program that works through the theory of self-help and motivation. 70001, Limited, also operates an intensive high school equivalency program, counseling and job orientation program which have produced results similar to OIC's and can likewise work through prime sponsors.

The College of Human Services in New York has also developed a compelling approach. All of these efforts are ideally suited to both the youth incentive entitlement program and the general experimental provisions of subpart 3. If there was any year to test these various approaches, this is the year, and this is the program.

I urge the Members of this House to vote for passage of the bill, although I again want to point out my specific reservations concerning the administration of the Young Adult Conservation Corps.

Mr. Speaker, I yield such time as he may consume to the gentleman from Connecticut (Mr. SARASIN).

Mr. SARASIN. Mr. Speaker, I rise in support of H.R. 6138 and strongly urge the Members of the House to vote favorably on the conference report. Although the bill does not contain everything the Members of this body would want, it nevertheless represents, in philosophy and content, the House views on the nature and purpose of the youth employment program.

I do believe, however, that we have to spell out some explanation of the changes the conferees made, and, in particular, in the langugae of subpart 1 of part C. As the Members of this House may recall, this is language which largely derives from H.R. 6044, a bill I introduced earlier this session. In brief, it entitles part-time employment or full-time summer employment to economically disadvantaged youths who return to high school or its equivalent.

This program establishes a series of pilot projects to test the efficacy of entitlement or guarantee and the effects that such entitlement will have on increasing school participation and reducing youth unemployment. However, we have made some changes from the original bill, allowing greater administrative flexibility and more experimentation. One of these changes pertains to the requirement of entitling youths to an average of 20 hours of work or training a week instead of the original requirement of a maximum of 20 hours per week. This will provide greater flexibility in administration and enable youths to work full time in between school periods, or to arrange for differing work schedules to meet the various requirements of employers, educators, and youths.

In addition, it should be reiterated that this entitlement does not just mean a job per se. It can include additional or on-the-job training in addition to regular schooling.

In the case where youths do receive such training as part of the entitlement, the Secretary is obligated to provide some form of allowance or stipend for such youths of no less than the minimum wage while engaged in that training. In effect, the youths are entitled during the school year to receive an average of 20 hours of either work or training at no less than the minimum wage. It does not mean that the wage provisions of the bill do not apply to work being done, but it does mean that whenever employment and training is offered that the youths are entitled to receive some form of allowance or stipend for the training portion.

A second matter should be cleared up. Section 328(b) of the youth incentive entitlement pilot program contains language that says no funds for employment shall be used through a nonprofit organization/association, et cetera which were previously provided by a political subdivision or local educational agencies in the area where the project exists. This language is in addition to language that currently exists under section 605(b) of CETA which states that no funds will be used to provide such services which are customarily provided only by a political subdivision or local educational agency.

It was not my intent in the writing of this bill to include any stricter provisions in this program, and I want to make clear that it is not the intent of this particular standard to in any way require any additional assurances in the operation of the youth incentive entitlement project than would occur in any other program operated under the conference report. The intention of the words "previously provided" is not to say that if a local educational agency or political subdivision no longer is providing service that it may have provided 10 years ago that this cannot now be provided. What it really is intended to say is that if a local educational agency or political subdivision ceases to provide a particular service in anticipation of funding under this bill, then that would be improper. It is not designed to prevent services from being rendered that have not been provided in the very recent past. I do believe that this can be worked out by regulation, and I would find nothing wrong in having a similar regulation, which applies to the community conservation improvement projects programs and to the general employment and training programs, applied to those under subpart 1.

A third concern which has been expressed to me by officials of the Administration is a failure in the bill to specifically set aside funds for evaluation of the pilot projects of the youth incentive entitlement pilot projects. Inasmuch as this is a demonstration program, and an experimental program, it is clear that the Secretary may set aside funds sufficient to provide the Congress with a judgment on the success or failure of the incentive entitlement projects and feel that he can, and has, the authority to do so.

Additionally, funds will also be needed to assist prime sponsors in planning. This program is not one that can easily be established overnight and will require careful and extensive development. The Secretary should set aside not more than 2 to 3 percent of the funds for planning, although I would prefer he utilize as much as possible from his discretionary account. Any planning assistance, however, should not be awarded until after the Secretary has established a preapplication process to screen out primes who have the capability and desire to operate a youth incentive entitlement program and will devote some of their own resources to the effort. And then, the Secretary should make it clear to prime sponsors that any such assistance does not mean that their final application will be approved.

A fourth concern is the need to assure that the Secretary full-funds each pilot project to truly test the effect of entitlement and not to spread the funds so thinly that pilot projects run short of funds during the fiscal year. Accordingly, the conferees have added language in the statement of managers which specifically allows the Secretary to set aside a certain percentage of the funds into a kind of escrow account to allow for changes in local conditions and possible increased enrollment when the program goes into effect. It would be my feeling that the Secretary must set aside an amount sufficient to full fund each pilot project throughout the year. This would prevent the Secretary from having to request more funds from the Congress later on down the line.

A further concern relates to section 327 of the bill which outlines the criteria for the Secretary's approval of a prime sponsor application for a youth incentive entitlement project.

In my view, the criterion which requires selecting prime sponsors from differing areas and conditions is first and foremost. We expect the Secretary to operate projects under a variety of different circumstances, and should include projects in urban or rural settings, in large and rural communities, with differing unemployment rates, in differing regions of the country. We do not expect the Secretary to farm the program out to the regional offices: or to divvy them up on a region-by-region basis. This will only confuse the administration of the program and prevent speedy evaluation.

The latter two criteria, that is, the extent to which funds are developed for other titles and job restructuring, are questions for negotiation. For example, if prime sponsors can utilize titles I and III funds for additional services to youth, they should be allowed to do so if these services will lead to a young person's being employed. And, in connection with the third criterion, if prime sponsors have been successful in placing youth in existing jobs, then this criterion should be considered accordingly, particularly if the jobs are located in the private or private non-profit sector.

In sum, outside of the first criterion, the latter two are subject to discussion by the Secretary and the prime sponsor applying for a project. The Secretary is not to establish a specific quota or requirement beforehand.

And, finally, the bill does provide for involving youths between the ages of 19

and 25. I believe at least one project should involve this latter age group.

I am naturally pleased that both Houses have agreed to include my concept, which I believe goes to the heart of the youth unemployment problem. Yet I am even more pleased that we are viewing this as an experiment. All too often ideas which sound beautiful in theory fail in practice, and at least we have the awareness to realize that before moving to enact a permanent program we should find out what works and what does not. I look forward to a close working relationship with the administration in getting this program underway and in resolving whatever problems might arise along the way.

The conference agreement contains several other provisions which are in need of clarification.

Section 341 of the bill requires that the new subpart 3 programs are explicitly designed to be "supplementary to but not replacing opportunities available under title I of this act." Section 346(2) further states "but services to youth under this title shall not be reduced because of the availability of financial assistance under this subpart."

This language is intended to prevent prime sponsors from substituting these new and experimental funds for existing youth services. At the same time, we do not wish to "lock" prime sponsors into every specific program they now operate. This would undermine the essential flexibility of CETA and prevent primes from making adjustments in their plans to meet changing conditions. Therefore, primes should have reasonable discretion to make specific programmatic changes and modest changes in title I youth programs, if approved by the Secretary and only if those changes can be shown to be necessary to meet changing local needs.

The conference report also contains revised language on the payment of the prevailing wage provisions. The bill now contains several options to pay less than prevailing wage. But I remain deeply disturbed by the precedent we have established. We may well be paying 16-year-old youths $7 or $8 an hour when there are thousands of fathers and mothers working for less. There is an estimated 6 million adults who now work for the minimum. And I am curious to learn whether the administration plans to pay prevailing wages in its welfare reform proposal—for more than a million and a half individuals. A year from now we can really see what effect these provisions will have in opening up jobs to the unemployed.

I am pleased that the conference agreed to extend the veterans provisions to age 35. The original language emphasized only those to age 27, thereby excluding almost all of those who actually served in combat.

The Washington Post recently—June 28, 1977—carried an article, "Veterans of a Lost War," by Colman McCarthy, which portrays the disturbing and unhappy histories of 346 veterans from the Cleveland area who participated in the war. As Mr. McCarthy points out, a study done by John P. Wilson of Cleveland State University reveals that of the 346 combat veterans, almost half of the blacks are unemployed, and nearly 40 percent of the whites; 41 percent have alcohol problems, and over 60 percent have drug problems and a disturbing number have very poor self-images.

Almost all studied were over age 27. Current government policy has failed to understand the unique readjustment problems of Vietnam-era combat veterans, and this is particularly true of CETA. What we need is not public service employment for these veterans but an improved understanding of their needs and better use of existing programs. The Veterans' Administration now operates under title 38, United States Code, a wide variety of programs. Yet these have been underutilized by combat veterans, largely because there are few individuals in the field who either understand the problems of such veterans or know how to encourage their participation. CETA could and should be used to help. As the conference report states:

> . . . the interests of Vietnam era veterans would be served by improving the coordination of CETA . . . programs . . . with . . . those authorized under title 38, U.S.C. . . . [and] . . . the conferees expect the Secretary to provide the necessary technical assistance and other resources needed to improve prime sponsors' awareness of existing veterans programs . . . and to increase prime sponsors' understanding of the unique readjustment problems of Vietnam-era veterans.

In addition, such assistance could, and ought to include better and more effective utilization of existing programs, such as the "split job" concept under chapters 31, 34, and 35 of title 38, United States Code, thereby enabling veterans to better utilize their readjustment benefits. Other avenues of assistance to be pursued might include first, cooperative programs between CETA and the Veterans' Administration, particularly in the area of technical, vocational, or professional training; second, cooperative efforts with institutions participating in the serviceman's opportunity college programs and with the veterans cost of instruction program with national and local business and labor organizations; third, community mental health centers to assist in personal readjustment and motivational counseling, and, finally, involvement of community-based organizations with veterans self-help programs which have a real understanding of the Vietnam combat veterans.

And, finally, some concern has been expressed that there is a vast potential for utilizing military training facilities in our youth employment programs. I see no problem with this, particularly since an underutilized military training facility is a waste of tax dollars that could be effectively used by CETA prime sponsors.

In closing, I believe this bill represents a fair compromise of both the House and Senate approaches. I suspect that because it is complicated, there may be some start-up problems, but I am optimistic these can be worked out. A year from now we should be in a position to enact a truly comprehensive approach to the youth unemployment problem. If not then we should wait until we have the "returns" in our experimental approach. Therefore, with all of this in mind I urge the Members of the House to support passage of the conference report.

Mr. STOKES. Mr. Speaker, I rise in support of H.R. 6138, the Youth Employment and Innovative Demonstration Projects Act of 1977, which will provide employment and training opportunities for youth.

I know of the desperate need for this legislation by the mayors, county officers, and Governors who are sincerely trying to help solve the youth unemployment problem in the Nation. In my State and in my own district, I have seen the destructive results of hopelessness and despair which in turn leads to increased delinquency and crime. I have been deeply troubled by the alarming increase in the rate of unemployment among all youth in general and among minority youth in particular.

Mr. Speaker, because of these problems, in 1976 I introduced H.R. 15750, the OIC Youth Job Creation and Training Act. The bill was cosponsored by 37 Members of Congress. This legislation focused on the self-help process developed by Dr. Rev. Leon Sullivan in the past 13 years through Opportunities Industralization Centers—OIC—in 200 communities in 50 States. It pointed out the value of the OIC prototype for an alternative system of urban career education. This system, called UNEC was funded by the National Institute of Education—NIE—which has rated the results as highly successful and exceptionally valuable to the Philadelphia and Pennsylvania school systems.

My 1976 bill was revised—to eliminate objections to exclusivity and focus on OIC—and reintroduced in 1977 as H.R. 7376, the National Community-Based Organizations Youth Job Creation and Training Act of 1977. This bill's broadened concept provided a special program for financial assistance to national community-based organizations of demonstrated effectiveness, in order to provide 1 million new jobs and job training opportunities, and other purposes. It included by name not only OIC, but also the National Urban League, Jobs for Progress, and the recruitment training program.

Mr. Speaker, both bills, H.R. 15750 and H.R. 7376, were designed to provide some of the same types of programs found in H.R. 6138.

H.R. 6138 provides that the Secretary and prime sponsors should give special consideration in carrying out innovative and experimental programs to community-based organizations which have demonstrated effectiveness in the delivery of employment and training services, such as OIC, and so forth. My bill, H.R. 7376, provided for consultation with community-based organizations too.

Mr. Speaker, because of the similarity between my bill and H.R. 6138, I wish to go on record as endorsing it and urging the continuation and expansion of the involvement of community-based groups as an integral part of our national employment and training delivery system.

It is my hope that with the help of leaders like Dr. Sullivan we can develop a coordinated effort using the resources of the traditional school system with the resources of industry and community-based groups who are closest to the youth themselves and who have a track record of effective service to youth.

Mr. Speaker, I urge my colleagues to support H.R. 6138. It is clear that the dropouts, the pushouts, and the leftouts among our young people can be helped to make their way into the mainstream of American life, as responsible taxpaying citizens earning their own way by working on good jobs and developing good careers.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I know this is an insignificant question but I will ask it: How much does this bill cost?

Mr. QUIE. Your answer poses a bit of a problem since this is an authorization.

Mr. ROUSSELOT. What does the gentleman mean, it is a problem?

Mr. QUIE. Again, since this is an authorization bill, we cannot know exactly what the cost will be. This is up to the Appropriations Committee, which thus far has appropriated $1 billion.

Mr. ROUSSELOT. That is $1 billion?

Mr. QUIE. That is right, and we expect to have a supplemental for $500 million, but for now the figure is $1 billion.

Mr. ROUSSELOT. It is $1 billion. And how many youth will be employed as a result of this bill? What does the gentleman guess? I assume this was discussed some place as to how many would be employed. Does the gentleman know how many will be employed? Is that a bad question?

Mr. QUIE. Since this program includes a variety of experimental programs, and youth will be involved in part-time, or full-time work, or in training, a better question would be how many will be served. And again, it depends on the appropriations. But a $1 billion appropriation should serve at least 300,000 youth on a year-round basis—that is double what is happening under our public service employment program.

Mr. PERKINS. That is correct.

Mr. ROUSSELOT. Mr. Speaker, 300,000 for $1 billion? An excellent use of our resources.

Mr. QUIE. It will pay off.

Mr. WEISS. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from New York.

Mr. WEISS. Mr. Speaker, special appreciation is due Chairman CARL PERKINS and subcommittee Chairman AUGUSTUS HAWKINS for their continuing leadership in the area of employment legislation. Without their efforts this bill would not be before us today.

If I may, Mr. Speaker, I would like to address my remarks to the "special veterans' provisions" which appear in the conference report but which were not contained in the House-passed version of this legislation.

As the Members will recall, on March 29, 1977, during our consideration of H.R. 2992, the CETA extension, there was some discussion about creating a special preference for younger—under age 27—Vietnam-era veterans. At that time, it was the position of the members of this committee that the Vietnam-era veteran might be better served under the special consideration section of title III of CETA.

The Senate amendments to H.R. 6138 contained a special consideration provision for veterans who are 27 years of age or younger with two specific requirements: First, prime sponsors are directed to establish local goals, taking into account the number of qualified eligible veterans, for placement in job vacancies in public service employment programs; and second, representatives of veterans' organizations are to be invited to serve as temporary members of prime sponsor planning councils, the States manpower service councils as well as the National Commission for Manpower Policy.

In conference I moved that the House accept the Senate provision with an amendment that the age level of the veterans to be considered be raised to 35 years and that assurances be made in the development of local goals that the number of persons in other special categories be considered for placement as well. The amendment was accepted.

The rationale behind raising the age eligibility level is quite simple: If the level were left at age 27, we would find ourselves failing to serve those who had served in combat in Vietnam. According to the Veterans' Administration, the average age, today, of the Vietnam-era veteran is 30.5 years. We felt that it would be improper and unfair to exclude the vast majority of Vietnam combat veterans from the provisions of the special consideration amendment.

The special veterans' provision which is contained in this conference report is in keeping with the basic design of CETA title III which provides in section 301 (a) for additional manpower services to "segments of the population that are in particular need of such services including * * * persons which the Secretary (of Labor) determines have particular disadvantages in the labor market." It is an amendment which merits the approval of the House.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 356, nays 58, not voting 19, as follows:

NOT VOTING—19

Addabbo	Ertel	Rooney
Brademas	Flippo	Russo
Burke, Mass.	Holland	Stockman
Conyers	Horton	Teague
Davis	Howard	Zeferetti
Dent	Koch	
Dickinson	McKinney	

The Clerk announced the following pairs:

Mr. Burke of Massachusetts with Mr. Dickinson.
Mr. Brademas with Mr. Horton.
Mr. Addabbo with Mr. Holland.
Mr. Zeferetti with Mr. McKinney.
Mr. Russo with Mr. Koch.
Mr. Teague with Mr. Howard.
Mr. Rooney with Mr. Flippo.
Mr. Dent with Mr. Conyers.
Mr. Davis with Mr. Ertel.

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON INTERNATIONAL RELATIONS TO SIT DURING 5-MINUTE RULE ON THURSDAY, JULY 21, 1977

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations may be permitted to sit during the 5-minute rule on Thursday, July 21, 1977.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AUTHORIZING CORRECTIONS IN THE ENROLLMENT OF H.R. 6138

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the concurrent resolution (H. Con. Res. 291) to authorize certain corrections in the enrollment of H.R. 6138.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 291

Resolved by the House of Representatives (the Senate concurring), That in the enrollment of the bill H.R. 6138 the Clerk of the House of Representatives is hereby authorized and directed, in the enrollment of said bill, to make the following corrections: Namely, in section 804(b)(1), as added by section 101, strike out "this part" and insert in lieu thereof "this title"; in section 806(a), as added by section 101, strike out "this part" and insert in lieu thereof "this title"; in section 806(b)(3), as added by section 101, strike out "that the activities funded" and insert in lieu thereof "shall be employed in activities that"; in section 343(d)(2), as added by section 201, strike out "technical trade school" and insert in lieu thereof "technical or trade school"; in section 346, as added by section 201, insert the subsection designation "(a)" after "Sec. 346."; and in section 353(b)(6), as added by section 201, strike out "will be" and insert in lieu thereof "will not be".

Mr. HAWKINS (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the concurrent resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California for the immediate consideration of House Concurrent Resolution 291?

There was no objection.

Mr. HAWKINS. Mr. Speaker, this concurrent resolution is simply to make technical corrections as must be made in the enrollment of the bill H.R. 6138. I know of no objection to the resolution, and I ask for its approval.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on H.R. 6138.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 7171, AGRICULTURAL ACT OF 1977

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 666 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 666

Resolved, That upon the adoption of this resolution it shall be in order to move, sections 401(a), 401(b)(1), 402 and 303(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7171) to establish more responsive programs for the benefit of farmers and consumers of farm products; to extend and improve the programs conducted under the Agricultural Trade Development and Assistance Act of 1954, as amended; and for other purposes, and all points of order against section 1334 of said bill for failure to comply with the provisions of clause 5, rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the five-minute rule by titles instead of by sections. Immediately after title XII is read, it shall be in order to consider an amendment striking out title XII and inserting in lieu thereof the text of the bill H.R. 7940, said amendment if offered shall be considered as original text for the purpose of amendment and shall be read for amendment by sections, and all points of order against said amendment for failure to comply with the provisions of clause 7 of rule XVI and clause 5 of rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment made in order under this resolution. After the passage of H.R. 7171, the House shall proceed to the consideration of the bill S. 275, section 303(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, and it shall be in order in the House to move to strike out all after the enacting clause of the said Senate bill and insert in lieu thereof the provisions contained in H.R. 7171 as passed by the House.

The SPEAKER pro tempore. The gentleman from California (Mr. SISK) is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

AMENDMENT OFFERED BY MR. SISK

Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SISK: On page 2, line 21, insert after the period the following new sentence: "The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit."

Mr. SISK. Mr. Speaker, in explanation of this amendment, one sentence was inadvertently left out of the resolution, and this amendment is simply offered to correct that feature of the resolution.

The amendment was agreed to.

Mr. SISK. Mr. Speaker, House Resolution 666 provides for the consideration of H.R. 7171, the Agricultural Act of 1977. This is a fairly complex rule, containing several waivers. While there are a number of waivers, they are, for the most part, technical in nature.

The rule provides for 2 hours of general debate with the time equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture. The bill is to be read for amendment by title rather than by section.

The rule provides for several waivers of the Budget Act in order for the bill to be considered. This is necessary because H.R. 7171 contains violations of sections 303(a)(4), 401(a), 401(b)(1), and 402 of the Budget Act. Most of these violations, however, are merely technical since the Committee on Agriculture has indicated that it will offer floor amendments to correct all of the problems with one exception.

The one provision of the bill which will not be amended in order to meet Budget Act requirements concerns support levels for crop years beyond 1977. Section 303(a)(4) of the Budget Act prohibits the consideration of new entitlements to become effective in a fiscal year prior to the adoption of the first budget resolution of that year. For example, a bill containing a new entitlement to become effective in fiscal year 1979 cannot be considered in the House until the first budget resolution for fiscal year 1979 has been adopted.

H.R. 7171 sets target prices for certain commodities at one level for the 1977 crop, a higher level for the 1978 crop, and a yet higher level for the 1979 crop. Since support payments for a given crop year are made the following fiscal year, this provision creates some entitlements first effective in fiscal year 1978 for the 1977 crop, some in fiscal year 1979 for the 1978 crop, and some in fiscal year 1980 for the 1979 crop. Applying the requirements of section 303(a)(4) of the Budget Act, the fiscal year 1979 and fiscal year 1980 entitlements cannot be considered until after the first budget resolution for the appropriate fiscal year has been agreed to.

However, full compliance with the Budget Act in this regard would preclude consideration of new price support measures for a given crop year until after the crops are planted. Clearly, compliance in this case would be inconsistent with any sound farm policy. Consequently, the Budget Committee recommended that a waiver of section 303(a)(4) be granted. The Committee on Rules concurred with this recommendation and the rule contains the waiver.

As I stated earlier, the Committee on Agriculture has agreed to offer amendments to cure the Budget Act violations under sections 401 and 402 of the Budget Act. However, waivers are required in order for the bill to be considered.

Section 1315 of H.R. 7171 provides contract authority which is not limited "to such extent or in such amounts as are provided in Appropriations Acts," as required by section 401(a) of the Budget Act.

A number of provisions of the bill, including those relating to certain disaster payments, would violate section 401(b)(1) of the Budget Act because they would become effective upon enactment of the bill. Section 401(b)(1) provides that it shall not be in order to consider a bill containing new entitlement authority to become effective before the first day of the fiscal year which begins in the calendar year in which the bill is reported. Thus, the entitlement provisions in H.R. 7171 should not become effective before October 1, 1977—the first day of fiscal year 1978—since the bill was reported from committee in calendar year 1977.

Similarly, certain provisions of the bill contain authorizations that would become effective upon enactment of the bill. Since this could occur during fiscal year 1977, the provisions in question would violate section 402(a) of the Budget Act. This section provides that it shall not be in order to consider a bill authorizing the enactment of new budget authority for a fiscal year unless the bill has been reported by May 15 preceding the beginning of that fiscal year.

Mr. Speaker, this rule also waives points of order against the consideration of section 1334 of H.R. 7171 for failure to comply with the provisions of clause 5 of rule XXI which prohibits appropriations in a legislative measure. This is actually a technical violation since the language in question simply allows administrative funds to be used for transportation of non-Federal scientists to research meetings. The language appears on page 139, lines 22 to 25 of H.R. 7171.

The rule also makes in order the consideration of the text of H.R. 7940, the Food Stamp Act of 1977, in lieu of title XII of H.R. 7171. H.R. 7940 is to be considered as an original text for the purpose of amendment and it will be read for amendment by section. Two points of order are waived against the substitute. Clause 7 of rule XVI, the germaneness rule, is waived. This is necessary for two reasons: First, H.R. 7940 amends several laws which are not amended by the original bill, and second, H.R. 7940 is much broader than title XII of H.R. 7171. Clause 5 of rule XXI prohibiting an appropriation in a legislative bill is also waived. Again, this is a technical violation relating to the transfer of funds. The language in question appears on page 57 of H.R. 7940.

After passage of H.R. 7171, the rule makes in order the consideration of S. 275, the Senate Agriculture Act of 1977. A waiver of section 303(a) of the Budget Act is also granted for this bill because it, like the House bill, contains price supports for various commodities for fiscal year 1979 and fiscal year 1980.

Mr. Speaker, H.R. 7171 is a complex piece of legislation containing some 15 titles. It is the result of extensive consideration by the Committee on Agriculture. I do not plan to discuss at this point the various provisions of the bill as I am sure there will be ample opportunity for members to discuss those provisions during consideration of the bill. I urge my colleagues to adopt House Resolution 666 so that we might proceed to consideration of H.R. 7171, a vital piece of legislation not only for the agricultural community in this country but for the Nation as a whole.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. MOORHEAD).

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I rise not only in support of the rule but also in wholehearted support of the basic concept of H.R. 7171 and commend the chairman of the committee for his balanced approach in this legislation.

Mr. Speaker, I rise in support of a farm bill not because I am a representative of an agricultural district—my district is a strictly urban and suburban district.

Mr. Speaker, I rise in support of this legislation not because I am a member of the Agriculture Committee—I am not—I am a member of the House Banking, Finance and Urban Affairs Committee and more particularly as chairman of that committee's Subcommittee on Economic Stabilization whose primary function has been to monitor this Nation's continuing and serious inflation problem.

Based on the studies which I and the staff of the Economic Stabilization Subcommittee have made, we believe that, in the main, H.R. 7171 is not inflationary and will be of benefit to the consumers of urban areas such as I represent.

A healthy agrarian economy is essential to a healthy urban economy.

I hope that my friends from the rural areas will also agree that the reverse is true—that a healthy urban economy is absolutely essential to a healthy agricultural economy.

In this connection, farm legislation poses a unique problem of balanced assessment. It is the only significant case in which the law that we write can directly affect supplies and prices in an important sector of our economy while at the same time posing the problem of budgetary cost, which also bears upon inflation in its separate way.

Let me say at the outset that something must be going right. I can think of no better news for our people, and indeed for the people of the world, than the recent crop reports from the Department of Agriculture. We learned to our distress in the 1972–75 period that food prices are above all a function of supply. We did not get an explosion of prices at the supermarket until, for a variety of reasons ranging from Soviet purchases to poor weather, supplies of the major farm crops fell short of demand earlier in this decade. There is literally nothing on the inflation front of greater positive significance than ample crops in the United States, and I include in that statement all the other forces at work such as wage trends, the international exchange rate of the dollar, and the size of the budget deficit.

Now, fortunately, we have ample supply. Wheat is in hand and the feed grains and soybeans need only a reasonable amount of rainfall in the next 6 weeks. The declining commodity markets have been sending the message loud and clear, and it is a happy message for the crucial food component of our price indexes for at least 18 months to come. One major reason for this gratifying situation is our basic farm legislation, which is far superior to what it used to be.

The bill before us has many elements, some less desirable than others, but its salient feature is that it will continue the underlying philosophy begun in 1970 and carried to all the major crops in the 1973 act. This is the philosophy of a fairly low loan or support price; a higher and fictional target price, with accompanying cash payments to farmers as necessary to protect income and provide incentives to produce without affecting the price to the consumer; and a minimum of restrictions on production. I recognize that we shall probably have some limitations on wheat production for the next crop, but this reflects a truly huge surplus and does not change the underlying philosophy.

I am aware that the declining prices, which signal good news for consumers,

are hardly welcome to the grain producers. But while some of them are unquestionably suffering, we should remember the bulwarks to their income contained in present law and improved by this act. We can argue about the precise levels of loan and target prices, but the fact remains that the farmers are not left completely to the whims of an erratic free market.

The other side of the coin, of course, is budgetary cost. While the 1973 act has cost very little because of low supplies and high market prices until recently, the potential for sizable cost in the target price-cash payment system is there, and President Carter's concern is warranted. That issue is relevant to the specific provisions of this bill, crop by crop. I believe, for example, that the target prices for wheat and feed grains in the Senate bill are needlessly high and thus needlessly costly, and I think the same goes for the rice and cotton targets in the bill before us. But we should keep this matter in perspective.

In light of the various factors, how do we assess this bill? I believe that in those difficult gray areas of choice the urban Members of this house, whose concern, like mine, is primarily with the price level, should keep foremost in their minds the matter of supply. If it comes to a choice, it is worth spending more dollars as a kind of insurance policy that the crops will be planted. We should welcome, as one example, the new system contained in this bill of gradually moving up the target price for grains in line with the cost of production; what we want more than anything else is an assurance that those farmers out there will stay in business and plant the crops, and to do that they must have a reasonable prospect of making a profit.

We can also welcome other innovations in the bill such as the important and little noticed provision that opens up a special import quota for cotton if prices exceed a trigger point. This is a recognition that excessive price increases at a time of speculative boom can be bad for farmers as well as consumers. The Nation would have greatly benefited—including prices at the local clothing store—if we had had this provision 4 years ago.

I believe, as I mentioned, that the price targets are probably higher than they need to be in some cases. The Senate figure of $2.18 for corn, for example, could cost about $1.5 billion a year more than the House figure of $2.10 without much payoff in the form of greater insurance of a good crop. We do not need a cotton price as high as the 56 cents in the House bill, nor a target price of $8.40 for rice.

But overall, I believe we should welcome this bill and its underlying approach to the perennial farm problem. It maintains a good balance between assurance of supply and budgetary cost. This Nation has always had ample food, but we learned a few years ago what happens when domestic and world demand outruns a restricted supply. This bill provides, as much as legislation can, that we will not face that situation again. It is worth the price.

I urge adoption of the rule and passage of H.R. 7171.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is one of the most complicated rules to come before this House in this Congress. The rule includes eight waivers of points of order, and some of these waivers apply at several different points in the bill. Five of the eight waivers are made necessary because of violations of the Budget Act. In addition the rule makes it possible to combine two major bills, one dealing with agricultural programs and the other dealing with food stamps.

Mr. Speaker, I do not want to use any more time than necessary, and yet Members should be aware of the various provisions in this rule. Two hours of general debate are provided for the consideration of H.R. 7171, the Agricultural Act of 1977. The first lines of this rule include four waivers of the Budget Act. All of these waivers have the approval of the chairman of the Budget Committee.

Section 303(a) of the Budget Act is waived as it prohibits the consideration of new entitlements to become effective in a fiscal year prior to the adoption of the first budget resolution for that fiscal year. This requirement is violated by provisions in the bill which increase support levels for crop years beyond 1977. Full compliance with section 303(a) of the Budget Act would preclude consideration of new price-support measures for a given crop year until after the crops are planted. Such a result is not consistent with good farm policy, and therefore the waiver of section 303(a) is necessary.

Section 401(a) of the Budget Act is waived because it prohibits contract authority not subject to the appropriations process. Section 1315 of the bill provides contract authority which is not limited by appropriations, and therefore the waiver is necessary. In this letter approving this rule, the chairman of the Budget Committee stated that the Agriculture Committee has agreed to offer an amendment on the floor correcting this violation by subjecting the contract authority to limitations in prior appropriation acts.

Section 401(b)(1) of the Budget Act is waived because it prohibits new entitlements which become effective before the first day of the fiscal year beginning during the calendar year in which the bill is reported. Under this provision, no entitlements in this bill should take effect before October 1, 1977. There are entitlements in this bill which could take effect before October 1, 1977, and therefore the waiver is necessary. Again, the chairman of the Budget Committee has indicated that the Agriculture Committee has agreed to offer a floor amendment curing this Budget Act problem by making these sections effective on October 1, 1977.

Section 402(a) of the Budget Act is waived. This is the May 15 reporting deadline for authorizations. It is waived as there are authorizations in this bill which would become effective upon enactment. Since this could occur during fiscal 1977, the bill should have been reported before May 15, 1976, in order to comply with the Budget Act. Therefore the waiver is necessary. Again it is my understanding that the Agriculture Committee will offer floor amendments to cure the violation by making the provisions in question effective on October 1, 1977.

In addition to these Budget Act waivers, the rule waives points of order against the bill for failure to comply with clause 5, rule XXI, which prohibits appropriations on a legislative bill. The waiver is necessary because section 1334 of the bill allows administrative funds to be used for a new purpose without being appropriated for that purpose.

Under the rule H.R. 7171 will be read for amendment by titles instead of by sections. It is in order to offer H.R. 7940, the Food Stamp Act as an amendment to title XII of the agriculture bill.

Two waivers are necessary in order to allow the food stamp bill to be offered. First, part of the food stamp bill is not germane to the title which will be amended. Therefore it is necessary to waive clause 7, rule XVI, the germaneness rule, in order to allow the food stamp bill to be offered as an amendment.

In addition the food stamp bill transfers funds to new purposes, without the funds being appropriated for the new purposes. This violates clause 5 of rule XXI which prohibits appropriations on legislation. Therefore the waiver is necessary.

Finally, Mr. Speaker, in order to expedite going to conference, the rule makes it in order to insert the House-passed language in the Senate bill. And even at this point, one last waiver of the Budget Act is required. The Senate bill includes the same violation of section 303(a) of the Budget Act that was in the House bill. Therefore, it is necessary to waive section 303(a) of the Budget Act in order to permit consideration of the Senate bill.

Mr. Speaker, the length of this explanation only underscores the complexity of this rule. And yet if we are going to combine the agriculture bill and the food stamp bill in one package, this kind of rule is necessary.

Mr. Speaker, the problem with combining agricultural programs and food stamp programs is that the farmer always receives the blame for the whole cost of the bill, when in fact a large portion of the cost results from the food stamp program.

Mr. Speaker, while exact cost projections are impossible because of the numerous variables in both of these programs, the committee estimates that the agricultural programs will cost between $5 and $6 billion, while the food stamp program is estimated to cost $5.3 billion. Others have estimated that the cost of the food stamp bill will in fact be higher.

One of the most objectionable parts of this food stamp bill, Mr. Speaker, is the elimination of the purchase require-

ment for food stamps. Recipients of food stamps will no longer have to pay their own money to receive food stamps.

Mr. Speaker, I oppose the elimination of the purchase requirement for food stamps.

Mr. Speaker, I have two requests for time. I yield 1 minute to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I rise in opposition to the rule. The Committee on Rules is supposed to be traditionally the traffic cop of Congress. It is supposed to present us with a means to consider legislation in an orderly manner.

The gentleman from Ohio (Mr. LATTA) has just detailed the waivers and mangling of the Rules of the House that this rule entails. But I want to call to the attention of the House even more forcefully to the deep cynicism that allows a rule to come out that marries two disparate issues such as the food stamp program and Federal agricultural policy in one bill. Either of these two issues standing alone is of such great importance to the United States as a whole that it is a great disservice to every Member of this House to glue them together in this Rube Goldberg fashion, denying the rights of Members to consider each issue as it should be.

The food stamp issue alone has been studied by many Members of the House for a long period of time. The gentleman from Illinois (Mr. MICHEL) has more than 100 sponsors of his bill to bring about fundamental reforms; yet we are told by the provisions of this rule that we have got to cram it all together and consider it in this manner. I think that is not the proper manner in which to consider this legislation. I say that as one who represents a district in which national farm policy is of the greatest importance to the many people whose lives, directly or indirectly, depend on farming and related business. These same people have repeatedly indicated their support for far-reaching reforms in the food stamp program. This rule will not allow proper consideration of either of these important issues. I personally believe these issues have been joined for the sole purpose of gaining urban Members support for the farm portions of the bill, traditional log rolling at its worst.

Mr. Speaker, I urge defeat of the rule in its present form so that we may have a more orderly and proper procedure.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Idaho (Mr. SYMMS).

Mr. SYMMS. Mr. Speaker, I rise to speak in opposition to this rule. I think the rule is an unholy marriage between two different subjects. This is a mistake for the House to be trying to merge them here, today in this legislation. For that reason I oppose the rule.

Mr. PHILLIP BURTON. Mr. Speaker, will the gentleman yield?

Mr. SYMMS. I yield to the gentleman from California.

Mr. PHILLIP BURTON. I thank the gentleman for yielding.

I am shocked.

Mr. LATTA. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, title XIV of the bill provides some important initiatives for the development and application of renewable energy resources for agriculture. This title includes the provisions of Farmers Home Administration farm ownership and operating loans to incorporate solar systems in farm buildings and operations, additional USDA research and extension efforts in the solar field, and a major new program for solar energy demonstration farm projects. The author of these provisions, the gentleman from California (Mr. BROWN) and the members of the House Agriculture Committee are to be commended for incorporating this new legislative authority into H.R. 7171.

Food and fiber production costs in this country have risen drastically as a result of energy price increases. This, along with the energy supply problems that have occurred in the past and may recur with more severity in the future are providing substantial incentives for the use of alternative energy sources. It has been estimated that as much as one-third of the total energy used directly in U.S. crop and livestock production goes into applications that may already be within reach of current technologies using other than fossil fuels as a form of energy. Irrigation alone may be using one-fourth of all energy going directly into agricultural production. The potential for energy substitution in agriculture is great and the need for further development is clear.

Solar energy and energy derived indirectly from solar radiation are significant renewable resources on which development efforts must be expanded. There are, however, other renewable resources beyond the bounds of solar that are showing great promise for a variety of applications. I fully understand that the committee intends the definition of the term "solar energy" to be a broad one. But, under the definition contained in H.R. 7171, solar energy is limited to solar heating and cooling, the growing of crops for various bimass technologies, and possibly wind power. However, the definition does not include biomass that utilizes garbage as a fuel; low-head hydroelectric dams that can run off of creeks, small rivers and irrigation ditches; electric vehicles; fuel cells; geothermal energy and other technologies that offer such great potential.

Adoption of alternative sources of energy does not occur unless those sources are reliable and economically competitive. Many of the technologies I have just mentioned are both. There is another factor, though, that is equally important—incentive. The incentive to apply the new technology must be there before it will be adopted.

We are all aware that, unfortunately, Farmers Home Administration has not actively perused solar energy programs until recently when HUD adopted their minimum standards for solar installation. However, Congress can take a major step forward toward assisting and encouraging responsible movement forward not only in the solar area but in the entire area of nonfossil energy by providing Farmers Home and their rural clients with adequate incentives for the adoption of workable alternative energy technologies. I will be offering an amendment to accomplish this. In addition to broadening the scope of title XIV to include all nonfossil forms of energy, my amendment will provide the necessary incentive to Farmers Home Administration by directing the Administrator to fund, on a priority basis, applications that include the use of nonfossil sources of energy.

Under my amendment, the Secretary of Agriculture would be required to coordinate with the Energy Research and Development Administration and other appropriate agencies to obtain assistance in acquiring the information necessary on nonfossil energy technology to enable Farmers Home Administration to develop equipment and performance standards which could be used as a basis for approval or denial of client applications. The Secretary would also be authorized and directed to foster the development of nonfossil energy technology and encourage its practical application through cooperative programs with ERDA and other agencies.

I believe this amendment will broaden and strengthen the provisions of title XIV in ways that will further our objectives for broad scale adoption of workable nonfossil energy technology, and I urge the support of my colleagues in this effort.

Mr. SISK. Mr. Speaker, I urge the adoption of this resolution. It is not without precedent to consider the agricultural extension along with food stamps. I think that it is a matter in which under this rule all elements can properly be considered and amendments will be in order, as well as a motion to recommit. Therefore, I question as to whether my friends have as much to cry about as they may feel.

Mr. Speaker, I urge the adoption of the resolution and move the previous question on the resolution as amended.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution, as amended.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SYMMS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 367, nays 38, not voting 28, as follows:

[Roll No. 439]

NOT VOTING—28

Addabbo	Fish	Rooney
Badham	Flippo	Russo
Brademas	Holland	Stockman
Burke, Mass.	Horton	Teague
Conte	Howard	Waxman
Davis	Ketchum	Yates
Dent	Koch	Young, Alaska
Dickinson	McKinney	Zeferetti
Erlenborn	Murphy, N.Y.	
Ertel	Pattison	

The Clerk announced the following pairs:

Mr. Burke of Massachusetts with Mr. Horton.

Mr. Addabbo with Mr. Dickinson.

Mr. Rooney with Mr. McKinney.

Mr. Brademas with Mr. Koch.

Mr. Zeferetti with Mr. Howard.

Mr. Russo with Mr. Flippo.

Mr. Teague with Mr. Ertel.

Mr. Dent with Mr. Holland.

Mr. Davis with Mr. Conte.

Mr. Murphy of New York with Mr. Badham.

Mr. Pattison of New York with Mr. Ketchum.

Mr. Waxman with Mr. Ketchum.

Mr. Yates with Mr. Erlenborn.

Mr. Stockman with Mr. Young of Alaska.

So the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. FOUNTAIN. Mr. Speaker, the CRT indicates that I am not recorded on rollcall No. 437, the military construction bill. I would like the RECORD to show that, had I been recorded, I would have voted for the bill.

AGRICULTURAL ACT OF 1977

Mr. FOLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7171) to establish more responsive programs for the benefit of farmers and consumers of farm products; to extend and improve the programs conducted under the Agricultural Trade Development and Assistance Act of 1954, as amended; and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. FOLEY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 7171, with Mr. EVANS of Colorado in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Without objection, the first reading of the bill will be dispensed with.

Mr. BAUMAN. Mr. Chairman, reserving the right to object, I do so only to ask the distinguished chairman of the Committee on Agriculture this question: If the first reading is dispensed with, is it then the gentleman's intention that the Committee will rise?

Mr. FOLEY. If the gentleman will yield, it is my intention that if the first reading of the bill is dispensed with, I will move that the Committee do rise.

Mr. BAUMAN. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Without objection, the first reading of the bill is dispensed with.

There was no objection.

The CHAIRMAN. Under the rule, the gentleman from Washington (Mr. FOLEY) will be recognized for 1 hour, and the gentleman from Virginia (Mr. WAMPLER) will be recognized for 1 hour.

The Chair recognizes the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WEAVER) having assumed the chair, Mr. EVANS of Colorado, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7171) to establish more responsive programs for the benefit of farmers and consumers of farm products; to extend and improve the programs conducted under the Agricultural Trade Development and Assistance Act of 1954, as amended; and for other purposes, had come to no resolution thereon.

ANNUAL REPORT OF SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION FOR 1976—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. WEAVER) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Public Works and Transportation:

To the Congress of the United States:

I herewith transmit the Annual Report of the Saint Lawrence Seaway Development Corporation for 1976. This re-

port has been prepared in accordance with Section 10 of the Saint Lawrence Seaway Act of May 13, 1954. This report covers the period January 1, 1976 through December 31, 1976, prior to the commencement of my term of office.

JIMMY CARTER.

THE WHITE HOUSE, *July 19, 1977.*

TWO NEW RESCISSIONS PERTAINING TO FOREIGN MILITARY CREDIT SALES PROGRAM AND GENERAL SERVICE ADMINISTRATION'S FEDERAL BUILDINGS FUND, AND ONE NEW DEFERRAL RELATING TO DEPARTMENT OF DEFENSE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–188)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith propose two new rescissions totalling $96.1 million in budget authority and report one new deferral of $12.5 million in budget authority.

The rescission proposals pertain to the foreign military credit sales program and the General Services Administration's Federal Buildings Fund. The new deferral relates to the Department of Defense, Uniform Services University of the Health Sciences.

I urge the Congress to act favorably on the rescission proposals.

JIMMY CARTER.

THE WHITE HOUSE, *July 19, 1977.*

RESCISSIONS RELATING TO PROCUREMENT FUNDS FOR B–1 BOMBER AND SHORT-RANGE ATTACK MISSILE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–187)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith propose rescission of $462.0 million in procurement funds appropriated to the Department of Defense for the B–1 bomber. In addition, I am proposing rescission of $1.4 million provided to the Department of Defense for procurement of the short range attack missile (SRAM–B).

The details of the proposed rescissions are contained in the attached reports.

JIMMY CARTER.

THE WHITE HOUSE, *July 19, 1977.*

A SUCCESSFUL PROGRAM IN INTERNATIONAL COOPERATION

(Mr. PRICE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PRICE. Mr. Speaker, in 1958 the Joint Committee on Atomic Energy proposed and the Congress adopted legislation encouraging international cooperation in the peaceful uses of nuclear energy. The legislation, known as the Euratom Cooperation Act of 1958, instituted a cooperative program between the United States and a group of six European nations to develop the peaceful uses of nuclear power. We were outstandingly successful in attaining the objective of encouraging the peaceful uses of nuclear power as a review of the situation in Europe will disclose.

The degree of success we attained is indicated by the title of an article in the July 1977 issue of Nuclear Engineering International. The title of the article to which I refer is "Europe Outpacing U.S." I would like to include the article at the conclusion of my remarks for the information of all of those interested in the peaceful uses of nuclear energy.

I would like to highlight a few of the accomplishments in this successful international cooperation program. Under the program, the first system for safeguarding nuclear material from diversion for other than peaceful purposes was developed. Of course, such safeguards only have meaning when they are applied on an international basis.

Under the Euratom program, the technology for the safe use of nuclear energy in the civilian economy was advanced both in Europe and the United States. Our industry was advanced a great deal under the program while at the same time, the benefits of the peaceful atom were brought to our foreign friends.

The group of nations who worked with on this program are now advancing at a faster rate than we are in realizing the benefits of nuclear energy. The nine nations that comprise what is now known as the European Economic Community, have made the financing of electricity producing facilities, especially nuclear, a priority goal in their energy program. As indicated in the article which follows, the European Community is now expanding their nuclear capacity at a faster rate than we are.

The importance which the Europeans attach to this prime energy source is also indicated in the buildup of the equipment industry in Europe to supply the increased nuclear generating capacities. This increased industrial capacity, of course, is taking over from American industry. The American share of the European market has, in fact, dropped from 64.5 percent in 1967 to 54 percent at the beginning of 1977.

In my view, the important point these developments convey is that the United States can provide and in fact has provided, the leadership for the peaceful uses of nuclear energy under properly safeguarded conditions. My concern is that the policy now being advocated is tending to isolate the United States from the international community and, thereby, foreclosing our ability to contribute to the safeguarding of nuclear material. I have expressed my views on this matter in a statement which is printed on page 19861 of the June 20, 1977 RECORD.

Excerpt from Nuclear Engineering International, July 1977, follows:

EUROPE OUTPACING UNITED STATES

New statistics published by the EEC Commission in Brussels illustrate the growing need in Europe for reliable supplies of enriched uranium.

At the end of last year 57.9 per cent of the EEC's nuclear power was produced by reactors using enriched uranium and 39.2 per cent from natural uranium.

But taking into account current nuclear building programmes dependence on enriched uranium will soon rise to 86 per cent.

The table below (top) shows nuclear power stations under construction and in service in the community at the end of 1976.

The Commission's survey says that when current construction programmes are completed reactors of between 600 MW and 999 MW will account for 56.9 per cent of the EEC's capacity.

Despite many set-backs, the countries of Western Europe are expanding their nuclear capacity at a faster rate than the U.S.

America's share of overall nuclear equipment fell from 64.5 per cent in 1967 to 54 per cent on Jan. 1, 1977 while W. Europe's share rose from 22.3 to 26.3 per cent.

The bottom table shows the nuclear capacities and growth rates on a world scale.

NUCLEAR STATIONS BEING BUILT IN THE EEC

	Total		In service		Under construction	
	MW	Percent	MW	Percent	MW	Percent
			1976		1977	
			MW	Percent	MW	Percent
Total power	61,338	100.0	16,931	100.0	44,407	100.0
Natural uranium reactors	6,633	10.8	6,633	39.2		
Enriched uranium reactors	52,727	86.0	9,800	57.9	42,927	96.7

Average rate of increase, percent

	Total		In service		Under construction	
	MW	Percent	MW	Percent	MW	Percent
			1976		1977	
			MW	Percent	MW	Percent
BWR	8,493	13.8	2,171	12.8	6,322	14.3
PWR	37,266	60.8	6,552	38.7	30,714	69.2
Advanced	532	0.9	194	1.1	338	0.8
AGR	6,463	1.5	833	5.2	5,535	12.5

CAPTIVE NATIONS WEEK: DOUBLE STANDARD ON HUMAN RIGHTS

(Mr. McDONALD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McDONALD. Mr. Speaker, each year since 1959, the President of the United States, in accordance with traditional American concern for human rights and the wishes of this House, has declared the third week of July to be commemorated as "Captive Nations Week."

This year, for the first time, our President has ignored the captive nations and enslaved peoples of the world held hostage by the Communist powers.

This sudden neglect is made even more appalling by the President's well known, publicly expressed concern for human rights. We had every reason to believe that a Presidential proclamation of Captive Nations Week would be forthcoming. However, only last Friday, one Greg Treverton of the National Security Council, acting as an administration spokesman advised the National Captive Nations Committee that no proclamation would be forthcoming.

The excuse given by Greg Treverton was incredibly cynical: he said that as the President's position on human rights was well known, it was unnecessary for him to honor the tradition of Captive Nations Week. This ridiculous and insulting statement was repeated to my staff yesterday, July 18, by designated Assistant Secretary of State Patricia Derian who added,

> I vaguely recollect recommending that the President issue a proclamation in support of captive nations, but I'm not overly concerned that he hasn't. It's not as if we were sending money to Chile.

This "radical chic" double standard shows more concern for a handful of Marxist terrorists locked up in Chile than it does for the millions in the Soviet slave labor camps and in the forced labor camps of Red China, Vietnam, Cambodia, Laos, and Cuba and the tens of millions murdered in the name of Communist imperialism.

I intend to make a longer statement during the Special Order on Captive Nations Week tomorrow, but I feel it is necessary to express my shame at the callous disregard for human rights' in the Communist-dominated countries by this administration.

I urge my colleagues, particularly those of my own Party, to join with me in asking the President to fulfill his responsibility to America's traditions of freedom and hold to the duty imposed upon him by Public Law 86–90 passed by joint resolution in 1959.

ALABAMA DOES CARE ABOUT ITS RURAL POOR

(Mr. EDWARDS of Alabama asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of Alabama. Mr. Speaker, yesterday we were treated once again to an anti-South article, this one written for the Washington Post by Colman McCarthy. It was Alabama's turn this time as subject of an uncalled-for story about the people of my State. It left the impression that Alabama just does not care about its rural poor. Nothing could be further from the truth.

Well, Mr. Speaker, we certainly know we are not perfect. We know we have much to do for our people. We know that we have people who live in poverty. And we do not need Colman McCarthy to tell us about it. But we have made great progress and we will continue to go forward notwithstanding Mr. McCarthy.

In Mobile County, for example, the county from which Mr. McCarthy launched his tirade, new industry is coming in great numbers. We have attracted $1 billion in new industry over the last 4 years, an amount equal to all the new industry brought into Mobile County over the last 50 years. The Tennessee-Tombigbee Waterway which so many antiprogress types have fought is now under construction through one of the poorest sections of this country, and thousands of jobs will be created in rural Alabama. Some 3,500 of these jobs will be available in Mobile County by the mid-1980's. Monroe County, a very rural county in southwest Alabama led the entire State last year with over $300 million in new industry, accompanied by new job opportunities for the rural poor.

An oil refinery under black ownership is getting underway in Tuskegee with the full support of our State government and our congressional delegation.

Plowing behind mules may offend Mr. McCarthy but it surely beats sitting around feeling sorry for ourselves. Eating okra may turn Mr. McCarthy's stomach, but it is standard fare all over the country. It is served almost daily in our Nation's Capital. And cutting wood for papermills may not seem like fun to Mr. McCarthy but it is big business in rural Alabama, and it surely beats waiting for the next welfare check.

Yes, the spirits of our people "are marked by resilience and stubborn faith in their own capabilities," and we do not expect outsiders of Mr. McCarthy's persuasion to understand that at all.

But our people do have that faith, and they believe in the present and in the future. The early 1960's referred to by Mr. McCarthy are times of the past in Alabama, and our people know it. Our rural poor are impatient for a piece of the pie, as are all poor people, but they know that the leaders of our State are working night and day to improve their lot. In the meantime, they are not looting their neighbor's stores or burning local businesses when the lights go out.

I am proud of our people. I am proud of the progress that we in Alabama are making. And I am doubly proud of the ability of our people to survive amid poverty, to plow behind mules, to enjoy okra, to provide wood for papermills, to express their resilience and stubborn faith in their own capabilities in such a way that even Colman McCarthy can see it.

There is a "new South" in rural Alabama today, a new spirit and a new progress that Colman McCarthy evidently cannot see. We are no longer waiting for change, we are working for it.

TRIBUTE TO HERBERT W. JOHNSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. BROYHILL) is recognized for 60 minutes.

Mr. BROYHILL. Mr. Speaker, all members of the North Carolina congressional delegation lost a real friend with the untimely passing on July 6 of Herbert W. Johnson, director of the Winston-Salem Regional Veterans' Administration Office. For more than 31 years, Herb, as we all knew him, served the veterans of North Carolina and across this Nation in an outstanding manner. He will be sorely missed by all of us.

I have had the privilege of knowing Herb since I was first elected to serve in the House of Representatives in 1962. He had been appointed as assistant director in the Winston-Salem office the year before and shortly after my election he offered his services to assist my staff and me in any way he could. This established the foundation of our friendship, and the service and cooperation he gave to my staff and me continued until his death 2 weeks ago.

In 1972, Herb's accomplishments and outstanding qualifications were recognized by the Administrator of Veterans Affairs and he was appointed as director of the Winston-Salem office. Herb and I continued our close relationship and I always felt I could call him personally with any problems or difficulties that might arise. During his tenure, Herb not only served in the best interests of the Veterans' Administration but he served in the best interests of individual veterans as well. He was constantly cognizant of the problems and needs of veterans and he never refused to speak to any veteran who called on him personally. His unselfish devotion to helping needy veterans and their survivors will not be easily forgotten.

It was only a short time ago that several farm co-op veteran students in my congressional district applied for additional educational benefits. They had previously completed farm co-op training but felt that their requests were justified since many new courses had been added to the curriculum that would benefit them. Herb called me to say that he believed that these benefits could not be authorized under current regulations but he wanted the Central Veterans' Administration office to review his decision to insure that every possible consideration was given to these individual veterans. Several weeks later, Herb called to say that he had been notified by the Central Office that these benefits could be granted and he stated he was pleased he asked for the review. Few men would ask their superiors to look over their actions but Herb did. He was a humble man and a very fine director.

This was typical of Herb, he always wanted each Member of Congress to know about any problems or difficulties veterans in his district were experiencing. Many, many times he alerted our offices

even before these problems were brought to our attention by the individual veterans. Herb's untiring dedication and devotion to the veterans of our State paid off in the excellent reputation that the Winston-Salem office had among other regional offices and veterans groups everywhere. I have always reminded veterans in my district of how fortunate they were to have their regional office under such fine guidance and leadership.

Herb's job did not end at 5. Many, many nights he worked on the problems of veterans and their families. Then, remarkably, he also found time to be a civic leader in the community. He was an active member of the American Legion, VFW, AMVETS, and the Winston-Salem Chamber of Commerce. He served as the Federal Coordinator for the Combined Federal Campaign for Forsythe County and he was also a member and past president of the Twin City Kiwanis Club, the North Carolina Federal Personnel Management Council, and the Winston-Salem Federal Council. Herb also served as a member of the Governor's Committee on Jobs for Veterans and was the director of the Winston-Salem Urban League. Herb's high caliber of achievement was displayed in his civic dedication.

Nothing meant more to Herb than doing his very, very best in service to our Nation's veterans. I know that his colleagues in the Winston-Salem office and every one who knew him joins with me in this tribute to a man who was such a fine example of a devoted unselfish civil servant. His tireless efforts in behalf of the veterans in North Carolina and across this Nation will not be forgotten.

My heartfelt sympathy is extended to Herb's wife, Mary, and his son, John. I have lost a real friend.

Mr. FOUNTAIN. Mr. Speaker, I would like to associate myself with remarks of my distinguished colleague, the gentleman from North Carolina (Mr. BROYHILL) over the death of Mr. Herbert Johnson. The veterans of North Carolina lost a respected friend recently with the passing of Herbert W. Johnson, director of the Veterans' Administration Regional Office in Winston-Salem, N.C.

For over 17 years, Herb Johnson ably served the veterans of the Winston-Salem region. His over three decades of service with the Veterans' Administration and his knowledge of North Carolina and its people gave him a special insight into the veterans of our area and the many problems which they often encounter after their service discharges.

In helping veterans with matters related to employment training, education, or health, Herb Johnson gave unselfishly of himself. He was always willing to go the extra mile in making sure that each and every veteran got a fair shake. On countless occasions, Herb Johnson's personal attention to a veteran's problem resulted in an expeditious, often favorable, disposition of that veteran's case.

Mr. Speaker, Herb Johnson will be missed by both me and my staff. But, more importantly, his loss will be felt the heaviest by his survivors and by all the many veterans with whom he has come into contact through the years.

My staff joins me in expressing our sincerest condolences to Mrs. Johnson and the family.

Mr. PREYER. Mr. Speaker, so often we hear the complaint that Government workers are not responsive to the needs of the average man on the street who has to find his way through the maze of Government regulations. There was one very great exception to this criticism in the person of Herb W. Johnson, director of the VA Regional Office in Winston-Salem, N.C., until his sudden death on July 6, 1977, of a heart attack.

Herb Johnson was that rare individual with the unique capabilities of administering the programs of a large regional office and at the same time giving individual attention to the problems of each veteran whose case came before him. My office staff and I have dealt with Herb Johnson on matters affecting veterans for approximately 8 years, and we always found him to be not only immediately attentive to the query but also completely dedicated to the cause of resolving the issue to the benefit of the veteran if at all possible under the law and rules and regulations of the Department.

He was a man of the highest integrity, dedicated to the service of his fellow man in general and to the veteran in particular. Herb Johnson will be greatly missed by those who worked for and with him and by those for whom he so diligently labored for 31 years—the veteran.

Our heartfelt sympathies are extended to Herb's family as are our thanks for his dedicated service.

Mr. JONES of North Carolina. Mr. Speaker, I am sure many Members of Congress were saddened to learn of the untimely passing of Herb Johnson, director of the Veterans' Administration Regional Office in Winston-Salem, N.C. All Members through necessity from time to time are called upon to contact the various, multiple agencies of this Government. In most cases the agencies are courteous and attempt to satisfy our requests. But those Members who had occasion to contact the Winston-Salem, N.C., Veterans' Office I am sure, will agree that no one could have been any more understanding and cooperative than Herb Johnson. Although I did not have the pleasure of knowing him intimately, I could not help but feel that he was a personal friend based on our multiple telephone conversations.

Certainly the Members of Congress have lost a dear friend and the military veterans likewise, for he seemed to give every case his personal attention and usually went the extra mile.

To his family and his many friends, I offer my condolences, and sincerely feel that I have lost a personal friend.

Mr. NEAL. Mr. Speaker, countless thousands of North Carolinians have been saddened by the death of Herbert W. Johnson. At the time of his passing, Mr. Johnson was director of the regional office of the Veterans' Administration in Winston-Salem. He had served in that capacity, and as assistant manager of that office, for 17 years. His career with the Federal Government spanned more than 31 years, not including 3 years of active duty with the U.S. Navy during World War II.

Herb Johnson spent most of his adult life in the bureaucracy, yet one would never describe him as a bureaucrat. He was a public servant in the finest sense of that word. Any member of the North Carolina and South Carolina delegations can attest to the integrity with which he administered the affairs of the regional office. I, perhaps more than any member of the delegations, know of his personal accessibility, because during most of my first term, the district congressional office and the VA office were in the same building. There was never a time when Herb Johnson was not available. There was never a problem too trivial to merit his attention; never a situation so complicated that he ducked his responsibility to deal with it. If it could be done, within the law, Herb Johnson did it. If it could not be done, Herb told you why regulations would not permit it.

It was inevitable, with such a large constituency, that Herb Johnson became known to thousands of veterans, their dependents, and their kinsmen. I believe he was seen by them as a man of impartiality, fairness, and compassion. Those few who harbored grievances did not lay the blame at Mr. Johnson's door. They regarded him as their friend and their advocate.

His reputation as a citizen in his own community was an enviable one. He was very active in service and civic organizations. He was a member of The American Legion, Veterans of Foreign Wars, and AMVETS. He was a member of the Winston-Salem Chamber of Commerce, past president of Twin City Kiwanis Club, and a director of Winston-Salem Urban League. He was a member and past president of the North Carolina Federal Personnel Management Council, and past president of the Winston-Salem Federal Council. He served on the Governor's Committee on Jobs for Veterans and was a member of Ardmore Baptist Church.

He was, in many ways, the Federal Government's most visible representative in North Carolina. His devotion to duty and the compassion and understanding with which he carried out the tasks inherent in his position greatly enhanced the image and reputation of the Federal Government, and the Veterans' Administration in particular.

We who worked almost daily with Herb Johnson's office shall certainly miss him. So, too, I am sure, will the thousands of North Carolinians and South Carolinians who benefited from his exceptional service, and his many friends and acquaintances who simply knew and admired the character of this extraordinary man.

Mr. MARTIN. Mr. Speaker, with a sense of genuine loss, I wish to take this opportunity to pay tribute to Herbert W. Johnson who served our Government over an extended number of years and most recently with the Veterans' Administration as regional director of the office in Winston-Salem. His untimely passing has taken from us a dedicated and highly esteemed individual.

We, in the North Carolina delegation,

have lost a friend, one who was devoted to duty and one who executed his responsibilities in a highly exemplary manner, responding with diligence to the tremendous volume of inquiries relating to veterans' matters as they were received from our constituencies.

Herb Johnson will be missed not only by us, by his capable and cooperative staff and those who were closely associated with him in his work, but also by the community which he served willingly and to which he made outstanding contributions. His generous activities are well known and widespread.

My deepest sympathy is conveyed to his family. They will be blessed with comforting and treasured memories in the years to come.

Mr. HEFNER. Mr. Speaker, a most tragic event occurred during the recent district work period. I was stunned to hear of the death of Herbert W. Johnson, director, Veterans' Administration Regional Office in Winston-Salem, N.C. Herb, as we all called him, spent his entire adult life, following his Navy service in World War II, in behalf of veterans and their families.

In his several capacities of leadership, he demonstrated a dedication and devotion which will be difficult to surpass. I came to know Herb personally three years ago and can state without hesitation that he has left a void in the ranks of veterans whose cause has suffered an irrevocable loss. Let us look at the record of a wonderful man who will be sorely missed.

Herb was born in Huntsville, Ala., and moved to North Carolina at an early age. He was graduated from Black Mountain High School and Mars Hill College. He also attended American University, Washington, D.C. He served in the U.S. Navy from November 29, 1942 to November 26, 1945. He completed over 30 years of service with the Federal Government.

He joined the Veterans' Administration on February 25, 1946 in the Roanoke, Va. regional office as a training officer in the Vocational Rehabilitation and Education Division. In 1948, he transferred to the Veterans' Administration Regional Office in Baltimore, Md. as chief, training facilities section. In July, 1950, he transferred in the same position to the Pittsburgh, Pa. regional office. In February, 1953, he was promoted to administrative officer, Veterans' Administration Central Office in Washington, D.C. where he served until he was promoted to assistant manager of the Winston-Salem Regional Office in March, 1960. He served in this capacity until May 1972 when he was appointed director of the regional office.

Herb was active in service and civic organizations. He was a member of the American Legion, Veterans of Foreign Wars, AMVETS, Winston-Salem Chamber of Commerce, Federal Coordinator for Combined Federal Campaign for Forsyth County. He was a member and past president of the North Carolina Federal Personnel Management Council, member and past president of the Winston-Salem Federal Council, member of the Governor's Committee on Jobs for Veterans, and was a director of the Winston-Salem Urban League. He was a member of the Ardmore Baptist Church.

No Member of Congress or veteran could ask for more dedicated service. The fine talent of Herb Johnson is reflected in every activity of the regional office. He was tenacious when need be, compassionate at all times.

Herb had the faith to accept what life decreed and to carry on through acclamation or adversity. He always gave his best but never compromised his principles. His first obligation was to the veteran and he was true to that cause above all. Many who have worked with him will continue in his tradition, but none can replace him.

I extend my deepest sympathy to Herb's wife Mary and his son, John.

My friend is gone. I shall miss him.

Mr. ANDREWS of North Carolina. Mr. Speaker, I am privileged to join my colleagues today in paying memorial tribute to the late Herbert W. Johnson, director of the Veterans' Administration Regional Office in Winston-Salem, and one of North Carolina's truly fine public servants.

The fact that nearly everybody who knew or came into contact with him called him simply "Herb" is in itself a testimonial to the warmth and character of the man.

Those members of my congressional staff who worked most closely with Herb Johnson were unstinting in their admiration and affection for him as a person, and in their respect for his devotion to duty. He was, they say, an unassuming man—always willing to go that extra mile for North Carolina's veterans, and who was fervent in his desire to help those who were sick, aged, or disabled.

Perhaps the most fitting tribute of all to his memory is the legacy he leaves to those countless veterans who know a better way of life because of Herb Johnson's quiet but unending efforts to make it so.

Herb will be sorely missed here, but the vast contributions he made to our State and her people will remain—as a living monument to his greatness.

Mr. WHITLEY. Mr. Speaker, I wish to join my colleagues in paying respect to a man who has served ably and well as a public servant. Herbert W. Johnson, known to many of us as "Herb," passed away suddenly in Winston-Salem, N. C., week before last. For more than 30 years, Herb had worked for the Veterans' Administration, concluding his career as manager of the Winston-Salem Regional Office of the Veterans' Administration for 5 years prior to his death.

Herb served with distinction and dedication in a difficult position. It is not easy to administer fairly and impartially the laws which Congress has passed which relate to the benefits of veterans and still give sympathetic and humane consideration to the personal needs of individual veterans.

I am sure that each of us who is a Member of this body has encountered a situation or many situations where his natural sympathy for the needs of individuals has made him want to extend benefits in cases where he realized the veteran did not meet the technical requirements of the law and we have also seen other types of cases where a veteran who met the technical requirements received benefits in defiance of the intent of the law.

Herb Johnson did an outstanding job in insuring that reasonable and sympathetic consideration was given to the claim of every veteran and that in each case of genuine need benefits were provided in all situations where they were authorized by law. He also worked diligently to avoid awarding benefits or continuing benefits to those who did not meet the legal requirements for eligibility, and to eliminate the possibility of fraud. Herb Johnson personified the kind of public servant every civil service employee should be. All of us who knew him extend our sympathy to his family and express to them our gratitude for his service to the Nation.

Mr. GUDGER. Mr. Speaker, I wish to associate with the remarks of others here who have eulogized Herbert W. Johnson, deceased, of late the director of the Veterans' Administration Regional Office, Winston Salem, N.C. Herbert W. Johnson deserves commemoration and a place in the permanent records of the Congress of the United States. Almost his entire mature life was spent in the service of his country. For 3 years he served in the U.S. Navy from November 29, 1942 to November 26, 1945. Thereafter in February 1946 he joined the Veterans' Administration in Roanoke, Va.

In the service of the Veterans' Administration he received promotion after promotion. He served for 2 years at the VA Regional Office in Baltimore, Md., as chief of its training facilities section. He served from July 1950 to February 1953 in the same position at the VA regional hospital in Pittsburgh, Pa. And thereafter he served for 7 years as administrative officer of the VA central office here in Washington, D.C. In 1960, he was promoted to become assistant manager of the Winston Salem, N.C. regional office in which capacity he continued to serve until May 1972 when he became director of that regional office.

Herb Johnson was not only a distinguished naval veteran himself, but in his entire postwar career he was a veteran's veteran. He spent much time attending local, State, and national meetings of the veterans' organizations of which he was a member—the American Legion, the VFW, the AMVETS. He was equally concerned about the civic affairs of the communities in which he lived. For example, he served on the Winston Salem Chamber of Commerce as president of its Twin City Kiwanis Club and as member and president of the Winston Salem Federal Council. He was equally active in State affairs, serving as a member of the Governor's Committee on Jobs for Veterans and as president of the North Carolina Federal Personnel Management Council.

You will note that 10 times in the preceding comments I have used the word "served." This is appropriate because the life of Herbert Johnson was a life of service to community, State, and Nation. But in another capacity, he served with equal earnestness. I refer to the service which

he rendered to each individual whose case required his attention. It was an outstanding characteristic of this man that in the discharge of his duties as an officer of the Veterans' Administration he took a personal interest in each case under his supervision. He made sure that every veteran's claim received just and sympathetic attention, and as director of the regional office in Winston-Salem during the years which he served he was responsible to some degree for the handling of the claims of some 617,000 veterans.

Herb Johnson was born in Black Mountain, within my congressional district, the son of Rev. J. J. Johnson, a distinguished minister of the Gospel in that community. He attended the public schools of Buncombe County, in which county I reside, and he graduated from Mars Hill College, a leading Baptist educational institution, located in my district.

The people of western North Carolina are grateful for the exemplary life and achievements of this devoted public servant, this native son, whose attainments greatly honor the community in which he was born and grew into manhood.

Herbert Johnson—an extraordinary man, a loyal and dependable friend, a person of sterling character. He endeared himself to many by his life of unselfish service. He will be greatly missed.

GENERAL LEAVE

Mr. CORCORAN of Illinois. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include therein extraneous matter, on the subject of the special order taken today by the gentleman from North Carolina (Mr. BROYHILL).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

AN UNATTENDED HUMAN RIGHTS ISSUE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 10 minutes.

Mr. FISH. Mr. Speaker, I wish to express the seriousness with which I view a direct violation of the fourth amendment to the Constitution of the United States, and to deplore the seeming lack of urgency in dealing with it.

Knowledgeable sources have confirmed that the Russians have placed within the Soviet Embassy in Washington, and in other locations in this country, intricate devices that are capable of intercepting long-distance telephone calls transmitted through the air by microwaves or ultra-high frequency radio signals, a system that handles more than two-thirds of domestic long-distance calls. By the use of advanced computers, information of interest to the Soviet Union is filtered out of the hundreds of thousands of phone calls made by U.S. citizens made available to them each day.

The existence of Soviet surveillance devices in the United States, Mr. Speaker, brings our most confidential governmental, economic, and corporate information under Soviet scrutiny. The fact that this practice has been known to prior administrations is no ground to condone it today.

It is unfortunate that within our Government there are those who gain access to information through an invasion of privacy, but when discovered the guilty are prosecuted. When an injustice is committed by a foreign government, however, no resolution can be reached in a court of law, nor can the accused be punished. Therefore, the U.S. Government is looked to by the people to bring an end to the practice.

John F. Kennedy demonstrated in handling the Cuban missile crisis of 1962, that responsibility for courageously stating our country's demands falls to the President of the United States.

Soviet eavesdropping is a crime, violating our fourth amendment rights against unreasonable search and seizure. The fourth amendment reads:

> (t)he right of the people to be secure in their persons, houses, papers and effects against unreasonable searches and seizures, shall not be violated . . .

A crime is being committed at this very moment, and the infuriating fact is that the instruments of invasion are here in the United States. The Constitution of the United States is the supreme law of the country. Public officials are sworn to defend it, American citizens are expected to abide by it, and foreign nations should respect it. The creators of the fourth amendment felt it important that every American be free of unreasonable search and seizure, no matter who the intruder was.

President Carter, well aware of the injustice being committed against citizens of the United States, has adopted a strange ambivalence inconsistent with what appears to be one of his administration's major concerns—human rights.

To protect the national security against further infiltration, the administration has drawn up plans for an intricate and expensive system of coding and decoding that would secure the Executive's privacy. Does the administration construe the fourth amendment to mean that only the executive branch of Government shall be granted security against unreasonable search and seizure, leaving the American people subject to foreign surveillance? Soviet eavesdropping, as the President claims, may not be an act of aggression, but it clearly is an invasion of the privacy of U.S. citizens.

If the reason for Presidential reticence is that we practice domestic eavesdropping on a scale approaching the massive Soviet effort, then this, too, is extremely disturbing and depressing.

I strongly and respectfully urge the President to stand firm and consistent to his commitment to human rights, and insist that the Soviets discontinue their surveillance of American phone calls.

LEGISLATION TO CREATE AN OFFICE OF SPECIAL PROSECUTOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Delaware (Mr. EVANS) is recognized for 5 minutes.

Mr. EVANS of Delaware. Mr. Speaker, I am today introducing legislation to create an Office of Special Prosecutor to investigate the recent allegations of bribery and other improper activities between foreign governments and Members of Congress.

Although the introduction of this legislation has been prompted by the cascade of reports that South Korean lobbyists may have improperly influenced Members of Congress, my bill would direct the new special prosecutor to investigate the whole area of foreign involvement with Members of Congress.

Yesterday, I, along with many of my colleagues, called on President Carter to appoint a special prosecutor. I did so because I am convinced that the House of Representatives simply cannot investigate itself in this matter. The slow-moving probe of the Ethics Committee, coupled with the resignation this past weekend of Committee Counsel Philip Lacovara has erased any confidence that might have been present in the committee.

Unfortunately, President Carter has, for whatever reasons, decided not to appoint a special prosecutor, preferring to place his confidence in the institution which has yet to show any progress whatsoever.

I believe the President is wrong. The only way to guarantee a fair, impartial, and independent investigation of these allegations is to have a group of individuals probing the charges who owe no political allegiance to anyone.

I also believe that the scope of the allegations already made regarding criminal activities between Members of Congress and the South Korean Government representatives have gone far beyond the ability or even the responsibility of the Ethics Committee to investigate. The Committee on Standards of Official Conduct was set up to deal with individual transgressions of Members of Congress, not to act as the investigatory body for a full range of criminal charges. It simply cannot, in my judgment, deal in a prompt and satisfactory way, with the wide spectrum of charges that have been made.

The Office of the Special Prosecutor worked with the Watergate investigation. It can work again. The success of the Watergate probe was due in large measure to the work of the Special Prosecutor, working in concert with other groups such as the Ervin committee, the House impeachment inquiry, the Justice Department, and the press.

Speaker O'NEILL has guaranteed the independence of the new Ethics Committee counsel. This statement itself is the best argument I know of for a prosecutor who is independent of the Congress. No matter what promises the Speaker makes, the independence of anyone cannot be guaranteed unless that person is taken from under the thumb of others. It was not so long ago that Richard Nixon promised Archibald Cox independence, a promise which went up in smoke during the Saturday Night Massacre.

Mr. Speaker, the public's level of confidence in Congress is distressingly low,

and unless we indicate to the American people that we are serious in getting to the bottom of these serious allegations, that confidence will shrink to zero.

It is time to put aside the old, established way of doing things around here. The "ol' boy" system cannot and should not be allowed to frustrate this inquiry. We need a special prosecutor now.

I ask unanimous consent that a copy of my bill be printed at the conclusion of these remarks.

H.R. 8412

A bill to require the President to appoint a Special Prosecutor to investigate and prosecute acts by agents of foreign governments to influence elected and non-elected officials and employees of the United States

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Congressional Integrity Act of 1977".

SEC. 2. The President shall, within 30 days of enactment of this Act, cause to be appointed a Special Prosecutor to serve in the Department of Justice.

SEC. 3. The Special Prosecutor shall investigate, prepare, and conduct prosecutions with respect to, acts by agents of foreign governments designed to buy influence for such governments from elected officials and employees of the United States by providing to such officials and employees money, gifts, free trips and other matters of value.

SEC. 4. (a) Notwithstanding any other provision of law, a special prosecutor appointed under this Act shall have, with respect to all matters in such special prosecutor's prosecutorial jurisdiction established under this Act, full power, and independent authority—

"(1) to conduct proceedings before grand juries and other investigations;

"(2) to participate in court proceedings and engage in any litigation, including civil and criminal matters, as he deems necessary;

"(3) to appeal any decision of a court in any case or proceeding in which such special prosecutor participates in an official capacity;

"(4) to review all documentary evidence available from any source;

"(5) to determine whether to contest the assertion of any testimonial privilege;

"(6) to receive appropriate national security clearances and, if necessary, contest in court, including, where appropriate, participation in in camera proceedings, any claim of privilege or attempt to withhold evidence on grounds of national security;

"(7) to make applications to any Federal court for a grant of immunity to any witness, consistent with applicable statutory requirements, or for warrants, subpenas, or other court orders, and for purposes of sections 6003, 6004, and 6005, of title 18, a special prosecutor may exercise the authority vested in a United States Attorney or the Attorney General;

"(8) to inspect, obtain, or use the original or a copy of any tax return, in accordance with the applicable statutes and regulations, and for purposes of section 6103 of title 26, and the regulations issued thereunder, a special prosecutor may exercise the powers vested in a United States Attorney or the Attorney General;

"(9) to initiate and conduct prosecutions in any court of competent jurisdiction, frame and sign indictments, file informations, and handle all aspects of any case in the name of the United States; and

"(10) to exercise all other investigative and prosecutorial functions and powers of the Department of Justice, the Attorney General, and any other officer or employee of the Department of Justice, except that the Attorney General shall exercise direction or control as to those matters that specifically require the Attorney General's personal action under section 2516 of title 18.

"(b) A special prosecutor appointed under this chapter shall receive compensation at a per diem rate equal to the rate of basic pay for level IV of the Executive Schedule under section 5315 of title 5.

"(c) For the purposes of carrying out the duties of the office of special prosecutor, a special prosecutor shall have power to appoint, fix the compensation, and assign the duties of such employees as such special prosecutor deems necessary (including investigators, attorneys, and part-time consultants). The positions of all such employees are exempted from the competitive service. No such employee may be compensated at a rate exceeding the maximum rate provided for GS-18 of the General Schedule under section 5332 of title 5.

"(d) If requested by a special prosecutor, the Department of Justice shall provide to such special prosecutor assistance which shall include full access to any records, files, or other materials relevant to matters within his prosecutorial jurisdiction, and providing to such special prosecutor the resources and personnel required to perform such special prosecutor's duties.

"(e) A special prosecutor may ask the Attorney General or the division of the court to refer matters related to the special prosecutor's prosecutorial jurisdiction. A special prosecutor may accept referral of a matter by the Attorney General, if the matter relates to a matter within such special prosecutor's prosecutorial jurisdiction as established by the division of the court. If such a referral is accepted, the special prosecutor shall notify the division of the court.

"(f) To the maximum extent practicable, a special prosecutor shall comply with the written policies of the Department of Justice respecting enforcement of the criminal laws which have been promulgated prior to the special prosecutor's appointment."

SEC. 5. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

PRESIDENT'S SUGAR PROGRAM ILLEGAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. FINDLEY) is recognized for 5 minutes.

Mr. FINDLEY. Mr. Speaker, the payments ordered by President Carter to sugar processors and producers constitute an illegal act according to the Comptroller General of the United States.

The administration was unwise to try to put over a scheme that had never been the subject of hearings, was never alluded to in the consideration of the Agriculture Act of 1949, and was not included in budget recommendations.

It was adventurism pure and simple. If it had been permitted to stand, who knows how far the executive could go without so much as a wink at the legislative branch. Fortunately, the Comptroller General has called a halt to it with his finding that the administration's program is illegal. Mr. Staats states very clearly:

The proposed program is not, in our view, authorized under 7 U.S.C. 1447 [and] the Department may not do indirectly what it cannot do directly.

I appeal to the President to rescind immediately his decision authorizing the payments. So far as I know, no President has ever proceeded with expenditures in contravention of views expressed by the Comptroller General. To do so would plainly be illegal.

Instead, the administration should now formulate a legislative proposal concerning sugar policy, let the Congress hold hearings and work its will. That's the time-tested and only proper way to consider the current hardship for sugar producers and what our Government should do about it.

The payments were expected to be made from Commodity Credit Corporation funds, which would put them beyond the usual discipline of the Comptroller General. Under normal procedure an adverse finding by the GAO would enable the Comptroller General to take exception to an expenditure. Such finding would effectively stop the disbursement.

Text of the letter from Mr. Staats follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., July 19, 1977.

Hon. PAUL FINDLEY,
House of Representatives.

DEAR MR. FINDLEY: This is in response to your letter dated June 15, 1977, which was also signed by the Honorable Edward R. Madigan, House of Representatives, concerning the Department of Agriculture's proposed regulations which would establish a price support payments program beginning with the 1977 sugar crop.

In this regard, you say that the proposed sugar regulations issued on June 14, 1977, are a classic example of an administrative agency trying to do indirectly what it cannot do directly. You refer to the current law as not permitting direct payments to sugar producers, but that the proposed regulations would get around this by providing that the processor would pay the producer the full amount of the support payment received, after deduction for administrative expenses. You indicate that there is also dubious legal authority for the proposed sugar plan because the current law requires that any payments shall be for the purpose of price support and you believe that the payments will not in any way increase, support or stabilize market prices, but will only provide income support.

You also question the legal basis for requiring a processor to carry out the program. You inquire as to what method of enforcement is available to the Department of Agriculture?

Finally, you question the legality of this type of "domestic subsidy" under our Government's international agreements, including the General Agreement on Tariffs and Trade (G.A.T.T.).

We have reviewed the opinion of the Department's Acting General Counsel which you included with your letter. We have also written to the Secretary of Agriculture in order to obtain his views on these matters. Due to the time constraints you have placed on our response, we met with certain officials of the Department of Agriculture to obtain such information and expression of views as we needed to prepare a quick response to your inquiry. While we have not received the written views of the Department we understand the Department's reply would confirm the views expressed by Department officials.

With regard to price supports for agricultural commodities, 7 U.S.C. § 1421 (1970) provides in pertinent part as follows:

"(a) The Secretary [of Agriculture] shall provide the price support authorized or re-

required herein through the Commodity Credit Corporation and other means available to him.

"(b) Except as otherwise provided in this Act, the amounts, terms, and conditions of price support operations and the extent to which such operations are carried out, shall be determined or approved by the Secretary. The following factors shall be taken into consideration in determining, in the case of any commodity for which price support is discretionary, whether a price-support operation shall be undertaken and the level of such support * * *. (1) the supply of the commodity in relation to the demand therefor, (2) the price levels at which other commodities are being supported * * * (3) the availability of funds, (4) the perishability of the commodity, (5) the importance of the commodity to agriculture and the national economy, (6) the ability to dispose of stocks acquired through a price-support operation, (7) the need for offsetting temporary losses of export markets, (8) the ability and willingness of producers to keep supplies in line with demand * * *.

"(e) Whenever any price support or surplus removal operation for any agricultural commodity is carried out through purchases from or loans or payments to processors, the Secretary shall, to the extent practicable, obtain from the processors such assurances as he deems adequate that the producers of the agricultural commodity involved have received or will receive maximum benefits from the price support or surplus removal operation."

Section 1447, title 7, U.S. Code (1970) provides for price support levels of nonbasic agricultural commodities as follows:

"The Secretary is authorized to make available through loans, purchases, or *other operations* price support to producers for any nonbasic agricultural commodity not designated in section 1446 of this title at a level not in excess of 90 per centum of the parity price for the commodity." (Emphasis added.)

The program proposed by Agriculture in its regulations has the stated objective of supporting prices in the market place for sugarbeet and sugarcane producers through payments made to sugar processors. In support of the proposed payments program for 1977 crop of sugar specific reference is made to the eight applicable factors enumerated in 7 U.S.C. § 1421(b). In this regard it is stated that the price received by producers in the United States is a function of the world market price which is currently depressed and therefore the price received by domestic producers is below their cost of production. Price support payments are said to be limited to two cents a pound for several reasons including that the effect of larger payments would be to support the world market price for sugar which would mean an unlimited outlay of currency from the U.S. Treasury.

Section 1435.3 of the proposed regulations (42 Fed. Reg. 30409 (June 14, 1977)) refers to a determination by the Secretary of Agriculture that the level of price support for 1977 crop sugar will be no more than 13.5 cents a pound and that if the national average market price is less than 11.5 cents a pound, the price support payment rate shall not exceed two cents a pound. Under section 1435.5, at the end of each marketing quarter, after the Department of Agriculture has determined the national average price for sugar received by processors in that marketing quarter, it will announce the rate of payment for sugar marketed in the quarter. Payments will be made to a processor on eligible sugar marketed by it during the marketing quarter.

Section 1435.6 provides for a written contract between the processor and the producer stipulating the producer's share of proceeds for the sale of sugar in the market place and the method of payment of the proceeds. The processor shall agree to pay the producer the full amount of the price support payment after deduction for administrative expenses incurred in carrying out its obligations under the program.

Section 1435.9 of the proposed regulations provides that the processor will only be allowed to deduct from the payments actual administrative expenses directly incurred as the result of distributing payments to producers and fulfilling other requirements of the program. Allowable costs may include increased labor, automated data systems use, postage, and the processing of bank drafts. It would not include general administrative and overhead expenses incurred in the processors normal operations.

The Secretary of Agriculture, under 7 U.S.C. § 1447 may make price supports available to sugar producers by means of loans, purchases or "other operations." With regard to "other operations," the Department of Agriculture's Acting General Counsel, in a memorandum to the Secretary, dated April 6, 1977, a copy of which was enclosed with your letter, states as follows:

"The term 'other operations' as stated in Section 301 [7 U.S.C. § 1447] would permit the Secretary of Agriculture to make payments to processors of sugar who pay support prices to sugar producers. Such payments would assure that producers would receive the support prices in the market place for their sugar at a time when processors could not otherwise afford to pay the support price in view of market prices for the processed product. The phrase 'other operations' would not, however, authorize direct payments to producers by the Secretary, since such payments would not support the price which the producers received in the market place for their sugar. This conclusion is supported by extensive legislative history."

After reviewing the pertinent legislative history, the Acting General Counsel concludes.

"* * * the phrase 'other operations' as contained in the Agricultural Act of 1949, as amended, would not allow the Secretary to make payments to producers of sugar beets and sugar cane, but would permit payments to processors of sugar in order to support the price received by producers for sugar in the market place."

We have reviewed the statute and legislative history discussed in the Acting General Counsel's memorandum and concur that the Department may not make direct payments to producers. Hence, whatever else it may encompass, we agree that the statutory term "other operations" was not intended to include direct payments to producers.

Under the proposed program, after the end of the previous marketing quarter, payments are to be made to processors who have agreed that after deduction for administrative expenses, the full amount of the payment is to be paid to the producers. It appears that while the payment is made by the Government to the processor, the processor's function is akin to that of a trustee for the benefit of the producers, and to act as an agent of the Government in determining the amount due to each producer who has sold eligible sugar to it, and in forwarding such payments to the individual producers. It is indeed difficult to distinguish the effect of the proposed program from that of a program of direct producer payments made on the basis of the amount of sugar marketed. Accordingly, the proposed program is not, in our view, authorized under 7 U.S.C. § 1447 as the Department may not do indirectly what it cannot do directly.

In any event we have substantial doubt that the proposal represents a price support program as contemplated by 7 U.S.C. §§ 1421 and 1447. As we understand the proposed program, at the end of each marketing quarter the Department of Agriculture will determine the national average price for sugar for the quarter, and based on this determination, payments, not to exceed two cents a pound, will be authorized to be paid to the processors for the benefit of the sugar producers, provided the market price does not exceed the designated support price (of, for example, 13.5 cents a pound for crop year 1977). The actual rate of payment per pound will be the amount by which the national average market price is less than the designated support price.

The stated objective of the proposed program is to support prices in the market place for sugarbeet and sugarcane producers through payments made to sugar processors. However, the proposed program is unlike traditional price support programs in which the Government stands ready to purchase a commodity at a given price, and in which it in effect establishes a floor in the market place which those desiring to purchase the commodity, must pay. Under the proposed program purchasers in the market place would pay the current price for sugar, for example, 11.5 cents a pound. At a later date, with a designated support level at 15.5 cents a pound, the producers would receive 2 cents a pound from the Government (less the processors' administrative expenses). It thus appears that the additional payment received by producers does not support or increase the market price but rather makes payments to processors for the benefit of the producers, as if the market price actually were higher.

In other words, the proposed program seems to provide, in essence, the equivalent of direct payments to producers, and we fail to see how the payments contemplated under the program would support the market price of sugar.

For the foregoing reasons, we are doubtful that the proposed program may be considered as a price support program as contemplated by 7 U.S.C. §§ 1421(e) and 1447.

With regard to processor participation in the proposed program, we have been informally advised by an official of the Department's Office of General Counsel, that he is aware of no means of compellisg a processor to take part in the program. However, since producers would presumably bring their sugar to processors whose participation in the program would result in substantial additional payments to producers, it would appear that processors would for economic reasons voluntarily participate in the program. Once part of the program, after having entered into written agreements with producers stipulating their share of proceeds from the sale of sugar and the method of payment, the processor would be required to submit reports and certifications to Department of Agriculture which would probably conduct local spot checks of the processor's activities under the program.

Finally, you question the legality of the proposed program under G.A.T.T. or other of our Government's international agreements. The above agreement (61 Stat. part (5) and (6), T.I.A.S. No. 1700, 55–61 U.N.T.S) which was concluded on October 30, 1947, and entered into force for the United States on January 1, 1948, provides in pertinent part as follows:

"ARTICLE XVI—SUBSIDIES

"Section A—Subsidies in General

"1. If any contracting party grants or maintains any subsidy, including any form of income or price support, which operates directly or indirectly to increase exports of any product from, or to reduce imports of any product into, its territory, it shall notify

the contracting parties in writing of the extent and nature of the subsidization, of the estimated effect of the subsidization on the quantity of the affected product or products imported into or exported from its territory and of the circumstances making the subsidization necessary. In any case in which it is determined that serious prejudice to the interests of any other contracting party is caused or threatened by any such subsidization, the contracting party granting the subsidy shall, upon request, discuss with the other contracting party or parties concerned, or with the contracting parties, the possibility of limiting the subsidization."

Under this provision if the U.S. grants a subsidy including any form of income or price support which operates to increase sugar exports or decrease sugar imports into the country, the Government is required to notify the other contracting parties. Upon request, the U.S. also must discuss the possibility of limiting the subsidization with any party that believes its interests have been seriously prejudiced. It is not clear to us at this point if the proposed program would increase exports and reduce imports of sugar into the United States; you may wish to raise this question with the Department of Agriculture officials. Of course if there were an increase of the market share of domestic producers, the U.S. Government would be obligated to inform the other parties regarding the program and upon request to discuss possible limitations on the extent of the subsidy. We are not aware of provisions of any other international agreement which might invalidate the proposed program.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. TRIBLE) is recognized for 5 minutes.

Mr. TRIBLE. Mr. Speaker, earlier today I was absent on official business when two rollcall votes were taken. Had I been present I would have voted as follows:

On rollcall No. 433, adoption of the conference report on H.R. 7554, Housing and Urban Development-independent agencies appropriation bill, fiscal year 1978 I would have voted "yea."

On rollcall No. 434, the vote on the Jupiter Probe amendment in disagreement, I would have voted "no," therefore supporting the program.

CREDIT LAWS—THE CONSUMERS' SHIELD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois, (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, in recent months consumers have shown an increasing level of confidence in the American economy. American consumers have demonstrated this confidence through increased spending at all levels.

Consumer spending accounts for nearly two-thirds of the Nation's gross national product. In May, consumer credit buying expanded by $2.53 billion. This increase is the third largest increase ever, according to the Federal Reserve Board. Polls measuring consumer confidence in the economy have reflected significant increases in buyer confidence, and June's figures indicate that this trend is continuing.

As chairman of the Consumer Affairs Subcommittee of the House Banking Committee I would like to express my belief that this increased consumer confidence is due, in part, to the credit legislation which originated in the Consumer Affairs Subcommittee. This legislation has proven itself to be beneficial to the consumer as well as to financial institutions and business enterprises.

One example of a law which stimulated the use of credit is the Equal Credit Opportunity Act amendments which became effective in March of this year. This law prohibits discrimination in the granting of credit to the elderly as well as discrimination based on sex, marital status, race, color, religion, and national origin. As a result, for the last 4 months, creditworthy citizens, who once were denied credit simply because they had reached a certain age, have been applying for loans knowing that their age would not be held against them.

Other examples of the diligent efforts of the members of the Subcommittee on Consumer Affairs in the area of consumer credit protection are the Truth in Lending Act, the Fair Credit Reporting Act, the Fair Credit Billing Act, and the Truth in Leasing Act. These laws have provided consumers with new rights and protections in their credit and financial dealings, where previously they had none, and have helped consumers to save valuable time and money.

The granddaddy of all consumer credit legislation is the Truth in Lending Act which has been in existence since 1968. The Truth in Lending Act has led to a greater understanding by the consumer of the obligations assumed when signing loan contracts. The requirements that there be standardized quotations of interest rates, as annual percentage rate, and that lenders disclose other information relating to the cost of credit, have permitted the consumer to make a more informed choice when seeking credit. The fact that consumers are able to obtain adequate information as to the full cost of credit, makes it easier for families to manage their money. The disclosures may at first appear complex to some people, but after experience is obtained the terms become meaningful and essential to the consumer's protection. The fact that consumer credit buying is on the increase indicates that these laws have made the consumer increasingly aware of his options.

In spite of all of the good that these laws have done there are proposals being put forth designed to change them. I view such proposals with great caution because they may cut back on consumer protections currently part of the law.

It is important, when making changes in any type of legislation, to keep in mind that legislation's fundamental purpose. The detrimental effects of tampering with any law must be carefully measured especially when that law has proven to be as effective as the Truth in Lending Act. The Truth in Lending Act was passed with one overriding goal—to help the consumer deal with the problems he encounters when seeking credit.

I would like to make it clear that while I support legitimate truth in lending simplification I am wary of any measure designed to weaken the basic premise of the law. It is our responsibility to protect the consumer by giving him the knowledge and the means to protect himself. In this way America will continue to prosper and grow.

HOUSING SUBSIDIES OR WELFARE SLUMS?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AUCOIN) is recognized for 5 minutes.

Mr. AUCOIN. Mr. Speaker, in an age which government involvement, especially by the Federal Government, has come increasingly under suspicion, it is a marvel that there is broad support for Federal housing programs, but it exists, nevertheless. That support extends from housing advocates for the poor to advocates for industries that build the housing.

This broad support is the result of programs that yield tangible returns for dollars spent. There are intangibles that accrue, too—revitalized cities, stabilized neighborhoods, and better economic and racial mixes of people.

Federal housing programs have not always been on target and they have not always been administered with an eye toward making them work. There have been failures as well as successes. But on the whole, Federal housing programs have been for the public good and deserve continued efforts to refine them so they meet the evolving challenges of each new age.

Given this viewpoint, I—as a member of the Housing Subcommittee—am shocked that the Office of Management and Budget has advanced a suggestion to scrap virtually all Federal housing programs and redirect that money through a reformed welfare system. Surely the OMB cannot seriously be considering correcting minor faults by making a major error. Yet, unbelievably, this seems to be the case.

I must wholeheartedly agree with Senator JOHN SPARKMAN of Alabama whose many years in the U.S. Senate give him a unique perspective on Federal housing programs. He called this OMB suggestion an echo of a discredited policy advanced by former President Nixon.

I would go a step further and call it a farce—a simplistic, myopic plan that fails to take into account the broad economics of housing production and housing availability.

It fails to assess the value of existing housing and community development strategies.

It fails to reckon with the need to target the production of housing for low-income Americans.

It fails to recognize the importance of Federal housing programs to the housing industry and to supporting industries—such as the forest products industry which is so important to my State of Oregon.

This thoughtless suggestion falls so far short of producing any positive result that I believe it should be dismissed out of hand. Time wasted on arguing over the suggestion would be better spent perfecting existing Federal housing programs.

I cannot conceive of a Democratic administration literally throwing up its hands on a longstanding national commitment to provide decent housing for Americans. The so-called cash-in proposal suggested by OMB will put money into the hands of low-income people for housing, but will not exert any control over what kind of housing they get. Jack Shriver, president of the National Association of Housing and Redevelopment Officials, accurately outlines the mess that would be created by saying—

In effect, this would put government assistance into the hands of slum landlords . . . and encourage them to keep the slums as they are.

I do not believe such an action would keep faith with the principles the Democratic Party espouses and I would not be a party to allowing it to happen.

The economic factors involved in the production of housing are fundamentally different than those of other consumer services. There is a much higher cost/risk factor, especially with housing designed for low- and moderate-income families. Coupled with this fact of life is the very real presence of skyrocketing housing costs caused by a number of factors, such as mushrooming land costs, the higher cost of money, more expensive building materials and higher labor costs. The cost of producing or rehabilitating housing has reached the point that an intolerably large number of Americans—including many young families with good incomes—cannot afford to buy a home. Low-income people, worst off of all, cannot afford to rent even barely decent housing.

Great strides have been made and more need to be made to combat the growing unaffordability of housing. The OMB, stretching the truth to the breaking point, claims that Federal Government housing programs are inefficient and thus contribute to increased housing costs. I would counter by predicting the cash-in proposal would be one of the most inflationary measures ever tried because it would not produce housing.

Presumably, OMB would leave intact the community development block grant program which is aimed at assisting low- and moderate-income people by attacking slums and blight and providing a stimulus to community redevelopment. But the community development block grant program never was intended to be a housing program and it could not shoulder the sole responsibility of stimulating production of the housing needed to meet the demand of our Nation's people.

Further, the community development block grant program is limited in the kinds of areas to which it can be applied. Housing programs are less limited. Indeed, Federal housing programs are working in inner cities, in suburban areas and in rural areas. Federal housing programs are designed to meet a wide variety of problems. Taken together, housing programs and the community development block grant program form an increasingly coordinated strategy to achieve social goals such as urban revitalization, neighborhood preservation, and racial and economic integration. That strategy also is working to prevent urban sprawl, thus saving energy and making more efficient the delivery systems for transportation, utilities and other public services.

Finally, I want to underline the disastrous effect I believe the cash-in proposal would have on the housing industry, and ultimately, on the entire economy. At a time when our Nation is trying to fight unemployment, this action would be counterproductive. No single action could be more effective in bringing the housing industry, and the industries that depend on it, to a swift demise. And when the cash-in plan fails—as it certainly would—who would receive the industry? Undoubtedly the Government, with costly, wasteful incentives. How would the death of this industry, and the loss of payrolls and thus the loss of tax revenue square with the President's notion that welfare reform is to be accomplished without an increase in cost?

I believe every idea should have its day in court. In this case, I do not think a long trial is necessary. An immediate verdict can be rendered that the case for this idea is insufficient to prolong the argument.

The Carter administration would be well advised to drop this absurd notion. It promised the people more in the field of housing, and the people deserve to get what they were promised.

Adverse comment on the OMB proposal has been widespread. One of the clearest, sharpest analyses appeared as an editorial in the Boston Globe on July 16, 1977, which noted that the cash-in plan "would pit the poor against the poor and, in time-honored fashion, ask them to take what they need out of what little they already have." I herewith submit that editorial in its entirety to illustrate further the foolhardiness of the OMB proposal.

STORM SIGNAL AT HUD

It is distressing news that the Carter Administration is even considering paying for a revamped welfare program with money that otherwise would be used for housing subsidies. While the proposal will surely be shot down before it gets much farther from the Office of Management and Budget, the fact that it could be made at all reveals a distinct danger—that rank pragmatism is about to be palmed off as urban policy by Bert Lance and his associates at OMB.

The approach, outlined in an OMB memo to HUD as one of three ways to mesh housing programs to the new welfare system now under construction, would pit the poor against the poor and, in time-honored fashion, ask them to take what they need out of what little they already have. President Carter has stated emphatically that no new welfare system can cost any more than the old one.

Given that jarring injunction, it is not surprising that Secretary Joseph Califano of the Department of Health, Education and Welfare and his associates should be looking at HUD and its $4.9 billion in housing subsidy funds.

They can argue, as did officials of the Nixon and Ford Administration, that the subsidy programs are wasteful and inefficient, that much of the money doesn't go to the poor at all but to middle-income people. They can also argue that the simplest and most direct way to help the poor is to subsidize them directly through the welfare check and let them find their own housing and that the housing problem is at bottom an income problem divorced from the problem of housing production.

Under this rationale, the government has no duty to stimulate the housing industry through subsidy programs. Helping provide a better market is stimulation enough.

The problem with such arguments is that they don't address either the realities of the urban conditions or the complexities of housing policy. They also overlook the crippling effect the loss of the subsidy programs would have on central cities and on the attempts, centered within HUD, to develop an urban policy that would open up housing opportunities while strengthening existing neighborhoods.

Subsidy programs are essential to any urban policy. They allow HUD to target funds where they are needed, to replace worn out slums, to build afresh on vacant lots or to salvage dwellings that would otherwise deteriorate and slip from the housing market.

The programs also provide thousands of new housing units that can make an enormous qualitative difference in the lives of millions of people.

The Carter Administration may argue that those units would be built anyway. The past indicates they would not be and that specialized industry capable of providing those units would fall apart, just as it did after the Nixon-declared moratorium on HUD programs in 1973.

Also destroyed would be HUD, the agency charged with the special responsibility as the advocate of urban America. Not only would HUD's Secretary Patricia Harris be left powerless without either money or programs, but cities like Boston and New York and Philadelphia would be left without a place to turn within the Administration.

That, of course, is not about to happen. But what can result from the internal struggle between HUD and OMB is a serious weakening of the Harris position within the Cabinet where she was originally slated to be the prime architect of the new urban strategy. Another result is a draining off of creative energies better directed at solving urban problems than compounding them.

LABOR LAW REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. THOMPSON) is recognized for 5 minutes.

Mr. THOMPSON. Mr. Speaker, on the opening day of the 95th Congress, I introduced H.R. 77, an omnibus bill to amend the National Labor Relations Act. As I explained at that time, the purpose of my bill was to cure certain inequities and deficiencies in the act which have led to the frustration of national labor policy.

These failings in the law have been constantly and dramatically called to my attention during my 15 years as chair-

man of the House Labor-Management Subcommittee. During that time I have spoken to literally thousands of working men and women who have told me of the terrible injustices they have suffered only because they wanted to exercise rights allegedly promised to them 40 years ago in the Wagner Act.

Several such workers were present with me this morning—workers who have been waiting over 20 years for redress of their legal rights. Mrs. Thelma Swan and her son Raymond Swan are living examples of the adage that "justice delayed is justice denied." This Nation cannot afford to permit such denials of justice to continue.

The staff report issued by my subcommittee at the end of the 94th Congress details many of those failings in the present law and makes certain recommendations for change. Those needed changes fall into two major categories: First, provisions which would expedite the processes and procedures of the National Labor Relations Board and eliminate the opportunities for delay in enforcement of workers' rights, and second, provisions which would strengthen the remedies available to the National Labor Relations Board in order to take the profit out of violation of the law and thereby encourage compliance with legal obligations.

Several specific proposals to accomplish those twin aims were included in H.R. 77. Since the opening day of the 94th Congress, my staff has been working with the staffs of Senators WILLIAMS and JAVITS and representatives of the Carter administration through the Department of Labor, as well as representatives of the American labor movement in an effort to refine and polish those proposals.

We have taken into account the views of many individuals and many constituencies and we have made adjustments to our original proposals in an effort to accommodate legitimate criticisms and alternative suggestions for accomplishing our basic goals.

We now have a bill which both Senator WILLIAMS and I are quite satisfied with and which has the wholehearted support of the administration. Identical bills are being introduced in both Houses today.

I believe this bill will go a long way toward insuring the right of working people to organize and bargain collectively as was guaranteed them so long ago. I believe that particularly in the South, where opposition to union organizing has been most virulent, this bill will make it more difficult for recalcitrant employers to frustrate and defeat their employees' rights. As a result, I hope this bill will also help protect workers in other parts of the country by doing away with open-shop havens which entice industry with the siren song of cheap and docile labor.

The thrust of the Thompson-Williams labor reform bill is identical to H.R. 77. It would provide three new remedial weapons for the NLRB, it would expedite representation elections, it would generally speed up the Board's processes, and it would make judicial enforcement of Board orders more expeditious.

A brief summary of the bill's provisions is attached.

As I mentioned earlier, I view this bill as the culmination of my 15 years as chairman of the Labor-Management Subcommittee. I believe it is the most important piece of legislation to protect the right of workers to organize since the Wagner Act 42 years ago. I am pleased that this bill has the total support of the President and his administration, and I am hopeful that we will be able to secure its passage in the House before we adjourn for the year.

We had earlier announced tentative plans to begin hearings on the labor reform package on July 25. We shall proceed with that plan and I anticipate intensive hearings over the 2 weeks prior to the August 6 recess.

In addition, I plan to hold a day of hearings on this bill on August 9 in Roanoke Rapids, N.C. Roanoke Rapids is the home of the J. P. Stevens Co. It is no secret that J. P. Stevens has become the model for antilabor employers throughout the country. J. P. Stevens and its lawyers have "written the book" on how to use every loophole and inadequacy in the law to prevent and forbid union organization and collective bargaining.

We have, over the years, been told horrendous tales by J. P. Stevens employees about their frustrations in attempting to exercise their fundamental rights as American workers to organize unions and bargain collectively. We will offer, on August 9, an opportunity to J. P. Stevens to respond to those charges. I sincerely hope that the company's representatives will accept our invitation.

The text of the bill and an explanation of its provisions follow:

H.R. 8410

A bill to amend the National Labor Relations Act to strengthen the remedies and expedite the procedures under such Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Labor Reform Act of 1977".

(b) Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the National Labor Relations Act.

SEC. 2. (a) Section 3(a) of the National Labor Relations Act is amended to read as follows:

"SEC. 3. (a) The National Labor Relations Board (hereinafter called the 'Board') created by this Act prior to its amendment by the Labor Management Relations Act, 1947, and by the Labor Reform Act of 1977, is hereby continued as an agency of the United States, except that the Board shall consist of seven instead of five members, appointed by the President by and with the advice and consent of the Senate. Of the two additional members so provided for, one shall be appointed for a term of five years and the other for a term of six years. Their successors, and the successors of the other members, shall be appointed for terms of seven years each, excepting that any individual chosen to fill a vacancy shall be appointed only for the unexpired term of the member whom that individual shall succeed. The President shall designate one member to serve as Chairman of the Board. Any member of the Board may be removed by the President, upon notice and hearing, for neglect of duty or malfeasance in office, but for no other cause."

(b)(1) The third sentence of Section 3(b) is amended by striking "three" and substituting "four".

(2) Section 3(b) is further amended by inserting after the third sentence the following new sentence: "The Board shall within 90 days after the date of enactment of the Labor Reform Act of 1977 establish a procedure, upon conditions stated in the rule, pursuant to which a quorum of a group designated pursuant to the first sentence of this subsection may, in appropriate cases, upon motion of the prevailing party in a decision of an Administrative Law Judge after a hearing under section 10(b), summarily affirm such decision. A motion and the response thereto shall be filed with the Board and presented to a quorum of a group designated pursuant to the first sentence hereof within 30 days after the decision of the Administrative Law Judge.".

SEC. 3. Section 6 is amended to read as follows:

"SEC. 6. (a) The Board is authorized to make, amend, and rescind (in the manner prescribed by subchapter II of chapter 5 of title 5, United States Code) such rules and regulations as may be necessary to carry out the provisions of this Act.

"(b)(1) The Board shall within twelve months after the date of enactment of the Labor Reform Act of 1977 issue regulations to implement the provisions of section 9(c)(6) including rules—

"(A) which shall, subject to reasonable conditions, including due regard for the needs of the employer to maintain the continuity of production, assure that if an employer or employer representative addresses the employees on its premises or during working time on issues relating to representation by a labor organization during a period of time that employees are seeking representation by a labor organization, the employees shall be assured an equal opportunity to obtain in an equivalent manner information concerning such issues from such labor organization;"

"(B) For classes of cases in which either the distance from the Board's regional office to the election site or the number of employees involved in the election make it infeasible to comply with the time limits stated in subsection (c)(6)(a) of Section 9, to extend to a maximum of 14 days the period for directing an election stated in that subsection, and to a maximum of 21 days the period for the holding of such an election stated in that subsection.

"(C) to facilitate agreements concerning the eligibility of voters; and

"(D) to govern the holding of elections in cases in which an appeal has not been decided prior to the date of the election.

"(2) The Board shall, to the fullest extent practicable, exercise its authority under subsection (a) of this section to promulgate rules declaring certain units to be appropriate for the purposes of collective bargaining.

"(3) A rule or regulation issued by the Board with respect to the subject matter set forth in paragraphs (1) or (2) of this subsection shall be judicially reviewable only in a proceeding under section 10 of this Act and only on the grounds that the Board prejudicially violated the requirements of subchapter II of chapter 5 of title 5, United States Code or that a rule or regulation of the Board is arbitrary or capricious, contrary to a specific prohibition of this Act, or of the Constitution. The failure of the Board to comply with the time requirements set forth in paragraph (1) of this subsection, or to institute a rule-making proceeding with respect to the subject matter set forth in paragraph (2) of this subsection, within a reasonable period of time after a request for such a rule-making procedure has been filed with the Board pursuant to section 553(e) of title 5, United States Code, to complete such a procedure within a reasonable period after its institution, may be reviewed at the behest

of any aggrieved party only in the United States Court of Appeals for the District of Columbia Circuit. The United States Court of Appeals for the District of Columbia Circuit shall have jurisdiction to grant appropriate relief.

SEC. 4. Section 9(b)(3) is amended by striking ", or is affiliated directly or indirectly with an organization which admits to membership, employees other than guards." and substituting "non guard employees of the same employer at the same location, or if such organization is directly affiliated with any national or international labor organization which represents non guard employees of the same employer at the same location".

SEC. 5. Section 9(c) is amended by adding at the end thereof the following new paragraph:

"(6) (A) Notwithstanding any other provisions of section 9, whenever a petition shall have been filed, in accordance with such regulations as may be prescribed by the Board, by an employee or group of employees or any individual or labor organization acting in their behalf alleging that their employer declines to recognize their representative as the representative defined in subsection (a) in a unit appropriate for the purposes of collective bargaining under a rule established by the Board pursuant to section 6 or a decision in the applicable industry, that a majority of the employees in that unit have designated that individual or labor organization as their representative defined in subsection (a), and that no individual or labor organization is currently certified or recognized as the exclusive representative of any of the employees in the bargaining unit defined in the petition, the Board shall investigate such petition. If the Board finds that the unit there specified is a unit appropriate for the purposes of collective bargaining under a rule established by the Board pursuant to section 6 or a decision in the applicable industry, and if the Board has reasonable cause to believe that a question of representation affecting commerce exists and that the other conditions specified in this subsection have been met, the Board shall within seven days after the filing of the petition direct an election by secret ballot not more than 15 days after a petition is filed under this subparagraph and shall so notify the representative named in the petition and the employer.

"(B) In any proceeding under this subsection in which the Board directs an election by secret ballot, and which is not governed by subparagraph (A) of this paragraph, the board shall direct the election on a date not more than 45 days after the filing of the petition and shall inform the representative named in the petition, the employer, and all other interested parties of the election date not less than 15 days prior to the election except that where the Board determines that the proceeding presents issues of exceptional novelty or complexity, the Board may direct the election on a date not more than 75 days after the filing of said petition.

"(C) After an election conducted pursuant to subparagraphs (A) or (B) of this paragraph is completed, the Board shall promptly serve the parties with a tally of the ballots.

"(D) (i) Any party to the election conducted pursuant to subparagraphs (A) and (B) of this paragraph may, within five days after such election, object to the election on the ground that conduct contrary to a rule relating to election declared by the Board pursuant to its authority under section 6 or conduct contrary to a rule of decision declared by the Board in a proceeding under section 10 did affect the result of the election.

"(ii) With regard to challenged ballots, the Board shall, where such ballots are sufficient in number to affect the outcome of the election, investigate the challenges and serve a report upon the parties on challenges.

"(iii) The Board shall move expeditiously to resolve any issues raised by the objections or regarding eligibility and to certify the results of the election, provided that an objection that an election was conducted under subparagraph (A) instead of subparagraph (B) shall not be a basis for setting the election aside.".

SEC. 6. Section 9(d) is amended by inserting immediately before the period at the end thereof a comma and the following: "except that no such certification shall be set aside unless the Board in issuing such certification prejudicially violated the procedural requirements of this Act or of subchapter II of chapter 5, United States Code, or acted arbitrarily or capriciously, or contrary to a specific prohibition of this Act or of the Constitution".

SEC. 7. The first sentence of subsection (10)(b) is amended to read as follows:

"(b) Whenever—

"(1) it is charged that any person has engaged in or is engaging in any such unfair labor practice, or

"(2) it is charged that any person has engaged in or is engaging in a willful violation of—

"(A) any final order of the Board entered pursuant to subsection (c) of this section and which is not and has not been the subject of a proceeding under subsection (e) or (f) of this section, or

"(B) any final order of a court of appeals of the United States entered in a proceeding under subsection (e) or (f) of this section, prohibiting interference with, restraint or coercion of employees in the exercise of the rights guaranteed in section 7 or discrimination against employees to encourage or discourage membership in a labor organization,

and that said violation occurred within three years of the entry of the order violated,

the Board, or any agent or agency designated by the Board for such purposes, is authorized to issue and cause to be served upon such person a complaint stating the charges. Such complaint shall contain a notice of hearing before the Board or member thereof, or before a designated agent or agency, at a place therein fixed, not less than five days after the serving of such complaint. No complaint shall be issued based upon any unfair labor practice or willful violation of a final order occurring more than six months prior to the filing of the charge with the Board and the service of a copy thereof upon the person against whom such charge is made, unless the person aggrieved thereby was prevented from filing such charge by reason of service in the armed forces, in which event the six-month period shall be computed from the day of his discharge.".

SEC. 8. Section 10(c) is amended by—

(1) inserting "(1)" after "(c)";

(2) striking out the fifth sentence of paragraph (1) (as redesignated by this section) and inserting in lieu thereof the following: "If upon the preponderance of the the testimony taken the Board shall not be of the opinion that the person named in the complaint has engaged in or is engaging in any such unfair labor practice, or has willfully violated or is willfully violating a final order as specified in subsection (b) of this section, then the Board shall state its findings of fact and shall issue an order dismissing the said complaint.";

(3) by adding at the end thereof the following new paragraphs.

"(2) If upon the preponderance of testimony taken the Board shall be of the opinion that the allegation in the complaint that a person has willfully violated or is willfully violating a final order as specified in subsection (b) of this section has been sustained, then the Board shall state its findings of fact and shall issue and cause to be served on such person an order certifying the identification of that person to the Secretary of Labor. Notwithstanding any other law, unless the Secretary of Labor determines that because of unusual circumstances the national interest requires otherwise, the Secretary shall certify the identity of such person to the Comptroller General. The Comptroller General shall distribute a list to all agencies of the United States containing the names of persons certified by the Secretary of Labor pursuant to this subsection. Notwithstanding any other law, no contracts shall be awarded to such person during the three-year period immediately following the date of the Secretary's certification, unless the agency of the United States concerned, after notice and opportunity for hearing to all interested parties, certifies to the Secretary of Labor that there is no other source for the material or services furnished by the person affected by the Board order.

"(3) In a case in which the Board determines that any person has engaged in an unfair labor practice within the meaning of subsection (a)(3) or (b)(2) of section 8 which deprives an employee of employment while employees in a bargaining unit which includes that employee are seeking representation by a labor organization or during the period after a labor organization has first been recognized as a representative defined in subsection (a) of section 9 in such unit until the first collective bargaining contract is entered into between the employer and the representative, the measure of backpay for the period until a valid offer of reinstatement is made shall be double the employee's wage rate at the time of the unfair labor practice. In a case in which the Board determines that an unlawful refusal to bargain prior to the entry into the first collective bargaining contract between the employer and the representative selected or designated by a majority of the employees in the bargaining unit has taken place, the Board may award to the employees in that unit compensation for the delay in bargaining caused by the unfair labor practice which shall be measured by the difference between (i) the wages and other benefits received by such employees during the period of delay, and (ii) the wages and fringe benefits such employees were receiving at the time of the unfair labor practice multiplied by the percentage change in wages and other benefits stated in the Bureau of Labor Statistics, Average Wage and Benefit Settlements, Quarterly Report of Major Collective Bargaining Settlements for the quarter in which the delay began. If the Secretary of Labor certifies to the Board that the Bureau has, subsequent to the effective date of the Labor Reform Act of 1977, instituted regular issuance of a statistical compilation of bargaining settlements which the Secretary determines would better effectuate the purposes of this subsection than the compilation specified herein, the Board shall, in administering this subsection use the compilation certified by the Secretary.".

SEC. 9(a) The third sentence of subsection 10(e) is amended by inserting the following immediately before the period at the end thereof a comma and the following: "nor shall any objection be considered by the court unless a petition for review pursuant to subsection (f) of this section has been timely filed by the party stating the objection".

(b) The first sentence of subsection 10(f) is amended by

(1) inserting "within 30 days" after "by filing", and

(2) inserting before the period at the end

thereof the following: "except that if a petition for review has been timely filed, any other party to that Board proceeding, aggrieved by the order, may, within 15 days of service on it of said petition, file a further petition for review.".

SEC. 10. The first sentence of section 10(1) is amended to read as follows:

"(1) Whenever it is charged that any person has engaged in an unfair labor practice within the meaning of—

"(1) subsection (a)(3) or (b)(2) of section 8 which deprives an employee of employment while employees in a bargaining unit which includes that employee are seeking representation by a labor organization or during the period after a labor organization has first been recognized as a representative defined in subsection (a) of section 9 in such unit until the first collective bargaining contract is entered into between the employer and the representative, or

"(2) subsection 4 (A), (B), or (C) of section 8(b) or section 8(e) or section 8(b)(7), the preliminary investigation of such charge shall be made forthwith and given priority over all other cases except cases of like character in the office where it is filed or to which it is referred.".

SEC. 11. Section 10(m) is amended by inserting "under circumstances not subject to section 10(l)," after "section 8,"

SEC. 12. Except as otherwise specifically provided in this Act, the amendments made by this Act shall take effect 60 days after the date of enactment of this Act.

FACT SHEET: LABOR REFORM ACT OF 1977

The Labor Reform Act of 1977 embodies several procedural and remedial changes to the National Labor Relations Act which are designed to correct two major problems that have arisen under the current Act: (1) delays in the processing of both election petitions and unfair labor practice cases, and (2) the inadequacy of the remedies which the National Labor Relations Board may invoke against violators of the law, particularly when violations occur during the critical period before a collective bargaining relationship is first established. The bill addresses these problems by (1) restructuring the operation of the Board to minimize delay in election and unfair labor practice proceedings without sacrificing the protections of due process, and (2) creating more effective remedies which will become meaningful deterrents to violations of the law. Specifically the bill provides for—appropriate bargaining units to be established to the fullest extent practicable by rulemaking; and election deadlines imposed on the Board—

(a) Where the unit is covered by a rule or decision, and where the union produces authorization cards from more than half of the unit employees, the election must be held within 15 days after the filing of a representation petition. This period may be extended to 21 days in certain circumstances.

(b) Where the unit is covered by a rule or decision, and where the union produces authorization cards from more than 30% of the unit employees, the election must be held within 45 days from the filing of a representation petition.

(c) Where the Board determines that the issues involved in the representation case are of exceptional novelty or complexity, the election may be delayed as long as 75 days from the date the representation petition was filed—

When employers make campaign speeches or other communications to employees on plant premises or during working time, employees to be given opportunity to receive information from union in equivalent manner, consistent with maintenance of production, details to be established by rulemaking within one year;

Whenever an employee is discharged during an organizational campaign or during a period after an election but prior to the entering into of a first collective bargaining contract, the Board must seek reinstatement of that employee through a court injunction under section 10(1) of the Act;

Employees discharged for protected activities during an organizational campaign or during a period after an election prior to a first collective bargaining contract must be reimbursed at double their wage rate with no deductions for income or behavior in their interim;

Where a party is found guilty of refusing to bargain in good faith for a first collective bargaining contract, the Board may award damages to the employees based upon an objective statistical measure of wage gains under collective bargaining agreements;

The expansion of NLRB from 5 to 7 members, with 7-year terms;

Quorum of 2 Board members may summarily affirm an Administrative Law Judge's unfair labor practice decision within 30 days after the ALJ's decision upon the motion of the prevailing party, procedure to be established by rulemaking within 90 days;

Any party seeking judicial review of a final order of the Board must file in court within 30 days of the Board order; otherwise the Board will obtain automatic court enforcement of its order;

Employers who the Board finds have willfully violated a final order of the Board, or of the Court where the Board's order was contested within the last 3 years to be debarred for three years unless the Secretary of Labor finds that the national interest requires otherwise or agency finds firm is sole source of material or service;

Separate units of guards may be represented by any local union, except for a local that admits into membership other employees of the same employer at the same location or a local that is affiliated with a national or international union that represents other employees of the same employer at the same location.

ENERGY AND TAXES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. COTTER) is recognized for 10 minutes.

Mr. COTTER. Mr. Speaker, as my colleagues know, the Ways and Means Committee recently completed markup of the tax portions of the National Energy Act. I explained the results of the committee's work in the Hartford, Conn., Courant, and I would like to share that article with my colleagues.

[From the Hartford Courant, July 15, 1977]

ENERGY AND TAXES

(By Congressman BILL COTTER)

The Ways and Means Committee has completed its draft of President Carter's National Energy Act. Every American should try to understand this legislation because it will change our standard and style of living.

In its final form, our bill is close to the President's original version. The committee decided to adopt most of his major proposals because we agreed that America's wasteful consumption of finite energy resources cannot go on forever.

Connecticut residents don't need to be convinced that there is an energy crisis. Last winter's uncontrolled escalation in the price of home heating oil was proof enough that the country needed a long-range energy policy.

But the crisis has been building since the end of World War II. During the fifties and sixties, America's unprecedented economic expansion and material prosperity made us more and more dependent on foreign oil. While U.S. companies enjoyed a monopoly over the exploitation of Middle Eastern oil, few Americans were worried. But as nationalistic governments began in the sixties to assert more and more control over their natural resources, American companies eventually lost their monopoly. We soon discovered the price of our dependence on imported oil.

The Arab oil embargo of 1972–73 hurt us more deeply than the temporary inconvenience of long lines at the gas pump. Since the embargo, Connecticut homeowners have seen the price of home oil swell by more than 300 per cent. At the same time, the high energy bill of American farmers has been passed on to the consumer in the supermarket.

But even before 1972, Connecticut was paying a higher home fuel bill than almost any other state in the country. With no energy reserves of its own, the state has long been dependent on foreign oil. Between 1959 and 1972, when foreign oil was cheaper than domestic, tariffs and quotas forced up the price of imported oil and compelled Connecticut distributors to buy more of the expensive domestic oil than they wanted.

Therefore, OPEC price increases since 1972 have only added to a state fuel bill that already was higher than the rest of the country.

The President's energy bill is less than perfect, but it gives Congress a basic working document with which a national energy policy can be enacted. Some of its most important provisions—energy taxes and credits—went to the Ways and Means Committee.

Taxes and credits are the clout behind the President's "carrot and stick" approach to the energy crisis. Some taxes, for example, are designed to discourage wasteful consumption of oil and natural gas by raising the price of these two fuels. Tax credits are provided to make it easier for industries and utilities to convert to coal, which is cheaper and more plentiful. Credits also will help consumers insulate their homes and purchase equipment for solar and wind energy.

The new energy taxes will raise revenue, and part of the committee's job was to decide how this money should be spent. Much of it will be returned to consumers in the form of rebates, which should keep the taxes from dampening economic growth. Some of the rebates are also intended to correct the social inequities that otherwise would result from the energy plan.

During the committee's month-long drafting work on the bill, two decisions were made that will affect Connecticut residents directly: tax rebates for users of home heating oil and a tax exemption for Connecticut utilities and industries.

The President's proposed wellhead tax on domestic crude oil has been called the "centerpiece" of his energy plan. This particular tax, which the committee adopted, is supposed to discourage oil consumption by raising domestic oil prices to the world level.

Under the President's proposal, the revenues from the wellhead tax would be rebated back in two ways: one general rebate for all consumers, and one rebate specifically for the purchase of home heating oil.

The President's rebate concept was equitable and fair. The general rebate would return tax money taken out of the economy and therefore avoid the recessionary impact of a major new tax. The home oil rebate would protect low- and middle-income consumers who already are paying more than they can afford for a basic necessity.

Without the home oil rebate, the wellhead tax would have increased the nation's residential fuel bill by $1.4 billion in 1980 alone. In Connecticut, the 1980 price tag would have been $64 million.

Home heating oil is not a wasteful luxury Since other provisions of the energy bill were designed to protect homes heated with electricity or natural gas, the home oil rebate was a logical way to help another group of consumers.

However, this rebate was almost killed when some committee members decided it was a special favor to New England. They persuaded the committee to delete the provision from the bill. Only four members dissented.

Two weeks later, the home oil rebate was back. The committee changed its mind when it learned there were homeowners dependent on home heating oil in 14 states outside New England, including Wisconsin, Michigan, Illinois, Ohio, Virginia and North Carolina. The issue, as I pointed out during the committee's debate, was clearly not one of "favoritism" to New England.

The "Cotter amendment," which put the rebate back into the bill, was passed on a 20 to 14 vote. By 1980, the amendment would be worth approximately $150 a year to the average home oil consumer. At the same time, it preserves the general rebate that goes to all consumers.

Both rebates would need Ways and Means approval again next year when the committee hopes to rewrite the tax code.

The home oil rebate is consistent with a basic principle in the Carter energy plan: Although everyone will have to make sacrifices, America's future energy policy should be fair to all regions and consumers.

The second important decision for Connecticut came after the committee voted to tax natural gas and oil burned by industries and utilities. The tax would be supplemented by a tax credit to help the industries and utilities convert to coal.

These were good proposals, but they posed a threat to states like Connecticut, where federal clean air standards forced utilities to discontinue coal, a major pollutant, in favor of cleaner fuels like oil. Connecticut utilities therefore faced a dilemma: burn oil, pay a heavy federal tax and pass the costs on to the consumer, or convert back to coal and risk violation of federal air quality standards.

In Connecticut, where air pollution is second only to Los Angeles, this was a serious problem. The committee therefore decided that utilities and industries forced by government order to burn oil or natural gas would not have to pay the tax.

In addition to these two decisions, the committee voted to:

Provide tax credits for homeowners and renters who install insulation and equipment for solar or wind energy.

Repeal various federal taxes on school and transit buses.

Grant tax credits for the purchase of electric automobiles and to encourage the development of geothermal energy.

Tax "gas guzzling" automobiles.

The "gas guzzler" tax was delayed until the 1979 model year. The committee took this step because General Motors has a head start on its competitors in the development of the small, gas-saving cars the tax is designed to favor. A one-year delay will give GM's rivals a chance to catch up and preserve competition in the industry. When it is imposed, however, the tax will be heavier for the most wasteful cars than the Administration's original proposal.

In its final form, the Ways and Means version of the energy bill will save slightly less than the President's version. White House energy experts, who worked closely with the committee during the long drafting sessions, have said they are basically pleased with the committee's product.

Most Ways and Means members believe they have written an equitable bill that will reduce energy waste without imposing unfair hardships on low- and middle-income consumers or on certain regions of the country. Every effort was made to limit the legislation's effect on the country's economic recovery.

The committee's work and the work of other House committees now goes to an Ad Hoc Energy Committee. The bill then faces action on the House floor and in the Senate.

The Ways and Means Committee has not written a perfect energy bill, and we believe that the legislation, once enacted, will need revision in the future. Even the most optimistic analysts of the President's original bill conceded that it could not significantly reduce our dependence on OPEC oil even after 1985.

But in spite of these doubts, we will have a national energy policy for the first time in our country's history. Future Congresses will have the opportunity to criticize and change this policy as the need becomes evident.

ANNOUNCEMENT OF HEARINGS ON ILLEGAL ALIENS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. EILBERG) is recognized for 5 minutes.

Mr. EILBERG. Mr. Speaker, I wish to announce that the Subcommittee on Immigration, Citizenship, and International Law of the Committee on the Judiciary has scheduled 2 days of public hearings July 27 and 28 to consider the problem of illegal aliens in general as well as proposed legislation to combat this problem.

The hearings will be held in room 2237 Rayburn House Office Building and will commence at 9:30 a.m. on both Wednesday and Thursday.

These will be the first in a series of hearings to be held on this subject and it is our intent to receive testimony only from Members of Congress during next week's hearings.

Those Members who are interested in testifying before the subcommittee on either of the aforementioned dates should address their requests to the Committee on Judiciary, room 2139, Rayburn House Office Building, or contact the subcommittee staff at 225–5727.

TRIBUTE TO DR. WILLIAM EDWARD FARRISON

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Mrs. BURKE) is recognized for 5 minutes.

Mrs. BURKE of California. Mr. Speaker, I would like to bring to the attention of my colleagues the record of an outstanding individual, Dr. William Edward Farrison.

Recently North Carolina Central University named its communications building after Dr. Farrison, who retired from the faculty in 1970 after 31 years as a teacher and 20 as chairman of the English department. The Farrison-Newton Building is only the third structure that has been named after a living person.

Dr. Farrison has made a tremendous contribution to the university community and has won the affection and admiration of his colleagues, friends and associates. It gives me special pleasure to compliment his fine career and achievements.

Miss Pauline Newton, an assistant professor of English is the cohonoree of the $2.5 million communications building.

NO "FREE RIDE" ON THE WATERWAYS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 15 minutes.

Mr. ALEXANDER. Mr. Speaker, The Washington Post carried a very pertinent viewpoint in its issue of July 19 regarding the issue of our inland waterways. The author, Harry N. Cook, is executive vice president of the National Waterways Conference, Inc.

In an effort to inform my colleagues of the value and benefits provided to the public and the relatively limited public investment in the waterways as a transportation system, I am commending it to my colleagues:

NO "FREE RIDE" ON THE WATERWAYS

(By Harry N. Cook)

After following T. R. Reid's continuing coverage of the saga of S. 790 in The Washington Post, many readers must be saluting efforts of New Mexico's Sen. Pete Domenici (R) to end the waterway users' "free ride" on the "federally built and [federally] maintained waterways." In fact, each of the articles must lead readers to wonder why on earth Congress hasn't gotten around to enacting waterway tolls in almost 200 years of federal government.

There are many reasons why not. I want to address just two of them. These are, first, that the federal taxpayer foots the entire bill for the inland navigation system and, second, that waterways have been unduly favored by transportation subsidies.

Even when defined in the narrowest sense, as a series of dredged channels and navigation structures to control depths, the waterways are not wholly federal projects. The U.S. Water Resources Council determined that non-federal interests currently provide seven per cent of the construction costs and eight per cent of the operation, maintenance and repair costs of in-channel navigation improvements. Non-federal expenditures include provision of lands, easements and rights-of-way, and dredged-material disposal sites.

But navigable channels alone do not make usable waterways. Before a waterway can be productive, extensive non-federal investment is required for onshore facilities such as wharves, terminals, docks, warehouses, elevators, special cargo-handling equipment, fire, water and sewer services, highway connections and railroad spurs. Much of this investment comes from private-sector users and beneficiaries of the waterway system, including port authorities and communities.

Port-related investments often total 20 to 40 percent of the federal cost of inland-waterway improvements. Thus, waterways are hardly projects of the federal govern-

ment. Rather, the federal investment serves as the "seed money" to attract large investments by states, localities and the users themselves.

These shippers, in return, have made a financial commitment stimulated by the federal investment that first made the channels navigable. Since 1952, some 10,000 plants have been built or substantially expanded along the nation's inland waterways. This expansion represents a capital investment exceeding $171 billion.

When the inland-waterway system is viewed as the complex transportation system and critical component of America's industrial and governmental economy that it truly is, the non-federal and especially the "user" contribution to the system's viability has been enormous. It far outstrips the modest $5 billion that the federal government has spent since 1824 on construction, operation and maintenance of navigation channels.

The federal government has always assisted all the major transportation modes: railroads, highways and airways as well as waterways. All are the beneficiaries of subsidies and other programs totaling in the billions of dollars. However, the lion's share of federal assistance has gone to highways, railways and airways.

While highway users do pay fuel taxes, it is important to note that government expenditures for streets, roads and highways that are not recovered from the users amounted to $4.3 billion in 1973, a typical year. In other words, in a single year, the total unrecovered government investment in highways, roads and streets almost equalled the 150-year total unrecovered government investment in inland-waterway construction, operation and maintenance.

Likewise, the cumulative waterway subsidy was exceeded by a single program of federal aid to the nation's railroads—the $6.4 billion Rail Revitalization and Regulatory Reform Act. A century ago, American railroads received perhaps the largest government subsidy in history: land and right-of-way grants totaling 9.4 percent of the continental United States. In more recent times, railroads have been the beneficiaries of various programs having the effect of subsidies: grade-crossing elimination, the Regional Rail Reorganization Act, a 1974 act to refinance the Railroad Retirement Act, inauguration of the quasi-governmental Amtrak passenger service. In addition, railroads are the beneficiaries of special federal tax relief.

Frequently, the statement is made that railroads must build, operate and maintain their own rights-of-way, while barge and truck rights-of-way are furnished by the federal government. There is one important difference, however. Waterways are public ways, open to all, and the competition is fierce. Because they own private rights-of-way, railroads control the traffic that moves over their tracks and the freight rates that are charged. To have a similar situation on the waterways, the federal government might consider granting a particular bargeline company exclusive rights to operate on, for instance, the Ohio River. If that line had the right to control all the traffic on the Ohio River and the rates charged, it is entirely probable that it could maintain the waterway, pay taxes on it and make a profit, too. But the line surely could not do all this without raising rates substantially. And who would pay? Clearly, the taxpayers and consumers.

The point is that waterways have been neither alone nor at the forefront in receipt of national support. The inland waterways move 16 percent of the nation's cross-country freight at a cost of less than two per cent of the total freight transportation revenues.

A waterway-user charge might be designed to recover revenues at a certain level for the government. Advocates in government have suggested 100 per cent cost recovery. But consumers of transportation services would actually pay several times the intended amount. They would pay again as water-competitive rail rates increased. Railroad spokesmen have estimated that water-compelled rail rates depress rail earnings by approximately $500 million a year. It is reasonable to assume, therefore, that imposition of waterway-user charges—freeing railroads from the constraint of lower water rates—would cost rail shippers as much as $500 million annually in higher rail rates.

These considerations suggest the wisdom of a careful and exhaustive study of the economic impact of waterway-user charges before rushing into inadequately considered legislation.

LOBBYIST OPPOSING CLASS ACTION SECTION OF H.R. 3816

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ECKHARDT) is recognized for 5 minutes.

Mr. ECKHARDT. Mr. Speaker, in past special orders, I have described some of the inconsistencies and duplicity of lobbyists in opposing the class action section of H.R. 3816, the Federal Trade Commission amendments. Today, I would like to focus on the behavior of the chief lobbyist for the Business Roundtable, who apparently sees no inconsistency in lobbying against this provision on the grounds that it would clog the courts, while he argues against closing the courthouse doors in his capacity as a lobbyist for another organization.

This lobbyist has argued that the class action section of H.R. 3816 would clog the courts and unduly line the pockets of opportunistic attorneys.

It is ironic that this same lobbyist also represents the Association of Trial Lawyers of America. In that capacity, he opposes no-fault auto insurance, arguing that the victims of automobile accidents should not be denied their rights to sue.

It is not unusual, of course, for a lawyer to take two conflicting positions for two separate clients, but when he is making both of his arguments in the public arena as a lobbyist, it is quite appropriate to point out the inconsistencies.

How is it that consumers making claims that they have been cheated in the marketplace clog the courts, but personal injury claimants do not? Incidentally, no-fault legislation permits full recovery for most permanent disability or serious bodily impairment and certain economic, hospital, and medical recovery for all injured persons.

However, it is not my purpose here to argue for or against no-fault insurance. I merely state that one insisting on all traditional rights for auto collision victims is in a poor position to deny any effective recovery to the thousands of consumers who are cheated in the marketplace daily.

How is it that trials which consolidate the cases of many consumers cheated in the same way in a single suit can be said to be more burdensome and time-consuming than the many separate claims of persons alleging personal injury?

How can it be argued that lawyers conducting class actions—thus avoiding a multiplicity of suits—are overpaid at 17 percent of the amount involved when personal injury attorneys bringing a multitude of suits are taking one-third or one-half of the recovery for themselves?

A lawyer best serves his client and the social system when it is possible for him to make a decent fee without overburdening his client by taking an inordinately great amount of the recovery. Every practicing lawyer knows that most consumer frauds involve too small an amount to make it worthwhile to try the customer's case. H.R. 3816 simply affords a means by which consumers may bring their cases in court in a practical and efficient way. I am sure that most of the trial lawyers of America would agree with the principles that underlie this bill. Of course, the Business Roundtable, which looks upon the judicial process as a nagging inconvenience to unrestrained business conduct, would disagree.

LEGISLATION TO REFORM THE SOCIAL SECURITY RETIREMENT TEST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. HAMILTON) is recognized for 30 minutes.

Mr. HAMILTON. Mr. Speaker, no one in this Chamber can doubt that life is becoming more difficult each day for millions of older Americans. Members of Congress ought to be especially sensitive to their problems. Who among us has not received touching letters from elderly constituents who live alone, who cannot get adequate social services or who cannot make ends meet on a meager income? Who among us has not sensed the helpless—or what is worse, hopeless—tone of such letters? As Members of Congress we bear a certain responsibility for the unacceptable conditions in which too many elderly people find themselves. It is incumbent upon us to identify and to understand the causes of their problems. It is our obligation to take whatever corrective steps we can and to set things right with America's aged.

Our easy access to information on the elderly does not permit us to claim ignorance of the causes of their problems. The dramatic social changes of the past few decades, especially the weakening of traditional family bonds in a society whose younger members have become increasingly mobile, have forced many older people to live alone without the aid and comfort of relatives. Deprived of the company and spiritual support that a closely knit family provides, they live out their final years in numbing isolation. Tied by choice or necessity to the familiar places in which they have passed so many years, they remain behind in America's hard-pressed rural areas and decaying inner cities. The statistics on their numbers are fairly precise, but the depth of their feelings of abandonment can only be guessed at.

The striking demographic changes of the past few decades, namely, a greater lifespan and a lower birth rate in all regions of the Nation, are also complicating the situation of the elderly. Any community of people suffers if its numbers increase too rapidly, and the community of the aged is no exception. One look at the statistics on aging in America leaves no room for doubt that the Nation's population is growing older at a profoundly rapid rate.

At the turn of the century, only one in every 25 Americans was aged 65 years or more. Today, 1 in every 10 Americans falls into this age category. If present trends continue, the proportion will reach one in every eight by the year 2000 and one in every six by the year 2030. In the absence of vigilance and action, this sort of increase in the numbers of a community inevitably results in the deterioration of social services in that community. Our society, which is geared to the needs and desires of the young, does not have sufficient retirement homes, hospitals or recreational facilities for the elderly. Likewise, it does not count among its members enough practitioners of the professions that serve the elderly. Worst of all, its public and private programs to assist the elderly are not adequate to meet the demands placed on them. Overcrowding, neglect and despair are the ultimate consequences.

There is one final factor which aggravates older people. I am referring, of course, to the rampant inflation that has wracked the American economy in the past few years. Runaway prices have hit everyone hard, but older people on a fixed income have been most cruelly hurt. Aside from the erosion of purchasing power—purchasing power which cannot be recouped if income is fixed—inflation harms the elderly in other ways. First, they must dispose of an increasingly greater share of their income in order to live, and so they cannot accumulate savings or make investments as a hedge against inflation. Furthermore, the necessities of life on which they spend most of their income, that is, food, shelter and medical care, are items whose prices rise the fastest of all.

Aged Americans are victims of an economic syndrome that pushes them into a more precarious position each year. It is already the case that a substantial portion of the elderly do not receive enough income to support themselves. Those who live alone or with nonrelatives tend to be the poorest of any single identifiable group in America. Nearly 60 percent of them receive less than $3,000 per year. Among the elderly as a whole, approximately one in six is officially classified as poor. Despite pensions, insurance programs and earnings, more than 3 million of them live in conditions of abject poverty.

It seems to me that there have been in Congress a gratifying appreciation of the problems of older people. Indeed, the 94th Congress was a watershed of legislation beneficial to them. Two major tax bills—the Tax Reduction Act of 1975 and the Tax Reform Act of 1976—contained helpful provisions. Some housing and credit discrimination problems were addressed in the Housing Authorization Act of 1976 and the Equal Credit Amendments of 1976, respectively. The improvement of health care was the object of two important bills—the Health Revenue Sharing and Health Services Act of 1975 and the Health Maintenance Organization Amendments of 1976. In addition, Congress passed the far-reaching Older American Amendments of 1975 as well as much other legislation of lesser impact.

No one can or should detract from such accomplishments. Just like the measure of a man, however, the measure of a legislature is often better taken with an eye to what was omitted and left undone. To the disappointment of millions of older people, the 94th Congress made no significant efforts in the area of social security reform. The social security program, a hallmark of the American spirit and perhaps the single most valuable program for the elderly ever enacted by Congress, continued to evade congressional examination. The success of the program in achieving its goals was not assessed; glaring deficiencies that have developed in the 42 years of its existence were not corrected. To my way of thinking, social security reform is a touchstone of concern for the elderly. No Congress, no matter how impressive its record, can boast of its concern for the elderly if it fails to ask serious questions about social security reform. I intend to ask some such questions today.

It is safe to assume that every Member of Congress knows something of the so-called retirement test, an integral part of the formula by which social security benefits are computed. The test is applied to all social security beneficiaries except disabled workers, disabled children of retired, disabled or deceased workers, and persons aged 72 years or more. At the present time the test specifies that beneficiaries may earn $3,000 per year before they begin to lose benefits at a rate of $1 for every $2 in earnings.

Besides this annual measure of retirement there is a monthly measure. Beneficiaries receive full benefits in any month during which they do not earn in excess of $250, regardless of the sum of their earnings in previous months. Only income from self-employment and wages count as earnings. A different retirement test is applied to beneficiaries who do not reside in the United States.

For many years now the retirement test has been the object of vigorous criticism. The limitations it provides have been attacked as an unnecessary, harsh and unfair disincentive to work. While there is truth to such charges, we should not think that the test was created in order to inconvenience older people. Forward-looking policymakers originally conceived the social security program first and foremost as a system of insurance. Much like the payments one receives when insured property is damaged or destroyed, social security benefits were intended to replace earnings lost when the principal wage earner of a family retired, was disabled, or died. Consequently, just as the insurer of property has tests to determine whether an insured loss has in fact taken place, so the Government had tests to determine whether a potential social security beneficiary had in fact suffered an insured loss of earnings. In the absence of such a loss, that is, in the case where a potential beneficiary was still receiving income from self-employment or wages, eligibility for benefits was not established. Income from such sources as savings, investments, and so forth, which a person was not working to earn, was not included for an obvious reason: the test was for retirement, not total income.

So the social security program was originally conceived, and in light of the original conception a retirement test was consistent. It is not a necessary feature of an insurance program, however, that it pay benefits only when an insured loss has occurred. For example, some life insurance programs, the so-called "investment plans," provide annuities to participants who have suffered no insured loss. Although the social security program could have been conceived along such lines, it is likely that it was not so conceived for a number of reasons.

In 1935, the year in which the program began to operate, Congress saw a definite advantage in a test that would push older workers into retirement. Younger workers, whose employment opportunities were strictly limited, could move more easily into the world of work. Also, Congress was justifiably worried that the limited funds available to the program might be spread too thin if those who did not suffer an insured loss were given benefits nonetheless. Moreover, Congress desired to protect a labor union movement that was none too strong in those years. Labor union representatives convinced Congress that automatic payments without a retirement test might depress wages by creating a pool of elderly workers who would willingly take jobs at low pay. The upshot of such considerations was a social security program—with a retirement test—which provided benefits only in case insured earnings were lost.

But changing times have had a clear effect on the original conception. The retirement test, which initially allowed no benefits to be paid for a month during which the potential beneficiary worked, has been liberalized in 11 separate instances since 1939. The liberalizing moves have included raises in the exempt limit of earnings, elimination of the test for persons of advanced age, establishment of the annual measure of retirement and reductions in the schedule of penalties. The test has never once been tightened. Thus, in responding to the need to improve the social security program and to keep it current, Congress has been moving in a single direction: Away from the idea of pure insurance—one gets benefits because one has suffered a loss—and toward the idea of pure entitlement—one gets benefits because one is entitled to them. The fact that there has been wide-

spread support for each of the liberalizing moves indicates that the conception behind the social security program is changing. Members of Congress should welcome this change and should search for fiscally responsible ways to encourage it.

I myself believe that it is once again time for Congress to liberalize the retirement test. To that end I am offering legislation which would weaken the test in two ways. First, the bill would assist those beneficiaries who receive less than the maximum benefits by allowing them to earn without penalty the difference between their benefits and the maximum benefits plus the exempt limit. Second, the bill would assist all beneficiaries by raising the exempt limit from $3,000 to $4,800. Both provisions would take effect for the taxable year beginning after December 31, 1977.

To see exactly what consequences the bill would have, suppose that it had gone into effect at the beginning of the present year. A person who retired at age 65 and who received the maximum benefits of $4,654.80 per year would have been able to add $4,800 to his benefits, thus bringing to $9,454.80 his total unpenalized income. A similar retiree who received the minimum benefits of $1,284.80 per year would have been able to add $8,170 to his benefits, thus bringing to $9,454.80 his total unpenalized income. Finally, a similar retiree who received the average benefits of $2,703.60 per year would have been able to add $6,751.20 to his benefits, thus bringing to $9,454.60 his total unpenalized income. The bill, then, would have established a uniform unpenalized income ceiling of $9,454.80 for such beneficiaries in place of current ceilings for them ranging from a high of $7,654.80 to a low of $4,284.80, with an average of $5,703.60. If the bill were enacted this year, the uniform unpenalized income ceiling for such beneficiaries would be slightly higher than $9,454.80 due to projected increases in social security benefits. There would be other ceilings for other categories of retirees, but all retirees in the same category would have a uniform ceiling. It is estimated that the bill would help at least 2 million older people, 1.4 million of whom lose all or part of their benefits and 600,000 of whom work only part time, or not at all, in order to stay below current limits. Those elderly capable of work, especially those in receipt of smaller benefit, would be able to achieve an adequate income without sacrificing any part of their hard-earned, well deserved benefits. At the current minimum wage, earnings of $4,800 represent slightly more than 1 year's work.

Before I close I would like to detail a few reasons why this legislation should be supported. To begin, two of the problems which originally motivated Congress to enact the retirement test, that is, the problems of making room for younger workers and of protecting wage levels, are no longer compelling. As concerns the first problem, economic conditions have improved vastly since the Depression and the forced retirement of older workers is no longer required.

Although it is not yet performing at peak efficiency, the expanding economy is creating jobs to accommodate both older and younger workers. Recent legislation to stimulate public hiring has further brightened the employment outlook. In addition, it should be remembered that a high level of competition for jobs between older and younger workers has never been conclusively documented. In fact, we know that these groups of workers often seek different kinds of employment because they have different needs. As concerns the second problem, a much stronger labor union movement and a comprehensive minimum wage statute already provide ample protection for most workers' wage levels. In any case, if more protection is called for then it can be either supplied by Congress or won through collective bargaining in a way that does not work to the disadvantage of economically powerless older people.

The third problem which originally motivated Congress to enact the retirement test is a bit more troublesome. I am referring, of course, to the problem of spreading too thin the limited funds available to the social security program. At a time when the program is on uncertain financial footing, is it fiscally responsible to draft legislation that would make greater demands on limited funds? Congress must proceed carefully in its reform of the retirement test inasmuch as small changes in the test can entail large expenditures of funds. For example, an increase in the exempt limit to $7,500—a common suggestion—would cost $3.6 billion in the first year and higher sums in subsequent years. Outright elimination of the test would cost $7 billion in the first year and higher sums in subsequent years. Therefore, I do not favor either a sizable increase in the exempt limit or the outright elimination of the test at the present time. Before such steps are taken Congress should address the serious problem of adequate funding for the social security program. No elderly person would be served if too generous benefits were to cause the program to collapse.

The bill I offer, however, can be considered fiscally responsible for two reasons. It has a moderate price tag when compared with many other bills to reform the retirement test. First-year costs would be slightly less than $3 billion. Also, because the bill would provide special relief to beneficiaries whose monthly benefit checks are small—the beneficiaries who most often require some public subsidy or assistance to survive—increased expenditures under the social security program would be offset by reduced expenditures under public subsidy and assistance programs. It is difficult to say just how much would be recovered but the sums could be substantial. For instance, 2.3 million social security beneficiaries receive supplemental security income at an annual cost of $3.5 billion. Another 3.5 million beneficiaries receive food stamps at an annual cost of $1.2 billion. A recovery of 64 percent of this $4.7 billion annual expenditure would completely offset increased expenditures under the social security program. I believe that the opportunity to have an unpenalized yearly income of over $9,500, when combined with the desire of many older people to get off the welfare rolls and onto the payrolls, would make complete recovery a live possibility.

There are other important arguments in favor of the legislation I offer. For one, there is no question but that the retirement test prompts premature withdrawal from the work force. Data of the Bureau of the Census indicate that droves of workers quit their jobs at age 65 in spite of the fact that few workers need to retire for reasons of health. It is a mistake to believe that most of these people want to stop working. Studies have shown that there is a sharp increase in work force participation among people aged 72 years or more, the exact opposite of what one would expect if these people stopped working because they wanted to. The reason for this increase is clear enough: the retirement test no longer applies at age 72.

The personal tragedy of enforced idleness is bad enough in itself. Gerontologists tell us that it can have devastating psychological effects on the elderly. It is not, however, the only cost of the retirement test. I have seen estimates that the enforced idleness of the elderly has resulted over a 12-year period in a gross national product 2.4 percent lower than it otherwise would have been. One might expect a loss of this magnitude if one considered the caliber of people being barred from productive labor. Older workers are frequently the most expert, experienced, and highly trained in their occupations. Many employers have noted that they are also the most reliable. It is sheer folly not to take advantage of such assets.

The retirement test is unacceptable on another ground: it is discriminatory in that it hits hardest at those who need their social security benefits most. On the one hand, those whose retirement income consists in a small benefit check each month are faced with the grim dilemma either of losing all their benefits through work or living in the poorest of conditions as public wards. The retirement test makes the social security program virtually worthless to such beneficiaries. On the other hand, those whose retirement income derives from large savings, investments, et cetera, are faced with no dilemma at all. The retirement test allows such beneficiaries a full compensation which they may not even need.

To compound the unfairness, the monthly measure of retirement permits the payment of nearly full compensation to those who are able to earn large amounts of retirement income in short periods of time. Such beneficiaries may earn substantial sums in a month or two and may draw their full benefits the rest of the time. It is obvious that the retirement test should not be a major part of a program one of whose main aims is the protection of the destitute.

Mr. Speaker, there is one final argument against the retirement test. To put it briefly, the test promotes a set of values for which Congress and the public have shown remarkably little sym-

pathy. It punishes productivity and rewards idleness. At a time when Congress is ready to eliminate work disincentives from welfare and unemployment compensation programs, the retirement test stands as a monument to inconsistent thinking. The inconsistency spills over into other areas of legislative concern. For example, Congress may very well put an end to mandatory retirement practices throughout the Nation. If this happens, then we shall be telling older workers that they can stay on the job and lose all their social security benefits in the process. I do not relish the thought of explaining such a contradiction to my elderly constituents. We cannot have it both ways. We cannot build up a policy with one hand and tear it down with the other hand. We must continue to weaken the retirement test in a fiscally responsible way. The legislation I offer should be considered.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CORCORAN of Illinois), to revise and extend their remarks, and to include extraneous matter:)

Mr. HILLIS, for 1 hour, on July 27.

Mr. BROWN of Ohio, for 1 hour, on July 27.

Mr. EVANS of Delaware, for 5 minutes, on July 19.

Mr. MARTIN, for 5 minutes, today.

Mr. FINDLEY, for 5 minutes, today.

Mr. TRIBLE, for 5 minutes, today.

(The following Members (at the request of Mr. VOLKMER) to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. AUCOIN, for 5 minutes, today.

Mr. THOMPSON, for 5 minutes, today.

Mr. COTTER, for 10 minutes, today.

Mr. EILBERG, for 5 minutes, today.

Mr. JONES of North Carolina, for 5 minutes, today.

Mrs. BURKE of California, for 5 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. ALEXANDER, for 15 minutes, today.

Mr. GUDGER, for 5 minutes, today.

Mr. ECKHARDT, for 5 minutes, today.

Mr. HAMILTON, for 30 minutes, today.

Mr. WIRTH, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SISK, to revise and extend his remarks in the body of the RECORD in connection with the consideration of H.R. 7171 immediately following the Agriculture Committee chairman.

(The following Members (at the request of Mr. CORCORAN of Illinois), and to include extraneous matter:)

Mr. ABDNOR in two instances.

Mr. BROWN of Ohio in two instances.

Mr. MARTIN in two instances.

Mr. PURSELL.

Mr. HYDE in two instances.

Mr. MICHEL.

Mr. HAGEDORN.

Mr. LAGOMARSINO.

Mr. WHALEN.

Mr. BROWN of Michigan.

Mr. ANDERSON of Illinois.

Mr. CRANE.

Mr. DORNAN in two instances.

Mr. MARLENEE in two instances.

Mr. SNYDER in two instances.

Mr. KEMP in two instances.

Mr. DERWINSKI.

Mr. BROOMFIELD.

Mr. ASHBROOK in three instances.

Mr. STEIGER.

Mr. TREEN.

Mr. STEERS.

Mr. PRESSLER in two instances.

(The following Members (at the request of Mr. VOLKMER) and to include extraneous matter:)

Mr. AKAKA.

Mr LONG of Maryland in two instances.

Mr. CARNEY.

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. ALEXANDER.

Mr. MCDONALD in two instances.

Mr. RISENHOOVER.

Mr. MURTHA.

Mr. SISK.

Mr. FRASER.

Mr. MAZZOLI.

Mr. KILDEE.

Mr. MINISH in two instances.

Mr. EILBERG.

Mr. TEAGUE.

Mr. KOSTMAYER.

Mr. RODINO.

Mr. PEPPER.

Mr. HANNAFORD.

Mr. BRECKINRIDGE.

Mr. DOWNEY.

Mr. JOHN L. BURTON.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1496. An act to amend title 18, United States Code, to make a crime the willful destruction or attempts to destroy the trans-Alaska pipeline system; to the Committee on the Judiciary; and

S. 1502. An act to amend title 18, United States Code, to make a crime the willful destruct'on of any interstate pipeline system; to the Committee on the Judiciary.

ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2502. An act to extend certain oil and gas leases by a period sufficient to allow the drilling of an ultradeep well;

H.R. 5970. An act to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, to authorize the military training student loads, and to authorize appropriations for civil defense and for other purposes; and

H.R. 7552. An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1978, and for other purposes.

ADJOURNMENT

Mr. VOLKMER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 31 minutes p.m.), the House adjourned until tomorrow, Wednesday, July 20, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1959. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–54, to regulate land disturbing activities to prevent accelerated soil erosion and sedimentation and to prevent sediment deposit in the Potomac River and its tributaries, including the sewer system of the District of Columbia, and for other purposes, pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1960. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–56, to amend the Good Samaritan Act of the District of Columbia, to establish a program for the certification of emergency medical technician/paramedics, and for other purposes, pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1961. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–59, to revise the rates charged for medical and mental health services provided by the District of Columbia, and for other purposes, pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

1962. A letter from the Assistant Secretary of Health, Education, and Welfare for Management and Budget, transmitting notice of a proposed new system of records for the Department of Agriculture, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1963. A letter from the Secretary of the Interior, transmitting the final report on the addition of the Santa Fe Trail to the National Trails System, pursuant to section 5(b) of Public Law 90–543 (H. Doc. No. 95–189); to the Committee on Interior and Insular Affairs and ordered to be printed.

1964. A letter from the Assistant Secretary of the Interior, transmitting notice of a proposed refund for excess payments on leases by Union Oil Co. of California, Mobil Oil Corp., and Gulf Energy and Minerals Co., United States, pursuant to section 10(b) of the Outer Continental Shelf Lands Act of

1953 (Public Law 83–212); to the Committee on Interior and Insular Affairs.

1965. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the intention of the Department of State to consent to a request by a friendly government for permission to transfer certain U.S.-origin military equipment to a third party, pursuant to section 3(a) of the Foreign Military Sales, as amended; to the Committee on International Relations.

1966. A letter from the Administrator, Federal Energy Administration, transmitting a report on changes in market shares of retail gasoline marketers during March of 1977, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

1967. A letter from the Administrator, Federal Energy Administration, transmitting a report on market shares of distillate fuel oil and residual fuel oil in March of 1977 by refiner-marketers and independent marketers, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

1968. A letter from the Administrator, Federal Energy Administration, transmitting a report on the economic impact of energy actions, pursuant to section 18(d) of Public Law 93–275; to the Committee on Interstate and Foreign Commerce.

1969. A letter from the Chairman, Federal Trade Commission, transmitting the Commission's annual report on cigarette labeling and advertising, pursuant to section 8(b) of the Public Health Cigarette Smoking Act (84 Stat. 89); to the Committee on Interstate and Foreign Commerce.

1970. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a Corps of Engineers report on a survey for flood control and allied purposes on Kalihi Stream, Oahu, Hawaii, pursuant to section 219 of the Flood Control Act of 1968; to the Committee on Public Works and Transportation.

1971. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a report from the Chief of Engineers, together with other pertinent reports, on Niniichik and vicinity, Alaska, in response to resolutions of the Senate and the House Public Works Committees; to the Committee on Public Works and Transportation.

1972. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a report from the Chief of Engineers, together with other pertinent reports, on Raccoon Creek Basin, Pennsylvania, in response to a resolution of the House Public Works Committee; to the Committee on Public Works and Transportation.

1973. A letter from the Secretary of Health, Education, and Welfare, transmitting a special supplemental report on the child support enforcement program, to update the data contained in the first annual report to include the transition quarter, pursuant to section 452(a)(10) of the Social Security Act, as amended by Public Law 95–30; to the Committee on Ways and Means.

1974. A letter from the Comptroller General of the United States, transmitting a report on the need for better techniques to identify and recover overissuances of food-stamp benefits and punishment for cases of fraud (CED–77–112, July 18, 1977); jointly, to the Committees on Government Operations, and Agriculture.

1975. A letter from the Comptroller General of the United States, transmitting a report on the status of major defense installations compliance with air quality standards (LCD–77–305, July 18, 1977); jointly, to the Committees on Government Operations, Armed Services, and Interstate and Foreign Commerce.

1976. A letter from the Deputy Attorney General, transmitting the report on antitrust issues relating to the production and transportation of Alaska natural gas, pursuant to section 19 of Public Law 94–586; jointly, to the Committees on Interior and Insular Affairs, Interstate and Foreign Commerce, and the Judiciary.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 6831. A bill to establish a comprehensive national energy policy; with amendment (Rept. No. 95–496, Pt. IV). Referred portions reported from the Committee on Interstate and Foreign Commerce with amendment. Referred to the ad hoc Committee on Energy.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRODHEAD:

H.R. 8405. A bill to amend title XVIII of the Social Security Act to include dental care, eye care, and hearing aids among the items and services for which payment may be made under the supplementary medical insurance program; jointly, to the Committees on Interstate and Foreign Commerce and Ways and Means.

By Mr. DON H. CLAUSEN:

H.R. 8406. A bill to provide recognition to the Women's Air Forces Service Pilots for their service to their country during World War II by deeming such service to have been active duty in the Armed Forces of the United States for purposes of laws administered by the Veterans' Administration; to the Committee on Veterans' Affairs.

H.R. 8407. A bill to provide for the monthly publication of a Consumer Price Index for the Aged and Other Social Security Beneficiaries, which shall be used in the provision of the cost-of-living benefit increases authorized by title II of the Social Security Act; to the Committee on Ways and Means.

H.R. 8408. A bill to amend title II of the Social Security Act to provide that the automatic cost-of-living increase in benefits which are authorized thereunder may be made on a semiannual basis (rather than only on an annual basis as at present); to the Committee on Ways and Means.

H.R. 8409. A bill to amend the Internal Revenue Code of 1954 to allow a taxpayer to deduct, or to claim a credit for, amounts paid as tuition to provide an education for himself, for his spouse, or for his dependents; to the Committee on Ways and Means.

By Mr. THOMPSON:

H.R. 8410. A bill to amend the National Labor Relations Act to strengthen the remedies and expedite the procedures under such act; to the Committee on Education and Labor.

By Mr. DORNAN:

H.R. 8411. A bill to amend the Export Administration Act of 1969 to provide for greater congressional oversight of exports of items which are subject to export controls imposed for purposes of national security; to the Committee on International Relations.

By Mr. EVANS of Delaware:

H.R. 8412. A bill to require the President to appoint a Special Prosecutor to investigate and prosecute acts by agents of foreign governments to influence elected and nonelected officials and employees of the United States; to the Committee on the Judiciary.

By Mr. HAMILTON:

H.R. 8413. A bill to amend title II of the Social Security Act to increase to $4,800 the amount of outside earnings which (subject to future cost-of-living adjustments) is permitted any individual each year without deductions from benefits thereunder, with further increases in the case of individuals receiving less than the maximum provided for benefits of the type involved; to the Committee on Ways and Means.

By Mr. HANNAFORD (for himself, Mr. ASHLEY, Mr. BLANCHARD, Mr. KRUEGER, Mr. MINETA, and Mr. MARKS):

H.R. 8414. A bill to declare a national policy on investment in the private sector of the U.S. economy; to the Committee on Banking, Finance and Urban Affairs.

By Ms. HOLTZMAN:

H.R. 8415. A bill to amend title 28 of the United States Code to provide for the appointment of a Special Prosecutor in appropriate cases, and for other purposes; to the Committee on the Judiciary.

By Mr. KETCHUM:

H.R. 8416. A bill to convey rights of certain lands removed from the Tule River Indian Reservation; to the Committee on Interior and Insular Affairs.

By Mr. MURPHY of New York (for himself, Mr. JENRETTE, and Mr. NEAL).

H.R. 8417. A bill to amend title 38, United States Code, to provide for a 12-year delimiting period for a veteran to complete a program of education; to the Committee on Veterans' Affairs.

By Mr. PURSELL:

H.R. 8418. A bill to provide for a reduction in the number of Federal employees through voluntary attrition; to the Committee on Post Office and Civil Service.

By Mr. QUIE (for himself, Mr. FORD of Michigan, Mr. BUCHANAN, Mr. BIAGGI, Mr. PRESSLER, Mr. SIMON, and Mr. HEFTEL):

H.R. 8419. A bill to amend title 38, United States Code, to provide for the payment of supplemental tuition allowances to certain veterans pursuing educational programs for purposes of offsetting the differences in State educational costs; to the Committee on Veterans' Affairs.

By Mr. ROONEY (by request):

H.R. 8420. A bill to amend the Department of Transportation Act and the Regional Rail Reorganization Act of 1973 to extend the eligibility for financial assistance under the rail service assistance programs, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROSE (for himself and Mr. DRINAN):

H.R. 8421. A bill to amend title 18, United States Code, to make a crime the use, for fraudulent or other illegal purposes, of any computer owned or operated by the United States, certain financial institutions, and entities affecting interstate commerce; to the Committee on the Judiciary.

By Mr. ROSTENKOWSKI (for himself, Mr. DUNCAN of Tennessee, Mr. CORMAN, Mr. PIKE, Mr. VANIK, Mr. COTTER, Mrs. KEYS, Mr. FORD of Tennessee, Mr. BRODHEAD, Mr. MARTIN, and Mr. GRADISON):

H.R. 8422. A bill to amend title XVIII of the Social Security Act to provide payment for rural health clinic services; to the Committee on Ways and Means.

By Mr. ROSTENKOWSKI (for himself, Mr. VANIK, Mr. CORMAN, Mr. COTTER, Mrs. KEYS, Mr. FORD of Tennessee, Mr. BRODHEAD, Mr. DUNCAN of Tennessee, Mr. MARTIN, and Mr. GRADISON).

H.R. 8423. A bill to amend titles II and XVIII of the Social Security Act to make

improvements in the end stage renal disease program presently authorized under section 226 of that act; to the Committee on Ways and Means.

By Mrs. SPELLMAN:

H.R. 8424. A bill to amend the Internal Revenue Code of 1954 to allow a taxpayer to deduct, or to claim a credit for, amounts paid as tuition to provide an education for himself, for his spouse, or for his dependents; to the Committee on Ways and Means.

By Mr. WEAVER:

H.R. 8425. A bill to designate certain lands for inclusion in the National Wilderness Preservation System; to the Committee on Interior and Insular Affairs.

By Mr. WEAVER (for himself, Mr. FOWLER, Mr. COHEN, Mr. ROYBAL, Mr. ASPIN, Mr. MILLER of California, Mr. WEISS, Mr. GILMAN, Mr. DOWNEY, Mr. JOHN L. BURTON, Mr. CARNEY, Mr. METCALFE, and Mr. VENTO):

H.R. 8426. A bill to assist in the marketing and handling of 1977, 1978, 1979, 1980, and 1981 crops of wheat and feed grains; to the Committee on Agriculture.

By Mr. WINN (for himself, Mr. SEBELIUS, Mr. GUYER, Mr. ICHORD, Mr. GLICKMAN, Mr. SKUBITZ, Mr. EILBERG, Mr. SYMMS, Mr. WATKINS, Mr. TAYLOR, Mr. JONES of Oklahoma, Mr. VOLKMER, Mr. YOUNG of Missouri, Mr. THONE, and Mr. SKELTON):

H.R. 8427. A bill to amend the Natural Gas Act to provide certain limitations on gas curtailment plans; to the Committee on Interstate and Foreign Commerce.

By Mr. ADDABBO:

H. Con. Res. 292. Concurrent resolution expressing the sense of Congress with respect to the Baltic States; to the Committee on International Relations.

By Mr. STUDDS (for himself, Mr. ROSENTHAL, Mr. PIKE, Mr. ASPIN, Ms. SCHROEDER, Mr. MAGUIRE, Mr. HANNAFORD, Mr. CARR, Mr. WEAVER, Mr. BEDELL, and Mr. FITHIAN):

H. Con. Res. 293. Concurrent resolution disapproving the proposed sale of airborne early warning aircraft to Iran; to the Committee on International Relations.

By Mr. ANDERSON of Illinois (for himself, Mr. RHODES, and Mr. COHEN):

H. Res. 694. Resolution providing for the consideration of the bill (H.R. 8125) to provide for the appointment of a Special Prosecutor in appropriate cases, and to require the Attorney General to make a preliminary investigation of alleged improper foreign influence in Congress to determine whether or not such a special prosecutor should be appointed for any cases arising therefrom; to the Committee on Rules.

By Mr. MAZZOLI:

H. Res. 695. Resolution to establish a Commission on South Korean Influence; to the Committee on Rules.

By Mr. SHIPLEY:

H. Res. 696. Resolution to maximize local nighttime radio service; to the Committee on Interstate and Foreign Commerce.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

228. By the SPEAKER: Memorial of the Legislature of the State of Washington, relative to the shipment or trading of Alaskan crude oil; to the Committee on International Relations.

229. Also, memorial of the Legislature of the State of Louisiana, relative to Federal income taxes paid by retirees over the age of 65; to the Committee on Ways and Means.

230. Also, memorial of the Legislature of the State of California, relative to the enactment of a national earthquake hazards reduction program; jointly, to the Committees on Interior and Insular Affairs, and Science and Technology.

231. Also, memorial of the Legislature of the State of Nebraska, relative to regulation of the insurance business; jointly, to the Committees on Interstate and Foreign Commerce, and the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. KETCHUM introduced a bill (H.R. 8428) for the relief of Gail Williamson; which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

149. By the SPEAKER: Petition of the United Cement, Lime and Gypsum Workers, Chicago, Ill., relative to the housing problem; to the Committee on Banking, Finance and Urban Affairs.

150. Also, petition of the United Cement, Lime and Gypsum Workers, Chicago, Ill., relative to amending the National Labor Relations Act; to the Committee on Education and Labor.

151. Also, petition of the World Organization For Freedom, Dearborn Heights, Mich., relative to human rights; to the Committee on International Relations.

152. Also, petition of the Surfside Masonic Lodge, Surfside, Fla., relative to the indictment of FBI agents in certain cases; to the Committee on the Judiciary.

153. Also, petition of the township committee of the township of Cranford, N.J., relative to the funding of public works project in fiscal year 1978; to the Committee on Public Works and Transportation.

154. Also, petition of the United Cement, Lime and Gypsum Workers, Chicago, Ill., relative to unemployment compensation; to the Committee on Ways and Means.

155. Also, petition of the United Cement, Lime and Gypsum Workers, Chicago, Ill., relative to national health security; jointly, to the Committees on Interstate and Foreign Commerce and Ways and Means.

AMENDMENTS

Under clause 6 of the rule XXIII, proposed amendments were submitted as follows:

H.R. 5400

By Mr. COHEN:

Page 31, after line 6, insert the following new subsection:

(e)(1) The Administrator, in consultation with the Secretary of Health, Education, and Welfare, and in accordance with section 553 of title 5, United States Code, shall prescribe standards of accessibility for physically handicapped and elderly individuals for registration and polling places for Federal elections, which shall be adopted, as provided in paragraph (2), by any State seeking financial assistance under section 7. Such standards shall include a requirement—

(A) that all such registration and polling places be located on the ground level, or at a location accessible by elevator, of a building or other facility, that such building or facility provide easy access to the outside, by ramp or otherwise, for such individuals, and that such building or facility meet any other standard prescribed by the Administrator which is necessary to enable such individuals to register and vote at such places;

(B) that paper ballots be made available at each polling place for a Federal election, for the use of voters who would otherwise be prevented from voting because of their inability to operate a voting machine; and

(C) that any voter who is unable to operate a voting machine or use a paper ballot, because of blindness or other physical handicap, be permitted to select a person of his choice to accompany such voter into the polling place in a Federal election to assist him in the completion of his ballot.

(2)(A) In order to become eligible for financial assistance under section 7, a State shall require, except as provided in subparagraph (B), that registration and polling places in each voting precinct in such State comply with the standards prescribed by the Administrator under paragraph (1).

(B) Each such State shall provide, in any case in which the chief election official determines that there is no available site in a voting precinct complying with the standards prescribed by the Administrator under paragraph (1)(A), for one or more alternative methods of registration and voting for physically handicapped and elderly individuals. Such alternative methods may include—

(i) the selection of one or more alternative registration or polling places outside of the voting precinct, but within the same congressional district, at which such an individual may register or vote;

(ii) the use of an absentee ballot on or before election day, curbside registration or voting outside of a registration or polling place, or any methods included in a plan for voter registration submitted under section 7(c)(1); or

(iii) any other method, or combination of methods, which guarantee that such individuals will be able to fully exercise their right to vote.

(C) Each such State shall require that when such an alternative method of registration or voting is selected in a voting precinct—

(i) the appropriate State or local official shall file a report with the chief election official of the State, not later than 60 days before the election in the case of a polling place and not later than 60 days before the close of registration in the case of a registration place, in such form and containing such information as such chief election official may require, including assurances that all reasonable efforts have been made to locate a site in compliance with the requirements of paragraph (1); and

(ii) such State or local official shall issue public notice of such method as early as practicable, and in any case not later than 60 days before the close of registration or election, respectively, in which such alternative method is to be used.

(3) Any State which, in the determination of the Administrator, has established by law standards for polling and registration places at least as stringent as those prescribed under paragraph (1), and has adopted and is implementing adequate procedures for the enforcement of such standards, may apply such standards in lieu of those prescribed by the Administrator under paragraph (1), and may be eligible for financial assistance under section 7. The Administrator may require each such State to keep such records and make such reports as he considers necessary to enforce this paragraph.

By Mr. SAWYER:

On page 30, line 4, strike out "and".

On page 30, line 6, strike out the period and insert in lieu thereof a semicolon.

On page 30, after line 6, insert the following new subparagraphs:

"(D) is not a candidate (as defined in section 301(b) of the Federal Election Campaign Act of 1971 (2 U.S.C. 431(b)) with respect to the Federal election involved;

"(E) is not, at any time during the 30-day period ending on the date of the Federal election involved, an officer or employee (with or without compensation) of (i) the

United States, or any agency or instrumentality thereof, or (ii) any State, or any general purpose or special purpose unit, subdivision, agency or instrumentality thereof; and

"(F) is not, at any time during the 30-day period ending on the date of the Federal election involved—

"(i) an employee (with or without compensation) of any candidate referred to in subparagraph (D); or

"(ii) an officer or employee (with or without compensation) of an organization which, at any time during such period, engages in any activity for the purpose of influencing the nomination for election or the election of any individual to Federal office."

By Mr. SOLARZ:

Page 36, line 23, strike out "and".

Page 36, after line 23, insert the following new paragraph:

(12) establishing and maintaining voting procedures in accordance with subsection (k); and

And redesignate the following paragraph accordingly.

Page 37, line 2, strike out "(11)" and insert in lieu thereof "(12)".

Page 39, after line 20, insert the following new subsection:

(k)(1) Each State and unit of general local government which receives funds under subsection (b)(1)(A) or subsection (b)(1)(C) may use such funds to establish and maintain a program which requires each individual who registers to vote under section 6(a)(1) in any Federal election or in any State or local election conducted in the jurisdiction of such State or unit of general local government, to submit to an ink marking procedure designed as a means of identification to prevent individuals from voting more than once in any such election.

(2)(A) Such ink marking procedure shall require that any individual who registers to vote under section 6(a)(1) and who desires to vote in any election referred to in paragraph (1) shall consent to the marking of any portion of his hand with an ink marking which—

(i) does not exceed 2 square inches in size;

(ii) is visible or is detectable through the use of any mechanical or electronic device; and

(iii) remains visible or detectable for a period of not less than 24 hours nor more than 96 hours.

(B) The type of ink used in the ink marking procedure by a State or unit of general local government in accordance with subparagraph (A)(ii) shall be used uniformly for all individuals who register to vote under section 6(a)(1) and who desire to vote in any election referred to in paragraph (1) which is conducted in the jurisdiction of such State or unit of general local government.

(3) Any apparent violation of section 11 which is discovered by a State or unit of general local government as a result of the ink marking procedure established and maintained by such State or unit of general local government under paragraph (1) shall be referred to the Attorney General of the United States.

H.R. 6796

By Mr. OTTINGER:

On page 51, between lines 20 and 21, insert the following new paragraph:

"Notwithstanding the provisions of this subsection or any other provision of this section, nothing herein shall be construed as authorizing the Administrator to enter into or make any such guarantee for the purpose of financing the construction of any commercial or full sized facility, including the expansion of any modular facility to a commercial or full sized facility, to convert coal, oil shale, or other domestic resources into alternative fuels for sale in commercially marketable quantities: *Provided*, That this paragraph shall not preclude the incidental sale of such fuels or byproducts thereof produced from a demonstration facility financed in furtherance of the purposes of this section."

On page 71, lines 18 and 19, strike "legislation" and insert "any authorization and appropriation".

H.R. 7171

By Mr. BURLISON of Missouri:

SEC. 1013. Section 331 of the Consolidated Farm and Rural Development Act is amended by adding at the end thereof a new subsection as follows:

"(j) in any area eligible for emergency loans under subtitle C, permit, at his discretion, the deferral of principal and interest on any outstanding loans made, insured, or held by the Secretary under this title, or under the provisions of any other law administered by the Farmers Home Administration, for not to exceed three years from the date of such deferral.".

By Mr. JOHN L. BURTON:

(Amendment to H.R. 7940, as reported, and offered as an amendment in the nature of a substitute for title XII of H.R. 7171, as reported.)

On page 53 of H.R. 7940, as reported, line 2, immediately after "of the" insert the following: "higher of the applicable state or".

On page 53 of H.R. 7940, as reported, after line 23, insert the following new paragraph:

"(3) A pilot project established under paragraph (2) of this subsection shall provide:

(A) Appropriate standards for health, safety, and other conditions applicable to the performance of work, including workman's compensation;

(B) That the project does not result in displacement of persons currently employed, or the filling of established unfilled position vacancies;

(C) That the project does not apply to jobs covered by a collective bargaining agreement;

(D) Reasonable conditions of work, taking into account the geographic region, the residence of the participants, and the proficiency of the participants;

(E) That participants will not be required, without their consent, to travel an unreasonable distance from their homes or remain away from their homes overnight;

(F) That participants will not be required to work in excess of 80 hours in any calendar month, nor in excess of eight hours during any calendar day in order to provide time to seek regular employment;

(G) That participation shall not result in any cost to a participant and that provisions be made for transportation, child care, and all other costs reasonably necessary to and directly related to participation in the project; and

(H) That no individual shall be required to participant in a project if—

(i) the position offered is vacant due directly to a strike, lockout, or other labor dispute; or

(ii) as a condition of accepting the work or continuing in the work, the individual would be required to join a company union or to resign from or refrain from joining any bona fide labor organization; or

(iii) acceptance would be an unreasonable act because of hardship imposed on the person or his family due to illness or remoteness.".

By Mr. HARKIN:

Line 16, page 9, after the words "disaster payments" insert the words "for prevented planting".

Line 14, page 9, strike out the period and insert the following: "and disaster payments for low-yield shall be made as provided in this section: *Provided*, That no disaster payments for low-yield for such crop shall be made under this section prior to October 1, 1977: *Provided, further*, That in the event any producers have received disaster payments for low-yield for the 1977 crop under prior law, they may retain such payments and if such payments are less than the amounts to which they are entitled under this section, the Secretary is authorized and directed to pay to such producers such additional amounts as may be due them under this section."

By Mr. JOHNSON of Colorado:

Page 52, after line 4, insert the following new section:

TOBACCO

SEC. 910. (a)(1) Section 101 of the Agricultural Act of 1949 is amended—

(A) by striking out "tobacco (except as otherwise provided herein), corn," in subsection (a) and inserting in lieu thereof "corn"; and

(b) by striking out ", except tobacco," in subsection (d)(3) and by striking out all that follows the first semicolon in such subsection.

(2) Sections 101(c) and 106 of such Act are repealed.

(3) Section 301 of such Act is amended by inserting the following before the period at the end thereof: ", except that no price support shall be made available for tobacco under this Act".

(4) Section 408(c) of such Act is amended by striking out ", tobacco".

(b) Section 303 of the Agricultural Adjustment Act of 1938 is amended by striking out "rice, or tobacco," and inserting in lieu thereof "or rice,".

(c) Section 5 of the Commodity Credit Corporation Charter Act is amended by adding the following undesignated paragraph at the end thereof:

"Notwithstanding any other provision of law, the Corporation may not exercise any of the powers specified in this section or in any other provision of this Act with respect to tobacco."

(d) The amendments made by subsections (a), (b), and (c) of this section shall become effective on January 1, 1980.

(e) Not later than January 1, 1979, the Secretary of Agriculture shall prepare and transmit to the President and both Houses of the Congress a report concerning economic effects, particularly on producers of tobacco, which are likely to result from the amendments made by subsections (a), (b), and (c) of this section and by section 1104 (a) of the Agricultural Act of 1977 becoming effective. Such report shall at least include the Secretary's findings and conclusions concerning such effects and his or her recommendations, if any, concerning methods of reducing or minimizing such effects.

Page 66, after line 15, insert the following new section and redesignate the subsequent sections accordingly:

SEC. 1104. (a) The first sentence of section 402 of the Agricultural Trade Development and Assistance Act of 1954, as amended, is amended by striking out "for the purposes of title II of this Act,"

(b) The amendment made by subsection (a) shall become effective on January 1, 1980.

By Mr. LEACH:

Page 64, line 20, strike out line 20 and insert in lieu thereof the following: "by inserting in Section 102 immediately before the first colon the words "and, when requested by the purchased of such commodities, may serve as the purchasing or shipping agent, or both, in arranging the purchasing or shipping of such commodities".

SEC. 1102. Title I of such Act is further amended by adding at the end thereof the following new section:

Page 66, line 5, strike out "1102." and insert "1103."

Page 66, line 9, strike out "1103." and insert "1104."

Page 66, line 16, strike out "1104." and insert "1105."

Page 67, line 5, strike out "1105." and insert "1106."

Page 67, line 4, insert the following:

SEC. 1105. Section 408 of the Agricultural Trade Development and Assistance Act of 1954, as amended, is amended by adding at the end thereof, the following subsection:

(d)(1) No later than six months following the date of enactment of this subsection, and at each two-year interval thereafter, the Secretary of Agriculture shall issue revised regulations governing all operations under title I of this Act, including operations relating to purchasing countries, suppliers of commodities or ships, and purchasing or shipping agents. The regulations shall include, but not be limited to, prohibitions against conflicts of interests, as determined by the Secretary, between (A) recipient countries (or other purchasing entities) and their agents, (B) suppliers of commodities, (C) suppliers of ships, and (D) other shipping interests.

" '(2) The regulations shall be designed to increase the number of exporters participating in the program, especially small business corporations and cooperatives. In this respect, the regulations shall limit—unless waived by the Secretary—the financing of any commodity exported during any fiscal year by any individual, cooperative, firm or subsidiary, or affiliate thereof, to no more than 25 per centum by volume of the planned programming of such commodity as reported under subsection (b) of this section.

" '(3) All revised regulations governing operations under title I and title III of this Act shall be transmitted to Congress by the Secretary as soon as practicable after their issuance."

Page 67, line 5, strike out "1105" and insert in lieu thereof "1106".

By Mr. SEBELIUS:

Title XI, on page 67, immediately after line 4, insert the following new section and redesignate existing section 1105 as section 1106:

"SEC. 1105. Section 408 of the Agricultural Trade Development and Assistance Act of 1954, as amended, is amended by adding the following subsection:

" '(d) Bagged commodities for the purpose of financing by the Commodity Credit Corporation under this Act shall be considered 'exported' upon delivery at port, and upon presentation of a dock receipt in lieu of an on-board bill of lading.' "

By Mr. WALKER:

(Amendments to H.R. 7840, as reported and offered as an amendment in the nature of a substitute to title XII of H.R. 7171, as reported.)

On page 4 of H.R. 7940, line 6, strike out "except" and insert in lieu thereof the following: "which is determined by the Secretary to be of high nutritional value and which is approved and identified for purchase with food stamps under section 9 of this Act, except that such term shall not include".

On page 29 of H.R. 7940, after line 22, insert the following new subsections:

(e)(1) The Secretary shall determine that a food is of high nutritional value under section 3(g)(1) and under paragraph (3) of this subsection if such food has an Index of Nutritional Quality which is at least 2 for 2 or more of the following nutrients: protein, vitamin A, vitamin C, niacin, thiamine, riboflavin, calcium, and iron, or if such food has an Index of Nutritional Quality of at least 1 for 4 or more of such nutrients; except that the Secretary after consultation with the National Research Council of the National Academy of Sciences, the Food Nutrition Board of the National Academy of Sciences, and the President of the National Academy of Sciences, may make specific exceptions to this definition of condiments or food products which have a significant value in the enhancement of palatability.

(2) As used in this subsection, the term "Index of Nutritional Quality" for a particular nutrient means the ratio of the nutrient content of the food sample to the human nutrient requirement as defined by the United States Recommended Daily Allowances, divided by the ratio of the calorific content of the sample to the United States Recommended Daily Allowance of calories.

(3) Food manufacturers, processors, and producers desiring to have their products approved for purchase with food stamps shall submit an application therefor at such times, in such form, and with such information as the Secretary may, by rule, require. The Secretary shall periodically review such applications, shall approve for purchase with food stamps those products which the Secretary determines are of high nutritional value, and shall transmit a list of products so approved to the Congress. The first such list shall be transmitted to the Congress within one year after the date of enactment of the Agricultural Act of 1977, and subsequent lists shall be transmitted at such times as the Secretary may, by rule, determine appropriate.

(4) Annually after products are first approved for purchase with food stamps under this subsection, the Secretary shall review the products approved for such purchase and withdraw the approval of any product which the Secretary determines to be no longer of high nutritional value.

(5) The Secretary shall notify food stamp recipients and retail food stores and wholesale food concerns participating in the food stamp program of products which are approved for purchase with food stamps and of the withdrawal of the approval of any product for purchase with food stamps.

(f)(1) Within 90 days after any product is approved under subsection (e) for purchase with food stamps, the manufacturer, processor, or producer of such product shall indicate the approval in a conspicuous place on the outside container or wrapper of the retail package of such product; except that if the Secretary determines that it is not feasible to so indicate the approval of any product (such as fresh meat, vegetables, and fruit), the approval need not be so indicated, and the Secretary shall notify retail food stores and wholesale food concerns participating in the food stamp program of such products and shall publish in the Federal Register a list of such products.

(2) Within 90 days after the approval of any product for purchase with food stamps has been withdrawn—

(A) the Secretary shall publish in the Federal Register a notice of such withdrawal; and

(B) the manufacturer, processor, or producer of such product shall remove any indication of the approval of such product from the outside container or wrapper of the retail package of such product.

(g) The Secretary shall select the manner by which manufacturers, processors, and producers shall indicate the approval of products for purchase with food stamps under subsection (f).

H.R. 7940

By Mr. NOWAK:

Page 16, line 25, redesignate subsection "(h)" as "(h)(1)";

Page 17, following line 12, add the following:

"(2) The Secretary shall require each State to submit a plan of operation for providing food stamps for households that are victims of a disaster. Such plan shall include, but not be limited to, procedures for informing the public about the program and how to apply for benefits, coordination with Federal and private disaster relief agencies and local government officials, application procedures to reduce hardship and inconvenience and deter fraud, and instruction of caseworkers in procedures for implementing and operating the disaster program;

"(3) The Secretary shall establish a Food Stamp Disaster Task Force, to assist states in implementing and operating the disaster program. The task force shall be available to go into a disaster area and provide direct assistance to state and local officials after the Secretary has determined that a disaster exists."

SENATE—*Tuesday, July 19, 1977*

(Legislative day of Wednesday, May 18, 1977)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by Hon. ALAN CRANSTON, a Senator from the State of California.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

God of our Fathers, whose almighty hand has made and preserved us a nation, "be Thou our Ruler, Guardian, Guide and Stay. Thy true religion in our hearts increase, Thy bounteous goodness nourish us in peace." May we never forget that this land was first settled "for the glory of God" and freedom to worship according to one's conscience. As this purpose permeated the life of the people, so many religions have flourished in this Republic. For this we give Thee daily thanks. May the Pilgrim dream be fulfilled in daily life as we remain true to the God they worshiped. Give us grace to complete what our fathers began that this Nation may be a bastion of spiritual power and a beacon of freedom to all mankind. Help us now to work in the spirit of our prayer. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., July 19, 1977.

To the Senate:

Under the provisions of Rule I, Section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ALAN CRANSTON, a Senator from the State of California, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. CRANSTON thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Monday, July 18, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TIME LIMITATION AGREEMENT—H.R. 2 CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that with reference to the conference report on the surface mining bill (H.R. 2) there be a 1-hour limitation of time for debate on the adoption of the conference report, the time to be equally divided between Mr. METCALF and Mr. HANSEN.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider Calendar Orders No. 1 and 4 on the treaties.

Mr. BAKER. Mr. President, reserving the right to object, the majority leader knows, as I just advised him, that these matters are cleared on this side on the Executive Calendar, and there is no objection to proceeding to executive session and to the ratification of these treaties.

PROTOCOL OF AMENDMENT TO THE INTER-AMERICAN TREATY OF RECIPROCAL ASSISTANCE (RIO TREATY)

The ACTING PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate as in Committee of the Whole, proceeded to consider Executive J, 94th Congress, 1st session, the procotol of amendment to the Inter-American Treaty of Reciprocal Assistance (Rio Treaty) which was read the second time, as follows:

PROTOCOL OF AMENDMENT TO THE INTER-AMERICAN TREATY OF RECIPROCAL ASSISTANCE (RIO TREATY)

(Signed at the Conference of Plenipotentiaries for the Amendment of the Inter-American Treaty of Reciprocal Assistance San José, Costa Rica, July 1975)

PREAMBLE

The High Contracting Parties represented at the Conference of Plenipotentiaries, meeting in the city of San José, Costa Rica, upon convocation by the Fifth Regular Session of the General Assembly of the Organization of American States, for the purpose of taking decisions on the amendments to the Inter-American Treaty of Reciprocal Assistance presented by the Special Committee to Study the Inter-American System and to Propose Measures for Restructuring It; of revising and coordinating the texts; and of preparing a Protocol of Amendments to that Treaty and signing it;

Considering:

That the High Contracting Parties are motivated by the desire to consolidate and strengthen their friendly relations, to ensure peace among the American States and to defend their sovereignty, their territorial integrity and their political independence;

That it is essential that peace and security among the American nations be guaranteed by an instrument that is in accordance with the history and principles of the Inter-American System;

That the High Contracting Parties wish to reiterate their will to remain united in an Inter-American System consistent with the purposes and principles of the United Nations, and their steadfast decision to maintain regional peace and security through the prevention and settlement of conflicts and disputes that could endanger them; to reaffirm and strengthen the principle of nonintervention as well as the right of all states to choose freely their political economic and social organization; and to recognize that, for the maintenance of peace and security in the Hemisphere, it is also necessary to guarantee collective economic security for the development of the American States; and

That the Preamble of the Inter-American Treaty of Reciprocal Assistance signed in Rio de Janeiro on September 2, 1947, insofar as it is compatible with this Protocol, shall be maintained because of its intrinsic value and is therefore reproduced below:

In the name of their Peoples the Governments represented at the Inter-American Conference for the Maintenance of Continental Peace and Security, desirous of consolidating and strengthening their relations of friendship and neighborliness, and

Considering:

That Resolution VIII of the Inter-American Conference on Problems of War and Peace, which met in Mexico City, recommended the conclusion of a treaty to prevent and repel threats and acts of aggression against any of the countries of America;

That the High Contracting Parties reiterate their will to remain united in an inter-American system consistent with the purposes and principles of the United Nations, and reaffirm the existence of the agreement which they have concluded concerning those matters relating to the maintenance of international peace and security which are appropriate for regional action;

That the High Contracting Parties reaffirm their adherence to the principles of inter-American solidarity and cooperation, and especially those set forth in the preamble and declarations of the Act of Chapultepec, all of which should be understood to be accepted as standards of their mutual relations and as the judicial basis of the Inter-American System;

That the American States propose, in order to improve the procedures for the pacific settlement of their controversies, to conclude the treaty concerning the "Inter-American Peace System" envisaged in Resolution IX and XXXIX of the Inter-American Conference on Problems of War and Peace;

That the obligation of mutual assistance and common defense of the American Republics is essentially related to their democratic ideals and to their will to cooperate permanently in the fulfillment of the principles and purposes of a policy of peace;

That the American regional community affirms as a manifest truth that juridical organization is a necessary prerequisite of security and peace, and that peace is founded on justice and moral order and, consequently, on the international recognition and protection of human rights and freedoms, on the indispensable well-being of the people, and on the effectiveness of democracy for the international realization of justice and security,

Have agreed upon the following:

ARTICLE I

Articles 1, 2, 3, 4, 5 (present 6), 8, 9, 10 (present 5), 20 (present 17) and 23 (present 20) of the Inter-American Treaty of Reciprocal Assistance shall read as follows:

Article 1

The High Contracting Parties formally condemn war and undertake, in their international relations, not to resort to the threat or the use of force in any manner inconsistent with the provisions of the Charter of the Organization of American States, the Charter of the United Nations or this Treaty.

Article 2

As a consequence of the principle set forth in the preceding article, the High Contracting Parties undertake to settle their disputes with one another by peaceful means.

The High Contracting Parties shall make every effort to achieve the peaceful settlement of disputes through the procedures and mechanisms provided for in the Inter-American System before submitting them to the Security Council of the United Nations.

This provision shall not be interpreted as an impairment of the rights and obligations of the States Parties under Articles 34 and 35 of the Charter of the United Nations.

Article 3

1. The High Contracting Parties agree that an armed attack by any State against a State Party shall be considered an attack against all the States Parties and, consequently, each of them undertakes to assist in meeting any such attack in the exercise of the inherent right of individual or collective self-defense recognized by Article 51 of the Charter of the United Nations.

2. At the request of the State Party or States Parties directly attacked by one or more American States and until the Organ of Consultation provided for in this Treaty takes a decision, each of the States Parties may determine, according to the circumstances, the immediate measures it may take individually in fulfillment of the obligation set forth in the preceding paragraph.

3. In the event of armed attack of extrahemispheric origin against one or more States Parties and until the Organ of Consultation takes a decision, each State Party may determine, according to the circumstances and at the request of the State Party or States Parties attacked, the immediate measures it may take in the exercise of its right of individual or collective self-defense in accordance with Article 51 of the Charter of the United Nations and with the obligation set forth in paragraph 1 of this article.

4. For the purposes of paragraphs 2 and 3 of this article, on convocation by the Chairman of the Permanent Council the Organ of Consultation shall meet without delay to examine such immediate measures as the States Parties may have taken in accordance with paragraph 1 of this article and to agree on the collective measures that may be necessary, including any joint action the States Parties may take before the United Nations, to give effect to the pertinent provisions of the Charter of the Organization.

5. The provisions of this article shall be applied in any case of armed attack against a State Party that takes place within the region described in Article 4 or within the territory under the full sovereignty of a State Party.

6. Measures of self-defense provided for in this article may be applied until the Security Council of the United Nations has taken the measures necessary to maintain international peace and security.

Article 4

The region to which this Treaty refers is bounded as follows:

Beginning at the South Pole, thence due north to a point 7 degrees south latitude, 90

degrees west longitude; thence by a rhumb line to a point 15 degrees north latitude, 118 degrees west longitude; thence by a rhumb line to a point 56 degrees north latitude, 144 degrees west longitude; thence by a rhumb line to a point 52 degrees north latitude, 150 degrees west longitude; thence by a rhumb line to a point 46 degrees north latitude, 180 degrees longitude; thence by a rhumb line to a point 50 degrees 36.4 minutes north latitude, 167 degrees east longitude, thereby coinciding with the End Point of the United States-Russia Convention Line of 1867; thence along this Convention Line to its Initial Turning Point 65 degrees 30 minutes north latitude, 168 degrees 58 minutes 22.587 seconds west longitude; thence due north along the Convention Line to its Starting Point at 72 degrees north latitude; thence by a rhumb line to a point 75 degrees north latitude; 165 degrees west longitude; thence due east to a point 75 degrees north latitude, 140 degrees west longitude; thence by a great circle to a point 86 degrees 30 minutes north latitude, 60 degress west longitude; thence due south along the 60 degrees west meridian to a point 82 degrees 13 minutes north latitude, which coincides with Point No. 127 of the Line of the Agreement between the Government of Canada and the Government of the Kingdom of Denmark, which entered into force March 13, 1974; thence along this Line of Agreement to Point No. 1 at 61 degrees north latitude, 57 degrees 13.1 minutes west longitude; thence by a rhumb line to a point 47 degrees north latitude, 43 degrees west longitude; thence by a rhumb line to a point 36 degrees north latitude, 65 degrees west longitude; thence by a rhumb line to a point at the Equator and 20 degrees west longitude; thence due south to the South Pole.

Article 5

If the inviolability or the integrity of the territory or the sovereignty or political independence of any State Party should be affected by an act of aggression as determined in accordance with Article 9 of this Treaty that does not fall within the scope of Article 3 or by a conflict or serious event that might endanger the peace of America, the Organ of Consultation shall meet immediately to agree on the measures that must be taken to assist the affected State Party and the measures and steps that should be taken for the common defense and for the maintenance of the peace and security of the Hemisphere.

If the inviolability or the integrity of the territory or the sovereignty or political independence of any other American State should be affected by an act of aggression as determined in accordance with Article 9 of this Treaty or by a conflict or serious event that might endanger the peace of America, the Organ of Consultation shall meet immediately to agree on the measures and steps that should be taken for the common defense and for the maintenance of the peace and security of the Hemisphere.

Article 8

Without prejudice to such conciliatory or peace-making steps as it may take, the Organ of Consultation may, in the cases provided for in Articles 3, 5 and 7, adopt one or more of the following measures: recall of chiefs of missions; breaking of diplomatic relations; breaking of consular relations; partial or complete interruption of economic relations or of rail, sea, air, postal, telegraphic, telephonic, radio-telephonic or radio-telegraphic, or other means of communication; and use of armed force.

Article 9

1. Aggression is the use of armed force by a State against the sovereignty, territorial integrity or political independence of another State, or in any other manner inconsistent with the Charter of the United Nations, the Charter of the Organization of American States or this Treaty.

The first use of armed force by a State in contravention of the aforementioned instruments shall constitute *prima facie* evidence of an act of aggression, although the Organ of Consultation may, in conformity with these instruments, conclude that the determination that an act of aggression has been committed would not be justified in the light of other relevant circumstances, including the fact that the acts concerned or their consequences are not of sufficient gravity.

No consideration of whatever nature, whether political, economic, military or otherwise, may serve as a justification for aggression.

2. Any of the following acts, regardless of a declaration of war, shall, subject to and in accordance with the provisions of paragraph 1 of this article, qualify as an act of aggression—

(a) Invasion by the armed forces of a State of the Territory of another State, through the trespassing of boundaries demarcated in accordance with a treaty, judicial decision or arbitral award or, in the absence of frontiers thus demarcated, invasion affecting a region which is under the effective jurisdiction of another State, or armed attack by a State against the territory or people of another State, or any military occupation, however temporary, resulting from such invasion or attack or any annexation by the use of force of the territory of another State or part thereof;

(b) Bombardment by the armed forces of a State against the territory of another State or the use of any weapons by a State against the territory of another State;

(c) The blockade of the ports or coasts of a State by the armed forces of another State;

(d) An attack by the armed forces of a State on the land, sea or air forces of another State;

(e) The use of armed forces of one State which are located within the territory of another State with the agreement of the receiving State, in contravention of the conditions provided for in the agreement or any extension of their presence in such territory beyond the termination of the agreement;

(f) The action of a State in allowing its territory, which it has placed at the disposal of another State, to be used by that other State for perpetuating an act of aggression against a third State;

(g) The sending by or on behalf of a State of armed bands, groups, irregulars, or mercenaries, which carry out acts of armed force against another State or such gravity as to amount to the acts listed above, or its substantial involvement therein.

3. Organ of Consultation may determine that other specific cases submitted to it for consideration, equivalent in nature and seriousness to those contemplated in this article, constitute aggression under the provisions of the Charter of the United Nations, the Charter of the Organization of American States on this Treaty.

Article 10

The High Contracting Parties shall immediately send to the Security Council, in conformity with Articles 51 and 54 of the Charter of that Organization, complete information concerning the activities undertaken or in contemplation in the exercise of the right of self-defense or for the purpose of maintaining inter-American peace and security.

Article 20

The Organ of Consultation shall adopt all its decisions or recommendations by a vote of two-thirds of the States Parties, except as provided for in the following paragraph.

To rescind the measures taken pursuant to Article 8, a vote of an absolute majority of the States Parties shall be required.

Article 23

The measures mentioned in Article 8 may be adopted by the Organ of Consultation in the form of:

(a) Decisions whose application is binding on the States Parties, or

(b) Recommendations to the States Parties.

If the Organ of Consultation takes measures to which this article refers against a State, any other State Party to this Treaty that finds itself confronted by special economic problems arising from the carrying out of the measures in question shall have the right to consult the Organ of Consultation with regard to the solution of those problems.

No State shall be required to use armed force without its consent.

ARTICLE II

The following new articles shall be incorporated into the Inter-American Treaty of Reciprocal Assistance and numbered as follows: 6, 11, 12 and 27.

Article 6

Any assistance the Organ of Consultation may decide to furnish a State Party may not be provided without the consent of that State.

Article 11

The High Contracting Parties recognize that, for the maintenance of peace and security in the Hemisphere, collective economic security for the development of the Member States of the Organization of American States must also be guaranteed through suitable mechanisms to be established in a special treaty.

Article 12

Nothing stipulated in this Treaty shall be interpreted as limiting or impairing in any way the principle of non-intervention and the right of all States to choose freely their political, economic and social organization.

Article 27

This Treaty may only be amended at a special conference convoked for that purpose by a majority of the States Parties. Amendments shall enter into force as soon as the instruments of ratification of two thirds of the States Parties have been deposited.

ARTICLE III

The following articles of the Inter-American Treaty of Reciprocal Assistance shall be renumbered as follows:

Article 10 shall become Article 13; 11, 14; 12, 15; 13, 16; 14, 17; 15, 18; 16, 19; 18, 21; 19, 22; 21, 24; 22, 25; 23, 26; 24, 28; 25, 29; and 16, 30.

Consequently the words "Articles 13 and 15" in the present Article 16 of the Treaty shall be replaced, in Article 19, by the words "Articles 16 and 18".

ARTICLE IV

The text and number of Article 7 of the Inter-American Treaty of Reciprocal Assistance remains unchanged.

ARTICLE V

The terms "Permanent Council of the Organization of American States" and "General Secretariat of the Organization of American States" shall replace the terms "Governing Board of the Pan American

Union" and "Pan American Union," respectively, wherever these terms appear in the articles of the Treaty that have not been specifically amended by this Protocol.

ARTICLE VI

This Protocol shall remain open for signature by the State Parties to the Inter-American Treaty of Reciprocal Assistance and shall be ratified in accordance with their respective constitutional procedures. The original instrument, the English, French, Portuguese and Spanish texts of which are equally authentic, shall be deposited with the General Secretariat of the Organization of American States, which shall transmit certified copies thereof to the Governments of the Signatory States for the purpose of ratification. The instruments of ratification shall be deposited with the General Secretariat, which shall notify the States Parties to the Inter-American Treaty of Reciprocal Assistance of each deposit.

ARTICLE VII

The Inter-American Treaty of Reciprocal Assistance, together with this Protocol of Amendment, shall remain open for signature by the Member States of the Organization of American States that are not Parties to the Inter-American Treaty of Reciprocal Assistance and shall be ratified in accordance with their respective constitutional procedures. The instruments of ratification shall be deposited with the General Secretariat, which shall notify the States Parties to the Inter-American Treaty of Reciprocal Assistance of each deposit.

ARTICLE VIII

This Protocol shall enter into force among the ratifying States when two thirds of the Signatory States thereof have deposited their instruments of ratification. It shall enter into force with respect to the remaining States when they deposit their instruments of ratification.

ARTICLE IX

When this Protocol enters into force, it shall be understood that Member States of the Organization of American States that are not Parties to the Inter-American Treaty of Reciprocal Assistance and that sign and ratify this Protocol are also signing and ratifying the parts of the Inter-American Treaty of Reciprocal Assistance that have not been amended.

ARTICLE X

This Protocol shall be registered with the Secretariat of the United Nations through the General Secretariat of the Organization of American States.

ARTICLE XI

When this Protocol of Amendment enters into force, the General Secretariat of the Organization of American States shall prepare a consolidated text of the Inter-American Treaty of Reciprocal Assistance that shall include the parts of that Treaty that have not been amended and the amendments introduced by this Protocol. This text shall be published upon approval by the Permanent Council of the Organization of American States.

ARTICLE XII

The Inter-American Treaty of Reciprocal Assistance shall continue in force between the States Parties to the Treaty. Once this Protocol of Amendment enters into force, the Treaty as amended shall apply among the States that have ratified this Protocol.

ARTICLE XIII

The States Parties to the Inter-American Treaty of Reciprocal Assistance that have not ratified the Protocol of Amendment on the date on which this Protocol enters into force may request a meeting of the Organ of Consultation and participate fully in all the meetings this Organ may hold provided that they formally undertake, in each case, to accept the decisions of the Organ of Consultation adopted in accordance with the Inter-American Treaty of Reciprocal Assistance as amended by this Protocol of Amendment.

In witness whereof, the undersigned Plenipotentiaries, whose powers have been found to be in due and proper form, sign this Protocol, which shall be called "Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance (Rio Treaty)", in the city of San José, Costa Rica, on the twenty-sixth day of July of the year one thousand nine hundred seventy-five.

DECLARATIONS AND RESERVATIONS

DECLARATION OF BOLIVIA

Bolivia signs this Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance without reservation in the conviction that this Protocol updates and improves the stipulations of the original instrument in the light of the changed circumstances.

RESERVATION OF PERU

In signing the Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance, Peru makes an express reservation with regard to article 3, paragraph 3.

RESERVATION OF PARAGUAY

In signing the Protocol of Amendment ad referendum, the Delegation of Paraguay makes an express reservation concerning Article 20, on the grounds that it is inappropriate to use different criteria for applying measures and for removing them; this is tantamount to requiring different majorities for the two cases. The Delegation of Paraguay therefore considers that since the decisions or recommendations of the Organ of Consultation must be adopted by a two-thirds vote of the States Parties, a two-thirds vote of those States must also be required to rescind them.

RESERVATION OF GUATEMALA

On signing this Protocol, Guatemala reiterates the reservation it made on ratifying the Inter-American Treaty of Reciprocal Assistance, which reads: "The present Treaty poses no impediment whatever to Guatemala's assertion of its rights over the Guatemalan Territory of Belize by whatever mean it considers most appropriate; a Treaty that may at any time be invoked by the Republic with respect to the aforesaid territory."

STATEMENT BY PANAMA

Panama signs this Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance with the reservation that the new text can only be accepted in accordance with the provisions of the Constitution of Panama with respect to the ratification of treaties; in the meantime, Panama will not accept any new clause that might be in contravention of the mandates of the Political Constitution of the Republic of Panama or the national interest.

STATEMENT BY MEXICO

1. The Delegation of Mexico reiterates its conviction that, in establishing the boundaries of the security zone as indicated in Article 4, regions protected by other international instruments that have been expressly or tacitly approved by the United Nations should, as far as possible, not have been included.

2. The Delegation of Mexico continues to consider that, except in case of self-defense, the collective measures to which Article 8 refers cannot be applied in mandatory form, given their coercive nature, without authorization by the Security Council of the United Nations.

RESERVATION OF THE UNITED STATES

The United States, in signing this Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance, accepts no obligation or commitment to negotiate, sign or ratify a treaty or convention on the subject of collective economic security.

STATEMENT AND RESERVATION OF EL SALVADOR

The Delegation of El Salvador states its firm conviction that no provision of this Protocol impairs the principle of hemispheric solidarity in the face of aggression, whatever its origin may be. Without prejudice to any other reservations the Government of the Republic may make in due course, it signs this Protocol with the reservation that its articles contain no commitment by the Parties to use compulsory methods or procedures for the settlement of disputes, which El Salvador cannot accept.

Mr. SPARKMAN. Mr. President, we have before us today the Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance, better known as the Rio Treaty. This treaty, which was signed in 1947 and which entered into force for the United States on December 3, 1948, incorporated the guiding principle of earlier agreements: that "an armed attack by any state against an American state shall be considered as an attack against all the American states."

The protocol of amendment does nothing to change this fundamental principle of inter-American solidarity. All it does is to modernize the language in several articles, redefine the zone of defense by eliminating Greenland and certain areas of the high seas, and allows sanctions—diplomatic, economic or military—to be lifted against a member state by a simple majority rather than by two-thirds vote as was previously required. Sanctions, members will recall, were applied against Cuba in 1961 by a two-thirds vote, but lifting them was forestalled when the same number of votes was required to remove them. Our Ambassador to the Organization of American States, Gale McGee, a former Member of this Chamber, testified that it became obvious to the Latin governments, and among our officials who are involved in Latin American policy matters, that the imposition of sanctions, which is a formidable responsibility, is one thing, but their lifting becomes another type of responsibility.

Mr. President, this protocol of amendment also contained one article to which the United States could not agree. Article 11 provides that a new "collective economic security" treaty be developed sometime in the future by the Organization of American States. The United States opposed this provision and entered a reservation to it upon signing the Protocol, on the basis that collective economic security was not germane to a military security agreement. As a consequence, the Protocol of Amendment to the Rio Treaty, which we have before us now, should be given the advice and consent of this body subject to the following reservation:

The United States, in signing this Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance, accepts no obligation or commitment to negotiate, sign or ratify a treaty of convention on the subject of collective economic security.

Mr. President, I urge that the Senate give its advice and consent to ratifica-

tion of the Protocol. I request unanimous consent that portions of the Foreign Relations Committee report, accompanying Ex. J., 94–1, the Protocol to the Rio Treaty, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PURPOSE

The Amendments incorporated in the Protocol reaffirm the principles embodied in the Rio Treaty, modernize its language and induce somewhat greater flexibility into the use of the Treaty's mechanisms with the object of enhancing its usefulness as a peacekeeping instrument in the hemisphere. More specifically, the Protocol reaffirms the principle of "attack against one, attack against all," while restricting its applicability and resultant obligations. Secondly, it provides for the lifting of diplomatic, economic and military sanctions against a member state by a simple majority vote rather than by the two-thirds majority vote required for all other decisions. Thirdly, it revises Treaty procedures so as to provide specifically, rather than by implication for binding decisions and for recommendations by the Organ of Consultation.

COMMITTEE ACTION

President Gerald R. Ford transmitted the Protocol of Amendment to the Inter-American Treaty of Reciprocal Agreement signed at San Jose, Costa Rica July 26, 1975, to the Senate on November 29, 1975. The Committee on Foreign Relations held a public hearing on the Protocol on June 7, 1977. At that time it received testimony from Hon. Gale McGee, United States Ambassador to the Organization of American States, who was accompanied by Mr. David A. Gantz, Assistant Legal Adviser for European Affairs of the Department of State.

Ambassador McGee described the Rio Treaty as "a hallmark in the lexicon of international treaties in the collective security sense." The amending processes, he said, reaffirms its principles, which he called "the real significance of this updating." He reminded the Committee Members that while he was a Senator and chaired the Western Hemisphere Subcommittee he had held hearings on the proposals the American delegation planned to take up at the San Jose, Costa Rica meeting of the OAS. His point was that the Senate had been consulted in advance before any decision was made, and before policy had been determined. "The result," he said, "is almost precisely the present document."

He then outlined for the Committee the three salient points of the Protocol. First, the original 1947 Rio Treaty provided that any sanctions imposed by the OAS for security reasons, including the imposition of embargo, must be imposed by two-thirds vote. Since the years of the Cuban embargo, the Latin American nations have come to the conclusion that the imposition of sanctions, a formidable responsibility, is one thing, but removing them is another category of responsibility. Therefore, it was agreed that an action to rescind sanctions or measures could be approved by a majority vote of the states that are parties rather than by two-thirds vote. Paraguay was the only nation to object to this revision which it did by adopting a reservation.

Second, these amendments will limit the area of coverage of the Treaty. Instead of incorporating almost all of the Western Hemisphere, including Greenland and extensive off-shore waters, the Protocol excludes Greenland and confines the Treaty to the continental Americas, North and South, along with a reduced high seas area. This met with the uniform approval of all governments, although Mexico declared that regions already protected by other international agreements should not have been included.

Third, certain Latin American countries insisted that a collective economic security clause be injected into the Rio Treaty as Article 11. They were concerned, Ambassador McGee said, "about the actions that we sometimes take in the economic field." He told the Committee that the United States delegation felt that "an economic policy ought to be settled in an economic pact and not be mixed up in a military document. Combining the two areas confuses issues and raises questions of integrity and credibility." As Article 11 was incorporated into the Protocol despite the United States protest, the U.S. delegation made a reservation which reads:

"The United States, in signing this Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance, accepts no obligation or commitment to negotiate, sign or ratify a treaty or convention on the subject of collective economic security."

Ambassador McGee and the State Department strongly recommended that the Senate give its advice and consent to ratification of the Protocol together with the reservation to Article 11.

Ambassador McGee's complete statement, a transcript of the hearing, and State Department replies to questions regarding the Rio Treaty and the Protocol are included as an appendix to this report.

On July 12, 1977, the Committee met again in open session and ordered by voice vote, without dissent, that the Protocol be reported favorably.

BACKGROUND

The guiding principle of the Rio Treaty—that every act which disturbs the peace of the Americas affects the peace of every nation of the hemisphere—has antecedents in four earlier agreements.

The Inter-American Conference for the Maintenance of Peace, Buenos Aires (1936), which established the same principle and provided for mutual consultation in the event of war or threat of war.

The Declaration of Lima (1938), which reaffirmed that principle and expanded the system of consultation.

The Declaration of Reciprocal Assistance and Cooperation for the Defense of the Nations of the Americas (1940), which specifically applied the principle to attacks by non-American states, declaring that "any attempt . . . against . . . the inviolability of territory, the sovereignty or political independence of any American state shall be considered as an act of aggression against the states which sign this declaration."

The Act of Chapultepec (1945), which recommended the conclusion of a formal treaty incorporating the principle following the establishment of world peace.

Two years later, in 1947, the treaty recommended by the Act of Chapultepec was concluded. The Inter-American Treaty of Reciprocal Assistance (more commonly known as the Rio Treaty) was signed by the twenty two original members of the Organization of American States. It entered into force for the United States on December 3, 1948. Article 3 states in part:

"An armed attack by any State against an American state shall be considered as an attack against all the American states. On the request of the State or States directly attacked and until the decision of the Organ of Consultation of the Inter-American System, each one of the Contracting Parties may determine the immediate measures which it may individually take in fulfillment of the obligation contained in the preceding paragraph."

In the view of its supporters, including the United States, the Rio Treaty has served the hemisphere well in dealing with aggression and threats of aggression, whether by one American state against another or from extra-continental sources. It has provided good offices for calming disputes which might have led to conflict. In so doing, it has provided in eighteen cases a preferred alternative to action by the United Nations.

In recent years, however, the emergence of strong new economies and tighter links between many Treaty members and the world economy have signaled a change in the traditional structure of hemispheric relations. As a consequence, the OAS in 1973 created a special Committee to Study the Inter-American System and to propose Measures for Restructuring it, called CEESI, after its Spanish acronym.

In the overall study carried out by CEESI over a period of several months, one of the main topics of concern to the Committee was that of the scope of the system of collective security. The outcome of its work in this regard was a draft Protocol Amendment to the Rio Treaty. The purpose of this draft was to modify certain provisions and to incorporate other new provisions in the Treaty signed in 1947. Later it served as the basis for approval of the Protocol of Amendment signed at the Conference of Plenipotentiaries held in San Jose, Costa Rica in July 1975.

On July 25, 1975, the Conference considered and approved the Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance, which was signed by the delegates of the following Member States, duly empowered for this purpose, at the closing meeting held on July 26, 1975:

Bolivia
Venezuela
Trinidad and Tobago
Peru
Nicaragua
Colombia
Uruguay
Guatemala
Paraguay
Honduras
Haiti
Panama
Dominican Republic
Chile
Mexico
Brazil
United States of America
Ecuador
El Salvador
Argentina
Costa Rica

From the beginning of its deliberations, CEESI was split into two camps. The first, consisting of Peru, Mexico, Argentina, Panama, Chile and Venezuela, argued for major changes in the Treaty including the elimination of Article 3, on the grounds that the extra-hemispheric attacks to which it pertains would be directed against the United States, not themselves. They also wanted to eliminate Article 6 which provides for possible action in the event of aggression which is not an armed attack; and the narrowing of the area of coverage to exclude non-signatories, such as Canada, and of territory outside the hemisphere, including a wide maritime area and U.S. foreign bases.

The second group, representing the majority view, sought minor changes, but at the same time sought retention of the principle of "attack against one, attack against all," and the preservation of the broad authority of Article 6.

Of major concern to both groups was the revision of Article 17 of the Treaty, which requires a two-thirds vote to lift economic and military sanctions. The drive to revise Article 17 to permit the lifting of sanctions by a simple majority vote had as its origin in the continuation in force of the mandatory sanctions imposed against Cuba in 1964. By 1973, the majority of member states

favored either lifting the sanctions or allowing each member to determine for itself its relations with Cuba. However, under Article 17, this majority, which represented less than two-thirds of the member states, could not end the mandatory sanctions. As a result of the CEESI negotiations, Article 17 has been revised to allow the lifting of sanctions by a simple majority vote rather than by the two-thirds vote still required for all other decisions.

Also of major concern to both groups was that of alleged U.S. economic intervention in Latin America, epitomized in the view of some Latin American countries by Hickenlooper and Gonzales Amendments. Despite strong U.S. objections, this concern is reflected in Article 11, as amended, which states "collective economic security shall be guaranteed by a special treaty on the subject." The United States made a specific reservation to Article 11 on the grounds that the Article is not germane to the Treaty and that "economic security" has not been defined.

Thus far, 21 of the 25 member States of the OAS have signed the Protocol of Amendment. Of these, seven have signed with a reservation. Those member states which have signed with a reservation include the United States, Peru, Paraquay, Guatemala, Panama, Mexico and El Salvador.

Four states, Mexico, Costa Rica, the Dominican Republic and Haiti, have already ratified the Protocol; ten more must ratify to provide the two-thirds majority which will bring the Protocol into force. It is likely that this process will take another two or three years, although the Department of State believes that if the U.S. proceeds to ratification it will encourage a number of other member states to do likewise.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the protocol be considered to have passed through its various parliamentary stages up to and including the presentation of the resolution of ratification.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will state the resolution of ratification.

The assistant legislative clerk read as follows:

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance (Rio Treaty) signed at a special conference of plenipotentiaries at San Jose, Costa Rica, on July 26, 1975 (Ex. J, 94–1), subject to the following reservation:

The United States, in signing this Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance, accepts no obligation or commitment to negotiate, sign or ratify a treaty or convention on the subject of collective economic security.

TREATY WITH CANADA ON THE EXECUTION OF PENAL SENTENCES

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate call up the treaty with Canada on the execution of penal sentences.

The ACTING PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider Executive H, 95th Congress, 1st Session, the treaty with Canada on the execution of penal sentences, which was read the second time, as follows:

TREATY BETWEEN THE UNITED STATES OF AMERICA AND CANADA ON THE EXECUTION OF PENAL SENTENCES

The Government of the United States of America and the Government of Canada,

Desiring to enable Offenders, with their consent, to serve sentences of imprisonment or parole or supervision in the country of which they are citizens, thereby facilitating their successful reintegration into society;

Have agreed as follows:

ARTICLE I

For the purposes of this Treaty:

(a) "Sending State" means the Party from which the Offender is to be transferred;

(b) "Receiving State" means the Party to which the Offender is to be transferred:

(c) "Offender" means a person who, in the territory of either Party, has been convicted of a crime and sentenced either to imprisonment or to a term of probation, parole, conditional release or other form of supervision without confinement. The term shall include persons subject to confinement, custody, or supervision under the laws of the Sending State respecting juvenile offenders; and

(d) "Citizen" includes an Offender who may be a dual national of the Parties and in the case of the United States also includes nationals.

ARTICLE II

The application of this Treaty shall be subject to the following conditions:

(a) That the offense for which the Offender was convicted and sentenced is one which would also be punishable as a crime in the Receiving State. This condition shall not be interpreted so as to require that the crimes described in the laws of the two Parties be identical in such matters not affecting the character of the crimes as the quantity of property or money taken or possessed or the presence of interstate commerce.

(b) That the Offender is a citizen of the Receiving State.

(c) That the offense is not an offense under the immigration laws or solely against the military laws of a Party.

(d) That there is at least six months of the Offender's sentence remaining to be served at the time of his application.

(e) That no proceeding by way of appeal or of collateral attack upon the Offender's conviction or sentence be pending in the Sending State and that the prescribed time for appeal of the Offender's conviction or sentence has expired.

ARTICLE III

1. Each Party shall designate an authority to perform the functions provided in this Treaty.

2. Each Party shall inform an Offender, who is within the scope of the present Treaty, of the substance of the Treaty.

3. Every transfer under this Treaty shall be commenced by a written application submitted by the Offender to the authority of the Sending State. If the authority of the Sending State approves, it will transmit the application, together with its approval, through diplomatic channels to the authority of the Receiving State.

4. If the authority of the Receiving State concurs, it will so inform the Sending State and initiate procedures to effectuate the transfer of the Offender at its own expense. If it does not concur, it will promptly advise the authority of the Sending State.

5. If the Offender was sentenced by the courts pursuant to the laws of a state or province of one of the Parties, the approval of the authorities of that state or province, as well as that of the federal authority, shall be required. The federal authority of the Receiving State shall be responsible for the custody of the transferred Offender.

6. In deciding upon the transfer of an Offender, the authority of each Party shall bear in mind all factors bearing upon the probability that transfer will be in the best interests of the Offender.

7. No Offender shall be transferred unless:

(a) he is under a sentence of imprisonment for life; or

(b) the sentence which he is serving states a definite termination date, or the authorities authorized to fix such a date have so acted; or

(c) he is subject to confinement, custody or supervision under the laws of the Sending State respecting juvenile offenders; or

(d) he is subject to indefinite confinement as a dangerous or habitual offender.

8. The Sending State shall furnish to the Receiving State a statement showing the offense of which the Offender was convicted, the termination date of the sentence, the length of time already served by the prisoner and any credits to which the Offender is entitled on account of work done, good behavior or pretrial confinement. Where requested by the Receiving State a translation shall be provided.

9. Each Party shall establish by legislation or regulation the procedures necessary and appropriate to give legal effect within its territory to sentences pronounced by courts of the other Party and each Party agrees to cooperate in the procedures established by the other Party.

10. Delivery of the Offender by the authorities of the Sending State to those of the Receiving State shall occur at a place agreed upon by both Parties. The Sending State shall afford an opportunity to the Receiving State, if it so desires, to verify, prior to the transfer, that the Offender's consent to the transfer is given voluntarily and with full knowledge of the consequences thereof, through the officer designated by the laws of the Receiving State.

ARTICLE IV

1. Except as otherwise provided in this Treaty, the completion of a transferred Offender's sentence shall be carried out according to the laws and procedures of the Receiving State, including the application of any provisions for reduction of the term of confinement by parole, conditional release or otherwise. The Sending State shall, in addition, retain a power to pardon the Offender and the Receiving State shall, upon being advised of such pardon, release the Offender.

2. The Receiving State may treat under its laws relating to youthful offenders any Offenders so categorized under its laws regardless of his status under the laws of the Sending State.

3. No sentence of confinement shall be enforced by the Receiving State in such a way as to extend its duration beyond the date at which it would have terminated according to the sentence of the court of the Sending State.

4. The Receiving State shall not be entitled to any reimbursement from the Sending State for the expenses incurred by it in the completion of the Offender's sentence.

5. The authorities of each Party shall at the request of the other Party provide reports indicating the status of all Offenders transferred under this Treaty, including in particular the parole or release of any Offender. Either Party may, at any time, request a special report on the status of the execution of an individual sentence.

6. The transfer of an offender under the provisions of this Treaty shall not create any additional disability under the laws of the Receiving State or any State or province thereof beyond those which the fact of his conviction may in and of itself already have created.

ARTICLE V

Each Party shall regulate by legislation the extent, if any, to which it will entertain collateral attacks upon the convictions or sentences handed down by it in the cases

of Offenders who have been transferred by it. Upon being informed by the Sending State that the conviction or sentence has been set aside or otherwise modified, the Receiving State shall take appropriate action in accordance with such information. The Receiving State shall have no jurisdiction over any proceedings, regardless of their form, intended to challenge, set aside or otherwise modify convictions or sentences handed down in the Sending State.

ARTICLE VI

An Offender delivered for execution of a sentence under this Treaty may not be detained, tried or sentenced in the Receiving State for the same offense upon which the sentence to be executed is based. For purposes of this Article, the Receiving State will not prosecute for any offense the prosecution of which would have been barred under the law of that State, if the sentence had been imposed by a court, Federal, State, or provincial, of the Receiving State.

ARTICLE VII

If either Party enters into an agreement for the transfer of sanctions with any other State, the other Party shall cooperate in facilitating the transit through its territory of Offenders being transferred pursuant to such agreement. The Party intending to make such a transfer will give advance notice to the other Party of such transfer.

ARTICLE VIII

1. This Treaty shall be subject to ratification and shall enter into force on the date on which instruments of ratification are exchanged. The exchange of instruments of ratification shall take place at Ottawa as soon as possible.

2. The present Treaty shall remain in force for three years from the date upon which it enters into force. Thereafter, the Treaty shall continue in force until thirty days from the date upon which either Party gives written notice to the other Party of its intention to terminate the treaty.

In witness whereof the undersigned, being duly authorized by their respective Governments, have signed the present Treaty.

Done in duplicate, in the English and French languages, each language version being equally authentic, at Washington this second day of March, 1977.

For the Government of the United States of America: GRIFFIN B. BELL.

For the Government of Canada: FRANCIS FOX.

Mr. SPARKMAN. Mr. President, the Committee on Foreign Relations, having weighed carefully the purposes of the treaty with Canada on the execution of penal sentences, and a similar treaty with Mexico, recommends the Senate give its advice and consent to the ratification of the treaty with Canada.

Individuals incarcerated in foreign jails or on parole in a foreign nation face significant obstacles to effective rehabilitation and successful reentry into society. Such individuals are far from their families, they must deal with an unfamiliar legal system and they are unable to take part in rehabilitation programs, work release programs and other methods of social rehabilitation.

The treaty is designed to assist Americans in Canadian jails and Canadians in U.S. jails by allowing them to be voluntarily transferred to a prison in their home country. In addition to this benefit for the prisoner, there is a real benefit to the United States and Canada. Since most persons imprisoned abroad will eventually return home, both countries have a definite interest in the rehabilitation of the prisoners in the other nation. The treaty will also alleviate friction which may occur as a result of the imprisonment of each nation's citizens in the jails of the other.

During its consideration of the treaty, the committee was especially concerned with the constitutionality of the prisoner transfers and the procedures to be used in the transfer process. The committee has concluded that a strong case can be made for the treaty's constitutionality and all of the numerous legal opinions submitted to the committee concur in this finding. It is my understanding the Judiciary Committee, in its action on the legislation necessary to implement the treaty, has taken additional steps to insure that the transfers are constitutional and the interests of the prisoners are protected.

The committee has recommended a declaration to the resolution of advice and consent to the effect that the instrument of ratification not be deposited until the necessary implementing legislation has been enacted. This will prevent a situation of our having a treaty with no means of carrying out its objectives. This declaration will also allow a full examination of the implementing legislation, and the procedures and safeguards it provides.

Our examination has found the purposes of this treaty to be worthwhile and has resolved in favor of the treaty the legal questions raised. Accordingly the committee urges the Senate to give its advice and consent to the treaty with the declaration.

I ask unanimous consent that an excerpt from the committee's report on the treaty and a section-by-section analysis of the treaty be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE COMMENTS

Individuals imprisoned in a foreign nation face large obstacles to rehabilitation: language barriers; distance from family; differences in culture; inability to participate in educational, work-release or counseling programs and difficulty in receiving parole. Parolees also have problems, such as securing suitable employment in a foreign nation, once they are paroled. The transfer of these prisoners or parolees to their home countries to finish out their sentences or to receive parole would greatly increase the prisoners chances of making a successful reentry into society. Taking the case of Mexico, for example, most of the U.S. prisoners in jail there are young Americans who are first-time offenders. Their ability to readjust would undoubtably be enhanced if they could participate in job training, counseling and other programs available in penal institutions in the United States.

Since most of the prisoners will eventually return to their home countries after completing their sentences all three nations have an interest in the penal conditions of their citizens incarcerated abroad. The Treaties would also have a beneficial effect in reducing the tension between the United States and Mexico and the United States and Canada arising from the imprisonment of each others' citizens.

These Treaties involve concepts and legal issues new to the criminal justice system of the United States. Whenever the Congress legislates in new areas, constitutional questions arise. The Treaties and the implementing legislation are no exceptions and the Committee recognizes that legitimate constitutional issues are involved. The ultimate test of constitutionality may, of course, come before the Supreme Court of the United States. But the Committee has carefully considered these issues and has concluded, in good faith, that a case for the constitutionality of the Treaties can be made. All the legal opinions received by the Committee concur in the constitutionality of the treaties.

Under the terms of the Treaties, collateral attacks on the sentences of the foreign nations can only be made in the courts of that nation. These provisions would have the effect of denying to an American citizen transferred to the United States an opportunity to petition for a writ of habeas corpus to challenge the validity of his Mexican or Canadian sentence or conviction. The Committee has determined that any constitutional questions involved in this preclusion of a writ of habeas corpus can be resolved by a valid waiver made at the time of the prisoners' consent to transfer. If the consent is to act as a waiver, then the prisoner must be made fully aware of the consequences of his consent and the attendant waiver. The Committee understands that procedures will be established under the implementing legislation to provide full counseling, legal assistance and information to prisoners eligible for transfer. The families of prisoners, to the extent possible, should be informed of these conditions and the status of their family member.

In considering the question of a waiver, the Committee recalled that the prisoner in a foreign jail would not have access to the courts of the United States to attack his conviction or sentence. It is only upon his transfer to the jurisdiction of the United States that a transferee could claim any access to U.S. courts. As a practical matter, the prisoner is not waiving a right held prior to transfer. It would place the United States in paradoxical posture to insist that the writ of habeas corpus be available to transferees to contest the judgments of foreign courts when the result would be that the Americans would remain in foreign jails with no access to the courts of the United States for any purpose dealing with his confinement.

Although the implementation of the transfers will benefit several hundreds of Americans imprisoned in Mexico and Canada, the Treaties should not be viewed as a final solution to the problems of all U.S. citizens imprisoned in those countries. Some will not be eligible for transfer and others will not become eligible until they have been convicted, received definite sentences, and these convictions and sentences have been appealed. Therefore, the Committee feels that the Government of the United States should continue to assist fully those prisoners not transferred. Particularly important are improved consular services, including more consular offices where needed, and insistence, through appropriate diplomatic channels, on respect for the rights of the accused. These steps should not be confined to the two nations with which we have negotiated these treaties, but should be taken in all countries where significant numbers of Americans have been arrested and imprisoned.

In summary, the Committee has found the purposes of the Treaties to be worthwhile, that a good case can be made for their constitutionality and their subject matter is appropriate for the making of a treaty. Accordingly, the Committee on Foreign Relations recommends the Senate give its advice and consent to the Treaty with Mexico on the Execution of Penal Sentences and the Treaty with Canada on the Execution of Penal Sentences.

BACKGROUND ON CANADIAN PRISONER TRANSFER TREATY

On the initiative of Canadian parole authorities, discussions on an agreement to transfer parolees began in 1975. The Canadian initiative was an outgrowth of discussions under the auspices of the United Nations dealing with the problems of supervision of parolees and rehabilitation of prisoners. In May, 1976, the Canadian parole committee forwarded a draft agreement which expanded the proposal to include incarcerated individuals in addition to parolees. Negotiations in person were resumed in Ottawa on January 7, 1977, and after some further correspondence, the treaty was signed in Washington by Attorney General Bell and Solicitor General Fox on March 2, 1977. At that time, about 275 Americans were in Canadian prisons and 90 Canadians were in American penitentiaries.

This Treaty, unlike the one with Mexico, did not come about as a result of drug enforcement efforts, adverse prison conditions or publicity. The Canadian authorities originated the idea in order to promote rehabilitation of parolees.

SECTION-BY-SECTION ANALYSIS—TREATY WITH CANADA ON THE EXECUTION OF PENAL SENTENCES

STATEMENT OF PURPOSE

The stated purpose is to facilitate the successful reintegration into society of American or Canadian prisoners, parolees and those under supervision in either foreign nation.

Article I

This article provides the definitions of the terms: "Sending State", "Receiving State", "offender" and "citizen" as used in the Treaty.

Article II

This article imposes the following conditions to the application of the Treaty:

1. That the crime for which the offender was convicted would be also punishable as an offense in the Receiving State;
2. That the offender is a citizen of the Receiving State;
3. That the offense is not one against the immigration or solely military laws; and
4. That no appeal or collateral attack is pending and that the time for appeal has expired.

Article III

This article deals with the mechanisms of the transfers and eligibility of transferees and provides that—

1. Each nation must designate an authority to perform the functions of the Treaty;
2. All subject offenders be informed of the terms of the Treaty;
3. The transfers will be initiated by a written request of the offender and, if the Sending State approves, the request will be forwarded through diplomatic channels;
4. The Receiving State must approve of the transfer;
5. If the offender was convicted by a state or province under its laws, that state or province must also consent to transfer;
6. The best interest of the prisoner will be the basis of any decision by the States on the suitability of transfer;
7. No offender can be transferred unless he is serving a definite sentence, a life sentence, is a juvenile offender or is serving an indefinite sentence as a dangerous or habitual criminal;
8. A report by the Sending State on the prisoner's status be submitted at the time of the transfer;
9. Each State shall adopt the necessary implementing legislation; and
10. The place of delivery of transferees will be agreed to by both parties and that the Receiving State will be allowed to review the consent of the transferee.

Article IV

The article imposes certain conditions on the Receiving State and protects the rights of the transferee:

1. The laws and procedures of the Receiving State, including parole laws, shall apply, except the power to grant pardons or amnesty is reserved to the Sending State;
2. The Receiving State's laws on youthful offenders shall apply regardless of the offender's status under the laws of the Sending State;
3. No sentence can be enforced by the Receiving State so as to extend its duration;
4. The expenses of the completion of the sentence will be borne by the Receiving State;
5. That each State will cooperate in the furnishing of requested reports on the status of a transferee; and
6. The transfer does not impose any loss of rights that would not have been imposed as a result of conviction in the foreign state.

Article V

This article allows each State to adopt legislation to regulate the extent to which its courts will entertain collateral attacks by offenders transferred to the other State. The Sending State must inform the other of any decision to modify or set aside a conviction or sentence, and once so informed, the Receiving State must take the appropriate action. Most importantly, this article prohibits collateral attacks or appeals of the sentence or conviction except in the courts of the Sending State.

Article VI

Article VI protects a transferred prisoner from double jeopardy by providing that the prosecution of the transferee would be barred on the same basis as if the conviction had been obtained at the federal or state level in the Receiving State.

Article VII

This article provides that either State will cooperate in facilitating the transfer through its territory of a prisoner transferred under authority of a separate treaty between one of the signatories and a third state.

Article VIII

The terms of ratification and the duration of the Treaty are spelled out in this article. The exchange of instruments of ratification will take place at Ottawa. The initial term of the Treaty will be three years, and it will continue in force after the first three years until either party gives thirty days notice of intent to terminate.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the treaty be considered as having passed through the various parliamentary stages up to and including the presentation of the resolution of ratification.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will state the resolution of ratification.

The assistant legislative clerk read as follows:

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty between the United States of America and Canada on the Execution of Penal Sentences which was signed at Washington on March 2, 1977 (Ex. H, 95–1), subject to the following declaration:

That the United States Government declares that it will not deposit its instrument of ratification until after the implementing legislation referred to in Article III has been enacted.

ORDER FOR ROLLCALL VOTE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the vote occur on the protocol and the treaty today at 12 o'clock noon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a single rollcall vote on both the protocol and the treaty, Calendar Nos. 1 and 4, and that the single rollcall vote count for two.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, it is anticipated that the votes on the declaration and reservation can be by voice vote. They will only require a majority vote. There will be only one rollcall vote on the resolutions of ratification.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I have no further need for my time.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Tennessee is recognized.

TRIBUTE TO JAMES STOKLEY

Mr. BAKER. Mr. President, not long ago, east Tennessee lost a good friend with the death of James Stokley of Newport. His wife, noted author Wilma Dykeman, writes a column that appears in the Knoxville News-Sentinel, and the column that she wrote following the death of her husband is one of the most eloquent and touching personal descriptions I have ever read.

I offer the article for the benefit of my colleagues and ask, Mr. President, unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DIMINISHED BY HIS GOING, BETTER FOR HIS PRESENCE

(By Wilma Dykeman)

Three times I have reached for the telephone to ask my editor for a reprieve from writing for a few weeks. But my hand was stayed.

Exactly a week ago, from the day I am writing, on Monday afternoon, I was composing my weekly column for this paper. A few minutes later my perceptive co-author, my wisest counselor, my mentor, and my love read my words, offered a penetrating suggestion and his daily (indeed, almost hourly) words of approval and affection. A few hours later, he fell on the grass beside his garden and was gone.

Thus a week becomes a lifetime, and the world is changed, and for a few people on this mysterious planet nothing will be the same again. Yes, the oak outside the window will stand, the garden will bear, summer will flourish and wane, other lives will continue their familiar routine—but all diminished

because he is not here. And I shall continue, too, diminished by his absence, but better than than I could ever have been without his presence for a little while.

We met in a garden and we parted in a garden. I was picking flowers in my mother's garden in Asheville on that August Sunday morning when Thomas Wolfe's sister and her husband drove into our yard with two young men, "Stokley brothers from Newport, Tenn." One of them wore a white shirt, open at the collar with rolled-up sleeves, against which his smooth skin was a golden tan and his eyes were the clear blue of sea or sky, and before that day was finished he had asked me if I liked books and the woods and the final question—Beethoven. Two weeks later I canceled my career in New York. In October we were married. I believe there never was a couple more destined for each other.

Very few people knew the true dimensions of James' life. In a world where outer appearances are judged as reality he invested more and more of his time in inner riches. In a time when bigger is considered best and power seems a prize worth any sacrifice, he cherished the fragile spirit, the delicate creativity that flows from an eternal power. In a period when the loud and the self-proclaiming receive the world's awards, he was quiet and self-forgetful.

He was also a person of immense power. With all his gentleness he was capable of deep anger. Anger against injustice—injustice in any form or dimension—led him into some lonely valleys. He never talked of those experiences because he had no martyr's complex—too much laughter to be a martyr. And when his family or friends or society caught up with his farsighted vision, he never suggested an attitude of "I-told-you-so." He was too busy looking ahead to other horizons. In all his patience he seethed with powerful impatient. Impatience with trivia—the second-rate in our cultural, spiritual, educational, political, industrial, individual and social lives—led him to some lonely pinnacles. This grieved him, not because he minded being alone but because any riches of mind or spirit or body that he discovered he wanted to share with everyone else. And every day was an adventure of discovery for him.

I never met anyone who savored more deeply the potential of the moment. Whether we were in a strange land or here in our own familiar mountains, whether we were listening to the first katydids of summer or the Eroica Symphony, whether we were among exciting famous people or talking with old-timers or were alone together, to whatever we were doing he brought full appreciation, passion, imagination.

People sometimes asked if he was disconcerted by my writing, my career. How little they knew him! He had no identity crisis, no need to narrow anyone else's life to enhance his own. Indeed, one of the purposes of his life seemed to be to make sure that everyone—no matter race or sex, social status or creed—should have not only opportunity but encouragement to be not only good but best.

And he was the best. Funny and sad, uniquely innocent and infinitely sophisticated, he balanced the world of nature and the world of books and dwelt in a realm of special goodness. He would not have liked that word, it would embarrass him. But he was good. We shall rarely see his like again.

A week ago he left on one of the few trips we have not taken together. But he is not wholly away—and I am not wholly here. We are still together.

ENDANGERED SPECIES ACT

Mr. BAKER. Mr. President, later this week the Committee on Environment and Public Works will hold hearings on the implementation of the Endangered Species Act. The hearings are designed to be a comprehensive examination of the act, leading, if necessary and appropriate, to modifications in the manner in which the very worthwhile goals of this act are achieved.

The hearings have arisen, Mr. President, from a broadly perceived need to reexamine this legislation and determine whether the implementation of the act conforms to the original intent of Congress in enacting it. In holding these hearings, we will attempt to determine whether a sensible solution can be found to mitigate the untoward effects that the strict implementation of the act has caused in the past and will continue to cause in the future.

The State of Tennessee has had its share of these problems, Mr. President, as indicated by a joint resolution passed by the 90th General Assembly of the State of Tennessee. I believe the resolution abundantly illustrates the problems that have arisen under the Endangered Species Act and, therefore, believe it merits the attention of my colleagues; I ask unanimous consent, Mr. President, that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

HOUSE JOINT RESOLUTION NO. 53

Whereas, the United States Department of the Interior has placed the snail darter fish and certain species of mussels and snails on the Endangered Species List pursuant to provisions of the Endangered Species Act; and,

Whereas, the snail darter and mussels have been litigated in lawsuits (Environmental Defense Fund vs TVA et al) in the U.S. District Court in Knoxville and the Sixth Federal Circuit Court of Appeals; and,

Whereas, these species were found subsequent to the approval of the required Environmental Impact Studies prepared by TVA; and,

Whereas, there is no proof that the Tellico Dam or the Duck River Project (Normandy and Columbia Dams) will destroy the snail darter, mussels or snails or that their species cannot exist in other streams; and,

Whereas, the Tellico, Normandy and Columbia Dams will provide improved water quality which will make other segments of the streams more favorable for the propagation of these species; and,

Whereas, the Tellico Dam and the water control system on the Duck River is absolutely necessary for economic growth and development in their respective locations; and,

Whereas, the people of the Duck River area have in good faith committed themselves to pay TVA a sum of 16.2 million dollars over a 40 year period; and,

Whereas, this commitment is being met since January 1972 by a payment of five cents per thousand gallons on water being used in the Upper Duck River Watershed; and,

Whereas, the use of the Endangered Species Act to curtail worthwhile public works and endanger human life would be grossly unfair and a breach of faith with the citizens of the State of Tennessee and a general waste of effort and money; now, therefore,

Be it resolved by the House of Representatives of the Ninetieth General Assembly of the State of Tennessee, the Senate concurring, That this Assembly urge the President of the United States, the Secretary of the Interior, Congress and the Board of the Tennessee Valley Authority to immediately consider remedial measures and adopt appropriate rules and/or legislation which would provide a sensible solution and permit these vital public projects in the State of Tennessee to continue.

Be it further resolved, That copies of this Resolution be sent to the President of the United States, the Secretary of the Interior, each member of the Tennessee Congressional delegation and the Chairman of the Board of the Tennessee Valley Authority.

Mr. BAKER. I am confident, Mr. President, that through these hearings the committee will be able to make recommendations regarding amendments to the act that will address the problems experienced in Tennessee and will lead to its implementation with reason and flexibility. I would hope that the Senate, and ultimately the Congress, will respond in a prompt and favorable manner to these recommendations.

SPECIAL ORDERS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Indiana (Mr. BAYH) is now recognized for not to exceed 15 minutes.

Mr. BAYH. I thank the Chair.

THE FUTURE ENERGY POLICY OF THIS COUNTRY

Mr. BAYH. Mr. President, I seldom request the privilege of occupying the time of the Senate on a special order. However, it is very likely that the Senate will spend most of the time remaining in this session acting on various components of the President's energy proposals and this morning I would like to take a few moments to talk about a matter which will impact significantly on the Nation's future energy policy and which is being debated at the highest levels of the executive branch—the future route of a gas transmission system to bring Alaskan gas to the lower 48 States.

Mr. President, all of us, elected officials and citizens alike, have been preoccupied with developing a coherent national energy policy. The country has listened to special Presidential messages; it has heard the President at press conferences. There is not a Member of this body who has not talked to his constituency or to a larger national audience about the importance of resolving both our short-term and long-term energy problems.

Between now and the time we adjourn, whenever that day comes, I think it is likely that more time will be spent on energy than any other legislative matter before this body.

One area that will doubtlessly be controversial and receive priority attention is the question of how to best increase the Nation's supply of natural gas. Few of us from those States of the country heavily dependent on natural gas can easily forget the severe hardships and economic disruptions caused this past winter by natural gas shortages. It is ironic to be addressing the Senate in the midst of one of the longest and most severe heat waves this Nation has had in a long time and asking my colleagues

to remember the severe winter we had last year.

But the fact is that unless we resolve the problem of equitable, efficient, and speedy distribution of our natural gas resources we are apt to have a number of long cold winters accompanied by misfortunes similar to those we witnessed last year.

Twenty States suffered unemployment as a result of the gas curtailments in 1977. Approximately 1.2 million workers were thrown out of work as a result of factory, school, or other closings. We must do everything possible to avoid these things from happening again.

All of us know that there is no magic panacea, no bill we can pass that will prevent similar events tomorrow. It takes a certain amount of lead time to develop delivery systems for new energy resources. However, there is a question now being discussed at the highest levels in the administration that can, in my judgment, if resolved in the right way, cut as many as 4 or 5 years off the time necessary to deliver new natural gas supplies to the energy deficient parts of the Nation. And that proposal is the construction, just as rapidly as possible, of a safe, economical, and environmentally acceptable gas transmission system to bring our Alaskan gas reserves to those parts of America that need them most.

Mr. President, most of us here in this Chamber agree on the necessity to conserve energy, and switch from heavy reliance on natural gas and oil to coal, which we have in abundance, and clean, renewable energy resources, currently in the research and development stage. But the undeniable fact is that the United States will be deeply dependent on natural gas for our energy needs for the foreseeable future.

Even with the best research and development efforts and smoothest possible conversion from oil and gas to coal and other energy sources, it is going to take us a while to get this job done, and we are going to be heavily dependent on natural gas for the rest of this century. Natural gas is a critical component of the Nation's total energy supply, making up about one-third of all energy used in this country. It seems to me only prudent to suggest that we must do all we can to assure ourselves the most stable supply possible. One critical factor in giving us this assurance will be access to our Alaskan gas.

Mr. President, the natural gas discovered at Prudhoe Bay on the North Slope of Alaska is estimated to exceed 20 trillion cubic feet of gas, which can provide, at the very minimum, 5 percent of American natural gas consumption for the next 25 years.

Experts believe that there are other undiscovered reserves elsewhere in Alaska, and that these could run as high as 72 to 185 trillion cubic feet.

A reliable, safe, and efficient transportation system for moving this gas south could impact significantly on future American shortages by potentially supplying as much as 1.6 trillion cubic feet annually, as soon as the President chooses and Congress approves one of the proposed gas lines.

Mr. President, as my colleagues know, I have long been interested in delivering Alaskan oil and gas to the lower 48 States in an economical, equitable, efficient, and environmentally sound manner. My interest in this matter, as that of other Members of this body, was first stimulated when the question of distributing Alaskan oil was before this body.

I opposed the Alaskan oil pipeline proposal, which was eventually adopted, from its very inception because I predicted that it would not result in an equitable or economical distribution of North Slope oil, but would instead lead to a surplus of crude on the west coast, at vastly inflated prices, and continued shortages in parts of the country—primarily the Midwest, Northeast, and Atlantic States—dependent on unstable sources of foreign gas and oil.

Of course, I do not like people who say, "I told you so." But the tragic fact is that the predictions many of us in this body made at the time the Alaskan oil pipeline was built have been borne out. Barring further mishaps on the Alaskan oil pipeline, there will be a 500,000 to 600,000 barrel per day surplus of crude oil on the west coast this fall.

It is imperative that this error not be repeated when we select an Alaskan gas pipeline.

For this reason, I find the El Paso gas pipeline proposal, which would parallel the Alyeska route, totally unacceptable and am firmly committed to a trans-Canadian route which would bring Alaskan gas to a central location and connect up with pipelines that could carry it east, west, or south, as demand dictates.

As I understand the current situation, deliberations in both the United States and Canada on the issue of a trans-Canada pipeline are reaching a decisive stage, and both Governments will soon announce their preference for a gas pipeline route. This is the reason I have requested time this morning.

The Canadian Government has already received recommendations from the Berger inquiry and the National Energy Board, both of which were critical of the Arctic route, the trans-Canada route proposed earliest, back in 1973. It is currently awaiting reports from the Lysyk inquiry, which will address the economic and social costs of the Alcan route, a second and more recently proposed trans-Canada route, and the environmental assessment review panel, which will assess the environmental impact of the Alcan route. These reports are due on August 1 of this year. If these analyses uncover no major problems with the Alcan route, and my study has led me to believe that none are expected, it is almost definite that Prime Minister Trudeau will approve the Alcan route, pending the resolution of certain issues raised by Canada's National Energy Board about this proposal.

The posture of our own Government in negotiations with the Canadians is likely to be crucial. If our negotiations can resolve these issues in a way that does not compromise the technical or financial viability of the Alcan proposal, then construction of a trans-Canada pipeline, which will distribute Alaskan gas economically and equitably, can proceed promptly and in a manner that is mutually beneficial to both the United States and Canada.

Here, in this country, the Federal Power Commission and the administration's task forces have also sent final recommendations to the President. While the FPC was divided in its judgments about the relative merits of the Alcan and Arctic routes, it clearly found either of them superior to the El Paso proposal. The Alcan route received the strongest backing from the interagency task forces set up by the President, and just this weekend the Justice Department issued a report criticizing the Arctic route because of its anticompetitive aspects.

It seems to me, from reviewing these various reports and recommendations, especially those issued by the Canadian Government, that the only viable trans-Canadian option available to us is the route that follows the Alcan Highway, particularly if issues raised by the National Energy Board about the Alcan route can be negotiated successfully. With the demise of the Arctic route, pressure upon the President to recommend the El Paso route will become increasingly intense. For this reason, I intend to ask my colleagues to join me in signing a letter to the President urging him to pursue negotiations with the Canadians toward consummating an acceptable agreement on the Alcan route and recommending this route to the Congress.

In the past many of us have supported the Arctic proposal over the Alcan route. When I first supported this McKenzie Delta route, back in 1973, it was the only trans-Canada option available and was looked on favorably by the Canadian Government because of their belief that vast gas reserves would be found in the McKenzie Delta. Over the past year, and even the past few months, the situation has changed dramatically, and I have reassessed my earlier position.

I hope those colleagues who were with me on the Arctic route will also reexamine the situation, and understand that because of recent developments, the Alcan route is the only trans-Canada option now open to us, and one that avoids the social, environmental, and technical problems recently found to be associated with the Arctic route. We must join together now and support a sensible trans-Canada route, which is far superior, from almost any perspective, to the El Paso, Alaskan route.

This issue will be before Congress after the President makes his recommendation this fall. Therefore, I think it is important that we begin to convey our concern to the President, to make sure that lack of prior consultation between the Congress and the President does not lead to differences of opinion at the time the President sends up his choice.

In closing, Mr. President, I would like to express that it is my firm contention that going ahead with construction of

the Alcan route is in both the short-term and long-term interests of this Nation. If the green light is given to this project soon, we will likely begin receiving gas through the Alcan pipeline sometime in the winter of 1979–80, and in the areas of the country in desperate need of it. This compares to a distribution predicted completion date of 1984–85 for the El Paso route, which will deliver energy to areas already experiencing a surplus of energy—areas which themselves do not want the El Paso route because of the severe environmental problems associated with it.

Mr. President, the Alcan Consortium has already contracted for Canadian gas from Alberta for delivery to the Lower 48 by 1979–80.

We know that gas is there, and the Canadian Government has commented favorably on its sale to the United States. By starting construction on the southern end of its proposed gas pipeline, the Alcan Consortium can distribute Canadian gas to the Midwest, Atlantic region, and the west coast by the winter of 1980 and continue these deliveries until the northern segments of the pipeline are built to bring our own Alaskan gas south. This should avoid the risk of too many more winters like the one we had last year.

Therefore, I urge my colleagues to join with me in requesting that the President conduct our negotiations with the Canadians in such a way that they result in an acceptable agreement on the Alcan route and that he ultimately recommends this route to the Congress. I believe that most of the issues raised by the Canadians can be resolved in a way that benefits both countries, but it is important that our negotiators realize the crucial role they will play in the coming months and that they represent our interests fairly.

I do not want us to have a glut of natural resources in one part of our country, and I want us to solve this problem as quickly as we can. All of that seems to augur for the selection of the Alcan route, so that we can get Canadian gas and then Alaskan gas as quickly as possible, and will not have a repetition of the long, cold shortages we experienced last winter.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. ZORINSKY). Under the previous order, the special order having been concluded, there will now be a period for the transaction of routine morning business, with no resolutions coming over under the rule.

ORDER FOR NO ROLLCALL VOTES BETWEEN 12:30 P.M. AND 2 P.M. TODAY

Mr. BAKER. Mr. President, if I may have the attention of the distinguished majority leader, I wonder if it would be possible, for today only, to arrange that there not be any votes between 12:30 and 2 p.m. I respectfully urge the majority leader that there be no rollcall votes between the hours of 12:30 and 2 p.m. today.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, the minority leader, as I understood his request, said for today only?

Mr. BAKER. That is true.

Mr. ROBERT C. BYRD. This is not by any means intended to set a precedent?

Mr. BAKER. No, let me say it is not. There are certain traditional factors we take account of, and we would wish to continue on that basis.

Mr. ROBERT C. BYRD. But there are certain additional factors today?

Mr. BAKER. There are; and I would respectfully urge the majority leader not to object to this request at this time.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, are we still in morning business?

The PRESIDING OFFICER. We are still in the period for morning business.

TRANS-CANADA PIPELINE ALTERNATIVES

Mr. STEVENS. Mr. President, having listened to my good friend from Indiana outline his position with regard to a pipeline for Alaska gas through Canada, I would be remiss if I did not urge him to study two vexatious issues concerning a pipeline through Canada.

One is the potential for cost overruns, and whether or not this Government ought to guarantee the cost of a pipeline running through a neighboring but nevertheless a foreign country, with a prospect for cost overruns, as we have seen on the oil pipeline, approaching at least 100 percent going through a new area, as proposed to go through Canada.

I seriously question whether the Federal Government should be called upon, as it is indicated from Canada we will be called upon, to guarantee the construction cost of a pipeline that the Canadians say must be owned by Canadians but financed by world capital, which to me means Saudi Arabian money, owning the pipeline to carry Alaska's gas through Canada.

Secondly, the National Energy Board has stated categorically that one of the conditions for a pipeline through Canada to carry Alaska's gas would be an all-events tariff. I believe they stated that the consumers of the United States should bear the risks—all the risks—of interruptability or accident encountered in terms of the gas supply, so that the people who finance the pipeline through Canada would know it is the American consumer that bears the risk.

In other words, all the profit would stay in Canada and all the control would stay in Canada, but all the risks would be borne by the consumers of the United States.

To my knowledge, we have never permitted any interstate pipeline to have an all-events tariff, and I believe Congress is going to have a substantial burden of issues before it should the President recommend a pipeline through Canada. I, for one, will oppose to the last drop of Alaska's gas the proposal that a pipeline should go through Canada under those two conditions, and I am sure my friend from Indiana understands the depth of our feeling with regard to our resources.

But I appreciate his statement, and the fact that he has announced a change in position so far as the gas pipeline through Canada he supports is concerned.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, the committees have been notified well over a month ago that objections would be made to unanimous-consent requests for committee meetings during sessions of the Senate other than on energy matters and emergency matters, and matters which were considered to be important legislation before the Senate goes out for the year.

I do have a request I will propound, and I believe there is some exigency involved here. As I say, there was well over a month of notice given.

I ask unanimous consent that the Agricultural Research and General Legislation Subcommittee of the Agriculture, Nutrition, and Forestry Committee be allowed to meet during the session of the Senate today until 1 p.m. on the subject of chemicals in food and agriculture. It is my understanding that a panel of scientists are coming in from all over the country. Those scientists would be discommoded otherwise.

Again, I say, well over a month of notice was given. It seems to me that the meeting could have been set up at another time, but I am constrained to ask for the request in view of the fact that the scientists are from other parts of the country. I hope there will be no objection.

Mr. BAKER. Mr. President, reserving the right to object, it poses a problem of good proportion for me because I have objected repeatedly, both on the floor and in informal conferences with the distinguished majority leader, to other committees and subcommittees meeting on matters not related to energy legislation and other urgent matters. I am extremely reluctant to refrain from objecting at this time. The only matter which would compel me to withhold my objection—and I will, of course, withhold my objection today—is that we reconvened a good hour earlier than we planned originally yesterday.

At this time I will not object to this single request; but I would say, Mr. President, that this action does not alter my general feeling that committees should not meet at this point beyond the time limits in which they are permitted to meet under the standing orders and under the Stevenson resolution.

I might also say, Mr. President, it is anticipated we will have a rollcall vote at 12 noon and we may have other rollcall votes prior to that time. So there is a good possibility the subcommittee will be interrupted in any event. I would urge them to terminate those hearings as

soon as possible and well before 1 p.m. for the convenience of their members and all the rest of us.

Mr. ROBERT C. BYRD. Mr. President, I thank the minority leader. I believe he has raised other thoughtful points which lead him to refrain from objecting in this instance. He points out certain other exigencies which prevail in this instance which were not foreseen.

The PRESIDING OFFICER. Without objection, it is so ordered.

FAILURE OF THE SUGAR PROGRAM

Mr. LONG. Mr. President, I am sad to state, as many of my colleagues in this body have been sad to state, that the present sugar policy of this administration is a failure. It is a bankrupt policy which the GAO today suggested is illegal.

I ask unanimous consent, Mr. President, that there be printed at this point in the RECORD a letter dated July 19, 1977, from the Comptroller General of the United States to Congressman PAUL FINDLEY explaining why the administration's sugar program, with which I have disagreed, is improper and illegal. The report goes on to say that the GAO is not sure whether the program would increase or decrease sugar imports in the United States.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., July 19, 1977.

Hon. PAUL FINDLEY,
House of Representatives

DEAR MR. FINDLEY: This is in response to your letter dated June 15, 1977, which was also signed by the Honorable Edward R. Madigan, House of Representatives, concerning the Department of Agriculture's proposed regulations which would establish a price support payments program beginning with the 1977 sugar crop.

In this regard, you say that the proposed sugar regulations issued on June 14, 1977, are a classic example of an administrative agency trying to do indirectly what it cannot do directly. You refer to the current law as not permitting direct payments to sugar producers, but that the proposed regulations would get around this by providing that the processor would pay the producer the full amount of the support payment received, after deduction for administrative expenses. You indicate that there is also dubious legal authority for the proposed sugar plan because the current law requires that any payments shall be for the purpose of price support and you believe that the payments will not in any way increase, support or stabilize market prices, but will only provide income support.

You also question the legal basis for requiring a processor to carry out the program. You inquire as to what method of enforcement is available to the Department of Agriculture?

Finally, you question the legality of this type of "domestic subsidy" under our Government's international agreements, including the General Agreement on Tariffs and Trade (G.A.T.T.).

We have reviewed the opinion of the Department's Acting General Counsel which you included with your letter. We have also written to the Secretary of Agriculture in order to obtain his views on these matters. Due to the time constraints you have placed on our response, we met with certain officials of the Department of Agriculture to obtain such information and expression of views as we needed to prepare a quick response to your inquiry. While we have not received the written views of the Department we understand the Department's reply would confirm the views expressed by Department officials.

With regard to price supports for agricultural commodities, 7 U.S.C. § 1421 (1970) provides in pertinent part as follows:

"(a) The Secretary [of Agriculture] shall provide the price support authorized or required herein through the Commodity Credit Corporation and other means available to him.

"(b) Except as otherwise provided in this Act, the amounts, terms, and conditions of price support operations and the extent to which such operations are carried out, shall be determined or approved by the Secretary. The following factors shall be taken into consideration in determining, in the case of any commodity for which price support is discretionary, whether a price-support operation shall be undertaken and the level of such support * * *. (1) the supply of the commodity in relation to the demand therefor, (2) the price levels at which other commodities are being supported * * * (3) the availability of funds, (4) the perishability of the commodity, (5) the importance of the commodity to agriculture and the national economy, (6) the ability to dispose of stocks acquired through a price-support operation, (7) the need for offsetting temporary losses of export markets, (8) the ability and willingness of producers to keep supplies in line with demand * * *.

"(e) Whenever any price support or surplus removal operation for any agricultural commodity is carried out through purchases from or loans or payments to processors, the Secretary shall, to the extent practicable, obtain from the processors such assurances as he deems adequate that the producers of the agricultural commodity involved have received or will receive maximum benefits from the price support or surplus removal operation."

Section 1447, title 7, U.S. Code (1970) provides for price support levels of nonbasic agricultural commodities as follows:

"The Secretary is authorized to make available through loans, purchases, or *other operations* price support to producers for any nonbasic agricultural commodity not designated in section 1446 of this title at a level not in excess of 90 per centum of the parity price for the commodity." (Emphasis added.)

The program proposed by Agriculture in its regulations has the stated objective of supporting prices in the market place for sugarbeet and sugarcane producers through payments made to sugar processors. In support of the proposed payments program for 1977 crop of sugar specific reference is made to the eight applicable factors enumerated in 7 U.S.C. § 1421(b). In this regard it is stated that the price received by producers in the United States is a function of the world market price which is currently depressed and therefore the price received by domestic producers is below their cost of production. Price support payments are said to be limited to two cents a pound for several reasons including that the effect of larger payments would be to support the world market price for sugar which would mean an unlimited outlay of currency from the U.S. Treasury.

Section 1435.3 of the proposed regulations (42 Fed. Reg. 30409 (June 14, 1977)) refers to a determination by the Secretary of Agriculture that the level of price support for 1977 crop sugar will be no more than 13.5 cents a pound and that if the national average market price is less than 11.5 cents a pound, the price support payment rate shall not exceed two cents a pound. Under section 1435.5, at the end of each marketing quarter, after the Department of Agriculture has determined the national average price for sugar received by processors in that marketing quarter, it will announce the rate of payment for sugar marketed in the quarter. Payments will be made to a processor on eligible sugar marketed by it during the marketing quarter.

Section 1435.6 provides for a written contract between the processor and the producer stipulating the producer's share of proceeds for the sale of sugar in the market place and the method of payment of the proceeds. The processor shall agree to pay the producer the full amount of the price support payment after deduction for administrative expenses incurred in carrying out its obligations under the program.

Section 1435.9 of the proposed regulations provides that the processor will only be allowed to deduct from the payments actual administrative expenses directly incurred as the result of distributing payments to producers and fulfilling other requirements of the program. Allowable costs may include increased labor, automated data systems use, postage, and the processing of bank drafts. It would not include general administrative and overhead expenses incurred in the processors normal operations.

The Secretary of Agriculture, under 7 U.S.C. § 1447 may make price supports available to sugar producers by means of loans, purchases or "other operations." With regard to "other operations," the Department of Agriculture's Acting General Counsel, in a memorandum to the Secretary, dated April 6, 1977, a copy of which was enclosed with your letter, states as follows:

"The term 'other operations' as stated in Section 301 [7 U.S.C. § 1447] would permit the Secretary of Agriculture to make payments to processors of sugar who pay support prices to sugar producers. Such payments would assure that procedures would receive the support prices in the market place for their sugar at a time when processors could not otherwise afford to pay the support price in view of market prices for the processed product. The phrase 'other operations' would not, however, authorize direct payments to producers by the Secretary, since such payments would not support the price which the producers received in the market place for their sugar. This conclusion is supported by extensive legislative history."

After reviewing the pertinent legislative history, the Acting General Counsel concludes:

"* * * the phrase 'other operations' as contained in the Agricultural Act of 1949, as amended, would not allow the Secretary to make payments to producers of sugar beets and sugar cane, but would permit payments to processors of sugar in order to support the price received by producers for sugar in the maket place."

We have reviewed the statute and legislative history discussed in the Acting General Counsel's memorandum and concur that the Department may not make direct payments to producers. Hence, whatever else it may encompass, we agree that the statutory term "other operations" was not intended to include direct payments to producers.

Under the proposed program, after the end of the previous marketing quarter, payments are to be made to processors who have agreed that after deduction for administrative expenses, the full amount of the payment is to be paid to the producers. It appears that while the payment is made by the Government to the processor, the processor's function is akin to that of a trustee for the benefit of the producers, and to act as an agent of the Government in determining the amount due to each producers who has sold eligible sugar to it, and in forwarding such payments to the individual producers. It is indeed diffi-

cult to distinguish the effect of the proposed program from that of a program of direct producer payments made on the basis of the amount of sugar marketed. Accordingly, the proposed program is not, in our view, authorized under 7 U.S.C. § 1447 as the Department may not do indirectly what it cannot do directly.

In any event we have substantial doubt that the proposal represents a price support program as contemplated by 7 U.S.C. §§ 1421 and 1447. As we understand the proposed program, at the end of each marketing quarter the Department of Agriculture will determine the national average price for sugar for the quarter, and based on this determination, payments, not to exceed two cents a pound, will be authorized to be paid to the processors for the benefit of the sugar producers, provided the market price does not exceed the designated support price (of, for example, 13.5 cents a pound for crop year 1977). The actual rate of payment per pound will be the amount by which the national average market price is less than the designated support price.

The stated objective of the proposed program is to support prices in the market place for sugarbeet and sugarcane producers through payments made to sugar processors. However, the proposed program is unlike traditional price support programs in which the Government stands ready to purchase a commodity at a given price, and in which it in effect establishes a floor in the market price which those desiring to purchase the commodity must pay. Under the purposed program purchasers in the market place would pay the current price for sugar, for example, 11.5 cents a pound. At a later date, with a designated support level of 13.5 cents a pound, the producers would receive 2 cents a pound from the Government (less the processors' administrative expenses). It thus appears that the additional payment received by producers does not support or increase the market price but rather makes payments to processors for the benefit of the producers, as if the market price actually were higher.

In other words, the proposed program seems to provide, in essence, the equivalent of direct payments to producers, and we fail to see how the payments contemplated under the program would support the market price of sugar.

For the foregoing reasons, we are doubtful that the proposed program may be considered as a price support program as contemplated by 7 U.S.C. §§ 1421(e) and 1447.

With regard to processor participation in the proposed program, we have been informally advised by an official of the Department's Office of General Counsel, that he is aware of no means of compelling a processor to take part in the program. However, since producers would presumably bring their sugar to processors whose participation in the program would result in substantial additional payments to producers, it would appear that processors would for economic reasons voluntarily participate in the program. Once part of the program, after having entered into written agreements with producers stipulating their share of proceeds from the sale of sugar and the method of payment, the processor would be required to submit reports and certifications to Department of Agriculture which would probably conduct local spot checks of the processor's activities under the program.

Finally, you question the legality of the proposed program under G.A.T.T. or other of our Government's international agreements. The above agreement (61 Stat. part (5) and (6), T.I.A.S. No. 1700, 55–61 U.N.T.S.) which was concluded on October 30, 1947, and entered into force for the United States on January 1, 1948, provides in pertinent part as follows:

"ARTICLE XVI—SUBSIDIES

"Section A—Subsidies in General

"1. If any contracting party grants or maintains any subsidy, including any form of income or price support, which operates directly or indirectly to increase exports of any product from, or to reduce imports of any product into, its territory, it shall notify the contracting parties in writing of the extent and nature of the subsidization, of the estimated effect of the subsidization on the quantity of the affected product or products imported into or exported from its territory and of the circumstances making the subsidization necessary. In any case in which it is determined that serious prejudice to the interests of any other contracting party is caused or threatened by any such subsidization, the contracting party granting the subsidy shall, upon request, discuss with the other contracting party or parties concerned, or with the contracting parties, the possibility of limiting the subsidization."

Under this provision if the U.S. grants a subsidy including any form of income or price support which operates to increase sugar exports or decrease sugar imports into the country, the Government is required to notify the other contracting parties. Upon request, the U.S. also must discuss the possibility of limiting the subsidization with any party that believes its interests have been seriously prejudiced. It is not clear to us at this point if the proposed program would increase exports or reduce imports of sugar into the United States; you may wish to raise this question with the Department of Agriculture officials. Of course if there were an increase of the market share of domestic producers, the U.S. Government would be obligated to inform the other parties regarding the program and upon request to discuss possible limitations on the extent of the subsidy. We are not aware of provisions of any other international agreement which might invalidate the proposed program.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

Mr. LONG. Mr. President, instead of helping many of our small farmers whose livelihood depends on cane and beet sugar production, the administration was misled by some advisors to give direct subsidies to the rich. Multimillion dollar companies, some owned by one family, would receive million dollar checks from the U.S. Treasury, while the small farmer was squeezed out by the combination of dumped foreign sugar at ridiculously low prices and the large rich U.S. companies which receive million dollar checks from Uncle Sam.

It is difficult for me to understand how anybody in the administration who knew anything about sugar, including our Secretary of Agriculture, could have supported this "subsidy for the rich" program.

I do not believe Bob Bergland, a lifelong supporter of the sugar industry, supported this program. He was apparently overruled and now has to play the role of a good soldier. But he cannot support a program which is illegal.

It is an open invitation for foreign producers to take over our market and that is, in fact, what is happening. Currently, imports of foreign raw sugar account for over 45 percent of U.S. sugar consumption. Imports are arriving in the United States at less than 8 cents a pound, and foreign contracts with U.S. refiners indicate the strong likelihood of dumping. This compares with an estimated cost of production for U.S. producers of between 15 and 18 cents per pound, depending on the particular crop—cane or beet—and the particular part of the country.

The U.S. International Trade Commission thoroughly studied the sugar situation and concluded by an overwhelming majority, after 6 months' investigation, that the domestic industry is being seriously injured by foreign imports. The Commission recommended immediate action to reduce imports.

Receiving very bad advice from people who should know better, the President denied that relief and opted for this direct payment scheme. Apparently, some suggested that this approach would encourage the successful negotiation of an International Sugar Agreement. The opposite proved to be the case. Foreign producers, seeing a weak U.S. program and probably sensing it would drive out many U.S. producers leaving them a captive market, showed no interest in signing such an agreement.

We are still trying, but these countries feel that the United States is so desperate, they can wait and force us to sign any agreement. It is a typical "heads I win, tails you lose" trade negotiation in which the United States has been Uncle Sugar or Uncle Sucker too many times.

Mr. President, I strongly support the override petition introduced by Senator DOLE and cosponsored by Senators ANDERSON, BURDICK, CURTIS, HAYAKAWA, MCCLURE, and HASKELL. If the President does not use the authority he has to give a reasonable chance of survival to U.S. sugar producers, I will push hard to the override or the Church bill, of which I am also an active cosponsor.

I understand there will be an amendment offered to the farm bill in the House which add sugar beets and sugarcane to the list of "designated nonbasic commodities" in section 201 of the Agriculture Act of 1949.

In addition, it provides for price support at a level of 55 percent of parity, which translates to a price floor of about 14 cents per pound.

That amendment, which is essentially the same as the Church amendment here in the Senate, has the support of the cane, beet, and corn processors as well as the following groups representing farmers: National Farm Organization; National Farmers Union; National Corn Growers; International Brotherhood of Teamsters; International Longshoremen; General Federal of Grain Millers and others. In my judgment it makes a great deal of sense and actually gets the administration off the hook. It is a temporary program until there is a adequate International Sugar Agreement.

Sugar is a basic commodity and deserves to be treated as one. We do not expect, nor do we ask for all of the agriculture benefits of peanuts, corn, honey, or many other basic commodities. There is a virtual embargo on peanut imports but we do not ask for that on sugar. We do not mind sharing our market with foreign producers. But we do not want to give them the whole thing.

Finally, Mr. President, I ask unani-

mous consent that an excerpt from the transcript of the July 13 hearings before the Finance Committee on the subject of sugar be incorporated in the RECORD. The discussion is primarily between me and Secretary Bergland. It details many of the differences which I and many other Senators from the cane, beet, and corn sugar areas have with the administration's misguided program.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

Senator LONG. You made reference to the very unfortunate situation with regard to sugar. Is not sugar the only, or at least one of the very few forms, of commodities today that does not have a program, either through loans, payments or purchases of some sort?

Secretary BERGLAND. That is correct, one of the few. We have nonstorables, of course, for which there is no program—livestock, and eggs, and the like.

Senator LONG. As a means of achieving the 14 cent price of sugar, do you hope to treat sugar as the other farm commodities that do have a program today?

Secretary BERGLAND. Mr. Chairman, we have tabled a very detailed proposal of the Sugar Conference in Geneva. We are prepared to participate in an international sugar agreement. We hold that the best longterm permanent solution, or hope, for the American and international sugar industry—the international sugar market, Mr. Chairman, as you know, is a dump ground, a zoo. It is not a free market. It is a residual market. We all understand that. It has to be dealt with in that context.

We think, therefore, because if there is an international problem it should be dealt with in an international forum, the international sugar talks we think is the most appropriate place. The talks commenced in June. Reasonable progress was made. No conclusion was expected. They resume next week.

Secretary Katz will represent the Administration in those talks. You may ask him more details in this regard. If they blow up on us, if we cannot produce an international sugar agreement, then I think we have to seriously consider going about developing a policy of our own regarding sugar.

But until and as long as we have some reasonable good hope of getting an international agreement, I would urge that we not take any unilateral action beside the 2 cent a pound payment which has been agreed to.

Senator LONG. Mr. Secretary, I heard the statement made, and I agree with it, under the leadership of Mr. Katz we sent the best negotiation team that we have sent to any such meeting of this sort over to Europe and they were not successful in working something out, and I doubt that they are going to be able to work it out this time. It is not their fault.

We are making a good proposal to the world, but there are various people, because they do not want to pay the price, the consumer nations do not want to agree with something that would make it possible for the producer to charge them more for sugar.

I honestly do not see a great deal of prospect of Mr. Katz and his group of achieving any more cooperation from the world than they did before. Those people have a greater diversity of opinion over there than we do here, because they represent more countries.

Why can we not have some sort of a program that you could either support, or at least not oppose, to bring the sugar producers 13.5 to 14 cents for sugar, while all this effort to reach an international agreement is going on?

Secretary BERGLAND. Mr. Chairman, the sugar talks will resume next week and will continue on through the first week in August, or so. If no progress is made there, then I think it is unfortunate, but a fact, that we will not have an agreement. The next few weeks will tell the story.

If the thing disintegrates, then we have to consider a domestic sugar policy. There are a variety of ways in which this can be done. We can establish a target price concept, authorize payments to be made by producers; by law we do not currently have authority to do that.

We could establish the price support level and a lower range, a so-called competitive most times in the market, protect that by levies against the imports, to be sure that our own price support program is not overrun by low-cost or cheaper foreign imports.

We could establish quotas, restrictive import limits in various countries. There are a variety of remedies, Mr. Chairman, that we will consider.

Senator LONG. Mr. Secretary, it seems to me that all that we really need to do is pass some law to treat sugar like some of these other commodities, let you fix the support price wherever you think it ought to be, and I think we know where you think it ought to be. That would take care of our sugar producers and give the Administration the right to put quotas and handle the quotas however you want to handle them.

It seems to me that the fine reputation and record that President Carter has, and you have, for integrity and fairness, it seems to me that you could have a program and we would not have any problem with it. Under the old sugar program, there was only one thing that gave us trouble about that. These people would come in here and lobby and try to get some advantage regarding quotas. Representing the sugar producing states, there was not much I could do about that, because we wanted a Sugar Act. On the House side, we would have to contend with Mr. Cooley who did not need a Sugar Act.

Those House fellows pretty well ran over us.

If we give the Administration the right to handle the quota how they want to handle it, it seems to me that they could handle it, and it would make our foreign policy more effective. The President could use that as he wants to, to get a little leverage for human rights.

I think that would be a lot better leverage than to get somebody to try to make some progress in the human rights area, then tell them you are not going to send a weapon or something, they can get the weapons elsewhere, trade with other foreign countries.

I cannot understand why we cannot simply make sugar a basic commodity that you fix a support price where you think it should be fixed and under Section 22, as I understand it, that would require you to put quotas into effect. You could put them out for us and let everybody bid on them, or try to help people in some of these countries to achieve an equitable and just standard of living by getting those people to use the favorable price they get from the United States, to pass it on through to some of those workers in the field.

Why can we not do something like that?

Secretary BERGLAND. That is obviously one of the options we do have, indeed. As I stipulated earlier, we still have hopes that we can bring out a sugar agreement. If it does not work, we have to consider that remedy you suggested, Mr. Chairman, and there are some others.

Senator LONG. If Mr. Katz could get an agreement from all of these people he is too valuable to be sitting there negotiating sugar agreements. He should be Secretary of State. I know that he will do the best that can be done, but it seems to me what you are talking about there is something that cannot be done. I applaud his efforts to try to bring it about.

Meanwhile, it seems that we have people suffering, our own people. We owe it to them to look after them. You are interested in those people and you are doing your best to try to help them. Why can we not move on ahead with something along the line that I have been discussing, or something that would do the job, rather than do the type of thing that was done up to now, get a program that is a complete flop.

To say you are doing something for those people now is to apologize to them and I just think that we ought to give these people a program. They are suffering, and you know they are suffering, do you not?

Secretary BERGLAND. Yes, Mr. Chairman. We are not satisfied with the current sugar situation.

There are two processors in Louisiana that have closed, four more in big trouble; two processors in Colorado have closed.

There are a dozen processors across the United States in serious financial trouble. There is not a sugar producer in this land who can produce sugar for these prices. Things are coming apart at the seams; we understand that.

We do not think the U.S. can afford to sit idly by to let its own domestic sugar industry fall apart. If we destroy our own productive capability, that means we are going to have to import an additional $2 to $4 billion worth of sugar, making our own trade deficit even worse, obviously no better.

From our vantage point in the Department of Agriculture, we will never support a policy that will consciously or subconsciously allow the distintegration of the domestic sugar industry. It is in the process of coming apart at the seams.

Senator LONG. I would call the existing sugar program a Coca Cola program. It will make money for Coca Cola.

Mr. Austin could say what he did to see to it that those who consume the product do well, but it is a disaster as far as the American sugar producer is concerned, and I just think that the time has come for the Secretary of Agriculture to be called on and give us authority. I would frankly, Mr. Secretary, give you the power to do it, and settle for whatever you do.

I am impressed that by the time your recommendations get down there to that variety of opinion down there at the White House and the Bureau of the Budget, we might as well forget about it. Nothing is going to happen. We will keep hearing conversations, and keep providing disappointments to our people. They are entitled to something better than that, from me and you, it seems to me.

The President is interested in the farmer; he is a farmer himself. It seems that responsibility should be vested in you and your Department to give us a program, and we should implement it.

If you cannot recommend something to us, can you just agree not to get involved at all until we do pass something?

Secretary BERGLAND. We still have high hopes that Mr. Katz, with all of his professional experience and wisdom and charm can pull off the near impossible, that we will have a successful sugar agreement this fall.

Senator LONG. Here is my problem, if you could have your way, my people would not be suffering. If Mr. Katz could have his way, my people would not be suffering, and I suppose some of those people down there in the White House have good intentions.

The problem is, we are getting the worst of it, and are in very bad shape. The same thing is occurring elsewhere in this country. We need action—not conversation, action.

I am just pleading with you. If you cannot do something to help us, then send us word. If you cannot help you will not help the other fellow, you will just get out of the road and see what we can do by ourselves.

Secretary BERGLAND. All right, Mr. Chairman. I will be talking to you.

Senator LONG. Thank you very much.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

RESCISSION, B-1 BOMBER—MESSAGE FROM THE PRESIDENT— PM 97

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, and Armed Services:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith propose rescission of $462.0 million in procurement funds appropriated to the Department of Defense for the B-1 bomber. In addition, I am proposing rescission of $1.4 million provided to the Department of Defense for procurement of the short range attack missile (SRAM-B).

The details of the proposed rescissions are contained in the attached reports.

JIMMY CARTER.

THE WHITE HOUSE, *July 19, 1977.*

TWO RESCISSIONS, MILITARY CREDIT SALES PROGRAM AND FEDERAL BUILDINGS FUND—MESSAGE FROM THE PRESIDENT— PM 98

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred, pursuant to the order of January 30, 1975, to the Committee on Appropriations, the Budget, Foreign Relations, Governmental Affairs, and Armed Serviecs:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith propose two new rescissions totalling $96.1 million in budget authority and report one new deferral of $12.5 million in budget authority.

The rescission proposals pertain to the foreign militarv credit sales program and the General Services Administration's Federal Buildings Fund. The new deferral relates to the Department of Defense, Uniform Services University of the Health Sciences.

I urge the Congress to act favorably on the rescission proposals.

JIMMY CARTER.

THE WHITE HOUSE, *July 19, 1977.*

REPORT OF THE ST. LAWRENCE SEAWAY DEVELOPMENT CORPORATION—MESSAGE FROM THE PRESIDENT—PM 99

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Environment and Public Works:

To the Congress of the United States:

I herewith transmit the Annual Report of the Saint Lawrence Seaway Development Corporation for 1976. This report has been prepared in accordance with Section 10 of the Saint Lawrence Seaway Act of May 13, 1954. This report covers the period January 1, 1976 through December 31, 1976, prior to the commencement of my term of office.

JIMMY CARTER.

THE WHITE HOUSE, *July 19, 1977.*

MESSAGES FROM THE HOUSE

At 3:17 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks announced that:

The House has passed the bill (S. 1435) to authorize appropriations for the Federal election Commission for fiscal year 1978, with amendments in which it requests the concurrence of the Senate.

The House disagrees to the amendments of the Senate to the bill (H.R. 7932) making appropriations for the legislative branch for the fiscal year ending September 30, 1978, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two houses thereon; and that Mr. SHIPLEY, Mr. BENJAMIN, Mr. GIAIMO, Mr. MCFALL, Mr. MURTHA, Mr. TRAXLER, Mr. MAHON, Mr. ARMSTRONG, Mr. COUGHLIN, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

The House has passed the following bills and joint resolutions in which it requests the concurrence of the Senate:

H.R. 3373. An act to extend for an additional temporary period the existing suspension of duties on certain classifications of yarns of silk;

H.R. 3387. An act to continue until the close of June 30, 1979, the existing suspension of duty on synthetic rutile;

H.R. 3755. An act to provide for the reinstatement of civil service retirement survivor annuities for certain widows and widowers whose remarriage occurred before July 18, 1966, and for other purposes.

H.R. 4319. An act to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes;

H.R. 5037. An act for the relief of Jack R. Misner;

H.R. 5146. An act to amend the Tariff Schedules of the United States to provide for the duty-free entry of competition bobsleds and luges;

H.R. 5176. An act to lower the duty on levulose until the close of June 30, 1980;

H.R. 5285. An act to amend the Tariff Schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets, and plates of certain plastics or rubber;

H.R. 5289. An act for the relief of Joe Cortina of Tampa, Fla.;

H.R. 6975. An act to amend title 5, United States Code, to provide that hearing examiners shall be known as administrative law judges, and to increase the number of such positions which the Civil Service Commission may establish and place at GS-16 of the General Schedule;

H.R. 7012. An act to provide for a 40-per centum reduction of the burden on respondents in the censuses of agriculture, drainage, and irrigation taken in 1979 and thereafter, and for other purposes; and

H.J. Res. 372. A joint resolution to authorize the President to issue a proclamation designating the week beginning on November 20, 1977, as "National Family Week."

At 4:40 p.m, a message from the House of Representatives delivered by Mr. Hackney, one of its clerks, announced that:

The House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4088) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes.

The House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1474) to authorize certain construction at military installations, and for other purposes.

The House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7554) making appropriations for the Department of Housing and Urban Development, and for sundry independent executive agencies, boards, bureaus, commissions, corporations, and offices for the fiscal year ending September 30, 1978, and for other purposes; that the House recedes from its disagreement to the amendments of the Senate numbered 9 and 24; and that the House recedes from its disagreement to the amendments of the Senate numbered 28, 40, 45, and 46 and concurs therein each with an amendment in which it requests the concurrence of the Senate.

The House disagrees to the amendments of the Senate to the bill (H.R. 3722) to amend the Securities Exchange Act of 1934 to authorize appropriations for the Securities and Exchange Commission for fiscal year 1978; requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. STAGGERS, Mr. ECKHARDT, Mr. METCALFE, Mr. KRUEGER, Mr. CARNEY, Mr. DEVINE, and Mr. BROYHILL were appointed managers of the conference on the part of the House.

The House has passed the bill (H.R. 2982) to suspend until the close of June 30, 1980, the duty on synthetic tantalum/columbium concentrate, in which it requests the concurrence of the Senate.

ENROLLED BILLS SIGNED

At 5:25 p.m., a message from the House of Representatives delivered by Mr. Berry announced that the Speaker has signed the following enrolled bills:

H.R. 2502. An act to extend certain oil and gas leases by a period sufficient to allow the drilling of an ultradeep well.

H.R. 5970. An act to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, to authorize the military training student loads, and to authorize appropriations for civil defense, and for other purposes.

H.R. 7552. An act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1978, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–1690. A letter from the Chairman of the Cost Accounting Standards Board transmitting, pursuant to law, a report of proposed Standards, rules and regulations promulgated by the Cost Accounting Standards Board concerning adjustment and allocation of pension cost (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC–1691. A letter from the Chairman of the Federal Trade Commission transmitting, pursuant to law, a report concerning (a) the effectiveness of cigarette labeling, (b) current practices and methods of cigarette advertising and promotion, and (c) recommendations for legislation deemed appropriate (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1692. A letter from the Secretary of Transportation transmitting, pursuant to law, a report on "Availability and Use of Abandoned Railroad Rights-of-Way" (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1693. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law, a report on gasoline service station market shares for the month of March 1977 (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–1694. A letter from the Secretary of the Interior transmitting, pursuant to law, the final report on the Santa Fe Trail concerning inclusion in the National Trails System (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–1695. A letter from the Director of the National Science Foundation transmitting, pursuant to law, a report on a planned addition to the NSF system of records, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC–1696. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act, 2–56 an act to amend the Good Samaritan Act of the District of Columbia, to establish a program for the certification of emergency medical technician/paramedics, and for other purposes (with accompanying papers); to the Committee on Governmental Affairs.

EC–1697. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act, 2–59 an act to revise the rates charged for medical and mental health services provided by the District of Columbia, and for other purposes (with accompanying papers); to the Committee on Governmental Affairs.

EC–1698. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act, 2–54 an act to regulate land disturbing activities to prevent accelerated soil erosion and sedimentation and to prevent sediment deposit in the Potomac River and its tributaries, including the sewer system of the District of Columbia, and for other purposes (with accompanying papers); to the Committee on Governmental Affairs.

EC–1699. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "The Food Stamp Program—Overissued Benefits Not Recovered and Fraud Not Punished" (CED–77–112) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1700. A letter from the Comptroller general of the United States transmitting, pursuant to law, a report entitled "Department of Defense Air Pollution Control: Progress and Delays (LCD–77–305) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1701. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "The Labor Surplus Policy: Is it Effective in Providing Government Contracts to High Unemployment Areas and Jobs for the Disadvantaged?" (PSAD–77–133) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1702. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Clarence Connon Dam and Reservoir: Cost, Schedule, and Safety Problems" (PSAD–77–131) (with an accompanying report); to the Committee on Governmental Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Human Resources:

With amendments:

S. 1750. A bill to amend the Public Health Service Act and the Federal Food, Drug, and Cosmetic Act, as amended, to conduct studies concerning toxic and carcinogenic substances in foods, to conduct studies concerning saccharin, its impurities and toxicity and the health benefits, if any, resulting from the use of nonnutritive sweeteners including saccharin; to ban the Secretary of Health, Education, and Welfare from taking action with regard to saccharin for 18 months, and to add additional provisions to section 403 of the Federal Food, Drug, and Cosmetic Act, as amended, concerning misbranded foods (together with supplemental views) (Rept. No. 95–353).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

James J. Gillespie, of Washington, to be U.S. attorney for the eastern district of Washington.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were each read twice by their titles and referred as indicated:

H.R. 2982. An act to suspend until the close of June 30, 1980, the duty on synthetic tantalum/columbium concentrate; to the Committee on Finance.

H.R. 3373. An act to extend for an additional temporary period the existing suspension of duties on certain classifications of yarns of silk; to the Committee on Finance.

H.R. 3387. An act to continue until the close of June 30, 1979, the existing suspension of duty on synthetic rutile; to the Committee on Finance.

H.R. 3755. An act to provide for the reinstatement of civil service retirement survivor annuities for certain widows and widowers whose remarriages occurred before July 18, 1966, and for other purposes; to the Committee on Governmental Affairs.

H.R. 4319. An act to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes; to the Committee on Governmental Affairs.

H.R. 5037. An act for the relief of Jack R. Misner; to the Committee on Finance.

H.R. 5146. An act to amend the Tariff Schedules of the United States to provide for the duty-free entry of competition bobsleds and luges; to the Committee on Finance.

H.R. 5176. An act to lower the duty on levulose until the close of June 30, 1980; to the Committee on Finance.

H.R. 5285. An act to amend the Tariff Schedules of the United States with respect to the tariff treatment accorded to film, stripes, sheets, and plates of certain plastics or rubber; to the Committee on Finance.

H.R. 5289. An act for the relief of Joe Cortina of Tampa, Fla.; to the Committee on Finance.

H.R. 6975. An act to amend title 5, United States Code, to provide that hearing examiners shall be known as administrative law judges, and to increase the number of such positions which the Civil Service Commission may establish and place at GS–16 of the General Schedule; to the Committee on Governmental Affairs.

H.R. 7012. An act to provide for a 40 per centum reduction of the burden on respondents in the censuses of agriculture, drainage, and irrigation taken in 1979 and thereafter, and for other purposes; to the Committee on Governmental Affairs.

H.J. Res. 372. A joint resolution to authorize the President to issue a proclamation designating the week beginning on November 20, 1977, as "National Family Week"; to the Committee on the Judiciary.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent the second time, and referred as indicated:

By Mr. GLENN:

S. 1882. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 to authorize the Law Enforcement Assistance Administration to make grants to States for the prevention and detection of certain crimes involving the torching of buildings, and for other purposes; to the Committee on the Judiciary.

By Mr. WILLIAMS (for himself and Mr. JAVITS):

S. 1883. A bill to amend the National Labor Relations Act to strengthen the remedies and expedite the procedures under such act; to the Committee on Human Resources.

By Mr. RIEGLE (for himself and Mr. CRANSTON):

S. 1884. A bill to amend the National Labor Relations Act to clarify its coverage of health professionals; to the Committee on Human Resources.

By Mr. McINTYRE:

S.1885. A bill for the relief of Lewis and Saunders, Inc.; to the Committee on the Judiciary.

By Mr. CURTIS:

S. 1886. A bill to amend title IV of the Social Security Act to make necessary changes in the amount of earned income to be disregarded under the State plan for aid and services to needy families with children; and

S. 1887. A bill to amend title IV of the Social Security Act to reverse the computation of earnings disregards and work-related expenses under the AFDC program; to the Committee on Finance.

By Mr. BELLMON:

S. 1888. A bill to amend title IV of the Social Security Act to allow States to provide community work and training programs under State plans for aid and services to needy families with children; to the Committee on Finance.

By Mr. LUGAR:

S. 1889. A bill to terminate the authorization of the navigation study and survey of the Wabash River, Ind.; to the Committee on Environment and Public Works.

By Mr. WILLIAMS:

S. 1890. A bill to extend commuter rail passenger services operated by the Consolidated Rail Corporation, to provide for the adequate insurance of risks incurred in the operation of such services, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BELLMON:

S. 1891. A bill to amend title IV of the Social Security Act to require that dependent children of unemployed fathers be eligible for assistance under the aid to families with dependent children program, and to provide 100 percent Federal funding for such aid; to the Committee on Finance.

By Mr. THURMOND:

S. 1892. A bill to authorize and direct the Secretary of Agriculture and the Secretary of the Interior to quitclaim retained rights to certain land in Orangeburg County, S.C., to the State superintendent of education of the State of South Carolina; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KENNEDY (for himself, Mr. SCHWEIKER, Mr. JAVITS, and Mr. PELL):

S. 1893. A bill to amend the Public Health Service Act to establish the President's Commission for the Protection of Human Subjects of Biomedical and Behavioral Research, and for other purposes; to the Committee on Human Resources.

By Mr. CRANSTON (for himself and Mr. HAYAKAWA):

S. 1894. A bill for the relief of California Canners and Growers, a nonprofit cooperative association organized under the Agricultural Code of the State of California; to the Committee on the Judiciary.

By Mr. FORD (for himself and Mr. PEARSON) (by request):

S. 1895. A bill to amend the Natural Gas Pipeline Safety Act of 1968 to authorize appropriations for fiscal year 1979; to the Committee on Commerce, Science, and Transportation.

By Mr. FORD (for himself and Mr. PEARSON) (by request):

S. 1896. A bill to amend the Hazardous Materials Transportation Act to authorize appropriations for fiscal year 1979; to the Committee on Commerce, Science, and Transportation.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S.J. Res. 72. A joint resolution authorizing the President to proclaim annually a week during the first 10 days of May as "Pacific/Asian Amercan Heritage Week"; to the Committee on the Judiciary.

By Mr. BARTLETT:

S.J. Res. 73. A joint resolution proposing an amendment to the Constitution of the United States to establish maximum age limits for certain officers of the Government; and

S.J. Res. 74. A joint resolution proposing an amendment to the Constitution of the United States providing for the reconfirmation by popular vote of certain Federal judges; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

(Statements in connection with the above introduced bills and joint resolutions are printed at the conclusion of Senate proceedings today.)

ADDITIONAL COSPONSORS

S. 123

At the request of Mr. INOUYE, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 123, to amend the Social Security Act.

S. 1307

At the request of Mr. THURMOND, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 1307, to amend title 38, United States Code.

S. 1570

At the request of Mr. MOYNIHAN, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 1570, to amend the Internal Revenue Code.

S. 1693

At the request of Mr. CRANSTON, the Senator from Maine (Mr. HATHAWAY) was added as a cosponsor of S. 1693, the Veterans Health Care Amendments Act of 1977.

S. 1702

At the request of Mr. INOUYE, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 1702, to amend the Social Security Act.

S. 1728

At the request of Mr. ANDERSON, the Senator from New York (Mr. JAVITS) was added as a cosponsor of S. 1728, the Domestic Violence Prevention and Treatment Act.

S. 1785

At the request of Mr. KENNEDY, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 1785, the Lobbying Reform Act of 1977.

S. 1820

At the request of Mr. METCALF, the Senator from South Dakota (Mr. ABOUREZK) was added as a cosponsor of S. 1820, to establish programs for maintenance of natural diversity.

S. 1871

At the request of Mr. WILLIAMS, the Senator from Missouri (Mr. EAGLETON) was added as a cosponsor of S. 1871, to amend the Fair Labor Standards Act.

SENATE CONCURRENT RESOLUTION 5

At the request of Mr. GRIFFIN, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of Senate Concurrent Resolution 5, relating to the Missing in Action in Vietnam.

SENATE CONCURRENT RESOLUTION 5—WITHDRAWAL

At the request of Mr. WEICKER, the Senator from Rhode Island (Mr. PELL) was withdrawn as a cosponsor of Senate Concurrent Resolution 5, concerning diplomatic relations with Vietnam.

SENATE CONCURRENT RESOLUTION 15

At the request of Mr. WEICKER, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of Senate Concurrent Resolution 15, to reduce the risk of chemical warfare.

SENATE CONCURRENT RESOLUTION 22

At the request of Mr. KENNEDY, the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of Senate Concurrent Resolution 22.

SENATE CONCURRENT RESOLUTION 26

At the request of Mr. CRANSTON, the Senator from Michigan (Mr. GRIFFIN), the Senator from Michigan (Mr. RIEGLE), the Senator from Nevada (Mr. LAXALT), the Senator from Florida (Mr. STONE), the Senator from North Dakota (Mr. BURDICK), the Senator from Indiana (Mr. LUGAR), and the Senator from South Dakota (Mr. ABOUREZK) were added as cosponsors of Senate Concurrent Resolution 26.

SENATE RESOLUTION 224—SUBMISSION OF A RESOLUTION RELATING TO CAPTIVE NATIONS

(Referred to the Committee on Foreign Relations.)

Mr. DOLE (for himself and Mr. PERCY) submitted the following resolution:

SENATE RESOLUTION 224

Whereas Public Law 86–90 authorizes the third week of July to be proclaimed Captive Nations Week, and

Whereas the basic premise of Public Law 86–90 is the reaffirmation of the right of national self determination of all captive peoples, and

Whereas the Final Act of the Conference on Security and Cooperation in Europe committed the participating States to "respect the equal rights of peoples and their right to self determination"; Therefore be it

Resolved that it is the Sense of the Senate that, in keeping with the spirit of P.L. 86–90 and the Final Act, the United States delegation to this fall's Belgrade Conference reaffirm the universal significance of respect for and effective exercise of equal rights and self determination of all peoples for the development of friendly relations among ourselves as among all States.

CAPTIVE NATIONS WEEK

Mr. DOLE. Mr. President, I rise to introduce a Sense of the Senate resolution on behalf of myself and Mr. PERCY, my distinguished colleague from Illinois.

This being Captive Nations Week, our resolution addresses the all important question of self-determination and its relationship to the Belgrade Conference which will convene this fall to discuss implementation of the Final Act of the Conference on Security and Cooperation in Europe.

BASKET I ALSO IMPORTANT

With all of the attention that has recently been paid to the human rights provisions of basket III, there has been a tendency to overlook the equally important humanitarian ideals articulated in basket I. This is especially true of principle VII which succinctly states that:

All peoples always have the right, in full freedom, to determine, when and as they wish, their internal and external political status, without external interference, and

to pursue as they wish their political, economic, social and cultural development.

CAPTIVE NATIONS STILL CAPTIVE

It is during Captive Nations Week that we are reminded of the plight of certain nations in Europe who, because of external interference, are not in a position to determine, in full freedom, their own future development or to exercise their right of self-determination.

PEACE THROUGH SELF-DETERMINATION

As the final act makes clear, friendly relations among the participating States can come about only when there is a recognition of the "universal significance of respect for and exercise of equal rights and self-determination."

The Dole-Percy resolution recognizes the wisdom of this final act language and calls upon the U.S. delegation to this fall's Belgrade Conference to reaffirm the principle of self-determination and the right of all peoples to exercise it freely.

SENATE RESOLUTION 225—SUBMISSION OF A RESOLUTION TO REFER A BILL TO THE COURT OF CLAIMS

(Referred to the Committee on the Judiciary.)

Mr. CRANSTON (for himself and Mr. HAYAKAWA) submitted the following resolution:

SENATE RESOLUTION 225

Resolved, That bill (S. 1894) entitled "A bill for the relief of California Canners and Growers, a nonprofit cooperative association organized under the Agricultural Code of the State of California," now pending in the Senate, together with all the accompanying papers, is referred to the Chief Commissioner of the United States Court of Claims, and the Chief Commissioner shall proceed with the same in accordance with the provisions of sections 1492 and 2509 of title 28, United States Code, notwithstanding the bar of any statute of limitation, laches, or bar of sovereign immunity, and report thereon to the Senate, at the earliest practicable date, giving such findings of fact and conclusion thereon as shall be sufficient to inform the Congress of the nature and character of the demand of the claim, legal or equitable, against the United States, or a gratuity in the amount, if any, legally or equitably due from the United States to the claimant.

SENATE CONCURRENT RESOLUTION 37—SUBMISSION OF A CONCURRENT RESOLUTION DISAPPROVING COMPULSORY AIR BAG EQUIPMENT IN AUTOMOBILES

(Referred to the Committee on Commerce, Science, and Transportation.)

Mr. BARTLETT submitted the following concurrent resolution:

SENATE CONCURRENT RESOLUTION 37

Resolved by the Senate (the House of Representatives concurring), That the Congress disapproves the Federal motor vehicle safety standard transmitted to Congress on June 30, 1977.

BIG BROTHER AND THE BAG

Mr. BARTLETT. Mr. President, I am today introducing Senate Concurrent Resolution 37, which would disapprove the recent decision of the Secretary of Transportation to require airbags or other passive restraint systems in all new autos by 1984.

What more appropriate effective date could they have chosen than 1984? This latest blow to freedom of choice by American citizens is indeed a decision that would be better suited to the pages of an Orwellian novel.

Instead, this decision by the Department of Transportation merely marks another area of our national life in which a Federal bureaucracy deems itself better able to look out for Americans than can Americans themselves.

The problem of preventing injury and death on our highways is obviously one which should be of concern to all Americans. Both the dollar cost and human cost of traffic accidents are extremely high. However, the fact that a serious problem exists should not automatically lead us to conclude that a response by Government is necessary. Unfortunately, the Federal Government seems inclined to adopt an all-knowing, paternalistic approach to the problem of automobile safety.

Some regulation of the use of our highways has always been necessary and widely accepted. State imposed speed limits, restrictions on drinking and driving, and various traffic control laws are examples of regulations which have been established to prevent some drivers from harming others who use the roadways. In recent years, the Federal Government, acting through the Department of Transportation, has occasionally gone beyond what is necessary to protect other road users from the dangerous actions of drivers. It has sought to require the use of certain safety devices which protect only the driver of the vehicle in which they are installed, but has left no choice to the driver as to whether he or she wants such devices in the car.

The seatbelt interlock system, formerly required by the Department, is a good example. Now the requirement for air bags is added to the list of Government attempts to take care of us whether we like it or not.

I am prepared to concede that there probably are advantages in terms of personal safety that result from using the airbag. Notwithstanding this fact, I think we fail to consider an essential factor when we allow Government to arbitrarily decide for us what steps we should take to protect ourselves. That factor is the importance of freedom of choice. Government may try to determine the risks from a given course of action. It may seek to inform the public of those risks. But so long as it is clear that no one else's safety is involved, I believe the decision on whether airbags or other passive restraint devices will be used should be left to the individual car owner.

In my judgment, the Government went as far as it reasonably could in 1976, when the Department of Transportation under Secretary Coleman announced that while it would not require airbags on all autos, it would at least require that they be available for those who wanted them.

Mr. President, under the National Motor Traffic and Motor Vehicle Safety Act of 1966, as amended, Congress has 60 calendar days, excluding recesses, in which it can veto any regulation which would require the installation of a passive restraint system other than seat belts. It is pursuant to this act that I have introduced this Senate concurrent resolution.

I hope that Congress will act favorably on this measure. The 60-day period will expire sometime around October 9. We must therefore act with dispatch on this matter. If we do so, we can lay to rest once and for all the recurring issue of "Big Brother and the Bag."

SENATE CONCURRENT RESOLUTION 38—SUBMISSION OF A CONCURRENT RESOLUTION DISAPPROVING PRESIDENTIAL ACTION REGARDING THE SUGAR INDUSTRY

(Referred to the Committee on Finance.)

Mr. DOLE (for himself, Mr. LONG, Mr. CURTIS, Mr. ANDERSON, Mr. JOHNSTON, Mr. MELCHER, Mr. HAYAKAWA, Mr. BURDICK, Mr. MCCLURE, Mr. HASKELL, Mr. ZORINSKY, Mr. YOUNG, and Mr. STONE) submitted the following concurrent resolution:

S. CON. RES. 38

Resolved by the Senate (the House of Representatives concurring), That the Congress does not approve the action taken by, or the determination of, the President under section 203 of the Trade Act of 1974 transmitted to the Congress on May 4, 1977.

AN EFFECTIVE SUGAR PROGRAM IS NEEDED

Mr. DOLE. Mr. President, I am introducing a resolution today along with Senators LONG, CURTIS, ANDERSON, HAYAKAWA, BURDICK, MCCLURE, HASKELL, STONE, and ZORINSKY which disapproves the President's substitute program to the International Trade Commission's recommendations to remedy the finding of injury to our domestic sugar industry because of imports. Under provisions of the Trade Act of 1974 the International Trade Commission conducted a study in response to a resolution of the Committee on Finance of the Senate. The resolution asked whether sugar imports were a substantial cause of serious injury or threat to the domestic sugar industry. After an intensive investigation of 6 months, on March 17, 1977, the USITC reported to President Carter that the domestic sugar industry is being threatened with serious injury by increased imports. To relieve this threat the USITC recommended that an import quota of 4.275 million tons be imposed. The President rejected this recommendation and on May 4, 1977, instructed the Secretary of Agriculture to institute an "income support" program.

The President's proposed sugar program is not in reality a price support program and would not solve the severe economic crisis that the sugar industry is presently undergoing. In fact, rather than a sugar producer price support program it would give industrial users of sugar a low priced ingredient. The records show that despite the drop in the sugar prices the industrial users' prices have gone up for such items as cola drinks, cookies, chocolate bars, and grape jelly.

SUPPORT PRICE

The announced level of 13.5 cents per pound support is not the support price. Two cents per pound is the support price and producers would not receive that if the market price exceeds 11.5 cents per pound. No matter how low the market price declines below 11.5 cents the maximum payment is still only 2 cents.

DOLE AMENDMENT

When the Senate passed my payment limitation amendment to the agricultural appropriation bill, it was pointed out that potential recipients of a large share of the payments are large corporations. The Senate limitation of payments to $50,000 on sugar made uniform and even-handed the maximum amount to be received by an individual producing any crop such as corn, wheat, cotton or rice as passed in the Senate farm bill. Payment limitations prevent payments of millions of dollars to conglomerate corporations.

PRODUCERS CONDEMN PROPOSED PROGRAM

Sugar producers are condemning the administration's proposed program. At a meeting in Denver, Colo., July 8, the National Sugarbeet Growers Federation jointly with the Great Western Sugar Co., issued a press release stating that they will take immediate steps to oppose the implementation of the proposed program and work to develop constructive alternatives. They expressed concern for glaring failures of the proposal as follows:

(1) The program's failure to provide adequate support to the costs of production and processing,

(2) The program not being a true price support program,

(3) The possibility the program could actually operate to further deflate prices, and

(4) The program's failure to recognize the inseparable and reciprocal relationship of beet growers and processor, both of whom share in the industry under traditional participating contracts.

Other concerns named were the program's innumerable ambiguities and legal uncertainties in its present form. These could result in harmful delays in providing assistance urgently needed to preserve the industry.

PRODUCERS NEED HELP

Mr. President, the announced sugar proposal will not save the industry from impending bankruptcy. The President's program does not become effective to provide any payments until after the first marketing quarter thus delaying relief for most producers well into 1978. Disapproval of his program by this resolution would provide the industry with relief immediately by restricting imports. The producer would receive better prices immediately from the marketplace instead of Government subsidies and there would be no problem of limiting payments to large corporations because there would be no payments.

A true support price of sugar at a reasonable level with the enforcement provisions to protect against dumping of excess sugar supplies of the world in the U.S. market is an alternative that should be enacted. The farm bill currently being considered by the House should also be amended to provide for an adequate sugar support program. I urge Members of this body to join in the effort to support the sugar industry.

Acceptance of my resolution would: First, disallow the President's proposed sugar program; and second, mandate the President to proclaim the USITC recommended import quota of 4.275 million tons.

My resolution provides a program more responsive to the needs of the sugar producers.

PRESIDENT'S PROPOSED PROGRAM ILLEGAL

Today, in a letter to Congressman PAUL FINDLEY, the Comptroller General of the United States indicates that the President's proposed sugar program may be illegal. He questions the legality of making payments to processors which would then go to producers on the basis of the amount of sugar marketed.

I quote from the Comptroller's letter:

It appears that while the payment is made by the Government to the processor, the processor's function is akin to that of a trustee for the benefit of the producers, and to act as an agent of the Government in determining the amount due to each producer who has sold eligible sugar to it, and in forwarding such payments to the individual producers. It is indeed difficult to distinguish the effect of the proposed program from that of a program of direct producer payments made on the basis of the amount of sugar marketed. Accordingly, the proposed program is not, in our view, authorized under 7 U.S.C. § 1447 as the department may not do indirectly what it cannot do directly.

Since direct payments to producers are prohibited under the Agricultural Act of 1949 and since the Comptroller General sees legal problems with the President's proposed sugar program, the recommended quotas of the USITC should be imposed immediately. After this needed action is taken the Congress can then consider sugar price support legislation.

Mr. President, I ask unanimous consent that the letter to which I have referred be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., July 19, 1977.

HON. PAUL FINDLEY,
House of Representatives.

DEAR MR. FINDLEY: This is in response to your letter dated June 15, 1977, which was also signed by the Honorable Edward M. Madigan, House of Representatives, concerning the Department of Agriculture's proposed regulations which would establish a price support payments program beginning with the 1977 sugar crop.

In this regard, you say that the proposed sugar regulations issued on June 14, 1977, are a classic example of an administrative agency trying to do indirectly what it cannot do directly. You refer to the current law as not permitting direct payments to sugar producers, but that the proposed regulations would get around this by providing that the processor would pay the producer the full amount of the support payment received, after deduction for administrative expenses. You indicate that there is also dubious legal authority for the proposed sugar plan because the current law requires that any payments shall be for the purpose of price support and you believe that the payments will not in any way increase, support or stabilize market prices, but will only provide income support.

You also question the legal basis for requiring a processor to carry out the program. You inquire as to what method of enforcement is available to the Department of Agriculture?

Finally, you question the legality of this type of "domestic subsidy" under our Government's international agreements, including the General Agreements on Tariffs and Trade (G.A.T.T.).

We have reviewed the opinion of the Department's Acting General Counsel which you included with your letter. We have also written to the Secretary of Agriculture in order to obtain his views on these matters. Due to the time constraints you have placed on our response, we met with certain officials of the Department of Agriculture to obtain such information and expression of views as we needed to prepare a quick response to your inquiry. While we have not received the written views of the Department we understand the Department's reply would confirm the views expressed by Department officials.

With regard to price supports for agricultural commodities, 7 U.S.C. § 1421 (1970) provides in pertinent part as follows:

"(a) The Secretary [of Agriculture] shall provide the price support authorized or required herein through the Commodity Credit Corporation and other means available to him.

"(b) Except as otherwise provided in this Act, the amounts, terms, and conditions of price support operations and the extent to which such operations are carried out, shall be determined or approved by the Secretary. The following factors shall be taken into consideration in determining, in the case of any commodity for which price support is discretionary, whether a price-support operation shall be undertaken and the level of such support * * *. (1) the supply of the commodity in relation to the demand therefor, (2) the price levels at which other commodities are being supported * * * (3) the availability of funds, (4) the perishability of the commodity, (5) the importance of the commodity to agriculture and the national economy, (6) the ability to dispose of stocks acquired through a price-support operation, (7) the need for ofisetting temporary losses of export markets, (8) the ability and willingness of producers to keep supplies in line with demand * * *.

"(e) Whenever any price support or surplus removal operation for any agricultural commodity is carried out through purchases from or loans or payments to processors, the Secretary shall, to the extent practicable, obtain from the processors such assurances as he deems adequate that the producers of the agricultural commodity involved have received or will receive maximum benefits from the price support or surplus removal operation."

Section 1447, title 7, U.S. Code (1970) provides for price support levels of nonbasic agricultural commodities as follows:

"The Secretary is authorized to make available through loans, purchases, or *other operations* price support to producers for any nonbasic agricultural commodity not designated in section 1446 of this title at a level not in excess of 90 per centum of the parity price for the commodity." (Emphasis added.)

The program proposed by Agriculture in its regulations has the stated objective of supporting prices in the market place for sugarbeet and sugarcane producers through payments made to sugar processors. In support of the proposed payments program for 1977 crop of sugar specific reference is made to the eight applicable factors enumerated in 7 U.S.C. § 1421(b). In this regard it is stated that the price received by producers in the United States is a function of the world

market price which is currently depressed and therefore the price received by domestic producers is below their cost of production. Price support payments are said to be limited to two cents a pound for several reasons including that the effect of larger payments would be to support the world market price for sugar which would mean an unlimited outlay of currency from the U.S. Treasury.

Section 1435.3 of the proposed regulations (42 Fed. Reg. 30409 (June 14, 1977)) refers to a determination by the Secretary of Agriculture that the level of price support for 1977 crop sugar will be no more than 13.5 cents a pound and that if the national average market price is less than 11.5 cents a pound, the price support payment rate shall not exceed two cents a pound. Under section 1435.5, at the end of each marketing quarter, after the Department of Agriculture has determined the national average price for sugar received by processors in that marketing quarter, it will announce the rate of payment for sugar marketed in the quarter. Payments will be made to a processor on eligible sugar marketed by it during the marketing quarter.

Section 1435.6 provides for a written contract between the processor and the producer stipulating the producer's share of proceeds for the sale of sugar in the market place and the method of payment of the proceeds. The processor shall agree to pay the producer the full amount of the price support payment after deduction for administrative expenses incurred in carrying out its obligations under the program.

Section 1435.9 of the proposed regulations provides that the processor will only be allowed to deduct from the payments actual administrative expenses directly incurred as the result of distributing payments to producers and fulfilling other requirements of the program. Allowable costs may include increased labor, automated data systems use, postage, and the processing of bank drafts. It would not include general administrative and overhead expenses incurred in the processors normal operations.

The Secretary of Agriculture, under 7 U.S.C. § 1447 may make price supports available to sugar producers by means of loans, purchases or "other operations." With regard to "other operations," the Department of Agriculture's Acting General Counsel, in a memorandum to the Secretary, dated April 6, 1977, a copy of which was enclosed with your letter, states as follows:

"The term 'other operations' as stated in Section 301 [7 U.S.C. §1447] would permit the Secretary of Agriculture to make payments to processors of sugar who pay support prices to sugar producers. Such payments would assure that producers would receive the support prices in the market place for their sugar at a time when processors could not otherwise afford to pay the support price in view of market prices for the processed product. The phrase 'other operations' would not, however, authorize direct payments to producers by the Secretary, since such payments would not support the price which the producers received in the market place for their sugar. This conclusion is supported by extensive legislative history."

After reviewing the pertinent legislative history, the Acting General Counsel concludes:

"* * * the phrase 'other operations' as contained in the Agricultural Act of 1949, as amended, would not allow the Secretary to make payments to producers of sugar beets and sugar cane, but would permit payments to processors of sugar in order to support the price received by producers for sugar in the market place."

We have reviewed the statute and legislative history discussed in the Acting General Counsel's memorandum and concur that the Department may not make direct payments to producers. Hence, whatever else it may encompass, we agree that the statutory term "other operations" was not intended to include direct payments to producers.

Under the proposed program, after the end of the previous marketing quarter, payments are to be made to processors who have agreed that after deduction for administrative expenses, the full amount of the payment is to be paid to the producers. It appears that while the payment is made by the Government to the processor, the processor's function is akin to that of a trustee for the benefit of the producers, and to act as an agent of the Government in determining the amount due to each producer who has sold eligible sugar to it, and in forwarding such payments to the individual producers. It is indeed difficult to distinguish the effect of the proposed program from that of a program of direct producer payments made on the basis of the amount of sugar marketed. Accordingly, the proposed program is not, in our view, authorized under 7 U.S.C. §1447 as the Department may not be indirectly what it cannot do directly.

In any event we have substantial doubt that the proposal represents a price support program as contemplated by 7 U.S.C. §§ 1421 and 1447. As we understand the proposed program, at the end of each marketing quarter the Department of Agriculture will determine the national average price for sugar for the quarter, and based on this determination, payments, not to exceed two cents a pound, will be authorized to be paid to the processors for the benefit of the sugar producers, provided the market price does not exceed the designated support price (of, for example, 13.5 cents a pound for crop year 1977). The actual rate of payment per pound will be the amount by which the national average market price is less than the designated support price.

The stated objective of the proposed program is to support prices in the market place for sugarbeet and sugarcane producers through payments made to sugar processors. However, the proposed program is unlike traditional price support programs in which the Government stands ready to purchase a commodity at a given price, and in which it in effect establishes a floor in the market price which those desiring to purchase the commodity must pay. Under the proposed program purchasers in the market place would pay the current price for sugar, for example, 11.5 cents a pound. At a later date, with a designated support level of 13.5 cents a pound, the producers would receive 2 cents a pound from the Government (less the processors' administrative expenses). It thus appears that the additional payment recieved by producers does not support or increase the market price but rather makes payments to processors for the benefit of the producers, as if the market price actually were higher.

In other words, the proposed program seems to provide, in essence the equivalent of direct payments to producers, and we fail to see how the payments contemplated under the program would support the market price of sugar.

For the foregoing reasons, we are doubtful that the proposed program may be considered as a price support program as contemplated by 7 U.S.C. §§ 1421(e) and 1447.

With regard to processor participation in the proposed program, we have been informally advised by an official of the Department's Office of General Counsel, that he is aware of no means of compelling processor to take part in the program. However, since producers would presumably bring their sugar to processors whose participation in the program would result in substantial additional payments to producers, it would appear that processors would for economic reasons voluntarily participate in the program. Once part of the program, after having entered into written agreements with producers stipulating their share of proceeds from the sale of sugar and the method of payment, the processor would be required to submit reports and certifications to Department of Agriculture which would probably conduct local spot checks of the processor's activities under the program.

Finally, you question the legality of the proposed program under G.A.T.T. or other of our Government's international agreements. The above agreement (61 Stat. part (5) and (6), T.I.A.S. No. 1700, 55–61 U.N.T.S.) which was concluded on October 30, 1947, and entered into force for the United States on January 1, 1948, provides in pertinent part as follows:

"ARTICLE XVI—SUBSIDIES

"Section A—Subsidies in General

"1. If any contracting party grants or maintains any subsidy, including any form of income or price support, which operates directly or indirectly to increase exports of any product from, or to reduce imports of any product into, its territory, it shall notify the contracting parties in writing of the extent and nature of the subsidization, of the estimated effect of the subsidization on the quantity of the affected product or products imported into or exported from its territory and of the circumstances making the subsidization necessary. In any case in which it is determined that serious prejudice to the interests of any other contracting party is caused or threatened by any such subsidization, the contracting party granting the subsidy shall, upon request, discuss with the other contracting party or parties concerned, or with the contracting parties the possibility of limiting the subsidization."

Under this provision if the U.S. grants a subsidy including any form of income or price support which operates to increase sugar exports or decrease sugar imports into the country, the Government is required to notify the other contracting parties. Upon request, the U.S. also must discuss the possibility of limiting the subsidization with any party that believes its interests have been seriously prejudiced. It is not clear to us at this point if the proposed program would increase exports or reduce imports of sugar into the United States; you may wish to raise this question with the Department of Agriculture officials. Of course if there were an increase of the market share of domestic producers, the U.S. Government would be obligated to inform the other parties regarding the program and upon request to discuss possible limitations on the extent of the subsidy. We are not aware of provisions of any other international agreement which might invalidate the proposed program.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

AMENDMENTS SUBMITTED FOR PRINTING

PUBLIC FINANCING OF ELECTIONS—S. 926

AMENDMENT NO. 528

(Ordered to be printed and to lie on the table.)

Mr. PEARSON. Mr. President, the Senate Rules Committee has recently reported S. 926, a bill to provide for the public financing of elections for the U.S. Senate. While I do not rise in support of the bill in all of its particulars, I do want to take this opportunity to indicate my support for the concept of public financing of congressional campaigns.

I take this position for four reasons: First, I am now convinced that our ex-

perience with public financing of presidential campaigns in 1976 shows that the concept is a workable one and meets the requirement that such a program be maintained through voluntary public support. Second, I believe that public support for public financing is sufficient to underwrite the program. Further, I believe the reform is needed to restore public confidence in Congress. And, finally, Mr. President, my own personal experiences have demonstrated to me that such reforms would be helpful.

I do not take this stand lightly, for in the past I have entertained serious reservations about the advisability of public financing. For one thing, Mr. President, I have opposed the idea of taxing the American people to foot the bill for my, or any other candidate's politicking.

I do believe, however, that the method employed to finance Presidential campaigns preserves an essential element of freedom of choice in the matter. The same method can be used for congressional campaigns, and is therefore an acceptable process for funding needed electoral reform in the Congress.

As you know, Mr. President, existing law permits citizens to "check-off" $1 on their returns—$2 for joint returns—to be taken out of taxes paid, and placed in the Presidential campaign fund maintained by the Secretary of the Treasury. When it was established, this method of collecting the funds necessary to finance Presidential elections created no new tax to further weigh upon the already overburdened taxpayer. Also, it lets the American people decide for themselves whether they want their tax dollars to finance political activities. Further, the decision is one of conviction, not convenience, as the check-off does not serve to reduce an individual's taxes.

Mr. President, I do want to stress my firm belief that any legislation adopted to finance congressional campaigns must retain this guarantee of the voter's right to choose. No public funds beyond those voluntarily designated should be spent on campaign financing. I will vigorously oppose any move to authorize the use of funds from the general treasury for this purpose.

Because of my very strong views on this point I am today introducing an amendment to S. 926 specifically prohibiting the use of any funds other than those raised through the checkoff. Public financing of congressional campaigns must be limited to the voluntary checkoff.

Mr. President, the workability of voluntary public financing of Presidential elections was clearly demonstrated in 1976 and I am convinced that the concept will work just as smoothly at the congressional level.

Beyond our positive experience with public financing in 1976, there has been a convincing demonstration of general public support for extending the concept. A recent nationwide public opinion poll found that a majority of the American people—57 percent—believe congressional campaigns should be financed by the Federal Government. Indeed, correspondence from my constituents in Kansas strongly endorses public financing. I think the time has come to make another refinement in our democratic process and extend public financing to congressional campaigns.

Certainly, Mr. President, part of the reason for the vanishing confidence in Government is the public's perception that its elected officials are controlled by special interests. Adoption of the public financing concept would do much to improve the image of the legislative branch and serve to bolster the people's confidence in Government. I harbor no illusions about eliminating all relationships between special interests and public servants. Special interest groups will continue to exist, and some elected officials will continue to be unduly influenced by them. But we can reduce the temptation. We can act to reduce, if not eliminate, those relationships which are not in the public interest. That is one reason for my support of the public financing concept, which places the responsibility for financing congressional elections in the open, with the public.

There are a number of positive arguments on the public financing issue. However, Mr. President, I must admit that I come to a position of support for the concept in large part because of personal experiences which highlighted for me the need for some reform of our current system of campaign financing.

Through personal experience I have learned, much to my discomfort, that whatever precautionary steps are taken it is entirely possible for a senatorial candidate to be the unwitting recipient of illegal campaign contributions. A system that allows this to happen is weak and must be strengthened.

In addition, Mr. President, because of another recent experience I have been forceably reminded that there are those who would make their campaign contributions contingent upon how the office holder would vote on a given issue or set of issues. It is only natural, of course, that persons give or withhold funds depending upon their perception of the candidate's overall record and expected performance. But attempting to link money and votes is abhorrent and simply unacceptable.

Our decisionmaking process must be governed by the merits of the issues at hand, not influenced by either the promise to give or the threat to withhold campaign contributions.

Mr. President, the concept of public financing is not without problems. But I have come to the decision that the problems are outweighed by the overall potential of improving our representative form of Government.

NOTICE OF HEARINGS

REORGANIZATION PLAN NO. 1

Mr. RIBICOFF. Mr. President, pursuant to chapter 9, title 5 of the United States Code, the President submitted on July 15 Reorganization No. 1, relating to the Executive Office of the President. The Governmental Affairs Committee will hold hearings on the plan on July 25 and July 26. On July 25, the committee will take testimony from the administration; and on July 26, opportunity will be given to other interested individuals and organizations to comment on the President's proposal.

The hearings will be held in room 3302, Dirksen Senate Office Building, and will begin at 10 a.m. each day.

AGRICULTURAL CREDIT AND RURAL ELECTRIFICATION

Mr. ALLEN. Mr. President, I wish to point out that the Committee on Agriculture, Nutrition and Forestry's Subcommittee on Agricultural Credit and Rural Electrification, which I chair, will conduct a hearing on S. 1729 at 9 a.m. on July 21, 1977.

The bill would amend the Rural Electrification Act of 1936 in order to permit the use of rural electrification and telephone revolving funds to replace electric power and telephone lines and equipment damaged or destroyed in rural areas by natural disasters.

Leading off the witnesses will be Mr. David A. Hamil, Administrator, Rural Electrification Administration, to be followed by Mr. Dick Wilkerson, general manager, Colorado Rural Electric Association; Mr. Al Ballard, general manager, Nebraska Rural Electric Administration; Mr. Harold Shoafe, assistant to the general manager, Kansas Electric Coops, Inc.; and, Mr. Robert D. Partridge, executive vice president, National Rural Electric Cooperative Association. Also included will be Mr. Thomas P. Dunne, Administrator, Federal Disaster Assistance Administration, HUD, and Mr. David Fullerton, executive vice president, National Telephone Cooperative Association.

ADDITIONAL STATEMENTS

(Additional statements are printed at the conclusion of Senate proceedings today.)

CONCLUSION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

DEFENSE APPROPRIATIONS, 1978

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of H.R. 7933, which will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7933) making appropriations for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes.

The Senate resumed with the consideration of the bill.

The PRESIDING OFFICER. Under the previous order, the Senator from Alaska (Mr. STEVENS) is recognized to call up three amendments.

Mr. STEVENS. Mr. President, was that to be recognized at a time certain, or is it in order that I can put in a quorum call at this point without the time running?

The PRESIDING OFFICER. It would take unanimous consent.

Mr. BAKER. Mr. President, I ask unanimous consent that it be in order to suggest the absence of a quorum without the time being charged to either party.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time not start running on Mr. STEVENS' amendments until he calls them up, which will be after the disposition of one or two other little amendments which the chairman has in mind.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time for each of the two votes following the first rollcall vote on the STEVENS' amendments, each of the two next amendments by Mr. STEVENS, be limited to 10 minutes each, with the warning bell to sound after the first 2½ minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME-LIMITATION AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, after the first vote on the amendment by Mr. STEVENS, there be a 10-minute limitation for debate between the disposition of that vote and the vote on the second, to be equally divided between Mr. STENNIS and Mr. STEVENS. I make the same request with respect to the vote on the third amendment by Mr. STEVENS.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I ask unanimous consent that that 10 minutes come, in each instance, out of the time allotted on the Stevens amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The following proceedings occurred later in the day and are printed at this point in the RECORD by unanimous consent.)

Mr. ALLEN. Mr. President, will the Senator from Alaska yield a few minutes, without it being charged to either side, in order that I may handle an amendment that I believe meets with the approval of the manager of the bill and the minority member of the committee?

Mr. STEVENS. Mr. President, we wish to accommodate the Senator from Alabama, and I ask unanimous consent that we have 6 minutes, not to be charged against the amendment.

I ask unanimous consent that the remarks of the Senator from Alabama precede in the RECORD the consideration of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 521

Mr. ALLEN. Mr. President, I call up my amendment No. 521.

The PRESIDING OFFICER. Without objection, the pending amendment will be set aside temporarily.

The amendment by the Senator from Alabama will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN), on behalf of himself and Mr. SPARKMAN, proposes amendment No. 521:

On page 28, line 9 and 10, strike the following: "$2,352,758,000" and add the following: "2,452,758,000".

FUNDING FOR ARMY BALLISTIC MISSILE DEFENSE R&D

Mr. ALLEN. Mr. President, I cannot imagine a more inopportune time to propose cutting the Army ballistic missile defense research and development budget. For the reasons which I will bring before this body, any cut at all in this austere program is difficult to comprehend, let alone justify. The amendment by the Senate Appropriations Committee to reduce the budget for the two R. & D. line items by a total of $100 million—nearly one-half of the authorized amount and the amount approved by the House—is absolutely unthinkable.

An aggressive BMD R. & D. program is vital to our Nation's strategic forces and necessary to our ability to continue an effective arms limitation agreement. A reduction in funding would result in letting down our guard for no good or sufficient reason.

It would weaken the President's policy of essential equivalence.

It would hand to the Soviets a unilateral advantage—without even the necessity of negotiation.

It could lead to technological surprise of the same magnitude of Sputnik, which shocked and appalled our Nation in 1957 and took 10 years of the most massive R. & D. effort in the history of mankind to catch up to another nation—an effort which, however noble, would not have been necessary had our Nation stayed abreast of technology. A comparable technological surprise in BMD could upset the strategic balance between the United States and U.S.S.R.

It is imperative that this Congress consider the effect of interrupting and disrupting such a relatively small but critically important program as this one at this time.

Over the last several years, we in the Senate and our colleagues in the House have pared the BMD program and budget to the funding level and direction a majority of us felt represented an acceptable risk for the United States in the face of Soviet strategic offensive and defensive activities. I am convinced that the $215 million funding level is the minimum necessary to adequately pursue BMD research and development.

This is the only program for strategic missile defense that we have in this Nation, and indeed, in the Western free world. We have alternatives in strategic offensive systems that are in debate year after year, but we only have one program on BMD. We are not debating alternatives to some other system, or the need for replacing obsolete equipment. We are faced with this one program.

The need for a viable BMD research and development program has become increasingly apparent since the United States and Soviet Union entered into the ABM treaty in 1972. The lead enjoyed by the United States in BMD at the time we entered into the treaty has greatly diminished. The United States has closed its only operational BMD site and research and development funding has been reduced to the barebone figure of $215 million.

Conversely, the Soviets have retained the Moscow ABM system, and there are strong indications of intensified research and development efforts. The Soviets appear to be developing a new BMD system which possesses advanced technological capabilities and the ability of rapid deployment. The Soviets could initiate deployment of their new system in about half the time required for the United States to initiate deployment. The Soviet Union is estimated to be spending on BMD systems research and development at twice the rate of the United States and there are indications of concerted effort toward potentially revolutionary R. & D. concepts which could upset the strategic balance.

The future survivability of the U.S. silo-based Minuteman system is being endangered as a result of Soviet momentum in both the quality and quantity of their ICBM development and deployments. Their aggressive strategic programs—coupled with extensive civil defense preparations—pose grave questions of Soviet intentions.

The U.S. BMD program must continue to support the provisions of a cost effective hedge option for defense of Minuteman and other elements of the deterrent forces during the early to mid-1980's, should the strategic situation force U.S. withdrawal from the ABM treaty.

Furthermore, Mr. President, I believe there are five vital points which must be considered in maintaining a sustaining level of ballistic missile defense research and development.

The first point is that the Soviet Union may not need the ABM Treaty and its attendant constraints if the United States does not pursue a meaningful, continuing ballistic missile defense program—and the treaty is up for review in October of this year. Dare we rely on Soviet good will to match our own unilateral restraint in ballistic missile defense? It definitely is not the course they are on now.

In this regard, the Secretary of Defense report to Congress, dated December 29, 1976, stated:

As the Soviets continue their substantial BMD R. & D. program, we must do likewise to encourage Soviet compliance with the ABM Treaty, protect our technological lead in BMD, and guard against their unilaterally achieving technological breakthroughs.

Furthermore, it would unilaterally foreclose the option to actively defend Minuteman and other high value targets. This could indicate to the Soviets a lack of U.S. resolve for maintaining a credible

BMD capability, and could reduce Soviet incentive to continue the ABM Treaty and to negotiate, in earnest, further arms control agreements. These likely adverse consequences are diametrically opposed to the intent of Congress as expressed in the "Jackson amendment" to the resolution approving the interim agreement in September 1972. This amendment reads in part as follows:

The Congress recognized the difficulty of maintaining a stable balance in a period of rapidly developing technology; the Congress recognizes the principle of United States-Soviet Union equality reflected in the Anti-ballistic Missile Treaty, and urges and requests the President to seek a future treaty that, inter alia, would not limit the United States to levels of intercontinental forces inferior to the limits provided for the Soviet Union; and the Congress considers that the success of these agreements and the attainment of more permanent and comprehensive agreements are dependent upon the maintenance under present world conditions of *vigorous research and development and modernization program as required by a prudent strategic posture.* (Emphasis added)

Second, such a unilateral reduction in BMD R. & D. portends a willingness to abandon the commitment to maintain qualitative leadership in BMD and to risk technological surprise. For this to occur on the eve of the ABM Treaty Review, and other arms limitation talks with the U.S.S.R. could place the U.S. negotiators in a position of weakness.

Third, aside from the points regarding the ABM Treaty and arms control negotiations, we need to consider the potential for future ballistic missile threats to the United States. The potential for a Soviet technological breakthrough in strategic offensive or defensive systems continues to be a major concern for the United States. It is only prudent that the United States continue a meaningful level of research on ballistic missile defense technologies and systems focused toward more economical and effective defensive capabilities until each of these threats is significantly mitigated or eliminated.

My fourth point is to caution against program interruption in ballistic missile defense at this time. A reduction of this size would disrupt the ongoing programs and would be essentially nonrecoverable in the near term—even in a crisis. It also would represent a failure to realize the benefits now accruing from the major investment in scientific technology made over the last decade in the BMD advanced technology and systems technology programs. It is clear that this budget cut would produce an irrecoverable impact. The disruption created in the program, the major deletions and shifts in technology tasks which would be necessitated, and the large scale termination of skilled personnel required would not permit full restoration in the near term. The momentum of the program would be interrupted for an indefinite period.

R. & D. is essential to maintain our technology lead, which in itself constitutes a deterrent to aggression. Hopefully, the Soviet perception of this sustained investment in technology will foreclose the need for an expensive deployment.

Finally, let us address the real question before this body: How much funding is essential? I have characterized this as a bare-bones budget request. We have heard that term used all too often in committee hearings. But, Mr. President, I say in all sincerity and with every conviction I possess, for the good of America, this program must be fully funded. No other nation in our hemisphere has such a program. It cannot be bought. It cannot be duplicated. It is our only strategic missile defensive option.

If we do not support the authorized amount, we risk the rapid disintegration of our entire strategic defense program, and we contradict the specific program and budget guidance this Congress gave DOD last year, which was reiterated so strongly in this year's Senate authorization.

Senator STENNIS and Senator MCINTYRE and the other distinguished members of the Senate Armed Services Committee recognized that fact when the budget request was authorized. This is what their report said about ballistic missile defense:

The committee strongly supports a stable level of R&D of ballistic missile defense technology designed for the protection of our land based deterrent. The committee recommends that the Department of Defense stabilize both the Advanced Technology and Systems Technology programs at a consistent level of real purchasing power in future years. The recommended funding adjustments for fiscal year 1978 reflect this reasoning. The Department of Defense is further requested to develop a long range R&D management plan consistent with such future funding levels.

Those are the words which represent the attitude of Congress after several years of close examination of this program and its effect on national defense and our arms limitation discussions. DOD submitted to Congress the minimum acceptable level which we had mandated. If you take last year's funding, and add the inflation factor, quick arithmetic will bear this out. There was no fat in the request. It is the amount required to maintain austere but effective technology programs for strategic defense.

In summary, what we are talking about is whether we will have an effective or an ineffective long-term BMD R. & D. program. It cannot be effective with this proposed cut. A unilateral reduction of this kind suggests a willingness to abandon the commitment to maintain qualitative leadership in BMD. For this to occur on the eve of the ABM Treaty Review with the U.S.S.R. could place the U.S. negotiators in a position of weakness.

My appeal to my colleagues is that they carefully consider the merits of BMD R. & D. and provide the funding essential for viable but relatively inexpensive programs which far outweigh their costs in terms of importance, both in the arms limitation negotiations and in the security of our Nation for the next several years.

Mr. President, I commend the House bill to our Senate conferees.

Mr. President, this amendment would restore the figure to the amount set by the House. I hope it will be accepted by the manager of the bill and by the ranking minority member.

Mr. STENNIS. Mr. President, how much time do we have on the Senator's amendment?

The PRESIDING OFFICER (Mr. CLARK). Three minutes.

Mr. STENNIS. I wish to yield time to the Senator from North Dakota, and I doubt that 3 minutes will be enough to cover the matter. We should have at least 3 additional minutes. I ask unanimous consent that 3 minutes be added to the time allotted for the amendment of the Senator from Alabama.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. I yield 4 minutes to the Senator from North Dakota.

Mr. YOUNG. Mr. President, the Congress unilaterally terminated the Safeguard ABM system without regard to the agreement the United States has with the U.S.S.R. permitting each country one ABM system. There is every reason to believe that the U.S.S.R. continues to maintain its ABM system around Moscow as well as continuing to improve its capability.

The United States is now in a position of not having an ABM site in accordance with an ABM agreement and at the same time if it obeys the agreement it is unable to build and deploy another system. As strange as this may seem, this has been the interpretation provided by the Department of Defense to the Committee on Appropriations. Although the United States is restricted by this interpretation from building and deploying an ABM system, it has been determined that a research and development program should be continued to keep abreast of the latest technology in ballistic missile defense.

Since fiscal year 1976, $450 million has been appropriated for ballistic missile defense research and development. The fiscal year 1978 budget request is for an additional $214.3 million. This would be in addition to the $450 million appropriated in prior years. The committee has recommended a reduction of $100 million leaving $114.9 million to continue this research and development. The reasons for this $100 million reduction are:

First. The Defense Department and Congress have agreed that the research and development in this field should be restricted to component development. This restriction excludes building a radar, missiles, or integrated control system.

Second. The division of funds between advance and system technology under the restrictions of component development is inefficient. Therefore, consolidation of funding into one research and development program will provide more flexibility and improve management control.

The $114.9 million remaining for research and development in ballistic missile defense should provide sufficient funds to keep the United States abreast in this technology area.

Mr. President, I have always supported a strong research and development program and support the continued funding for ballistic missile defense. But, I feel that the continued increase in

funds for this area is not warranted when the United States is prevented by agreement from deploying an anti-ballistic-missile system.

Mr. President, I realize there is need for some research in the field, but I felt that the amount appropriated by the House was excessive. I realize that my friend from Alabama has always been a reasonable man, and I dislike taking this position. But I felt the funds appropriated were too high.

Mr. ALLEN. I thank the Senator.

Mr. STENNIS. Mr. President, I yield myself 1 minute here. As I understand, this is an important matter. It is a matter about which there could be some differences of opinion, but it is an important matter, and I think it will meet the ends of the situation here now, so far as this amendment is concerned, if the Senator could modify and would modify his amendment to the $50 million, which will be the restoration of the funds. It will not be taking new money, so to speak, and I would recommend that the Senate accept a modified amendment to that amount for that amount.

Mr. ALLEN. I appreciate the response of the distinguished Senator from Mississippi, the manager of the bill, and the distinguished Senator from North Dakota (Mr. YOUNG), the ranking minority member.

I appreciate their attitude with regard to the amendment. I feel that the fate of the amendment lies in the hands of the two managers of the bill and, obviously, we will accede to the suggestion of the distinguished Senators.

I would like to state to the distinguished Senators that by agreeing to this modification that would not preclude an effort by the supporters of this program seeking to get the conferees to agree on the House figure; would it? It will be before the conference at a reduced figure.

Mr. STENNIS. Mr. President, so far as I am concerned, if the Senate adopts the amendment of $50 million that is the position of the Senate in conference. That would not preclude the House conferees at all from contending for what they saw fit. We just have to handle the matter in conference the best we can. I found out that is the best way to put it.

Mr. ALLEN. Yes.

Mr. STENNIS. That is certainly the way it is.

Mr. ALLEN. That is the way I understood it.

Mr. STENNIS. I yield to the Senator from North Dakota.

Mr. YOUNG. If the Senator from Alabama would be willing to modify his amendment to that extent, I would be willing to accept it. I would go further in conference with the House, if the House conferees make a good case, for more funds, I would be willing to go along with it.

Mr. ALLEN. I thank the distinguished Senator.

I yield to my distinguished colleague, Mr. SPARKMAN.

Mr. SPARKMAN. I thank the Senator very much.

Of course, I would like to see the full amount put in. After all, the nature of work that is done in this is the very thing we ought to be carrying on in connection with our various defense activities. What is the old saying? Half a loaf is better than no loaf at all. So I am very glad to join with my colleague in a willingness to accept that figure here if those in charge will accept it.

I do hope though we may keep an open mind with reference to what may come out of the conference or what future developments may be.

I appreciate the action taken.

Mr. STENNIS. I thank the Senator.

Mr. ALLEN. Mr. President, Mr. SPARKMAN and I are going to agree to the modification. The administration supports the restoration of the entire amount. I ask unanimous consent to insert a letter from Dr. William J. Perry of the Defense Department in support of the full restoration.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DIRECTOR OF DEFENSE
RESEARCH AND ENGINEERING,
Washington, D.C., July 13, 1977.

Hon. JAMES B. ALLEN,
U.S. Senate, Washington, D.C.

DEAR SENATOR ALLEN: I am answering your 12 July 1977 letter on behalf of the Secretary of Defense regarding funding for the Ballistic Missile Defense R&D Program.

We are seriously concerned that the recommended cut of $100 million by the Senate for Ballistic Missile Defense R&D will adversely affect our posture vis-a-vis the Soviets in this important strategic area. For a reduction to occur on the eve of the ABM Treaty Review is particularly disturbing since this could indicate to the Soviets a lack of resolve for maintaining a credible BMD capability and thereby reduce Soviet incentive to review the ABM Treaty in earnest.

Such a unilateral reduction in BMD R&D portends a willingness to abandon the commitment to maintain qualitative leadership in BMD and would risk technological surprise. The reduction would create a major asymmetry between the U.S. and USSR in future BMD capability and would foreclose the option to actively defend MINUTEMAN.

We strongly request that the authorized funding of $215 million be appropriated so that the BMD program can continue at a meaningful level of activity. Full restoration of the $100 million is an important issue within the Department.

Sincerely,

WILLIAM J. PERRY.

AMENDMENT NO. 521 (AS MODIFIED)

Mr. ALLEN. I send to the desk a modification and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the modification.

The legislative clerk read as follows:

On page 28, lines 9 and 10, strike: "$2,352,758,000" and add: "$2,402,758,000".

Mr. ALLEN. Mr. President, one further remark I would like to make. Inasmuch as there is not a line item on this program, I state specifically that the amendment is introduced for the purpose of restoring one-half of the cut, $50 million, to the Army ballistic missile defense program. The legislative history would show that that is the purpose of the amendment.

Mr. YOUNG. That is my understanding.

Mr. ALLEN. Yes. I thank the distinguished manager.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, of the Senator from Alabama.

The amendment, as modified, was agreed to.

Mr. STENNIS. I move to reconsider the vote by which the amendment, as modified, was agreed to.

Mr. ALLEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ALLEN. I thank the Chair and I thank the Senator.

(This concludes proceedings which occurred later in the day.)

AMENDMENT NO. 499

Mr. STEVENS. Mr. President, I call up my amendment No. 499.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes amendment No. 499.

Mr. STEVENS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, lines 2 and 3, strike "$7,910,176,000" and insert in lieu thereof; $7,949,376,000".

On page 6, line 14, strike "$10,560,063,000" and insert in lieu thereof: "$10,573,563,000".

On page 7, line 17, strike "$8,146,638,000" and insert in lieu thereof: "$8,186,638,000".

On page 7, line 6, strike "$589,001,000" and insert in lieu thereof: "$592,001,000".

On page 14, line 6, strike "$300,000,000" and insert in lieu thereof: "$200,000,000".

On page 39, line 22, strike all that follows the "," through the "," on page 40, line 3.

Mr. STEVENS. I ask unanimous consent that the Senator from Utah (Mr. HATCH) be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that it be in order that these amendments be considered en bloc. It is to a series of figures in the bill, but it is the same principle applied to each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, this is the amendment that deals with commissaries in the armed services. The men and women in our Armed Forces are the backbone of our strong Defense Establishment. I think it is essential to the survival of our defense system that our military people be compensated at a rate that is comparable to what they would receive if they were in similar civilian positions.

One of the most important compensations in the form of benefits of our retired and active duty military members and their families is the commissary system, providing them with savings on food products. The amendment that I introduce today will restore full funding to these essential food stores.

In keeping within budgetary restraints, full funding for commissaries under my amendment would be accomplished by

reducing the $300 million Secretary of Defense readiness fund by $100 million. There is no House allowance and no budget request for this item which has been added by the Senate committee.

I want to call to the attention of the Senate that this is not an amendment which would increase the funding under the bill.

In keeping with the request of the chairman of our committee and subcommittee, when I presented this amendment, to restore the money for the commissary system, we also include the amendment to reduce the readiness fund for the Secretary of Defense by $100 million.

Mr. President, the time on this amendment is limited. It is a similar amendment to one that has been here before. There is no similar provision in the House bill. This year, the Senate committee has added, over my protest, a 3-year phaseout of the appropriated funds support for commissary-clerk hire.

In recent times, the members of our Armed Forces have slowly but surely lost many of the benefits they were originally promised. Since the inception of our All-Volunteer Force, all branches of the service have been using the commissary system as a prime recruitment and retention factor.

Now according to a provision in the Senate appropriations bill, this factor will be jeopardized. This measure, as I said, recommends a 3-year phaseout of the appropriated subsidy for commissary-clerk hire. Enactment of this proposal will serve to escalate the prices of food in commissaries at least 4 percent a year in addition to the usual inflation of food prices causing an undue hardship on military and retired personnel.

Despite numerous congressional efforts to erode this essential military benefit, since its creation by legislation in 1866, our military commissaries have continued to receive Federal subsidies. It is my belief that the money used to fund these commissaries is a small price to pay for what this Nation receives from our men and women in uniform.

In many instances, the families of those who are military personnel are actively using food stamps at the present time. Yet, we have a situation where we are asked to raise the costs of food to those in military service.

We have in addition to that a large number of retired personnel living on a fixed income. One of the things they rely upon greatly in order to maintain their standard of living is, in fact, the commissary system.

As we are well aware, the commissary privilege was initiated as a convenience and economic benefit to all military personnel. But in Alaska this benefit is more than just a convenience, it is a necessity. According to figures compiled by the U.S. Department of Labor, Alaska remains the most expensive State in the Nation for families of all income brackets. The expense is greatest for families of low income.

Alaska's high cost of living is a financial burden on all State residents but these costs are especially taxing on the enlisted and retired personnel living there. These two groups generally fall within low-income level. According to the Department of Defense, Alaska has 3,130 military retirees and 23,152 active military personnel. Of the military personnel actively stationed in Alaska, 86 percent of these people are enlisted men and women.

Throughout our Nation, the largest number of people using the commissaries are the poorest people in the military including: married enlisted, the junior officers, and retired military members. According to the Department of Defense, the proposed 3-year phaseout of clerk-hire subsidies would have the most disastrous effect on the nearly 60,000 enlisted families that are eligible for food stamps.

The Reserve Officers Association of the United States cited a 1974 survey depicting the composite commissary picture: 43 percent retired personnel and 57 percent active duty members. Of the active duty military using commissaries, 15 percent are officers and 42 percent are enlisted men. According to their statistics, 67 percent of today's active force is a grade E5 or below making between $5,300 and $9,600 a year in pay and allowances.

As my colleagues will recall, last year in deferring the subsidy phaseout request, we directed the Secretary of Defense to submit to Congress a report on commissary reorganization. According to a Department of Defense official:

> The reorganization of the commissary store system is going well. When the instructions to reorganize into central management modes were disseminated to the Army and the Air Force, our goal was to reduce costs and increase our efficiency. In our view, that goal is well on track. Personnel savings and other management efficiencies have enabled us to effect reductions in appropriated fund costs. (Budgeted direct appropriated fund costs for FY 1978 are $309 million versus $313.5 million for FY 1977.) Increased efficiencies through centralized management have resulted in greater uniformity and control over commissary store operations, opening the door to other possible savings.

In the report submitted to the Senate and House Armed Services Committees, Assistant Secretary of Defense David Taylor stated management improvements will save almost $14 million in fiscal year 1977, $26 million in fiscal year 1978, and $36 million in fiscal year 1979. The savings are due to centralized management, consolidation of regions, greater use of part-time employees, and reducing the number of annexes.

Mr. President, while problems still remain in reorganization, commissaries have made great strides toward their goal of "reducing costs and increasing efficiency." I ask unanimous consent that the attached article entitled, "Commissary Reorganization—Is It Working?" from the May, June 1977 Review magazine be printed in its entirety in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMMISSARY REORGANIZATION—IS IT WORKING?

Is the reorganization of the commissary store systems working? A distinguished industry leader and longtime ALA supporter recently suggested that the question is redundant. "It must work," he commented, "Since alternatives are no longer available."

The important question is whether the reorganization will increase efficiency and reduce the cost of commissary store operations enough to merit continued support from the Congress. The reprieve the Armed Services won in the hard-fought struggle to retain Federal funding didn't finally resolve the issue. Last year when Congress agreed to continue appropriated commissary funding, it told the military, in no uncertain terms, that the *stores* must be managed more efficiently. Military officials say this is being done.

The management improvements—some of the most important of which include greater centralized management, increased use of automation, and other labor-saving measures—are producing positive results.

In a recent report to the Chairmen of both the Senate and House Armed Services Committees, Assistant Secretary of Defense David Taylor said management improvements already made will save almost $14 million in Fiscal Year 1977, $26 million in Fiscal Year 1978, and $36 million in Fiscal Year 1979.

The Department of Defense report to Congress said the savings came from:

Centralized Management. Both the Air Force and the Army went to centralized management of their stores last October. And this, the report said, allowed management functions to be consolidated and reduced the number of people required for administration.

Consolidation of Regions. The Navy commissary system, already centrally managed, consolidated two of its regions, which further reduced administrative costs.

More Use of Part-time Employees. By using part-time employees the stores save by not having to pay for the same amount of fringe benefits normally provided full-time employees. Also, part-time employees normally do not advance to higher paying grades.

Reducing Annex Stores. The Army, Air Force and Marine Corps have reduced the number of small annex stores and consolidated sales in the main stores.

The Air Force Commissary System is set to begin the second phase of its food store complexing operation. The move involves the administrative consolidation of two or more stores into a single operation.

SAVINGS REPORTED

AFCOMS officials recently reported that the complexing of 22 stores last year resulted in savings of $1.5 million and a reduction of 123 job slots. They expect "substantial savings" following the proposed consolidation of 58 additional stores. Customers will not be affected by the move. Local item selection boards will continue to meet and choose merchandise desired by a majority of local patrons.

In these and many other ways—even income from "cents-off" coupons, which commissaries had previously been turning over to the military exchanges for redemption—on balance, the comstores are making an all-out effort to improve management efficiency and operate more cost-effectively.

They are encountering a few problems here and there, but over all they're making progress. For example, Rear Adm. Edward M. Kocher, Commanding Officer, Navy Resale Systems Office, points out: "In the area of variable pricing NAVRESO still has a long way to go. It is a very sophisticated science and our Navy commissary stores just don't have the experience in this field that is available in the commercial sector. But, based on

the limited testing that we have accomplished on variable pricing to date, we are encouraged by the potential."

Admiral Kocher explains that one of the larger commissary regions has been trying out slightly larger markups on certain commodity groups, such as spices, snack items, luncheon meats, cookies and crackers, and frozen foods. Health and beauty aid items also carry a slightly higher markup, except for certain dentifrices, which are given a lower than normal markup.

"Our approach to variable pricing," says the admiral, "is to try to more closely approximate the total savings to the commissary customer across all commodity groups rather than, if you will, having super-buys on a few items and lesser savings on the others. Variable pricing represents a major change in the way we do business."

He believes variable pricing, thoughtfully and skillfully applied, should give NAVRESCO the tools it needs to adjust to the commercial competition to ensure that customers perceive the values they should in their commissary shopping privilege.

EFFORTS BEING MADE

Air Force, Army and Marine Corps comstores are also making a concerted effort to improve management and become as self-sustaining as possible through a variety of sound food marketing management techniques and efficient business practices—from centralized management to increased use of automation and labor-saving measures.

Maj. Gen. Daniel L. Burkett, AFCOMS Commander, is moving ahead with centrally directed management and administrative consolidation. He thinks variable pricing should apply basically to non-basic items: tobacco, soft drinks, candy, health and beauty aids, household items.

Army comstore's chief, Maj. Gen. Emmet W. Bowers, relies on a centrally directed worldwide commissary system to achieve more efficient operation, reduce personnel, lower direct and indirect operating costs, obtain better visibility and control of resources, resolve problems and put actual decision making at fewer supervisory levels. Suppliers and distributors are now able to do business at the region director's level. "By using source data automation to complete transactions more rapidly, payments are speeded up," General Bowers points out, "and increased efficiency reduces operating costs, and costs for the vendors doing business with us. This permits us to pass on the savings to our customers."

The effort at Marine Corps commissaries, says Brig. Gen. G. L. Bartlett, Director of the Corps' Facilities and Services Division, includes construction and renovation—replacing inadequate facilities with new buildings financed from surcharge revenues; upgrading equipment at stores not undergoing major modifications. The emphasis is on labor saving devices wherever possible and on improved convenience to the shopper.

WHAT'S IN THE FUTURE?

Will these management improvement efforts be sufficient to convince Congress and the Carter administration they are "for real"? The comstore subsidy looks safe (for now anyway) but what about its future after the Ford budget runs out in 1979?

The Department of Defense budget request for Fiscal Year 1978 (which begins this coming Oct. 1, and runs through Sept. 30, 1978) contains the money necessary to provide full appropriated fund support for commissary stores through that date. That budget proposal ($123.1 billion worth) was forwarded to the Congress by the outgoing President last Jan. 17. Ford's original budget proposal contained a provision to begin phasing out Government funding for the military food stores over a three-year period. The first phase of that plan would have lopped some $90 million of commissary operating funds out of the FY 78 military budget. But, just before Christmas, outgoing Secretary of Defense Donald Rumsfeld successfully prevailed upon President Ford to change his mind and restore the deleted $90 million in commissary funds.

Substituted was a paragraph which read: "We propose to continue the appropriated fund support to the commissary stores. Some cost reductions will be achieved as a result of certain management action, e.g., centralizing the management of Army and Air Force commissary stores. In addition, we are examining the potential for achieving further reductions, such as the increased use of part-time and intermittent employees, and the combining of administrative functions for two or more stores in one geographic area. As a result of management improvements we expect to reduce the cost of this support while simultaneously maintaining a reasonable savings for commissary patrons."

Despite this action, however, the commissaries—over the long haul—still face an uncertain future. The proposal to eliminate the stores' salary subsidies has been rejected by Congress each of the past two years. However, it is entirely possible that the new Carter administration—or Congress itself—may revive the idea, and the new Congress, of course, is not bound by previous votes. So, for FY 1979 and beyond, it's anybody's guess what will happen in the area of appropriated fund support for commissaries.

Dr. Harold Brown, the new Secretary of Defense, has said he expects to reduce defense spending by $5 billion to $7 billion by 1979. Much of the savings could come in reduced personnel and support costs, he said. He also observed that in his view "military pay and benefits costs take up a disproportionately large share of the defense budget."

EFFECTIVE PROOF

The savings to date are proof reorganization is effective. A DOD official said recently that:

"The reorganization of the commissary store system is going well. When the instructions to reorganize into central management modes were disseminated to the Army and the Air Force, our goal was to reduce costs and increase our efficiency. In our view, that goal is well on track. Personnel savings and other management efficiencies have enabled us to affect reductions in appropriated fund costs. (Budgeted direct appropriated fund costs for FY 1978 are $309 million versus $313.5 million for FY77) Increased efficiencies through centralized management have resulted in greater uniformity and control over commissary store operations, opening the door to other possible savings."

Corrections for drift, as the political winds change, have and are being made. But a careful review of the improvement effort over the past two years will convince even the most severe critic that—yes, the reorganization of the commissary system, with its goal of substantive increases in efficiencies, is working. And that industry, through ALA, is contributing substantially as an interested/involved/objective third party.

DON'T FORGET RECENT PAST

For those who attended the recent ALA Regional Seminars in San Diego and Norfolk the reasons why were fairly obvious: new and continuing dialogue, total participation by the respective services, etc.

But, for those who did not attend the seminars, may we remind *Review* readers that just two and one half years ago the Ford administration decided to support the OMB position to discontinue appropriated funds for the commissaries. Industry, along with many others, recognized that this action was unsound and unwise. The American Logistics Association, itself at the time just recently restructured and reorganized, quickly recognized and assumed its leadership role as an involved, concerned, interested and therefore objective third party.

An ALA Task Force was immediately put together. It met with responsible high-level people at DOD and offered its assistance and input. At the same time, a DOD Study Group, chaired by now Maj. Gen. Emmet W. Bowers, USA, and co-chaired by Capt. Robert Brewin, USN, was created.

The ALA Task Force met with this prestigious group on several occasions and presented a consensus of industry's suggestions and ideas. These meetings led to a survey of all ALA members, the results of which were developed into an "Industry Report" which the DOD Study Group accepted in its entirety and published verbatim in their final full report on the commissaries.

It is worth noting that the ALA Task Force showed foresight at the time in stating that after a blueprint for increased efficiency is developed, the "real world" of transition will come into play. The Task Force underscored another important fact: that change is difficult under any circumstance, but under the glare of publicity, and the divergent views in the Congress and the administration, it would be doubly difficult and a real challenge.

SOME PROBLEM AREAS

It is interesting that today, in implementing the DOD Study Group's recommendations, all of the suggestions made by ALA's Task Force are either in effect, under consideration, or in the process of being adopted. Admittedly, there will be some hangups in implementing the reorganization. Among them, for example, are:

Shelf Stocking—The DOD view on shelf stocking is that it is strictly voluntary on the part of the supplier and is requested only on a limited number of line items.

Payment Problems—Payment problems are actually not a major problem systemwide, according to DOD. If bills are sent to the proper place, they are paid on time. As part of the management improvement effort all of the Services are making every effort to handle payments as expeditiously as possible.

But, even the longest journey begins with the first step forward. And even the severest critics of Federal funding for commissaries will admit a good beginning has been made. There will be further problems, of course. But ALA believes they will not be insurmountable, and, as part of a concerned mature industry, stands ready to continue to provide guidance and lend expertise in the food marketing area whenever requested to assist the Services in reaching their objectives.

Mr. STEVENS. Mr. President, I urge my colleagues to reinstate full funding for our military commissaries so that the Department of Defense can continue to implement the programs of commissary reorganization that they have so successfully initiated.

We have come a long way already, Mr. President, in making the commissary system support itself. I think that the measures taken by Congress in the last several years are sufficient. There is no need to go further. This financial burden should not be placed upon those who are so much in need, those who, in fact, use the military system of commissaries.

Mr. President, I reserve the remainder of my time.

Mr. President, how much time do I have remaining?

May I make this inquiry?

As I understood it, this was 30 minutes, 15 on a side. I request how much time I used.

The PRESIDING OFFICER. We have the amendment as a 40-minute amendment. The Senator has used 4 of the 20 minutes. Sixteen minutes remain.

Mr. STEVENS. I thank the Chair.

Mr. STENNIS. I yield to the Senator from Missouri gladly whatever time he may wish on this amendment. We have 40 minutes on this amendment, equally divided. I yield the Senator such time as he may wish.

Mr. EAGLETON. I thank my distinguished colleague.

I wish to ask a question of Senator STEVENS.

With respect to the Senator's amendment, the funds that he would allocate to this clerk hire, he would take out of the so-called Secretary of Defense readiness fund, is that correct?

Mr. STEVENS. The Senator is correct. That fund was added by the Senate at the level of $300 million. This amendment would reduce it to $200 million and use the $100 million, roughly, for continuing the support for the commissaries.

Mr. EAGLETON. I thank the Senator.

Mr. STEVENS. It is the same amendment I offered in the committee.

Mr. EAGLETON. Very well.

Let me address myself then for a moment, before getting into the substantive debate, Mr. President, to the question of this readiness fund.

The Senator from Alaska has pointed out accurately that there is a $300 million readiness fund. And out of that $300 million he would take $100 million for this clerk-hire subsidy.

Let me read into the Record, Mr. President, what this readiness fund is about, and we can see whether taking $100 million from it for clerk-hire subsidies is a prudent thing to do.

Just briefly, here is what the committee says about this fund:

> The Committee believes that creation of a special fund that can be used exclusively to fund the highest priority military readiness items would be effective in helping the Department focus on readiness, provided that it is under the strict control of the Secretary of Defense. Accordingly, the Committee has recommended the creation of such a fund, the "Secretary of Defense Readiness fund." The funding provided is to be transferred to the various active and reserve operation and maintenance accounts, but only to be used for items that are directly associated with maintaining or improving military readiness in the strict sense of the term. The appropriation language provides that the Secretary is to notify the Congress—et cetera.

Let me just repeat a few of these words, Mr. President, because I think they are important.

> The committee believes that creation of a special fund that can be used exclusively to fund the highest priority military readiness items be effective in helping the Department focus on readiness.

"The highest priority military readiness items," that is what it says.

Later in the committee report:

> But only to be used for items that are directly associated with maintaining or improving military readiness.

Readiness, which might include, say, more ship overhauls, perhaps the fixing of aircraft engines not operating, or the funding of additional flying hours, and the like.

I am not saying what Senator STEVENS proposes is illegal. But I am saying that to equate restoring $100 million for clerk hire in commissaries—to equate that with what the committee had in mind in creating this fund, namely, the highest priority military readiness items—I think is a non sequitur.

I do not see how $100 million in clerk hire is anywhere on a par with the highest priority military readiness items.

Let me move on, Mr. President, in response to my distinguished colleague from Alaska. I strongly support the committee proposal to phase out the commissary-clerk hire subsidies over the next 3 years. Mr. President, I should point out that the Senate has for the past 3 years in a row, passed bills including a phaseout of this subsidy.

However, the House has not been willing to adopt the issue in conference and, consequently, no phaseout has occurred.

This is most disturbing since the phaseout has been supported both by President Carter and President Ford.

The committee's proposal will not close any commissaries, but will likely reduce food price savings from about 25 percent less than the local, say, Safeway or Giant grocery store, to about 15 percent less.

I repeat, no commissary is going to be closed. There are dozens of these around the major cities of the country. I think there are several in the Washington area. I believe there are five and we will check the figure here in a minute.

Here we are, five in San Antonio, six in Washington, D.C., three in Honolulu, four in Norfolk, five in San Francisco, just to name a few cities.

None will be closed. Perhaps some should be but that is not covered by this amendment. None will be closed.

The effect, if the committee's position prevails, will be, instead of the savings at commissaries being 25 percent, it will be about 15 percent—still a substantial saving.

Mr. President, the Committee on Appropriations provided an extensive write-up explaining the proposal, and I ask unanimous consent that it, together with the following material be printed in the RECORD at the conclusion of these remarks: A fact sheet prepared by the Appropriations Committee explaining in summary "Why commissary clerk-hire subsidies should be phased out over the next 3 years;" a section of the committee's report on pay comparability between military and civilian; an economic analysis comparing food chain stores and commissaries.

The PRESIDING OFFICER (Mr. DURKIN). Without objection, it is so ordered.

(See exhibit 1.)

Mr. EAGLETON. Now I shall address a subject that I know is troubling some of my colleagues—the use of food stamps in the commissaries. The Department of Agriculture has advised the committee that there are 303 military commissaries authorized to participate in the food-stamp program. The monthly redemption of food stamps in these stores amounts to about $1.3 million. The Department of Agriculture has advised the committee that, based on an average family size of 4, this represents usage by only 7,590 families, although the number may be somewhat higher since the participants probably used a part of their food-stamp allowance at other retail establishments.

The committee believes that the relatively small usage of food stamps is not an appropriate argument for the retention of a nearly $300 million annual subsidy. That is what we are talking about, Mr. President—a subsidy of about $300 million a year. More efficient ways can be found to subsidize the small number of families using food stamps in commissaries. And, furthermore, I remind my colleagues that eligibility standards for food stamps are not as restrictive as many believe they should be.

As my colleagues know, eligibility for food stamps is based on a "net income" concept under which households may deduct certain expenditures from a gross income that is higher than this level and still qualify for food coupons. I also note that food stamp net income eligibility levels under this concept are somewhat higher than the official poverty threshold. But the poverty threshold is based on a gross income concept. What this all boils down to is that there are estimated to be over 171,000 households participating in food stamps with annual gross incomes of over $9,000 per year. The Senate Committee on Agriculture, Forestry, and Nutrition, in reporting out this year's farm bill (S. 275), which includes reform of the food-stamp program, stated—Senate Report 95–180, page 116:

> The food-stamp program does not have any meaningful limits on gross income for eligibility determination. Because the regulations allow essentially unlimited "itemized" deductions from gross income, non-needy households with adequate incomes can qualify. It is this potential for "pyramiding" deductions in order to qualify that destroys public confidence in the program and evoked the consternation of the American public last year when it read that households might be eligible with incomes up to $16,000 per year.

Mr. President, the fact that there are somewhat loose eligibility standards in the food-stamp program that permit individuals with high incomes to use those stamps should not deter the Congress from eliminating an unjustifiable clerk-hire subsidy to commissaries. I strongly suspect that under the various food stamp reforms being proposed, both in S. 275 and in the House version, many of the commissary patrons now using food stamps would become ineligible under the more reasonable eligibility criteria being proposed in those pieces of legislation.

Mr. President, the distinguished Senator from Iowa is here, and I know that Senator STENNIS wishes to address himself briefly to this matter.

I will summarize: Over a 3-year period, if this becomes law, we will phase out a $300 million subsidy. We will save $100 million the first year, $200 million the second, and to phase it out entirely at the end of 3 years.

I can find no legitimate justification for this subsidy under current conditions. There is great pressure on the Defense budget, because of its huge size, to try to save wherever we can. If we were just talking about $5 million or $10 million, one could say that is picayune. But $300 million, even in the context of the Defense budget, is a significant amount.

The projection is that over the next 10 years, approximately $3.9 billion

would be saved by embarking on the program that the Appropriations Committee has wisely recommended.

I repeat: To try to equate this subsidy with the military readiness fund, which is to go for the highest priority military readiness items, just boggles the mind.

I am prepared to yield some time to the Senator from Iowa at this time.

The PRESIDING OFFICER. Who yields time?

Mr. CULVER. I am not ready yet.

Mr. EAGLETON. Mr. President, I reserve the remainder of my time.

EXHIBIT 1

WHY COMMISSARY CLERK-HIRE SUBSIDIES SHOULD BE PHASED OUT OVER THE NEXT THREE YEARS

Commissaries provide no military power, no forces and no readiness. Yet, according to the Defense Department, the clerk-hire subsidy to commissaries is $287 million in fiscal year 1978 and will total over $4 billion over the next ten years.

The Senate last year voted to phase out the subsidy over the next three years—but only the personnel subsidy. This year the Appropriations Committee recommends a similar subsidy phaseout. No commissaries would be closed. Under both Senate proposals, commissaries would still receive a subsidy for overseas transportation, free rent, base support, etc., as they do now (estimated to be about $100 million per year).

The proposal recommended by the Committee would save $3.9 billion over the next ten years.

Instead of the subsidy, this $3.9 billion savings could be used to eliminate the entire backlog of ships, aircraft, tanks and vehicles now overdue for overhaul in all three services. It could further be used to improve readiness significantly in the future.

The original justification for commissaries—to provide life's necessities to soldiers at remote frontier posts—is no longer valid in the United States, where there are 279 commissaries. Of these, there are 133 commissaries located within ten minutes driving time of the nearest commercial supermarket. Several metropolitan areas are glutted with commissaries—there are four in Norfolk, three in Honolulu, five in San Antonio, four in San Diego, five in San Francisco, and six in Washington, D.C.

Military pay is comparable to, or greater than, civilian pay—grade by grade comparison made by the Appropriations Committee this year shows that military salaries are close to or more than most civilian salaries. When benefits are added to both military and civilian pay, the military average $4,257 per year more than civilians.

No commissary would be eliminated if the appropriated fund subsidy is phased out. Commissaries would still have significant price advantages over commercial supermarkets since they need make no profit; the government has already paid for their inventory; buildings were provided from appropriated funds; they pay no rent, etc.

The average commissary savings is between 25 percent and 31 percent below local supermarket prices. Even after the subsidy is removed, average savings would be 13 percent to 21 percent.

Military retirees—all of whom are eligible to use the commissaries—now receive an average annual annuity of over $7,400. DOD's figures show that 15 percent, or over 150,000 retired military, also receive Social Security benefits averaging nearly $2,405 per year for individuals and $3,102 per year for families.

Cost-of-living pay raises to military retirees have averaged 10 percent for the past three years—between $500 and $700 per year. By law, these cost-of-living pay raises are likely to continue to amount to between 5 percent and 10 percent, or $400 to $700 per year in the future.

If commissaries are phased out over a three-year period, the average family buying all its groceries at the commissary would pay only about $1.60 extra per week.

Conclusion: There is no reason to continue to subsidize clerk-hire at the commissaries. Phasing out the subsidy will not close down commissaries and can be accomplished without hardship to either military retirees or active duty personnel. Even after the subsidy is removed, commissary patrons will still save 13 percent to 21 percent below local supermarket prices.

EXTRACT FROM SENATE REPORT 95-325 ON 1978 DEFENSE APPROPRIATIONS COMMISSARY SUBSIDIES

The fiscal year 1978 budget request of $113.9 billion for the Defense Appropriations Bill represents an increase of $9.5 billion, or 9 percent over the comparable amount of $104.4 billion appropriated in this bill in fiscal year 1977 (excluding the pay raise supplemental). This is the case even though the military force levels supported are virtually the lowest in 25 years. In fiscal year 1973—the final year of intense U.S. combat activity in Vietnam, the comparable amount provided in the Defense Appropriations Bill was $74.4 billion. Therefore, in the four year period 1973–78 since the U.S. ended its last major war, there has been a growth of $39.5 billion, or 53 percent, in the Defense budget. To a very great extent, the inflation that affects the cost of all goods and services in the U.S. has been responsible for this fantastic increase in the cost of defense.

Inflation notwithstanding, the Congress has strongly urged and supported the need for the Department of Defense to moderate its large annual budgetary increases by "pruning" out programs that are of only marginal utility to the true combat capabilities of our forces and to the essential defense of our nation. A major initiative was undertaken by the Administration in fiscal year 1976 and fiscal year 1977 in proposing a two year and three year phaseout respectively of the appropriated fund subsidy to military commissaries (grocery supermarkets) for the costs of military and civilian personnel. Although the 1976 two year phaseout proposal was rejected, the Senate version of the Defense Appropriations Bill provides for a five year phaseout. The Senate version of the 1977 Defense Authorization Bill provided for a three year phaseout. However, the final Conference Agreement on that bill concluded:

"Legislative action is not required for improvement in the efficiency of commissary store operations or the gradual reduction of appropriated commissary subsidies. These issues are routinely reviewed in the annual appropriations process. The conferees agree that as less funds are needed for commissary subsidies they should be used for urgent military requirements such as improved readiness."

Last year, the Senate Defense appropriations bill again recommended a 3 year phaseout, but this was deleted from the final version of the bill.

NATURE OF THE SUBSIDY

Unlike all other manpower-intensive nonappropriated fund activities that serve as fringe benefits for military personnel, commissaries presently receive a 100 percent subsidy for the cost of the military and civilian personnel required to manage and operate the stores. The total number of personnel involved has been stable at approximately 26,000 (24,000 civilians and 2,000 military) for the past three years (fiscal years 1975–77), even though this number is about 5,700 higher than the personnel who were operating these stores in 1970. For fiscal 1978, the budget requests increases of over 500 civilians employed in commissaries in 1979, but this is billed as a "management improvement" since it represents the substitution of less expensive part-time employees in place of full-time.

The reason for the subsidy is rooted in the original justification for commissaries, which were first established during the 19th century. A key part of this country's expansion to the West and settling of the frontier territories was the provision of military protection for citizens. To the extent that military personnel were deployed at remote frontier posts that lacked the commercial enterprises normally available in the developed portions of the countries, it was deemed necessary to provide such services. At that time, it became the clear policy to provide the civilized needs and amenities of life to soldiers at remote duty locations through commissaries and post exchanges. The Army established the first commissaries at frontier posts based on legislation enacted in 1866, and sold food and other items at cost to servicemen. The Marine Corps began operating its first commissary in 1909, and the Navy in 1910. Air Force began operating its own commissaries when it was established as a separate service in 1947.

In the post-World War II era, with the U.S. having extensive military deployments throughout the world, commissaries and exchanges have served a similar purpose—providing the normal everyday products that can be readily obtained by American citizens living in the U.S., but which simply are either unavailable in commercial stores overseas, or unreasonably expensive when available.

QUESTIONS ABOUT NEED FOR COMMISSARIES

In 1948, the services operated 210 commissaries at installations in the U.S. The House Committee on Armed Services became concerned about the growing number, and looked into the need for their continuing operation. The Committee Chairman concluded that the Congress originally intended the services to operate commissaries only in remote areas (as just explained) where servicemen didn't have the benefit of metropolitan food stores. As a result of that inquiry, the Services received approval for a regulation stating that commissaries would not be authorized where "adequate commercial facilities are conveniently available and sell commissary merchandise at reasonable prices." The Department of Defense Appropriation Act of 1954 included language that required the Secretary of Defense to certify the continued need for each commissary on the basis that commercial stores were inadequate, inconvenient or not selling food at reasonable prices. Similar language has been included in every subsequent DOD appropriation act.

Somewhere during the past century, however, the original purposes of commissaries gradually faded from view. The General Accounting Office (GAO) reported recently (FPCD–75–88, May 21, 1975, "The Military Commissary Store: Its Justification and Role in Today's Military Environment") that despite the Congressional concern and reemphasis on the reason for commissaries, no commissary *has ever failed to meet the DOD criteria*, and the number of stores in the U.S. was increasing. GAO has repeatedly reported that the DOD criteria for implementing the Congressional criteria of adequacy, convenience and price are unrealistic, and that there is no valid justification for commissaries in large metropolitan areas, (e.g., there are four commissaries in the Norfolk area, three in Honolulu/Pearl City, five in San Antonio, four in San Diego, five in San Francisco, and six in Washington, D.C.)

As of June 1974, there were 418 commissary stores in operation—279 in the U.S. and 139 overseas, all of which were built or rehabilitated using publicly appropriated funds. In December 1974, however, the Congress passed legislation prohibiting the use of appropriated funds for the construction

or improvement of commissaries in the United States. Henceforth, their construction was to be financed in the same manner as post exchanges—i.e., through profits generated. (A small surcharge was added to prices.)

In 1964, the annual subsidy amounted to only about $100 million for the cost of military and civilian personnel working in commissaries. These costs grown to an estimated $327 million ($287 million in this bill, plus an estimated pay supplemental of $18 million) in fiscal year 1978 if fully subsidized. Over the next 10 years, the full subsidy will cost the taxpayer $3.8 billion—a fantastic sum in the Defense bill for an item that has no *military* mission value.

The President's fiscal year 1977 budget proposed to phase out, over a three year period beginning in fiscal year 1977, the commissary subsidy for personnel and utility costs. The phaseout was to start on October 1, 1976, the date on which the next pay raise was scheduled. No commissary was to be closed. Ultimately, commissaries would be placed on a non-subsidized basis, in a manner similar to the way military post exchanges are now operated. As explained previously, although the Senate approved this proposal last year, final congressional action deferred the phaseout again.

Through product-by-product comparison survey, it has been established that commissary prices are about 23 percent below the price of similar goods in a commercial supermarket. In addition, no state or local taxes (totaling between 2 percent and 8 percent) are levied on commissary sales, thereby providing patrons further savings. The proposals to eliminate the subsidy have recommended raising prices sufficiently so that the amounts generated would gradually replace the appropriated fund subsidy. Based on an annual sales volume of $3.0 billion in fiscal year 1977, it is estimated that an increase in price of about 10 percent would generate enough funds to eliminate completely the need for the subsidy. Therefore, even after the full subsidy has been eliminated, commissary patrons would still enjoy a price savings of about 13 percent below commercial supermarkets, as well as sales tax savings of between 2 percent and 8 percent. Further management improvements could increase these savings.

Although the 1977 proposal for a phaseout was not repeated in the 1978 budget, President Carter did indicate that he generally supported phaseout of the subsidy. This occurred in response to a question from a private citizen, and was reported in the "Army Times" of June 13, 1977 as follows:

Question. Mr. President, my name is Randall Tucker from Fullerton, U.S. Navy retired, and my question pertains to the military.

What percent of commissaries do you expect to be closed in the next four years, and what area will be affected the most, and why?

The PRESIDENT. Well, I don't expect any appreciable number of the commissaries to be closed. The only proposal that I've ever heard about the PXs or the commissaries, is that they be self-supporting; that enough be charged in the prices of the goods that Navy and other military people buy just to pay the cost of operation of the commissary. But I don't think that's too tight a constraint to put on the military personnel.

I was in the Navy for 11 years myself. And I can't remember now. I wouldn't have any way to know if the commissaries paid their own way. But I don't think it's unreasonable for the taxpayers to demand that the military at least pay enough for goods they buy to cover operating expenses.

So, *two* Presidents have supported elimination of commissary clerk-hire subsidies.

REASON FOR CHANGE IN SUBSIDY

The proposal to eliminate the subsidy is a result of the very high cost of Defense manpower, which now consumes well over half of the Defense budget. The idea is to reduce manpower support costs in the interest of using funds to sustain and equip the strongest possible military force. The proposal would have absolutely no impact on the military strength of our combat forces or on their military readiness.

It can readily be seen why the commissary subsidy became a candidate for elimination. In 1964, the subsidy amounted to only about $100 million. At the same time, personnel costs in the entire Defense budget totaled $22 billion—or about 43 percent of a total budget of $50.8 billion. Since 1962, the Congress has made three key decisions:

1. Federal civilian salaries will be pegged at a rate that is comparable to employees in private industry; (1962)

2. Any increase in civilian salaries will be matched by an equivalent increase in military salaries; (1967), and

3. Military salaries shall be high enough to attract and retain a quality all-volunteer force. (1971)

Together, these account for an increase of 127 percent in military compensation from 1964 to 1975, and 117 percent in civilian pay during the same period. (During this period, the consumer price index increased only 74 percent.) As a result of these decisions, the commissary subsidy has increased by 180 percent, along with the other manpower costs of the Defense Department.

COMPARABILITY OF MILITARY SALARIES

Elsewhere in this report (see pp. 22–28) there is an extensive analysis of the relative comparability of military and civilian compensation, including benefits. Although there is difficulty in placing actual values on certain items, the analysis does include an attempt to make realistic comparisons. Careful examination of these comparisons show that military salaries are at least comparable to civilian pay and when fringe benefits of both military and civilians are added to salaries (e.g. retirement, health care, etc.) the average military employee receives $4,257 per year more than the civilian employee.

IMPROVEMENTS IN MANAGEMENT NEEDED

It has been the repeatedly stated view of the Congress that the management and operation of commissaries can and must be improved. This was reiterated in the Conference Report on the fiscal year 1977 Defense Authorization Bill (H. Report 94–1305). The problems relate, among other things, to location, duplication of coverage, and inefficient and non-uniform practices. Many of these problems were pointed out in studies made by the General Accounting Office (Report of March 19, 1975, FPCD–75–132 and May 21, 1975, FPCD–75–88). In addition, the Department of Defense completed a thorough study in May 1975 that pointed out many potential areas for improvement, including development and implementation of automatic data processing systems, consolidation of functions, greater utilization of employees to more effectively match workload, functional training, and the need for standards for measuring production efficiency.

There is no question that better management of the commissaries is an absolute necessity. The Department of Defense should reexamine the number of stores in relationship to the adequacy, convenience and price criteria. Recommendations within DOD have been made to close some 133 of the stores in the U.S. which are located within 10 minutes driving time of the nearest commercial supermarket. These should be examined carefully. In addition, the Department should examine commissary staffing and consider removing some of the increase in full-time personnel that has occurred since 1970. The proposal made by the Administration in its budget request to replace full time with part time personnel appears to be a welcome first step in the proper direction.

RECOMMENDATION—PHASE OUT COMMISSARY SUBSIDIES OVER A THREE YEAR PERIOD

It is clear that the appropriated fund subsidy to commissary stores is no longer justified in light of current military salaries and benefits, the high cost of continuing the subsidy, and the fact that it provides no combat readiness and makes no military contribution to the national defense. The committee therefore recommends phaseout of the subsidy over a three-year period. See page 288 for the rollcall vote of the Committee on this subject.

IMPACT ON MILITARY RETIREES

Many arguments have been raised that reduction in the commissary subsidy will seriously impact on retirees who use the commissaries. It should be recognized that the average military retiree will receive a stipend in excess of $7,402 during fiscal year 1978. Nearly 150,000 retirees receive social security benefits averaging $2,405 per year for individuals and $3,102 per year for families. In addition, over 140,000 retirees hold "second career" jobs in federal employment. In some cases, the total compension received by the individual exceeds $70,000 per year. (Civil Service pay and retirement.) The Committee's proposal would hold the annual price increase in commissaries to only about four percent a year—far less than the cost of living increases to retirees that have averaged over 10 percent a year in the past three years. By law, these cost of living pay raises for retirees are likely to continue to amount to between 5 percent and 10 percent per year, or between $400 and $700 per year in the future. If commissaries subsidies are phased out over a three year period, the average family buying all its groceries at the commissary would pay only about $1.60 extra per week. At the end of a three year phase out period, the commissary patron would pay approximately $280 more per year if all purchases were from a commissary store and $140 per year if half his food purchases were from commissaries.

In an attempt to clarify further the situation regarding the true income levels of military retirees, the committee directed that the Defense Department undertake a special study of income levels of military to include income from all sources except for social security. This would take into consideration such things as second jobs, investments, etc.

The Department provided the detailed information, based on 1975 data. It confirmed the committee's view that there are few retirees who are living on extremely low incomes. In fact, only 107,000 have adjusted gross incomes of less than $6,000. And it is very likely that many of these individuals receive social security benefits in the amounts discussed above, which tends to increase their total disposable income substantially since social security is not taxable. The detailed table provided by the Defense Department follows:

ADJUSTED GROSS INCOME[1] OF RETIRED MILITARY PERSONNEL[2]—TAX YEAR 1975

Adjusted gross income range	Number of members in this income range	Number of members in this income range or below
Under $1,000	6,261	6,261
$1,000 to $1,999	7,932	14,193
$2,000 to $2,999	11,891	26,084
$3,000 to $3,999	21,315	47,399
$4,000 to $4,999	30,591	77,990
$5,000 to $5,999	29,660	107,650
$6,000 to $6,999	28,668	136,318
$7,000 to $7,999	29,022	165,340
$8,000 to $8,999	30,707	196,047
$9,000 to $9,999	33,276	229,323
$10,000 to $10,999	35,574	264,897
$11,000 to $11,999	37,980	302,877
$12,000 to $12,999	40,769	343,646
$13,000 to $13,999	42,741	386,387
$14,000 to $14,999	44,042	430,429
$15,000 to $15,999	44,761	475,190

ADJUSTED GROSS INCOME[1] OF RETIRED MILITARY PERSONNEL[2]—TAX YEAR 1975—Continued

Adjusted gross income range	Number of members in this income range	Number of members in this income range or below
$16,000 to $16,999	44,701	519,891
$17,000 to $17,999	44,638	564,529
$18,000 to $18,999	42,894	607,423
$19,000 to $19,999	39,320	646,743
$20,000 to $20,999	35,274	682,017
$21,000 to $21,999	31,932	713,949
$22,000 to $22,999	28,289	742,238
$23,000 to $23,999	24,122	766,360
$24,000 to $24,999	21,996	788,356
$25,000 to $29,999	74,996	864,352
$30,000 to $34,999	37,038	901,390
$35,000 or more	32,944	934,334

[1] In addition to retired pay, this includes the 2d career income of the member plus any income from interest, dividends, other pensions, rents, and royalties. It is reduced for moving expenses, tax exempt disability retired pay, any disability income exclusion, and certain employment expenses. A spouse's adjusted gross income is included if a joint return was filed.

[2] Data do not include title III retired members or 116,000 members with an unknown adjusted gross income.

Source: Department of Defense.

COMMISSARIES WILL NOT BE ELIMINATED

The Committee rejects the notion that this proposal will result in the eventual elimination of commissaries. The continuing savings at commissaries will make them even more attractive as the cost of goods in the civilian sector continues to increase. Price advantages under local supermarkets are likely to improve as better management practices recently recommended by the Department's own study are implemented.

The most recent comprehensive study of commissaries prepared by the Department concluded that "Economies obtainable apthat these subsidies be phased out over a three year period, and has modified Section 814 of the bill to provide for such a pear to be sufficient to permit reimbursement for direct costs as proposed, retain significant savings for customers, and maintain a workable commissary system".

The fundamental problem found in the same study just quoted was the military patron's misperception of savings in commissary food prices. Although real savings averaged between 23 percent and 32 percent, over 60 percent of the patrons surveyed thought they were saving only 20 percent or less. The Committee recommends that an educational campaign be conducted by the Department as the subsidy is phased out, so that military members will recognize the true, continuing value of the commissary savings. Savings will still provide a viable recruiting incentive under the Committee's recommendation.

It would be particularly helpful if the various defense publications supported from non-appropriated funds were to provide true cost comparisons of commissary prices versus supermarket prices. In addition, the news media should be periodically informed of such pricing comparisons.

Finally, the Committee would point out that the military exchanges, which do not receive a subsidy for civilian personnel costs, still manage to provide average savings of about 20 percent or better below commercial prices. With a real incentive for improvement, commissaries should be able to achieve fairly similar savings.

The Committee is therefore recommending that these subsidies be phased out over a three year period, and has modified Section 814 of the bill to provide for such a subsidy phaseout, allowing price increases at the stores to reimburse the operation and maintenance accounts in order to make up for the reduction in subsidies. Under this plan, no commissaries need be closed.

SUMMARY OF COMMISSARY STORE SUPPORT

The table below shows the appropriated fund support being provided for commissary store operations in the budget request, including military and civilian personnel. The Committee has reduced civilian personnel funds by one-third to reflect savings from the phaseout. (Total saving is $95.6 million in fiscal year 1978.)

[1] Excludes the cost of transporting commissary store goods to overseas stores.

EXTRACT FROM SENATE REPORT 95-325 ON 1978 DEFENSE APPROPRIATIONS: PAY COMPARABILITY

Two years ago, in reporting out the Defense appropriations bill, the Committee included a detailed discussion of the question of military and civilian pay comparability (Senate Report 94-446, pp 17-22). The discussion addressed the controversy over the subject of pay and special benefits, and included detailed tables showing approximately how much the military and civilian personnel employed by the Federal Government actually received in some direct or indirect fashion and provided an assessment of their relative comparability.

The report included a summary table comparison of military and civilian compensation and benefits, using the Oct. 1, 1975 pay scales in effect at that time. The conclusions the committee drew at that time are reproduced below:

"The Committee is not yet in a position to state unequivocally that the military community is or is not better paid than civilian counterparts. It does believe that actual total compensation and benefits must be fully understood by the military member if we are to avoid the unnecessary loss of significant numbers of personnel. A first step is to educate the member in computing and understanding the actual extent of his entitlements, and to secure acceptance of the fact that he is not significantly worse off than others. The permanent solution is to revise the outmoded and confusing structure of the military pay system. The Committee will follow with interest any system modernization proposals arising from the current Quadrennial Review of Military Compensation, investigations of the Defense Manpower Commission, and other independent studies on the matter."

The Committee regrets that there does not appear to have been much progress made since that time. The Defense Manpower Commission and the Third Quadrennial Review of Military Compensation have met, studied, reported and are now generally defunct. The administration is in the process of appointing yet another "blue ribbon" panel to examine these problems. All of this is coupled with a plea from senior military commanders around the world not to change anything in the pay and benefits structure. Basically the perception, whether right or wrong is that any change to the system which either directly or indirectly costs the serviceman money is an "erosion of benefits." This is without regard to the question of whether or not the particular pay or benefit is justified on the basis of merit or common sense.

The Committee has carefully considered the views of the senior military commanders who have requested a "moratorium" on changes in pay and benefits. The Committee notes that this moratorium seems to be limited to those proposals that would in some way reduce pay or benefits. There is no moratorium on proposals that would increase pay or benefits. In fact, the 1978 budget was submitted with no fewer than six proposals to increase pay or benefits as part of the legislative program at the same time the Services were requesting a moratorium on changes. (These proposals involved retirement modernization, Family Protection Plan, Trailer allowances, Officer Personnel management, Family Separation allowance and Allowances for quarters in the Navy.)

The Committee does not subscribe to the view that a moratorium is appropriate at this time. It is the considered opinion of the Committee that a failure to review the budget request thoroughly and to make adjustments where warranted based on sound logic would be poor policy and represent a lack of attention to the Committee's responsibilities.

Accordingly, the Committee has rejected the notion of freezing all pay and benefits, and opted instead for the alternative of making a detailed and objective review of these pays and benefits, as it has done in the past.

In connection with this, the Committee has once again attempted to portray the comparable benefits and pay of the military and civilian employees of the defense department. The following tables provide the committee's analysis. Careful attention is drawn to the footnotes that explain the various assumptions used in preparing the material.

TABLE 1.—SELECTED EXAMPLES OF ANNUAL MILITARY AND CIVILIAN COMPENSATION (OCTOBER 1976 PAY SCALES)

Civilian salaries		Pay grade	Military grade (Army title)	Military salary (RMC)	Longevity step [2]	Typical number of dependents	Regular military compensation (RMC)[1]			
Salary	Comparable civilian grade						Basic pay	Quarters	Subsistence	Federal tax advantage

5,810	GS-1 step 1	E1	Private	6,732	<2	0	4,493	886	967	386

[1] Regular military compensation (RMC). RMC is defined in law as basic pay, basic allowance for quarters, basic allowance for subsistence, and the Federal tax advantage on these 2 nontaxable allowances. It assumes all members receive these allowances in cash. Federal tax and tax advantage are calculated on RMC only using the standard deduction for the dependents data shown based on the 1976 laws including the new negative income tax feature. It must be recognized that many members, particularly in lower enlisted grades are required to live in Government quarters and subsist in Government dining facilities like barracks and ships, and do not receive cash allowances.

[2] Average length of service for pay purposes of the personnel in each pay grade.

TABLE 2.—SELECTED EXAMPLES OF ANNUAL PAY AND BENEFITS FOR CIVILIAN PERSONNEL

	Total salary and benefits	Salary[1]	Retirement and survivor[2]	Life insurance[3]	Health benefits[4]	Total benefits[5]

1-1	7,253	5,810	999	37	407	1,443

[1] Average nearest whole step of general schedule employees as of December 1976.

[2] Normal cost of the current retirement system, net of employees' 7 percent contribution. Estimated at 17.2 percent of salary. Economic assumptions used to calculate normal cost were: 6 percent interest rate, pay growth of 3 percent, and an inflation rate of 4 percent.

[3] Based on the Government contribution of $4.615 per thousand of insurance. Amount of life insurance is the next highest thousand over base salary plus $2,000; e.g., an employee with a base salary of $7,500 would be insured for $10,000.

[4] Per capita cost of government contribution to health insurance premiums. Data extracted from OMB report, "Work-Years and Personnel Costs, Executive Branch, Fiscal Year 1976," Dec. 1, 1976 No data is available on the direct health care benefit of civil service employees. The Civil Service Commission does not treat it as compensation.

[5] Does not include the civil service overseas commissary or civil service use of military commissaries and exchanges, available only to a very small number of U.S. civilian employees stationed overseas. No data is currently available and the Civil Service Commission does not treat it as compensation.

[6] Limited to the salary of Executive Level V.

[1] Military estate benefits. Composed of retirement, the Government's contribution to old-age and survivors insurance (social security), and "other." The "other" category includes the survivor benefit plan (SBP) dependency and indemnity compensation (DIC), and death gratuity.

[2] Retirement. Calculations are based on the current retirement system. The present value of the contingent future benefit is estimated using the aggregate age entry normal actuarial technique. It represents the amount that would have to be placed into an interest-bearing fund in order to cover the retired costs of those who ultimately do retire. Economic assumptions are discussed in a special note. These values represent 26.7 percent of enlisted basic pay and 26.4 percent of officer basic pay.

[3] Social Security. The Government contribution to old age and survivors insurance is based on the 1977 rate of 4.95 percent of basic pay up to $16,500. The remainder of the social security tax is for the medicare program.

[4] (a) Other includes: Survivor benefit plan. Estimated in same way as retirement. The values are 1.3 percent of basic pay for officers and 0.5 percent for enlisted personnel.

(b) DIC. Estimated cost of a 1-yr term insurance premium to provide the protection provided by this program. The program is funded by Veterans Administration.

(c) Death gratuity. The per capita cost of death gratuity is $4 and $7.50 per year for enlisted and officers, respectively.

[5] Medical care. Composed of current care while on active duty and estimated present value of contingent future benefit received after retirement. The estimate included in the comparison base is the lower end of a range of estimates of compensation value, represented by a health maintenance organizations (HMO) premium, based on the costs of providing health care to military beneficiaries. This recognizes that military personnel, particularly younger enlisted and officer personnel would not, given the choice, purchase the full level of benefit specified in the military health care system. The value above that level is included in the institutional benefit package representing the differences between military service and civilian employment.

Current benefit. 2 rates are used: $188 for single and $852 for married personnel.

Deferred benefit. This benefit is fully earned as a result of 20 yr of active military service. Care is provided from military facilities and CHAMPUS (or medicare after the retired member reaches the age of 65). The present value of the accrual, including the medicare coverage, on a per capita basis is $158 for those with less than 20 yr service. Those with over 20 yr of service earn no more present value.

[6] Commissary and exchange. Estimated per capita benefit value calculation based on the appropriated fund subsidy to commissaries and exchanges. Retired portion of costs calculated on a deferred accrual basis. This per capita estimate overstates the benefit value for bachelors and understates it for married personnel and for persons located where no commissary exists.

[7] Does not include any estimate for certain nonappropriated fund activities associated with moral and welfare activities (e.g., hobby shops, officer clubs, golf and sports facilities, etc.). The DOD estimated the value of these to be $367 per active duty member in fiscal year 1976. This has been excluded because of differential use of the facilities and differential distribution in the United States and overseas.

Note on Economic Assumptions: Estimating present values for the deferred benefits requires the projection of interest or discount rates, pay growth and inflation many decades into the future. These calculations were based on an interest rate of 6 percent, pay growth of 3- and 4-percent inflation, a set of assumptions used in the Board of Actuaries of the Civil Service Retirement System Fifty-Second Annual Report to estimate the cost of the civil service retirement benefit. Estimates of present value are highly sensitive to these assumptions. For example, the civil service retirement benefit is often quoted as being worth 7 percent of salary. That estimate is based on an interest rate of 5 percent with no pay growth or inflation. Under the assumptions used above, the same benefit net of employee contribution is worth 17 to 18 percent of salary.

Note: Excluded from the table are such military benefits as follows, along with their estimated fiscal year 1978 budgetary costs and annual value of benefit to those who receive them:

Flight pay—paid to 79,500 officers in fiscal year 1978 or 29 percent of the officer force; range—$1,200 to $2,940 annually. Special pay to doctors, dentists, and optometrists, and veterinarians: paid to 17,700 officers in fiscal year 1978 or 6 percent of the officer force; range—$1,200 to $3,000 annually. Variable incentive pay to medical doctors only—paid to 2 percent of the officer corps, 5,800 officers in fiscal year 1978; range—$9,000 to $13,000 annually. Enlistment and reenlistment bonuses to enlisted personnel—paid to 291,100 personnel, or 16 percent of the enlisted force in fiscal year 1978; range—$1,500 to $2,500 for enlistment bonuses and up to $15,000 for reenlistment bonuses. Reenlistment bonuses however, are generally provided for in equal annual installments over the reenlistment period with an average payment in fiscal year 1978 of $967.

TABLE 4.—COMPARISON OF ANNUAL MILITARY AND CIVILIAN COMPENSATION AND BENEFITS (OCTOBER, 1976 PAY SCALES)[1]

Military grade and title	Military advantage (+) or disadvantage (−)	Military compensation and benefits	Civilian compensation and benefits	Comparable civilian grade

[1] Where more than one military or civilian grade is shown, the amount for compensation and benefits is the average of the values shown on tables 2 and 3 for those grades.

COMPARISON OF FOOD CHAIN STORES AND COMMISSARY OPERATIONS 1975[1]

[In millions of dollars]

Item	Safeway Stores	Greater A. & P. Tea Co.	Winn-Dixie Stores	Typical store (composite-identical firms[2])
Sales	9,716.9	6,537.9	2,961.0	3.689
Cost of sales	−7,761.8	−5,260.8	−2,385.1	−2.912
Gross profit (margin)	1,955.1	1,277.1	575.1	.777
Operating and administrative expenses, excluding interest costs	−1,667.2	−1,311.7	−494.7	0−.755
Net operating profit (loss)	287.9	(34.6)	81.2	.022
Items of expenses included in cost of sales or operating and administrative expenses that commissaries do not pay for:				
Taxes	137.8	82.2	31.7	.110
Rents and royalties	141.4	98.8	48.2	.050
Depreciation and amortization costs	87.7	53.7	35.0	.025
Advertising	[3] 194.3	98.2	28.3	.044
Maintenance and repair	[4] 119.0	62.3	26.3	.003
Accounting adjustments			[5] 7.7	
Insurance	[6]	[6]		.004
Other services[7]	[6]	[6]		.076
Total costs commissaries do not have	680.2	395.2	177.2	.312
Sum of net operating profits plus costs commissaries do not have—estimated potential commissary margin	968.1	360.6	258.4	.334
Potential commissary margin as percent of sales	10	6	9	9

[1] Source of data for Safeway, A. & P. and Winn-Dixie are "10K" reports filed annually with the Securities and Exchange Commission, except where noted otherwise. See footnote 2.

This is a 1974–75 composite analysis prepared annually and published in "Operating Results of Food Chains 1974–75," compiled by Wendell Earl and Willard Hunt (New York State College of Agriculture and Life Sciences, Cornell University).

The data from this report are all aggregated data reported as a percentage of sales for 30 identical firms. The study says "This stable group of firms is one of the best indicators of industry trends available" (p. 4). This data has been used for col. 4.

[3] Estimated at 2 percent of sales. According to Rom J. Marken, "The Supermarket" (1968: Washington State University), p. 93, the average amount spent on promotional activity by all supermarkets in the United States is 2.5 percent of sales. In recent years this percentage appears to have declined.

[4] Estimated at 10 percent of Safeway's plant and equipment value.

[5] Switch to "Last-In-First-Out" (LIFO) accounting made a paper reduction of $7,700,000 in 1975 earnings according to the "10K" Report.

[6] Not available.

[7] Includes: Transportation operations, travel, general administration and accounting and office services.

DISCUSSION

The above data clearly shows that *even without any subsidy,* the "profit margin" that should be achievable by commissary stores is at least 9 percent. This margin is the price savings that should be passed on to the customers. A&P is considered to be less representative for the 1975 year since it showed a net loss and was attempting to close stores to effect savings and turn the corner on profitability in 1976.

The 9 percent figure is considered to be a conservative estimate since the public information does not identify other cost advantages enjoyed by commissaries over food chains as follows:

Commissaries are not subject to certain minimum pricing agreement (e.g. milk and dairy products) and can buy these at lower prices than food chains. It is estimated this could save as much as 3 percent of the cost of goods sold.

Salaries for commissary personnel are subject to legal ceilings. Many private company officials' salaries exceed these maximums considerably. For example, executive pay levels for the three firms were as follows in 1975:

Firm	Annual salary of chief executive	Average annual salary of all officers and directors	Total number of officers and directors	Total salaries of all officers and directors
Safeway	$179,904	$73,807	59	$4,354,654
A. & P	160,416	51,396	21	1,079,319
Winn-Dixie	272,000	106,105	26	2,758,750

Source: Forbes magazine, annual directory issue, May 15, 1975.

It should be recognized that Federal salaries are limited by law to $47,500 per year.

The limited nature of the 10K Securities and Exchange Commission report made it impossible to determine that all costs that commissaries do not have had actually been identified. These could amount to several per cent of the cost of sales and operating and administrative expenses.

CONCLUSION

If commissaries are managed efficiently, price savings of about 12 percent, and perhaps even more, should be achievable based on analysis of three large food chain stores.

There is absolutely no reason why elimination of the subsidy should cause commissaries to close if they are managed efficiently. A three year phaseout of the subsidy gives plenty of time to improve management.

Prepared July 8, 1977, Senate Appropriations Committee.

Mr. STEVENS. I yield 5 minutes to the Senator from Utah (Mr. HATCH) on my time.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield for a unanimous-consent request?

The PRESIDING OFFICER. The Chair will advise the Senate that the question recurs on the amendment of the Senator from Alaska, amendment No. 499.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that Christopher Lehman of my staff be granted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I am anxious to support the amendment to H.R. 7933——

Mr. STENNIS. Mr. President, we are moving along. May I ask for quiet so the Senator can be heard?

The PRESIDING OFFICER. Will the Senate be in order?

The Senator from Utah is recognized.

Mr. HATCH. Mr. President, I am anxious to support the amendment to H.R. 7933 offered by my distinguished colleague from Alaska, Senator STEVENS, which deletes phaseout of the commissary subsidy over a 3-year period for the following reasons.

Reduction in appropriated funding for military commissaries will increase costs to active, reserve, and retired military personnel who patronize the commissary. Such an action is equivalent to a pay cut. With the recommended increase of 10 percent in commissary prices, this would effectively mean a 3-point-5-percent to 4-percent decrease in the soldier's real income.

I am concerned that section 814 of the bill, as it now stands, will cause a tremendous morale problem in the Active and Reserve Forces. When one considers that it is the lower pay grades that will be affected the most, I think it is im-

portant to note that that would cause morale problems. Some important facts should be noted: 31 percent of the enlisted men with less than 1 year of service are married and 50 percent of the officers with less than 2 years of service are married. These are the men who depend upon the commissary privileges to stay above water financially, particularly the junior enlisted families of which more than 60,000 are now eligible for Federal food stamps because of the low pay scale.

The bill, as now constituted, would mean the Government is changing past promises and commitments made as recruitment incentives. An Air Force triannual survey of attitudes shows that 31 percent of enlisted men and 35 percent of the officers say commissary and exchange privileges were influential in their career decisions. Further, we have the plight of the retired reservist who was promised the commissary benefits at age 60. This was one of the reasons that he stayed in the Reserves. Think also of the havoc that this would raise with our retired career military people. To many of them, this would appear as a breach of contract.

The present bill will seriously undercut recruitment and could be an important factor in leading to manpower shortages in later years. A study by the General Accounting Office shows that 13 percent of enlistments were greatly affected by the promise of commissary benefits.

Mr. President, the Senate will recall that House and Senate conferees discussed the commissary issue at great length last year and agreed to provide the full subsidy. Congress observed that economies could be realized by improving the efficiency of commissary operation, thereby achieving savings which will lead to a gradual reduction of the commissary subsidy, while still providing substantial savings to commissary patrons.

The conferees directed the Secretary of Defense to institute management improvements and operational efficiencies for the purpose of reducing commissary subsidies.

It appears that positive steps are being taken to accomplish that goal. I believe it would be premature for Congress to now dictate a three-year phaseout without the benefit of complete analysis and review of the steps which have already been taken by the Secretary of Defense in an effort to improve operations and thereby reduce the subsidy. Furthermore, I believe it would be precipitous to reduce the commissary benefit prior to the report of the President's blue ribbon panel on military compensation which is now considering the total compensation package.

I might add that generally I am the last person to want to keep spending programs alive and spending programs in bills.

But as I see it, in order to have a strong military, live up to the commitments we have made to the men who have given service in the military, keep the active participation of our public in becoming members of the military, and live up to the obligations the United States has undertaken, I think we should live up to this obligation at this time. Therefore, I wholeheartedly support the amendment of my colleague and recommend that all of my colleagues do so likewise. I think it is worthwhole. I think we should do it.

Mr. THURMOND. Mr. President, I support the amendment which deletes phaseout of the commissary subsidy over a 3-year period for the following reasons:

First. Reduction in appropriated funding for military commissaries will increase cost to active, reserve, and retired military personnel who patronize the commissary. It will be equivalent to a pay cut.

Second. The amendment will cause a tremendous morale problem in the active force.

Third. The amendment would mean the Government is changing past promises and commitments made as recruitment incentives.

Fourth. The amendment will add fuel to the discontent among the ranks, thus maintaining the pressure for unionism.

Fifth. The amendment will seriously undercut recruitment and could be an important factor leading to manpower shortages.

Mr. President, as you will recall, House and Senate conferees discussed the commissary issue at great length last year and agreed to provide the full subsidy. They further agreed that economies could be realized by improving efficiencies of commissary operations, thereby achieving savings leading toward gradual reduction of the commissary subsidy while retaining substantially the level of savings experienced by commissary patrons.

The conferees directed the Secretary of Defense to institute management improvements and operational efficiencies for the purpose of reducing commissary subsidies.

Preliminary indications are that positive steps have been taken toward that end. I believe it would be premature for the Congress to now dictate a 3-year phaseout without the benefit of complete analysis and review of the steps which have already been taken by the Secretary of Defense to reduce the subsidy. Furthermore, I believe it would be precipitous to reduce the commissary benefit prior to the outcome of the President's Blue Ribbon Panel on military compensation and without considering its impact in the context of the total compensation system.

The PRESIDING OFFICER. Who yields time?

Mr. CULVER. Mr. President, will the Senator yield me time?

Mr. STENNIS. Mr. President, I believe my time is about exhausted.

Mr. STEVENS. Mr. President, what is the time situation?

Mr. STENNIS. Mr. President, what time do I have remaining?

Mr. STEVENS. In the spirit of fairness I am happy to yield a couple of my time.

The PRESIDING OFFICER. The Chair advises the Senator from Alaska has 5 minutes and the Senate from Mississippi has 3 minutes remaining, and then both have an agreement for 5 additional minutes each prior to the vote.

Mr. STENNIS. Mr. President, I yield 1 minute to the Senator from Iowa at this point.

Mr. STEVENS. Mr. President, I yield 2 minutes of my remaining time to the Senator from Iowa.

Mr. STENNIS. So we can consider the matter of the amendment.

Mr. CULVER. I thank the distinguished chairman for yielding, and I simply wanted to alert the proponent of the amendment that I would have, upon completion of his time on this amendment, an amendment to his amendment. I simply wanted to have the opportunity to notice that intent so that we do not move to a vote without consideration of that amendment.

Mr. STEVENS. Might I ask my friend a question? Because of the situation we are going to postpone the rollcall votes which might lead to a little complication. Does he intend to offer his amendment at the end of this period or the end of the extended period? We reserved 5 minutes to each side when the voting starts.

Mr. CULVER. My intent would be to offer at the end of this period and obtain the additional time for its consideration.

Mr. STEVENS. I ask that because we want to stack the vote on the Senator's amendment also.

Mr. President, I shall ask that it be in order for the Senator from Iowa to offer his amendment at this time.

Mr. CULVER. With the understanding that we have a half hour time for debate on it for both sides.

Mr. STEVENS. I think there are 20 minutes on an amendment.

Mr. CULVER. I think it is a half hour.

The PRESIDING OFFICER. Time for amendments are 30 minutes equally divided.

Mr. STEVENS. Yes.

Mr. HATCH. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. STEVENS. I yield.

Mr. HATCH. Mr. President, I ask unanimous consent that John Haddow, of my staff, be accorded the privilege of the floor during the pendency of this bill and the vote thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, if the Senator is prepared to offer his amendment, and if it is agreeable to the Senator from Mississippi, I suggest we take up his amendment at this time and add on the time that the Senator has coming and that which we have coming on his amendment and continue so we get all these votes in the right sequence.

Does the Senator have any objection to postponing the vote on his amendment until after the discussion of our other two amendments as we previously agreed? That would mean the rollcall would start sometime after 11:30 a.m.

Mr. CULVER. I think it would be appropriate to reserve 5 minutes for both sides on that as well because if my amendment were to prevail it would change the Senator's amendment.

Mr. STEVENS. That is agreeable.

We would have a quorum call and then 5 minutes on each side, and the Senator's amendment would be the first vote when the voting starts.

Mr. CULVER. The only other consideration in that regard would be that in the event my amendment were to prevail it may make moot the Senator's amendment in a significant way and he may wish to have an opportunity to correct that deficiency on that occasion.

I do not know if he has time to do that.

Mr. STEVENS. As I understand it, the bill would still be open to amendment, I say to my friend.

Mr. CULVER. I am trying to protect the Senator's interest.

Mr. STEVENS. I appreciate the Senator's concern.

Mr. President, I ask unanimous consent that it be in order for the Senator from Iowa to offer his amendment at this time and the time remaining for the Senator from Mississippi and the Senator from Alaska be continued and not be yielded back.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 681

Mr. CULVER. Mr. President, I have an unprinted amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. CULVER) proposes unprinted amendment No. 681.

Strike lines 9 and 10 from the amendment No. 499 by Mr. STEVENS.

Mr. CULVER. Mr. President, this amendment would simply strike out the section of the amendment of the Senator from Alaska, reducing the $300 million earmarked in the appropriations bill for the combat readiness issue in our forces.

The Senator from Alaska would have us reduce that $300 million figure by $100 million in order to have the available money to fund the increase for the commissary subsidy that had been deleted by the committee.

Mr. President, I think that this amendment, as proposed by the Senator from Alaska, is a classic example of dangerously misplaced priorities in terms of our national defense effort. The real issue posed here is, who is for a strong defense?

Who is for a strong defense? At the present time, we have a commissary system that is based on a 19th century need to have these outposts to supply our troops in remote areas, and we have a commissary system that was initially established to compensate our military personnel properly at a time of inferior pay scales.

What has changed since then? First of all, on the commissary issue, what has changed is that we have seen a proliferation of commissaries all over America and all over the world. We have six of them in D.C.

When you go into one of these commissaries, what do you find? You find that, on the average, purchases are 23 percent—23 percent—cheaper than across the street at the supermarket. Twenty-three percent cheaper.

Why should we look at that? Mr. President, we should look at it, I think, because we have a situation where, since 1968, we have seen dramatic increases in military pay to our service personnel. I have voted for every one of them, so that we could approach comparability. But in achieving comparability, we have not accompanied that by a rational, appropriate reduction in some of the fringe benefits that were only justified at a time when pay scales were not comparable or appropriate.

What does the committee recommendation do? The committee recommendation does not eliminate any commissaries. All it says is that at a time when these commissaries are operating at U.S. Government expense, with no sales taxes, free real estate, free overhead, at a time of pay comparability, at a cost of $300 million a year just to the personnel working as clerks, we should no longer subsidize that particular aspect of the commissary operations. This is appropriate action because we have pay comparability.

This has been recommended by the Department of Defense for the past 2 years.

What happens if we eliminate that $300 million unjustified subsidy? What happens then? Do any commissaries close? No. Is there a reduction in any commissary services? No. The only thing that happens is that we put that small element of our total operation on a pay-as-you-go basis, so that the users pay for clerk-hire instead of making all taxpayers foot the bill.

What happens to the military personnel that avail themselves of this service? Well, simply, instead of a 23 percent savings, when we phase out the entire subsidy over the 3-year period recommended here, we get a situation by that time that it is still 13 percent cheaper than your constituent and mine, who are on comparability with that military person, have to pay for the same items in your hometown and my hometown.

Mr. President, why is this a problem? Why is this a problem from the defense posture of this Nation?

Mr. President, it is a problem because today we have two great threats—two great threats—to our defense budget. One is the fact that manpower costs represent 60 cents of every dollar that we apply to defense.

What about the Russians? They do not pay 60 cents out of every dollar for manpower costs. No; they pay a fraction of that, about 20 percent.

What does that mean? It means that when we talk about cutting the budget, and when we talk about fiscal restraint on the budget, it means that we start cutting it right away, with fixed costs at 60 percent of the budget for manpower, into the bone and the muscle of our defense program, because we have to cut into weapons and into other essential elements of our national defense posture in order to achieve that fiscal restraint.

Therefore, when we have properly, I think, and generously increased the salaries of military personnel to a point of comparability, certainly it is the height of irresponsibility to continue a subsidy at a time when we must restrain in our manpower costs.

Mr. President, what is the other big problem we have in our national defense?

In addition to manpower costs, the other special problem we face, in my judgment, is readiness—the lack of readiness.

We talk all the time about whether we are achieving or hurting our defense. We talk about what the Russians are doing. Are the Russians coming?

Let me say this: Last December I went to 12 bases—Air Force, Army, Navy, and Marine Corps—in the continental United States. We made a study, with members of the Senate Armed Services Committee staff, of the issue of readiness.

What did we find? I will tell you what we found, and it ought to scare the life out of you if you are interested in a strong defense.

People come in here and say they are for subsidizing commissaries, and somehow that is supposed to help achieve a strong defense.

What we found is that one-half—one-half—of America's military ships are not combat-ready on any given day. One-half of what all these taxpayers have paid all this money for, all these ships—I do not want to shock you too much, but one-half of them will probably not be available for combat on any given day if the balloon goes up with the Russians.

Do you know what else we found? One-half of our airplanes, our combat aircraft, on any given day, are not operationally ready to fly. Can you believe it?

This is not a figment of my imagination. This is documented, chapter and verse, by the Pentagon, by the commanders in the field, by a recent GAO study on the Army. In that instance, the GAO visited a base which I also inspected. And despite a similar investigation and critical report 5 years ago, GAO concluded:

It is still doubtful that strategic Army forces could deploy quickly and in a fully combat ready condition.

Much of the forces' combat essential equipment was not kept up, although it was reported to be. As a result, a considerable amount of maintenance would be required in a deployment to make it combat ready.

The problems had not yet been adequately corrected.

The Pentagon's own figures confirm my findings and give additional reasons for concern.

Some of the more sophisticated aircraft in our inventory, like the F–14, are operational only 30 percent of the time.

We have antisubmarine aircraft in the Navy—brace yourself—which are operational 10 percent of the time. We do not have the spare parts and other equipment. We do not have the operation and maintenance funds.

If we do not have spare parts, do you know what happens then? Cannibalization. I have talked with the men who work on those planes, on the line. Do you know what they have to do to make them fly? They have to open up one plane, take a part out of it, open up another plane—spend all those manhours—

and put that part in the other plane, while we send all those parts to the Shah and our own people do not have them.

What happens then? Other than the fact that they have all that down-time, other than the fact that they are not operationally ready, other than the fact that they cannot train adequately, what else happens?

Their morale goes down. The morale of those men goes down. They will not reenlist. They develop technical skills. Some contractor comes by, knocks on the door and says, "How much are you getting paid, kid, for being frustrated here on the line? How would you like to go to Iran and work for us, getting three times as much, doing the same thing, with the single exception that you will have parts to do it with?"

Every time in this defense budget we go fund some exotic, long-term, sophisticated weapons system we turn right around, cut the guts out of operation and maintenance and readiness funds, so that somtime, somewhere, in the year 2000-plus we might be ready on paper to fight a war. Everybody says we have to be tough to the Russians, so we come in and say, "We are going to give you toothpaste. Never mind that we cannot stop the submarine threat. We want a kid who can go to the ship's stores and go to Davy Jones' locker fat, dumb and happy."

That is the tradeoff being made right here.

Since I have previously studied this issue of receivers and reported to the Senate Armed Services Committee, and since I also recommended specific readiness improvements to the Appropriations Committee, I am particularly pleased that the committee has created this special fund.

Mr. President, this amendment gives the Senate a clear choice: we can save each commissary user a few cents or we can improve the sorry state of our combat forces.

Frankly, I think that if any serviceman were asked whether he wanted to pay a few pennies more for bread or milk or instead wanted to be sure that his rifle fired accurately and his plane was flyable, I believe he would agree with the Appropriations Committee.

If we want to send a signal to the Russians of our determination to resist aggression, the best way is by improving readiness—and not by pouring money into unnecessary exotic weapons systems or into a costly subsidy for the clerk-hire in military commissaries.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CULVER. I have 30 minutes on the amendment.

The PRESIDING OFFICER. The Chair would remind——

Mr. STEVENS. It is my understanding that 5 minutes have been reserved to a later period so the time has expired; is that correct?

The PRESIDING OFFICER. The agreement is that there was 30 minutes to be equally divided.

Mr. CULVER. I thought there was an hour equally divided.

The PRESIDING OFFICER. Thirty minutes equally divided with 5 minutes to be reserved for final debate prior to the vote.

Mr. EAGLETON. Mr. President, I ask unanimous consent that an additional 20 minutes be equally divided and allocated on this matter.

Mr. STEVENS. I object. In the first place, he is not arguing about his amendment.

Mr. EAGLETON. He most certainly is.

Mr. STEVENS. Absolutely not. Let me take my 10 minutes. If the Senator wants to get additional time later, that is something else. We are going to finish this bill by 6:30 tonight and in my functions on this side I have to have a limitation somewhere. I have cut down my amendments from an original hour to 30 minutes in order to accommodate the managers of the bill and the managers of the Senate. If the Senator is going to have an hour on an amendment to my amendment that I cut down to 30 minutes in order to accommodate the Senate, I will object.

Mr. CULVER. Will the Senator yield? It was the Senator's understanding that I had a half hour to a side. I can assure the Senator that the 20 minutes can be amply utilized in addressing as specifically as the Senator cares to hear it——

Mr. STEVENS. I will not yield further. We have agreed to a time limit on these amendments and amendments to the amendments. I will address the amendment. I will address my amendment later.

Right now, this amendment is the amendment to delete that portion of my amendment which is consistent with the provisions of this bill as it was before our committee. Our committee decided that no amendment to restore funds would be considered unless the person who offered the amendment found another place in the bill to cut. It so happens that the readiness fund which is in this bill was dreamed up in this committee. It was not a budget request. It was not in the House bill. There was no hearing on it. It is a $300 million blank check to the Secretary of Defense to meet readiness requirements.

My friend says that this is going to affect the readiness. We have $34.5 billion in this bill—$34.5 billion—for operation and maintenance for the Department of Defense, $2.5 billion more than last year. He wants to compare that to the duty I had to find some place to cut the bill in order to make it possible to restore the money, not to increase the money. I am not increasing any money for funding commissaries. It is to restore the money for commissaries.

Just yesterday we voted on whether or not we are going to subsidize those who park around the Capitol. I assume the people who want to cut out the subsidy for commissaries clerk-hire, that is, the people who work in the commissaries, are going to face up to the question of whether we are going to ask the military people to pay for their parking spaces, whether we are going to ask the military people to pay for those who are hired to run the recreation camps, whether we are going to ask them to pay for those people who run the gas stations on the military bases.

I will tell you, Mr. President, the issue here is not readiness. That readiness fund is the source of a cut that we have to make in order to go to conference. If the House conferees want the $300 million in readiness funds, which I doubt, I seriously doubt they are going to give the Secretary of Defense a blank check for $300 million—if they do, we can absorb the $100 million somewhere in this budget, which has no much money for the military.

Mr. President, Alaskans believe a promise made is a debt unpaid. We made a promise to those people when they entered the military that they would have commissary privileges as they were known at the time. The retired people relied upon that. That promise would be broken by those who do away with the commissary privilege.

We are having difficulty now getting people to enlist in the military services, and even greater difficulty in getting them to stay. Yet annually someone comes in here and says, "Let us remove one of these privileges, one of these subsidies."

Is it a subsidy to give them parking on base? Is it a subsidy to have people run the gas stations? Is it a subsidy to have people there 24 hours a day, or whatever it takes, to have a commissary in some of these places? So there are three or four commissaries here. How many retired people are there in the District of Columbia, in the Washington area? How many people relied upon the fact that commissaries would be there and served their time in the military? This is a question of keeping a promise.

On the Senator's amendment to delete the readiness fund, so far as I am concerned, if the Senator from Mississippi believes in the readiness fund so much that that amendment which deletes $100 million from its offends him, I will take it out and carry the burden of the increase in the budget.

It was a rule of the committee that we had to cut somewhere to get any money restored.

I only selected that because it is an unbudgeted item. So far as I know, the Secretary of Defense does not want it, at least to my knowledge he has never asked me for it.

I yield to the Senator from Mississippi as to whether or not the Secretary of Defense asked for it. To my knowledge, he did not.

Beyond that, it is just an item, as the Senator knows, to carry it into conference and maintain the budget level as set by the Senate Budget Committee.

I have no love lost one way or the other for the blank check for readiness. To me, that $300 million is nothing compared to the $34.5 billion for operation and maintenance. We also have $25 billion in here for procurement. But the Senator wants to shift over a 10-year period $4 billion in cost to the very needy people of the military service, the retired people and the lower paid military people, both enlisted and officers, who use the commissaries. The study indicates, if the Senator wants to look at it, the people who use the commissary are the people who need the commissary. If it does not make any difference to the

Senator, he can go downtown and shop at the Safeway if he wants to. We have the figures, which I will give during the summation, as to the number of people who are in the military with families who are today shopping at the commissaries with food stamps.

Do not talk to me about savings. Over 10 years, we shall have $4 billion, but it will be at the cost of those people who cannot afford it and they will leave that military service.

Mr. CULVER. Will the Senator yield?

Mr. STEVENS. I did not interrupt the Senator from Iowa and I do not want to be interrupted now.

Mr. CULVER. The Senator did not ask me to yield.

Mr. STEVENS. I did not interrupt him, and I am not going to yield.

I say to the Senator from Mississippi, out of my great respect for him, if he wants this readiness feature, I shall delete it myself, but I am not going to have it on the basis that somehow or other, we are going to waive readiness on one side against the commissary privileges that we have promised to people of the military. They came in the service; they stayed through military retirement; those commissary privileges must be there.

That is putting an apple on one scale and an orange on another scale and saying we are happy. I am trying to balance out the equities of those promises that were made to the people in the military service against the total military budget. I am not balancing readiness against this restoration. The Department of Defense wants this. They requested that full funding for commissaries this year. They have a blue ribbon panel making a study of all of the costs and all of the benefits today.

Mr. EAGLETON. Will the Senator yield?

Mr. STEVENS. They have not reported back.

Mr. EAGLETON. The Department of Defense, for the past 2 years, has supported the phaseout of commissaries.

Mr. STEVENS. They may have done it in the past, but this year they took a lesson from the fact that, 2 years in a row, Congress rejected a phaseout. This year they say they have a blue-ribbon panel studying military compensation. The Department of Defense requested deletion of the Senate modification to section 814, which would phase out the commissary study. This is their position, as presented to our committee.

Mr. EAGLETON. For 2 years they have been trying to phase this out. We in Congress have not been sufficiently responsive.

Mr. STEVENS. I might say this could be one of the more enlightened positions of the new administration.

I find myself in a very admirable position, supporting the new administration in the Department of Defense. I think we ought to listen to them. At least, Congress told the Department of Defense, 2 years in a row, not to do this. I think that was a message.

I am sure the Senator knows that the House is not going to go along with this reduction should my amendment fail.

Mr. EAGLETON. I hope the Senator will listen to the administration on his blue-collar amendment. We can stipulate on that, since he is supporting their position.

Mr. STEVENS. That is one of those great positions. I am happy to know they are in support of this position.

Again, with all due deference to my good friend from Mississippi, who does so much work on the floor of the Senate, I ask the Senator from Mississippi if he wants this amendment, this $100 million, restored to the readiness fund. If he does, I shall agree to the amendment that is offered by the Senator from Iowa. If he does not, or if he does not care one way or the other, I am going to oppose the amendment of the Senator from Iowa.

Mr. STENNIS. I respond that the Senator from Mississippi was hoping to be heard briefly on the entire problem. But the amendment is pending. I do not have any time on that. I shall have to make a background statement when I speak.

Mr. STEVENS. I am more than willing to yield the time I have remaining to the Senator from Mississippi. If he wishes that amendment agreed to, again I say, I shall agree to it and carry the burden of the increased cost of my commissary amendment.

Mr. STENNIS. Again, I think we shall have to go into it fully. When I get some time, I shall outline the picture as I see it.

Mr. STEVENS. What is the time remaining?

The PRESIDING OFFICER. The initial 10 minutes of the Senator from Alaska have just expired.

Mr. YOUNG. Will the Senator yield to me?

Mr. STENNIS. Mr. President, without anyone being at fault, there is a little mixup on this matter. I yield to the Senator from North Dakota, the ranking minority member of our subcommittee, 5 minutes on the bill if he wants to use it now.

Mr. YOUNG. Mr. President, undoubtedly, there is greater need for these commissaries in some places than others in the United States and around the world. Alaska is one place where they are badly needed. But a lot of inequities have crept into the use of commissaries. We have, in Washington, a great many retired military personnel, who retired at 38–40 years of age, and have another job at, say, $30,000 or $40,000 a year now and are eligible for sizable retirement pensions. They are eligible for this cheaper food. I think there is an inequity, not only in the military personnel, but with other people.

Some of these commissaries, I believe, should be kept just as they are. But I think it is a subject that deserves more study. I would like to see the bill go to conference with the $100 million and a 3-year phase-out, to be considered in conference with the House. At that conference, something might be done to, stop some of these inequities.

So far as active military personnel are concerned, they need them. I hope they keep them. But we are spreading these around the world far more than is necessary.

Mr. STENNIS. I thank the Senator.

Mr. President, what is the situation, if I may inquire now, with reference to time on the Culver amendment to the amendment?

The PRESIDING OFFICER. The Chair advises the Senator from Mississippi that all time has expired on the amendment, except that 5 minutes remain on each side prior to the vote.

Mr. STENNIS. Good.

Mr. STEVENS. Mr. President, at this time I call up my amendment 501.

Mr. CULVER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I ask unanimous consent that the time remaining for the Senator from Mississippi and the time remaining for the Senator from Alaska be added on to the time to be taken up on a previous amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair advises that there are 4 minutes remaining for the Senator from Alaska, 3 minutes for the Senator from Mississippi. The unanimous-consent agreement added that to the final time.

Mr. STEVENS. I ask unanimous consent that the time be equal when we reconsider amendment 499, so it gives him 2 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 501

Mr. STEVENS. At this time, I call up my amendment No. 501.

Mr. STENNIS. Mr. President, I think that is the next thing in order.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes amendment No. 501.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 55, strike out line 1 and all that follows through line 24, and redesignate the following sections accordingly.

The PRESIDING OFFICER. The Chair advises the Senators that there are 10 minutes to a side on this amendment.

Mr. EAGLETON. May I ask, did the Chair say there are 10 minutes to a side?

The PRESIDING OFFICER. At this time. Then, of course, there will be an additional 5 minutes.

Mr. EAGLETON. On the earlier vote, there will be 5 minutes to a side on the Culver amendment.

Mr. STEVENS. He still has 5 minutes coming on his amendment to my amendment, and I have 5 minutes.

Mr. EAGLETON. Then we have 5 minutes and——

Mr. STEVENS. The agreement is that there are 5 minutes on each side before

any vote occurs on these three amendments.

Mr. DURKIN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DURKIN. What amendment are we discussing?

The PRESIDING OFFICER. The Senator from Alaska has just called up amendment 501, which the clerk just read.

The Senator from Alaska is recognized.

Mr. STEVENS. Let me temporarily recall that. I had forgotten that the Senator from New Hampshire wished to participate in discussion on amendment 500. Let me call up amendment 500.

I withdraw amendment 501 temporarily.

The PRESIDING OFFICER. The amendment is laid aside.

AMENDMENT NO. 500

The PRESIDING OFFICER. The clerk will report amendment No. 500.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes amendment No. 500.

Mr. STEVENS. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 58, strike out line 14 and all that follows through line 4 on page 59, and redesignate the following sections accordingly.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senator from Alabama (Mr. ALLEN) and the Senator from New Hampshire (Mr. DURKIN) be added as cosponsors to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I thank the Senator from Mississippi and I thank the Chair.

Mr. President, the amendment I have offered would delete the provision limiting Wage Board entrance salaries and ingrade step increases of Wage Board employees. This limitation was in the House bill as reported from the House Appropriations Committee, but was deleted on the House floor. The Senate Appropriations Committee never discussed this amendment. In fact, a less restrictive amendment, which would have limited Wage Board salary increases to 3 percent a year was defeated in subcommittee at my request.

The Senate report is silent on the reasons for including this restriction. The House report, however, stated:

The Committee cannot, through the Appropriations process, fully address the complex problems involved in wage board reform.

I agree that we cannot solve this complex matter by adding one paragraph of legislative language to the defense appropriations bill. Moreover, as a member of the Governmental Affairs Committee, which was jurisdiction in this area, I can assure my colleagues that the committee will be reviewing the entire situation during the next session of Congress. Additionally, the Post Office and Civil Service Committee in the House has already begun hearings on Wage Board reform.

Let me briefly outline the reasons this limitation should be removed from the Department of Defense appropriations bill:

This provision would deny funds appropriated under this act to pay the full salary for certain blue-collar Federal workers who are not provided for under existing law. It would apply only to those blue-collar workers who happen to be working for the Defense Department; Federal workers under the jurisdiction of all other departments would receive the full salary as now provided by law.

Those supporting the legislative provision now contained in this appropriations bill might point out that the language only restricts the use of funds to pay 100 percent of the local prevailing wage, and so we are just insuring Federal comparability with local rates. The problem with this argument is that local prevailing rates are based on averages.

Obviously, in private industry, some will be paid more than the average rate, and some will be paid less—depending on the experience of the individual and his skill level. The provision contained in this bill would insure that the Department of Defense would have available to it only the labor pool of the average low-skill workers. Experienced, highly qualified blue-collar workers will most certainly leave the Federal service to seek the better paying jobs which will be available in the private sector.

Another inequity that this provision would impose is that it limits a defense employee to a local wage that may be far, far below the wage that prevails in the particular industry—such as the aircraft industry. Our concern is this area should not be in meeting the local average wage as in being competitive with wages that prevail in any given industry. That is what the Monroney amendment recognized and provided for, and that is what this language would vitiate. It would return us to a situation in which the Government cannot retain highly skilled workers because those workers can find and will move toward positions in the private sector where they can command better wages.

For those workers who would remain with the Defense Department there would be absolutely no incentive to perform the job efficiently or effectively since they could not advance beyond the capricious and arbitrary limit that section 852 would impose.

Finally, Mr. President, for those blue-collar workers who are now making more than the average local rate, they would be denied any salary increase whatsoever until such time as the average local rate exceeded their current salary. For some long-term Federal employees, it might be 5 years or more that they would be forced to go without a pay increase if we allow this language to remain in the bill.

Let me repeat, Mr. President, the Defense Appropriations Subcommittee defeated an amendment which would have restricted Wage Board employees to a 3-percent annual salary increase. This limitation is more restrictive and more onerous and, therefore, I would hope that the Senate will accept my amendment to delete section 852 from the bill.

Mr. President, I will go into this matter in greater detail later.

I ask the Senator from New Hampshire how much time he would like to have.

Mr. DURKIN. Two minutes.

Mr. STEVENS. I yield to the Senator from New Hampshire 2 minutes at this time.

Mr. DURKIN. Mr. President, I thank the Senator.

Mr. President, I rise in support of this important amendment which I am cosponsoring with my friend and colleague from Alaska (Mr. STEVENS). The Wage Board salary provision in the Department of Defense appropriation bill is both unfounded and unwarranted, and will have a discriminatory impact on blue-collar Federal workers. In my own State of New Hampshire, we have the Portsmouth Naval Shipyard and the blue-collar workers at the shipyard do excellent work, particularly in the area of overhaul and conversion of nuclear submarines. Our amendment will delete this discriminatory provision from the appropriation bill, and allow the full salary levels to be provided the hard-working blue-collar Federal employees at PNSY and across the Nation.

Section 852 of the reported bill has the effect of placing severe limitations on the pay of blue-collar employees in the Department of Defense. This provision will create unjust and unreasonable conditions for the hourly-paid employees of the Department of Defense. Further, section 852 will create limitations on defense employees that do not apply to similar employees who work in other agencies. It will allow a person of similar skills to be paid more than an individual working for the Department of Defense. In this way, the provision will not allow for like workers to receive like pay.

It is the blue-collar workers who are most hurt by inflation and have the most difficulty as far as their wage situation is concerned. The step increases in wages are the only means by which many persons in the blue-collar establishment can get promotions. Yet, section 852 of the appropriation bill severely limits these step increases, creating an additional burden for this financially hard-pressed group of workers.

By placing a limitation on the step increase in wages, the end result will be that a Federal installation will employ and train a skilled person, and that person will later move to take the same type of job in another area. The Federal Government will not be able to retain these highly skilled workers, because these workers will be able to find other jobs which can offer better wages and benefits. In this way, the Government will lose all its investment in the training of that person.

The blue-collar workers at the Portsmouth Naval Shipyard have already been forced to suffer economically due to the arbitrary civilian manpower ceilings. The shipyard has a sufficient amount of overhaul and repair work to employ additional blue-collar workers,

but for the civilian manpower ceilings. Like many of the defense industrial and commercial activities, the Portsmouth Naval Shipyard has the capacity and ability to handle more work if not for the limitation on industrially funded civilian manpower in the Department of Defense manpower ceilings. As I argued during the debate on the military construction appropriation bill, the imposition of the end-strength ceilings has resulted not only in decreased efficiency of operation but also in a severe economic hardship for workers who may be dismissed periodically in order to meet the ceilings. We should not place an even greater burden on Federal blue-collar workers through limiting wage board salary increases.

Finally, let me add that this is a complex topic which will affect the lives of many of the workers of the Nation. Such an important subject should not be considered as part of this appropriation bill.

I urge my colleagues to join me in supporting this amendment.

I thank the Senator from Alaska.

Mr. STEVENS. I am happy to have the Senator as a cosponsor.

How much time does the Senator from Maine need?

Mr. HATHAWAY. Two minutes.

Mr. STEVENS. I yield to the Senator.

Mr. HATHAWAY. Mr. President, I rise in support of the pending amendment offered by the Senator from Alaska (Mr. STEVENS). This amendment would strike from the bill language contained in section 852 which would prevent the pay of any wage board employee from exceeding the prevailing local wage rate in the area in which he works.

At first glance this language might seem desirable to some as fostering cost-cutting. But, in fact, the committee language is discriminatory and would result in an inequitable treatment of a great number of Department of Defense blue-collar workers.

Since the measure before us today can only affect the utilization and disbursement of funds available to the Department of Defense and its subsidiary departments, adoption of the committee language would have the discriminatory result of allowing blue-collar workers in all civilian departments to continue to benefit from the procedures and policies contained in title 5 of the United States Code, while prohibiting their colleagues employed by the Defense Departmentment from enjoying equal treatment.

At the same time I am most concerned that the committee language would in reality raise personnel costs of DoD over the long run and in fact achieve exactly the opposite of the result the committee purportedly intends.

The structure of title 5 of the United States Code has the past several years allowed specified employees performing certain highly skilled jobs to be paid somewhat more than the prevailing wage rate for their area This results from the language of the Monroney amendment adopted a number of years ago which endorses such payment if the specified employees possess such skills and talents as to make a local wage rate inapplicable or inappropriate.

In such situations, the employee must instead be paid a wage equivalent, and I stress the word equivalent, to that paid to comparable workers with comparable skills in the private sector in other parts of the country.

Let me cite an example to demonstrate the workings of the Monroney amendment and the impact which the committee language would have.

For example, certain employees charged with the responsibility of maintaining and overhauling our Nation's naval fleet are necessarily highly skilled. They must be familiar with extremely sophisticated electronics equipment and other state-of-the-art technology. They represent, through their experience and talents, a resource to our national defense capability and mobilization base.

In this regard, from my own personal knowledge, I am thinking of the employees of the Kittery Naval Shipyard located in Kittery, Maine, with some functions occurring in Portsmouth, N.H.

A number of these employees, under the Monroney amendment, have been paid wages higher than the prevailing local wage rate, because their skills are not found in the private sector and because it is in the national interest to pay these employees a higher rate.

The Appropriations Committee language in section 852 would freeze such employees at their current rate, and prevent them from receiving any future raises until the local wage pool caught up with their frozen rate.

To some this may appear to be desirable cost-cutting. But in fact, it would greatly raise Government costs and in the long run achieve exactly the opposite of that which it intended.

These employees, so adversely affected, would be forced to seek alternative employment in the private sector in other parts of the country where they would receive pay commensurate with their skills.

As a result, the Government facility would be forced to seek and train, at great expense, new personnel to fill their places. The cycle would no doubt continue in future years. The taxpayers would be poorly served by such a policy, and we would be ill-advised to adopt the committee language for this reason.

Further, the committee langauge, in my view, undermines the structure of this body in attempting to achieve, by way of limitation on an appropriation bill, that which properly is the concern of an authorizing committee, in this case the Committee on Governmental Affairs. That committee is charged now with the overall supervision of the civil service system, and properly should be the committee which undertakes any action in this area.

I do not doubt that there is some need for reform of the wage structure of Federal employees. Perhaps there are some positions and skills subject to the provisions of the Monroney amendment which should not be, and no doubt this provision results in some Federal employees being paid more than good management principles, and equity with their colleagues in the private sector would dictate.

But these are the type of issues which ought to be examined in detail by the appropriate committee and not adopted helter-skelter without adequate study. To adopt the appropriate committee language would in effect wipe out the Monroney amendment which is valid in principle.

On June 30 of this year, the House of Representatives made this determination, and by a division vote to strike this language.

I would, therefore, urge my colleagues to support the pending amendment to strike the committee language and thereby give us the opportunity to study these issues in more detail, without discriminating against our valuable defense workers.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, what time is left?

The PRESIDING OFFICER. The Senator has 3 minutes remaining.

Mr. EAGLETON. Mr. President, the Senator from Mississippi has left the floor, but he assigned his time to me. I yield myself such time as I may consume.

Mr. President, I rise in opposition to this amendment, and in support of section 852 of the committee bill. The blue collar wage board determination process has a long history. The need for reform of the process is well known and well recognized. Last year, the Committee on Appropriations fully described the problems and proposed reforms in the system. I would simply like to summarize the worst features of the present system as pointed out by this committee, the House Appropriations Committee, the Defense Department, the Civil Service Commission, the General Accounting Office, and the Rockefeller Panel special report to the President on Federal Compensation.

Just let me say in a nutshell, the House Appropriations Committee, the Defense Department, the Civil Service Commission, the GAO, and the Rockefeller panel, all agree with the position the Committee has taken, and all, in essence, run counter to what the Senator from Alaska is suggesting.

As a result of present law, the Government is legally required to pay wages greater than those being paid for comparable jobs in private industry.

Although the law requires the Government to equate the average wage in the private sector to step 2 of the Federal wage system, the average step in the Department of Defense is 3.7.

There is a single night shift premium wage applicable nationwide; no attempt is made to relate night shift differentials to local practices. In the majority of cases, the uniform differential substantially exceeds local practices.

The Monroney amendment (5 U.S.C. 5343(d)) requires local prevailing rates to be based on wage rate data from outside the local area in certain cases. This is contrary to the prevailing rate premise, and in fact results in Federal employees in many local areas earning more than their counterparts in the private sector.

These, Mr. President, are four, as I raise them, of the most telling points as to why the committee position should be supported.

In essence, the sum is that the blue collar worker in the Federal Government is consistently getting higher wages than that being paid in a comparable private industry position.

Mr. President, I ask unanimous consent to have printed in the RECORD at the conclusion of my remarks appropriate extracts in this subject from last year's Senate committee report as well as this year's House and Senate Appropriations Committee, as well as extracts from the report of the President's panel on Federal compensation, and the General Accounting Office report entitled "Improving The Pay Determination Process For Federal Blue Collar Employees."

The PRESIDING OFFICER (Mr. NUNN). Without objection, it is so ordered.

(See exhibit 1.)

Mr. EAGLETON. I think there is a very clear case that we must ask now to bring some sense to the blue collar pay determination process. While it is true that this provision only affects DOD employees, they account for over 70 percent of all Federal blue collar workers. Reform begun in this bill can be completed in others, and reform is exactly what is being proposed by section 852.

This section will prevent the hiring of employees at any step above step 2—100 percent comparability level—or promoting employees above this step who are hired after December 31, 1977. This provision will not reduce the salary of anyone employed in a Federal wage board position prior to December 31, 1977.

There is a further and compelling reason to reject this amendment and support the pay reform embodied in the committee bill. The bill as reported would result in outlays totaling $101.5 billion. That is the outlay figure of the defense bill as reported. There is a further amount of $2.3 billion for military and civilian pay raises that the Department of Defense will be submitting in a supplemental next January. Even assuming that a partial reduction can be made in that $2.3 billion, outlays for matters under the Defense Subcommittee are likely to be at or greater than the Appropriations Committee's allocation of $103.7 billion under the first concurrent budget resolution. This amendment will result in the expenditure of an additional $300 million, thereby breaking the budget outlay allocation totals. I do not believe it would be wise to do that at this time. Therefore, I support the committee's position.

I strongly urge my colleagues to vote against this amendment.

Mr. President, I ask unanimous consent to have printed in the RECORD a document supplied us by the Navy which shows that in many instances the blue collar wage board employee is making a higher salary than his supervisor; that there have been situations in which blue collar people have moved into white collar supervisory situations and say they were not going to get as high a salary as they once had been making, and have gone back to a blue collar position. The salaries being paid, I repeat, are not comparable with those in private employment on the outside. They are in excess of that, and this is an area in which the committee has decided we should trim the budget. I fully concur with the committee's recommendation.

I reserve the remainder of my time.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Provide specific details for the record, by shipyard if possible, of white collar supervisory salaries compared with present blue collar salaries, demonstrating that at some point, the white collar supervisor finds it more economically attractive to revert to blue collar.

Answer. The information follows for four West Coast yards:

Supervisory level	Annual salary: Graded 4th step [1]	Ungraded: 2d step [1]	Ungraded: 4th step [2]
Long Beach Naval Shipyard:			
GS–11	$18,763		
WS–13		$21,674	
GS–12	22,485		
WS–14		22,506	
WS–13			$23,400
WS–15		$23,483	
WS–14			$24,315
WS–15			25,355
GS–13	$26,738		
Mare Island Naval Shipyard:			
GS–11	18,763		
WS–12	22,485		
WS–13		23,317	
WS–14		23,962	
WS–15		24,710	
WS–13			25,189
WS–14			25,875
WS–15			26,686
GS–13	26,738		
Puget Sound Naval Shipyard:			
GS–11	18,763		
WS–13		22,048	
GS–12	22,485		
WS–14		22,859	
WS–15		23,774	
WS–13			23,816
WS–14			24,690
WS–15			25,667
GS–13	26,738		
Pearl Harbor Naval Shipyard:			
GS–11	18,736		
GS–12	22,485		
WS–13		23,546	
WS–14		24,357	
WS–15		25,272	
WS–13			25,438
WS–14			26,312
GS–13	26,738		
WS–15			27,290

[1] Denotes representative rates for comparison purposes between wage board and graded.

[2] Denotes actual average grade of employee in wage board status.

An example of a situation where the white collar supervisor would find it economically more attractive to revert to blue collar status, which is typical of all the yards, is shown below:

A GS–12 white collar supervisor (e.g., a Supervisory Production Controller) frequently will supervise a WS–13 step 4 (blue collar). The GS–12 salary at all the yards in this example is, however, below the WS–13 level. Hence it becomes economically attractive for the GS–12 to revert to WS–13 (step 4), a position for which he would be qualified. Thus at the GS–12 level, there is an incentive to assume the less responsible position of the WS–13. In numerous instances the GS–12 supervises even a WS–14 or WS–15 blue collar type which is even more inequitable.

EXHIBIT 1

EXTRACT FROM SENATE REPORT 95–325 ON 1978 DEFENSE APPROPRIATIONS

SECTION 852—WAGE BOARD SALARY REFORM

In its report on Defense Appropriations last year (S. Rept. 94–1046, pp. 53–56) the Committee strongly urged that action be taken to implement proposals for reform of the Blue collar (wage board) pay system that were recommended by the Administration, the Rockefeller (Presidential) Commission, and the General Accounting Office. It is the committee's understanding that no action has been taken on these proposals by the legislative committees. Accordingly, the committee recommends inclusion of a general provision that will prevent the pay of any wage board employee from exceeding the prevailing rate in the local area in which he works. This provision will not result in a reduction in salary of any employee, but will prevent any pay increases from taking effect for any employee until the prevailing rate in the private sector for that employee has "caught up" with his salary.

It is estimated that this general provision will save approximately $300 million in fiscal year 1978. These savings will be in funds that otherwise would need to be appropriated in the 1978 pay supplemental to be submitted next January.

EXTRACT FROM HOUSE APPROPRIATIONS COMMITTEE REPORT NO. 95–451, 1978 DEFENSE BILL

WAGE BOARD SALARY REFORM

A Presidential commission has recommended major changes in the laws that govern pay of federal Wage Board employees. The changes would keep federal blue collar wage rates equal to average private wages. These changes proposed by the President's Panel on Federal Compensation would save federal taxpayers $660 million per year in current dollars. It has been estimated that $540 million of this savings would occur in the DOD budget, which contains over $6 billion for Wage Board employees' salaries. In addition, these reforms would take away much of the impetus to commercial contract by Defense services.

The President's Panel on Federal Compensation (Rockefeller Commission) and a General Accounting Office study both recommended major changes in this law. According to the Rockefeller Commission, the current law causes "significant departures from the local prevailing rate principle," which result in "an unfair competitive advantage for the Federal Government, and unjustifiable payroll costs."

There are a number of aspects embodied in the Wage Board Reform proposals. They include bringing the average step at which employees are actually paid in line with the step (step 2) at which comparability with civilian wages is established. As of June 30, 1975, the average step for DOD employees equalled step 3.7 and is probably at 4.0 or higher at the current time. This is equivalent to paying an 8 percent premium.

A provision added to the basic law (5 U.S.C. 5343) in 1968 referred to as the Monroney Amendment permits the importation of wage rates from one area to another under certain circumstances. This often results in federal wages in small cities and rural areas being based in part on higher prevailing wage rate found in larger cities. In addition, the imported data is never used if it will lower wages. Other inequities in the Federal Wage Board procedures include a nationwide differential for night shift work and the exclusion of state and local government workers wages from the wage surveys.

The Committee cannot, through the appriations process, fully address the complex problems involved in wage board reform. However, the Committee feels that as a part of the proposal to protect the jobs of many federal employees it is required to sharply limit the practice of contracting for services provided by these employees. To accomplish this some steps should also be made in the direction of wage board reform. It is hoped that this proposal will also encourage the appropriate legislative committees of the Congress to take some action on this matter. Thus, the Committee has inserted a general provision, Section 853, in the bill which will prevent the hiring of employees at any step

above step 2 (100 percent comparability level) or promoting employees above this step who are hired after December 31, 1977. This provision will have no effect on anyone employed in a federal wage board position before December 31, 1977. This proposed general provision reads as follows:

SEC. 853. None of the funds appropriated by this Act shall be available after December 31, 1977, for the pay of a prevailing rate employee, as defined in section 5342(a)(2), (A)–(B) of title 5, United States Code, that is greater than 100 percent of the prevailing rate determined under section 5343 of title 5, for the grade in which he is serving: *Provided*, That the pay of a prevailing rate employee who was employed on or before December 31, 1977 shall not be reduced by this limitation below that to which he was entitled based on his rate of pay on December 31, 1977 if the employee—

(A) continues to be employed after December 31, 1977 without a break in service of one work day or more; and

(B) is not demoted or reassigned for personal cause, or at his request.

EXTRACT FROM SENATE REPORT 94–1046 ON 1977 DEFENSE APPROPRIATIONS BILL

FEDERAL WAGE SYSTEM EMPLOYEES OF THE DEPARTMENT OF DEFENSE

The Department of Defense employs over 350,000 Federal Wage System (blue collar) employees at a cost in excess of $5.7 billion in fiscal year 1977. Total Federal wage system employees in the U.S. Government is about 480,000 with basic payroll costs of approximately $7.8 billion. DOD is, therefore, the largest employer of this type of personnel.

DESCRIPTION OF SYSTEM

Rates of pay for Federal Wage System employees are maintained in line with prevailing rates of pay for comparable work within each local wage area. Within each local wage area there is a single set of wage schedules applicable to the blue-collar employees of all agencies in the area. Each non-supervisory regular schedule consists of 15 grades with each grade having five steps. A single grade structure applies nationwide. Individual positions are graded on the basis of job evaluation in accordance with a uniform set of job-grading standards. There are separate leader and supervisory schedules for each area.

Uniform policies and procedures for the Federal Wage System are established by the Civil Service Commission, but significant roles in policymaking and operation of the system are played by both agencies and employee unions.

The prevailing rate principle on which Federal blue-collar pay rates are based dates from the 1860s. While there have been many changes in blue-collar pay setting since then with respect to occupational and agency coverage, agency authorities, and administrative procedures, the basic principle is over 100 years old.

The principal result of the pay rate determination process for blue-collar employees has been pay raises that have significantly exceeded those in the general schedule over the past 6 years. During the past 3 years, the wage board increases have been nearly double the general schedule increases as shown on the following table.

Average annual increases in pay raises for Federal employees

[In percent]

Fiscal year:	General schedule[1]	Wage system (blue collar)
1971	6.0	8.7
1972	5.5	6.5
1973	5.1	5.7
1974	4.8	[2]10.2
1975	5.5	8.9
1976	5.0	[3]9.5

[1] Increases granted in October of the fiscal year concerned.

[2] Includes about 4 percent caused by removal of wage price controls and "catch-up."

[3] Composite estimate of increases provided to the Committee during hearings on the fiscal year 1976–DOD Supplemental estimates.

INEQUITABILITY OF PRESENT SYSTEM

The Committee believes that, as a result of present law, the Government is now legally required to pay wages greater than those being paid for comparable jobs in private industry.

As of June 1975, 74 percent of Federal blue-collar employees were in the upper three of the five Wage Board pay step levels. The average step in the Department of Defense is 3.7. Yet the law requires the Government to equate the average wage found in the private sector to Step 2 of the Federal Wage System. Steps 3, 4, and 5 receive wages, 4, 8, and 12 percent respectively, higher than the average private sector rate. Thus, on the average, Federal blue-collar civilians are paid more than their counterparts in the private sector.

The Federal Wage System has a single premium wage or night shift differential applicable nationwide. No attempt is made to relate night shift differentials to local prevailing practices. In the majority of cases, the uniform differential exceeds local practices substantially, resulting in Federal employees earning more than their counterparts in the private sector.

The Monroney Amendment (5 USC 5343 (d)) requires local prevailing rates to be based on wage rate data from outside the local area when it is determined that there is insufficient specialized industry in the local area. This concept of using out of area rates is contrary to the basic prevailing rate premise on which the Federal Wage System is based. It is not necessary to find matches for every Federal occupation in a wage area in order to establish an equitable wage schedule. Private firms follow reasonably consistent patterns in setting wage relationships among kinds and levels of work. Similar relationships are followed in the federal service by grouping jobs doing the same level of work and aligning them in a uniform grade pattern. It is only necessary to obtain a reasonable sample of local industry rates in order to identify prevailing levels of pay and relate them to the Federal grade structure The result, once again, is that, in those cases, Federal employees in the local area earn more than their counterparts in the private sector.

PROPOSED REFORMS

These inequitable practices of the Federal Wage System were pointed out in the recent report of the Rockefeller Commission ("Report to the President of the President's Panel on Federal Compensation," December 2, 1975), and a General Accounting Office Report (FPDC 75–122) "Improving the Pay Determination Process for Federal Blue-Collar Employees," June 3, 1975. The Rockefeller Commission recommended that substantial changes be made in the Federal Wage System. These recommendations were consistent with earlier, similar recommendations made by the Comptroller General in the reported cited. The Rockefeller Commission's recommendations were as follows:

The requirement that, under certain circumstances, local wage rates will be set in consideration of survey data from outside the area should be repealed.

The provision for uniform percentage night shift differential should be amended to provide that such differentials be established in accordance with prevailing practices in each wage area.

The requirement that each grade of a regular wage schedule have five steps should be amended to provide that step-rate structures be established in accordance with the predominant industry practice on a nationwide basis.

The requirement for a fixed payline step should be amended to provide for wage schedule adjustments on the basis of comparisons between average rates in industry and average rates being paid to federal wage employees.

The present restriction of wage surveys to private enterprise only should be amended to permit the inclusion of state and local governments whenever necessary to obtain adequate samples and appropriate job matches.

On March 2, 1976, the administration submitted a legislative package that would effect the reforms discussed above. In the letter of transmittal, the Chairman of the Civil Service Commission states.

"We urge early enactment of this important proposal, which is essential to assure that the taxpayer's burden for compensation of Federal wage employees is limited to that which is fully warranted by prevailing practices."

IMPACT ON DEPARTMENT OF DEFENSE APPROPRIATIONS

Naturally, since DOD contains over 70 percent of the blue collar employees in the Federal government, the proposed reforms have a significant impact on DOD appropriations. The Department estimates that implementation of the proposed legislative package will save $437 million in fiscal year 1977. The net savings in fiscal year 1977 amount to only $337 million, since the proposal involved a 3 percent minimum wage increase for all employees notwithstanding the reform measures. The savings in later years resulting from this proposal are very significant. They have been estimated by the Defense Department to be $871 million in fiscal year 1978, $1,331 million in fiscal year 1979, $1,553 million in fiscal year 1980, and $1,641 million in fiscal year 1981. Aggregate savings, fiscal year 1977 through 1981, therefore, will total $5,733 million if the reforms are enacted.

COMMITTEE RECOMMENDATION

The committee urges the appropriate legislative committees to take action on these proposals in time for their speedy adoption. The committee seriously considered including a limitation in this bill that would have prevented blue collar wage increases from exceeding 3 percent in fiscal year 1977 (it is estimated they will be approximately 8.8 percent based on present law). However, the committee decided that since most of the funding required for the pay raises is not being requested in this bill, but rather will be submitted along with the fiscal year 1977 pay supplemental, it would defer action on such a limitation at this time.

The Department of Defense is placed on notice, however, that even though the President's proposed legislation changing the wage board pay raise determination process has not yet been acted upon, the committee expects that the funds included in this bill, plus the $35 million included in the President's budget contingency estimate (to be transmitted in the fiscal year 1977 supplemental), will fully fund the blue collar payroll in fiscal year 1977. Any shortfall in funding is to be made up through civilian strength reduction.

REPORT TO THE PRESIDENT OF THE PRESIDENT'S PANEL ON FEDERAL COMPENSATION, DECEMBER 1975

THE VICE PRESIDENT,
Washington, December 2, 1975.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: In response to your memorandum of June 12, 1975, I submit

herewith, on behalf of all the Members, the report of the Panel on Federal Compensation. We have kept in mind your primary objective of "a system that is fair and equitable, both to the employees and to the public."

The findings and recommendations of the Panel are presented in this volume. Background information, summaries of comments received, alternatives considered, and similar materials which provide support for the Panel's recommendations, are in a supplementary volume.

Some of the recommendations can be implemented administratively; others will require legislation to be effected. Before implementation of any of the recommendations, additional consultation with interested parties.

We wish to acknowledge the assistance provided by prior studies of Federal compensation by the U.S. Civil Service Commission, the General Accounting Office, and the Congress, as well as the hundreds of letters containing the comments of State Governors, labor unions, private employers, professional associations, Federal employees, and the public:

Respectfully,
NELSON A. ROCKEFELLER, *Chairman.*

SUMMARY OF RECOMMENDATIONS

The full texts of the recommendations summarized below can be found in the indicated chapters. Those recommendations which will require legislation are indicated by an asterisk.

The many separate Federal civilian pay systems should be reviewed, and combined with other pay systems or eliminated if no longer needed (Chapter I).

The principle of comparability with the private sector should be reaffirmed as the basis for Federal pay-setting (Chapter II).

Consideration should be given to conducting major Federal pay surveys less frequently than once a year, with interim adjustments based on an appropriate statistical indicator (Chapter II).

The principle of comparability should be extended to include benefits as well as pay. Development and testing should take place over the next two years to determine the best approach to implementation (Chapter II).

The present General Schedule, which covers white-collar employees, should be replaced by a Clerical/Technical Service and a Professional/Administrative/Managerial/Executive Service (Chapter III).

The Clerical/Technical Service should be paid local or other geographical rates (Chapter III).

The executive branch should be authorized to establish special occupational schedules and personnel systems when the regular schedules hamper management's ability to recruit and manage a well-qualified workforce (Chapter III).

Merit, rather than length of service, should be the principal basis for within-grade pay advancement for employees in the Professional/Administrative/Managerial/Executive Service (Chapter III).

Pay rates for the Executive Schedule should be increased so that the rate for level V is above the current "comparability" rate for GS-18 (Chapter IV).

Federal pay laws should be amended to permit the inclusion of State and local governments in Federal pay surveys when needed (Chapters V and VI).

The President's Agent should continue its efforts to improve the statistical techniques used in the white-collar survey design and pay rate determination processes (Chapter V).

Certain statutory provisions of the Federal Wage System should be repealed or amended to: eliminate the requirement that out-of-area data be used, under certain circumstances, in setting local wage rates; permit the establishment of night shift differentials in accordance with local prevailing practices; permit step-rate structures to be established in accordance with predominant industry practice; eliminate the fixed payline step; and permit the inclusion of State and local governments in wage survey when needed (Chapter VI).

The Civil Service Commission should develop appropriate legislative and regulatory proposals to provide more equitable premium compensation to all Federal employees working under similar circumstances (Chapter VII).

The President's Agent, the Federal Employees Pay Council, and the Advisory Committee on Federal Pay should meet jointly on a regular basis throughout the year to discuss and resolve the issues in the pay-setting process, with a view to formulating a common recommendation to the President (Chapter VIII).

The present roles in the pay-setting processes of the Federal Wage System should be continued (Chapter VIII).

The Advisory Committee on Federal Pay should be assigned the responsibility for an ongoing review of the interaction between the Federal compensation system and the private sector marketplace (Chapter VIII).

[Report to the Congress, Civil Service Commission, Department of Defense, Veterans Administration]

IMPROVING THE PAY DETERMINATION PROCESS FOR FEDERAL BLUE-COLLAR EMPLOYEES

(By the Comptroller General of the United States, June 3, 1975)

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, D.C.

To the President of the Senate and the Speaker of the House of Representatives:

This report discusses the ways in which the pay setting process for Federal blue-collar workers can be improved to insure closer pay comparability with the non-federal sector. These improvements will require changes in certain legislative provisions and administrative policies and practices. The agencies involved agreed with most recommendations contained in the report, and the Civil Service Commission plans to draft legislative proposals to revise some statutory provisions.

We made our review pursuant to the Budget and Accounting Act, 1921 (31 U.S.C. 53), and the Accounting and Auditing Act of 1950 (31 U.S.C. 67).

We are sending copies of this report to the Chairman, Civil Service Commission; the Secretary of Defense; the Administrator of Veterans Affairs; and the Director, Office of Management and Budget.

ELMER B. STAATS,
Comptroller General of the United States.

DIGEST

The law provides that pay rates for Federal blue-collar employees—about 475,000—be fixed and adjusted from time to time, by administrative action, in accordance with local prevailing rates.

LAWS PREVENTING ATTAINMENT OF COMPARABILITY

However, Federal blue-collar wage rates often exceed local prevailing rates, putting the Government at a competitive advantage in the labor market. This situation arises because of the following legislative provisions.

The Federal pay range at each non-supervisory grade is 16 percent with five equal steps. In contrast, most private sector employees are paid under single-rate pay schedules. When multiple-step schedules exist in the private sector, many have fewer steps than the Federal system. The second Federal step is equated to the prevailing private sector rate, but most Federal employees moved to the fifth step in May 1975—placing them 12 percent above market.

Under certain conditions private sector wage rates used in setting Federal rates may be based on private rates of other localities.

Federal night differentials are based on a percentage of employees' scheduled wage rates. This often results in a more generous differential than the prevailing private sector differential.

To insure that the legislative pay principle of comparability is attained, the Congress may wish to reconsider these legislative provisions.

MORE REPRESENTATIVE SURVEY COVERAGE NEEDED

Annual surveys are made of private industry wages in 137 geographic areas. State and local governments are excluded by law and certain segments of the private sector by administrative action.

To insure that wage data is sufficiently representative of local prevailing wages, the Congress may wish to consider allowing State and local governments to be included in the survey process. Also, the Chairman of the Civil Service Commission should:

Expand wage surveys to cover the broadest feasible universe of private sector establishments.

Reassess periodically and adjust as necessary wage and survey area boundaries.

Require appropriate agencies in areas having a specialized Government industry to determine whether sufficient applicable industry exists in the entire wage area before going outside of the area for wage data.

Require that the predominant Federal jobs in each wage area which have comparable private industry jobs be surveyed in addition to the required jobs.

IMPROVING DATA COLLECTION PROCESS

Teams of Federal employees, selected from the local area, match private sector jobs with descriptions of Federal jobs and collect private sector wage rates for the jobs. It is likely that many errors have been introduced into the wage data because of fundamental weaknesses in collection techniques.

To improve these, the Chairman of the Civil Service Commission should:

Establish a permanent body of carefully selected and thoroughly trained full-time collectors to minimize errors.

Establish additional quality controls on the data collection process.

The Civil Service Commission, Department of Defense, and Veterans Administration generally agreed with most of the recommendations.

Mr. BUMPERS. Mr. President, will the Senator yield for a question?

Mr. EAGLETON. Yes. I do not know how much time I have. Is the Senator supporting my position or opposing it?

Mr. BUMPERS. I do not know. That is why I want to ask questions.

Mr. EAGLETON. If the Senator is going to ask unfriendly questions, I suggest he do it on the time of the Senator from Alaska.

Mr. BUMPERS. What if I am ambivalent and do not know how I am going to vote?

Mr. EAGLETON. Mr. President, I ask unanimous consent that 3 minutes be allocated to the distinguished Senator from Arkansas, without the time being charged to either side.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BUMPERS. In my ambivalent mood, let me ask the Senator a very pointed question. Does this mean that the people who presently are employed will be frozen until the prevailing wage rate in the area reaches their present wage rate?

Mr. EAGLETON. Yes.

Mr. BUMPERS. What effect does the Senator think that will have on the morale of blue collar workers, and how long would he anticipate that taking?

Mr. EAGLETON. The question of morale crops into all of the debate we have had this morning. If we take away the commissary subsidy, the Senator from Alaska says that will affect morale. If we try to bring comparability to wages being paid blue collar workers, on the military base, as compared to those working outside the base, that is going to affect morale.

The point is that the Defense budget is under considerable pressure for reduction, and if we do not pick these areas of excess, I do not know where we will ever cut the budget.

This morale factor can be raised in a host of areas—double dipping, military retirement at 20 years, and others. By the way, the Department of Defense opposes the Stevens amendment, as do a whole host of other agencies. They obviously have taken morale into account.

Mr. BUMPERS. Nobody takes a cut under this bill. Is that correct?

Mr. EAGLETON. Yes, that is correct.

Mr. BUMPERS. No. 2, I come from a low per capita income State. However we want to gage it, the point is that it would mean that people who work as blue collar workers for the Department of Defense will be stuck with whatever that low per capita income is, that low prevailing wage rate.

Mr. EAGLETON. If the prevailing rate is higher, it would not have the negative impact that the Senator from Arkansas has just described.

The PRESIDING OFFICER (Mr. NUNN). The 3 minutes of the Senator have expired.

Mr. INOUYE. Mr. President, will the Senator from Alaska yield for a few questions?

Mr. STEVENS. I will be happy to do so.

Mr. INOUYE. Is not this problem presently under very intensive study by the GAO?

Mr. STEVENS. It is, and it is also under study by the legislative committees. This is legislation in an appropriations bill. The House Committee on Post Office and Civil Service is working on the problem, and the Senate Governmental Affairs Committee has announced that it will work on the problem next year.

The difficulty with this amendment is that it covers only blue collar people in the Department of Defense. All other blue collar people working for the Federal Government would continue to be available for their wages. It is very discriminatory against the Department of Defense blue collar people.

Mr. INOUYE. Is the Senate committee having jurisdiction over labor activities concerned about this section?

Mr. STEVENS. As I understand it, this would come under the joint jurisdiction of the Senate Labor Committee and the Governmental Affairs Committee. As I said, the Governmental Affairs Committee has announced that it will take it up following action by the House Committee on Post Office and Civil Service.

We are concerned about this. It is a very discriminatory way to deal with the problem. The reason is that the incoming "new hires" would be able to get increases until they reached the average wage.

The Senator from Missouri is talking about average wages. What it means is that once you reach the average wage, the comparability wage for the area, based on seniority or any merit increases or anything else, you are frozen. So we have frozen Federal employment in the blue collar level for the Department of Defense to the average wage. You can hire all the bright new ones you want and give them raises up to the average; but once you reach the average, you are not entitled to any raise until the comparable wage for an average wage for the area increases. It means that there is no incentive to stay, once you reach the average wage in the blue collar field in the Defense Department. It is counterproductive.

There is a way to deal with it, we think, and we are trying to work on it in the legislative commitees. I did not know this was in the bill. The committee, as the Senator will recall, struck out the provision and limited these increases to 3 percent. I did not realize this other provision was in there, or I am certain the committee would have stricken it at the same time.

Mr. INOUYE. I thank the Senator for his response and his clarification. I believe his position is just, and I hope the Senate will support it.

Mr. BUMPERS. Mr. President, will the Senator yield for a question?

Mr. STEVENS. I yield.

Mr. BUMPERS. That is what the Davis-Bacon Act is all about, for example.

Mr. STEVENS. Yes.

Mr. BUMPERS. To make certain that the prevailing wage rate in an area prevails in Federal construction jobs. If that is fair under the Davis-Bacon Act, why is it not fair for blue collar workers in the Department of Defense?

The PRESIDING OFFICER. The time of the Senator from Alaska has expired. The Senator from Missouri has 3 minutes remaining.

Would you like to answer that question, the Senator from Missouri?

Mr. EAGLETON. Yes. I thought it was an excellent question deserving an answer. The whole question, if I may point out to my colleague from Arkansas, is whether the wages paid to the people under the Wage Board pay system ought to be comparable to what is paid private civilian blue collar employees in the immediately adjacent geographic area. In many, many instances the rate of pay being paid to Federal blue collar workers is considerably in excess. The Department of Defense thinks that is wrong, the Rockefeller Commission that studied it thought it was wrong; the GAO thinks that it is wrong; the two most recent Presidents of the United States, President Ford and President Carter, think that is wrong. Here is an area where a sizable amount of money can be saved, and this is an area in which we should support the committee's position.

The PRESIDING OFFICER. The Senator from Missouri has 2 minutes remaining.

Mr. EAGLETON. I am prepared to yield back the remainder of that time.

Mr. STEVENS. As I understand it, Mr. President, the time will carry over, according to the previous agreement.

The PRESIDING OFFICER. That is correct.

AMENDMENT NO. 501

Mr. STEVENS. I call up amendment No. 501.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposed amendment No. 501.

Mr. STEVENS. Mr. President, I ask that further reading of the amendment be dispensed with.

The PRESIDING OFFICER: Without objection, it is so ordered.

The amendment is as follows:

On page 55, strike out line 1 and all that follows through line 24, and redesignate the following sections accordingly.

Mr. STEVENS. Mr. President, I ask unanimous consent that my colleague from Alaska (Mr. GRAVEL), and Senators TOWER, HATCH, and DOLE be added as cosponsors to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. How much time is on this amendment?

The PRESIDING OFFICER. At this point there are 10 minutes to the side on this amendment.

Mr. STEVENS. Mr. President, this amendment to strike section 844 of the appropriations bill is before us.

The language now contained in the bill would prohibit retired servicemen from receiving retired pay if they work for the Federal Government. The popular term used to refer to men and women in this situation is "double-dippers." The term itself is offensive and shows little understanding of the incentives we have tried to establish and maintain which are absolutely essential if we are to be able to defend our form of government. Retired servicemen now employed under civil service are not double-dippers. They are receiving compensation for a job currently being performed, and they are receiving retirement for a job they have honorably completed.

While the language contained in this bill would allow those drawing $6,000 or less in retired pay to work for the Government without penalty, the fact is that this exception will affect very few people. The average retired pay of enlisted personnel today is $6,100 per year. I remind my colleagues that this is just $300 more than the official poverty level as determined by the Bureau of Census. It is apparent that retired military personnel must work to support their families. When the Federal Government has already invested 20 years in the education and training of these people, it seems sheer folly to deny ourselves the benefit of these experienced men and women by penalizing them for further Government service. Additionally, many skills necessary for the military are most useful in

other areas of the Federal establishment, but are not easily transferrable to the private sector.

One major flaw with the language now contained in the Defense appropriations bill is that no distinction is made between disability retirement and regular retirement benefits. A disabled veteran who perhaps lost an arm or leg in the service of his country and who goes to work for the Federal Government after October 1, 1977, would be denied his disability retirement benefits under this bill. This limitation must certainly stand out as one of the most abhorrent ever to come before this body for consideration. We would deny compensation to a man who has become physically handicapped in the defense of his country if he is still working for that Government he defended at so costly a personal price. If for no other reason than this, my amendment to strike this provision from the bill should be accepted.

I would also point out that this prohibition is a clear example of one hand not knowing what this other is doing in Congress. Legislation has been introduced to allow those who have served in the Reserves and National Guard to begin drawing retirement at 55 years of age rather than the present age of 60. A bill has also been introduced to provide an additional credit point in the civil service competition for veterans of the National Guard and Armed Forces Reserves. These two bills express interest in increasing the incentives associated with Reserve and Guard duty which is essential if the volunteer force is to be a workable concept. Enactment of section 844 of this bill would certainly provide a disincentive for any Federal employee who is now spending a weekend a month and 2 weeks each summer insuring the readiness of our Reserve forces.

Finally, the President has appointed a blue-ribbon panel to make recommendations on the entire spectrum of the military retirement system. These recommendations will be forwarded to Congress early next year. If the system does indeed require change, it should be accomplished in a fair, comprehensive manner rather than the piecemeal, discriminative approach embodied in the legislative prohibition contained in this appropriations bill.

At least a dozen different bills have been introduced in this Congress to prohibit the unionization of the Armed Forces. I can certainly sympathize with those who advocate the establishment of a military union when I look at the bill now before the Senate. We are appropriating $100 million in advertising and other gimmicks to induce men and women to join the All-Volunteer Army, yet at the same time, we are talking about eliminating the commissary benefits; every year there are more and more restrictions placed on the CHAMPUS program; and now we are talking about denying servicemen their justly earned retired pay if they seek a job with the Federal Government. I would also remind my colleagues that we now require a retired officer to forfeit 40 percent of his retirement if he comes to work for the Government. There is no United States of America without the Army, Navy, and Air Force; and there will be no Armed Forces if we continue to drive away the people who seek to make a career of the military service. Despite rosy projections from the Army on the success of the All-Volunteer Force, I personally find it just a bit disconcerting that less than half of the Army recruits have completed high school. Many men and women who have served for years in the Army forces would not recommend it to anyone seeking a career—over the years they have seen too many of the promised benefits disappear on a rollcall vote of Congress.

I would make one final point Mr. President. Some who support the prohibition contained in this bill might say that servicemen do not contribute to their retirement system so that we are really taking away something they have not earned. They have indeed contributed in that for 20 years, the enlisted personnel, particularly, have been paid at a substandard level. The Senate report makes a big deal of how much military pay has increased over the past 10 years. Are we to pat ourselves on the back for paying lower grade enlisted personnel less than the poverty income? Even adding in the additional allowance for quarters, the most any enlisted man gets is less than $3,000 per year and it is less than $1,000 a year for the lower grade enlisted men. I challenge anyone to find suitable rental units within the Washington metropolitan area or my State of Alaska which can be leased for a family at $200 a month.

Mr. President, I have here a statement from the Department of Defense stating that the prohibition contained in the Senate bill should be stricken, and I would ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1)

Mr. STEVENS. There is no accurate estimate of what the language in section 844 would save the Federal Government. The rough estimate is $26 million. If the actual monetary impact is of prime importance to any of my colleagues, I would certainly support an amendment to delete that amount from the advertising and recruiting budget contained in this bill. The surest way we can continue to have a capable military force is to live up to the promises we have made in the past. I am advised, however, that additional funds would probably not be required if my amendment is accepted because last year there was some $141 million surplus in the retirement fund which was returned to the Treasury.

Mr. President, I urge the Senate to accept my amendment to delete section 844 from the defense appropriations bill.

I want to call attention to the fact that even today under the Dual Compensation Act if a retired officer is employed by the Federal Government he forfeits 40 percent of his retirement compensation. That leads to one problem with this amendment, because I am not sure what the result will be. I fear it might be that he would have to forfeit the 40 percent even if he were to receive less than $6,000. But I think my colleague from Missouri could clear that up.

The great problem with this is that, again, it is trying to deal in an appropriations bill something that ought to be dealt with in the regular legislative process.

Since I have been a member of the Appropriations Committee I have tried to keep controversial amendments off bills like this, because I do not think these bills should be vehicles for controversial subjects.

There is a flaw in this language, because there was no distinction between disability retirement and regular retirement benefits. A disabled veteran who perhaps lost an arm or a leg in service to his country, and who goes to work for the Federal Government October 1, 1977, would be denied his disability retirement benefit under this section which, I think, is just not proper, that is all. There is no word for it, there is no reason for it.

Second, even for those who have earned their retirement, the question is why should we do this? The President has appointed a blue-ribbon panel to make recommendations on the entire spectrum of the military retirement system.

I think probably one of the most difficult problems facing the United States today is the total unfunded liability of the military retirement system. I agree with that. But to make the change as is advocated here, to say that those who are employed by any portion of the Federal Government and who have more than $6,000 retirement compensation must forfeit it all or be ineligible for Federal employment, I think is unfortunate.

In the first place, if that person is employed in the private sector, he is entitled to 100 percent of his retirement. In many instances their employment skills are related to Federal activities. We can actually benefit from their employment in other areas of the Federal Government after their service in the military.

I believe those who support this prohibition might say that servicemen do not contribute to this retirement system, so we are not really taking away something they have not earned. That is a true statement, they have not contributed.

But this is another one of those commitments we made to get them to enlist in the first place, and in this Congress we are worried about what is going to happen to the volunteer military concept. Are we going to continue the process of taking away the benefits that were used as inducements to enlistment?

We have limited the medical benefits in the CHAMPUS program; we have phased out the regular reenlistment bonus; we have phased out travel pay on reenlistment; we have phased out the superior performance proficiency; we put a pay cap of 5 percent on what should have been 8.75; we have eliminated the terminal leave benefits; we have limited the distance which people who are still eligible for CHAMPUS can use the CHAMPUS program; we have put in a Federal income tax sick pay exclusion in terms of the military pay personnel; we have taken the BAQ and BAS payments from the terminal leave payment

benefits; we have reallocated the pay raises so that it reduces the home pay for families occupying Government quarters; we have eliminated the 1 percent add-on for retired pay adjustments; we are phasing out the GI bill; and we are now limiting the pay for tuition for airmen's education and for the commissioning program, the so-called AECP program. I could go on, there are others.

We have dealt already with the commissaries; we have already passed on a great portion of the costs that were previously supported by the Federal Government; on the medical benefits there is a proposal to charge dependents for outpatient care; we now have the vending machines that used to go into the recreation funds diverted into a separate program, which I support, but it is still the program taking away from the funds that used to be available on base.

Now we are starting, as I mentioned, the first foot-in-the-door where if you have anything other than a vehicle on base you now have to pay for on-base rental space for your recreation boat or your recreation trailer or whatever else you might have if you live on base.

All I am saying is this is just another step to prove to people that the Federal Government, when it makes commitments to induce enlistments, will not keep them in the end. That is the problem here, and the great problem is that this should not be on an appropriations bill. Since the President has taken the step of appointing this commission to study and look into this problem of military retirement, I think we should await the action of the President's commission before taking any further consideration of it in Congress.

EXHIBIT 1

LIMITATION ON RETIRED MILITARY PAY (SECTION 844)

HOUSE BILL

The House Report recommended that military retirees who begin work for the Federal government after 1 October 1977 be prohibited from collecting military retired pay. Defeated on the floor of the House.

SENATE BILL

Sec. 844. The Committee recommends inclusion of a general provision that prohibits future retirees whose annual retired pay is $6,000 or more as of 30 September 1977, from collecting military retired pay while employed by the Federal government.

DEPARTMENT OF DEFENSE POSITION

The Department requests that this section be deleted.

JUSTIFICATION

Military retired pay is earned through fulfilling the obligation of a military career which oftentimes encompasses armed conflict, unique hardships and sacrifices. Therefore, it is inappropriate and inequitable for retirees to forfeit retired pay for accepting Federal Government employment. Even a provision exempting retirees who earn less than $6,000 per year in retirement pay can be counterproductive in the long run. The average enlisted retiree employed with the Civil Service (E–7) who retires after 20 years, receives an annual retirement annuity below the $6,000 limitation. If he retires after 22 years his retirement pay will exceed the $6,000 limit. The effect of this provision will be to encourage early retirements causing reduced productive manyears and increased training and procurement costs. The loss of retired pay will also prove disadvantageous to the government. In lieu of taking such a substantial reduction in income, most will seek employment elsewhere, thus precluding the intended savings. In addition, it will deny the government the opportunity to employ highly trained individuals not available from other sources. There are numerous alternatives that can provide adequate controls on the number, type and pay of retirees which are not as drastic as complete forfeiture of pay. This decision should be delayed pending examination by the Presidential Blue Ribbon Panel.

Mr. HATCH. Mr. President, I wholeheartedly support the amendment offered by the distinguished Senator from Alaska (Mr. STEVENS). I am hopeful that a majority of my colleagues are also in support of this action, however, if this amendment is not approved, a grave injustice will be done to the many members of our armed services. Retirement pay is an essential element of the career incentive package which induces members of the military service to endure the hardships of a military life. I believe military retirement pay is justly earned for enduring these hardships. In addition, this retirement pay is compensation for the ever present possibility of a recall to active duty in the event of a national emergency.

To penalize these retirees for accepting future Federal employment I believe would be discriminatory. The military retiree should be afforded the opportunity to compete for Federal employment without the threat of monetary loss. The military system forces early retirement on many through the "up-or-out" method used to keep the forces young and viable. This is necessary to prevent stagnation in the ranks. Battles will not be won by the overaged soldiers and sailors who cannot withstand the rigors associated with combat.

Section 844 of this bill would allow Federal employment to any one with military retirement pay of less than $6,000. This exemption can prove to be counterproductive in the long run. The average 20-year enlisted retiree at the rank of E–7 who is employed in the Federal Government civil service will fall just under the $6,000 limitation. If this same person were to remain in the service for 22 years he would exceed the $6,000 limitation. The military retirement formula is very basic and every man nearing retirement age can readily compute his retirement pay. This provision will encourage early retirement causing reduced productive man-years and increased training and procurement costs. The supporters of this provision foresee million of dollars of saving to the Government resulting from forfeited retirement pay. But I believe this provision will prove to be counterproductive to the Government.

This august body is filled with intelligent men. Would any of you seek employment in a job where you would forfeit $6,000 or more each year in order to hold the job? No, you would not . . . and neither will they. In effect this will deny the Government of a prime source of skilled—experienced manpower. I ask the supporters of this provision—how much will the Government save? Government jobs will still have to be filled and with this provision we will be robbing the Nation of quality personnel to fill these positions. The door will be closed on a group of men and women who have 20 plus years of administrative and leadership experience.

Now let us examine some of the facts surrounding this issue. According to data provided by the Department of Defense—at the end of 1976 there were approximately 1 point 2 million military retirees. In fiscal year 1978 another 68,000 are expected to retire. Of all the military retirees at the end of 1976—11-point-4 percent are paid $5,000 or less—22-point-5 percent are between $5,000 and $6,000—28-point-5 percent are between $6,000 and $7,000—and 12-point-8 percent are between $7,000 and $8,000. A quick pause for addition tells us that 74-point-2 percent of all retirees at the end of 1976 receive less than $8,000 per year. These are men who are still capable of giving years of service in another capacity. Those figures are enlightening—but let us now relate them to the Federal civil service. Only 5 percent of all Federal workers are what has become known as "double dippers"—and I find that term offensive—I prefer to think of them as "double servers." Of this 5 percent—two-thirds earn between $10,000 and $18,000 per year. Less than 1 percent of those military retirees now employed by the Federal Government earn $36,000 or more. Of the 141,817 "double servers"—111,793—78 percent—are retired enlisted men. Senator STEVENS has already told us that the average retired pay of enlisted personnel today is $6,100 per year. He has reminded us that this is just $300 higher than the offical poverty level—and we are all aware of today's high cost of living which forces the retired serviceman to seek employment to support his family.

Unless this amendment is passed, future military retirees will not seek employment with the Federal Government. This loss of talent and useful training to the Government will result in future employees not being the best qualified in many cases. Additional training costs and the practice of hiring outside consultants will ultimately result in additional costs to the Government.

It is for these reasons, I object to the placing of military retirees into a position of being a second-class citizen. I ask my colleagues to join me in strongly supporting this amendment offered by the distinguished Senator from Alaska.

Mr. EAGLETON. The Senator from Mississippi has assigned to me his 10 minutes on this amendment as well.

Mr. STENNIS. By unanimous consent. The Senator from Missouri is handling this part of the bill.

Mr. EAGLETON. Mr. President, I have been concerned, as have many Members of the Senate, including the distinguished Senator from Mississippi, about the very high costs and unfunded financial liability of all of the retirement systems in this country, Federal, State, and local. With very few exceptions they all share one common characteristic, ballooning future costs that very well could drive this Nation into serious financial straits

during the next 50 years or so into the next century.

I might add, parenthetically, at this point, that one of the items that brought New York City almost into the depths of bankruptcy, was their pension obligations and pension liabilities. It still is a millstone around the neck of New York and continues to haunt them every day with the same problems which relate to other cities, other governmental entities and, indeed, relates to the military pension system as well.

The military pension system, as has been pointed out by the Senator from Alaska, is totally noncontributory. The individual makes no contribution whatsoever toward the eventual cost of his annuity. Second, it allows individuals to retire and draw an immediate annuity after 20 years of service regardless of age at the time of retirement.

These two features of the military retirement system have resulted in the situation where the current annual cost of the retirement system is now $9 billion.

That is what it is up to now—$9 billion. Roughly 12 or so years ago it was $1 billion. Today it is $9 billion, and 25 years from now it is conservatively projected that it will be $30 billion.

The unfunded liability of the present pension system—listen to this figure, Mr. President—the unfunded liability of the present system is $170 billion. That is the unfunded liability of this system. Just to give you a concept of the order of magnitude of this, that figure, $170 billion, is over four times the unfunded liability of pension systems of the 100 largest industrial firms in the country, according to a recent Washington Post article.

Take the Fortune 500 list. Take the 100 biggest corporations, add up their unfunded pension liability, and it is about $38 billion. For the Defense Department, it is about four times that, $170 billion.

The question of double dipping really, Mr. President, is the tip of the iceberg on this whole pension retirement system.

It is the focus of this immediate amendment, but I repeat it is only the tip of the iceberg. The whole question of military pensions has been studied for over 10 years by various commissions, and I am going to ask that at the conclusion of my remarks that various extracts and portions of these previous studies be printed in the RECORD.

The question of double dipping itself has been extensively studied in a report I have before me entitled "Study of Retired Uniformed Services Personnel in the Federal Civilian Service—December 1976," by the U.S. Civil Service Commission. This report is 400-plus pages long, and I am going to ask unanimous consent that a few pages, as designated, be printed in the RECORD at the conclusion of my remarks.

We have in this country now, nearly 8,000 double-dippers, who retired from the military under the age of 40 and are drawing their military retirement pension and a new Federal civil salary as well.

That is nearly 8,000 under 40—38, 39, 37 years of age—are drawing a pension and at the same time drawing a full civilian paycheck every month. We have, a total, of about 140,000 double-dippers. But of that 140,000, nearly 8,000 of them are under age of 40.

I ask you, Mr. President—and, indeed, I will ask my colleague from Alaska—do you know any business in the United States—Coca-Cola, IBM, United States Steel—any business, that would retire some of its key personnel in the 30-years-of-age bracket, say at 37, 38, or 39, and pay them a pension so that they then could get in another line of work and draw a full salary?

The problem with double-dipping is inextricably entwined with the "20-year and out" policy. That again is going to be studied by a special panel appointed by President Carter, as it has been studied by previous panels, and I hope their studies give us some useful information. But the time to begin to make some inroads on this gigantic fiscal dilemma of the military retirement system is to nip this double dipping as best we can in this bill.

The President, as I said, has appointed another group. However, even the President has placed himself on record as being opposed to double-dippers. He does not have to wait for his study commission to handle that issue. I believe it was during one of his town meetings in Clinton, Mass., that he was asked about double-dipping and said that he was opposed to it.

To give you another figure that is relevant, there are about $1 billion in pension checks being paid to individuals who are also on the Government payroll in a full-time line of work. They get about $2 billion in civilian salaries in addition to their $1 billion in retired pensions.

The Senator from Alaska repeatedly points out these were promises made. When all of this double-dipping, commissary, and all of these other benefits were first introduced, Mr. President, it was at a time when the military pay scale was considerably below the going market rate. Even I am young enough or old enough to remember a song called "$21 a Day Once a Month." Years and years ago in the thirties—the Senator from Alabama remembers it—a buck private was paid $21 a day once a month in the depths of the depression, and he could have made more perhaps on the outside if he could have found a job.

But that has been changed, Mr. President. Today the military pay schedule now is comparable to that of the civilian sector. Indeed, I put in the RECORD during my discussion of an earlier amendment a table that shows military pay and benefits exceeds comparable civilian pay and benefits in almost all grades. So as to the needs for the inducement of double-dipping, commissaries, or all of these things we have been discussing here today those needs were geared to a bygone era. We are in a very expensive era now. I assure this body if we do not begin to make some inroads on the ballooning cost of these pension systems, we are going to get to the day where we have to make the decision "guns or pensions."

President Johnson always talked about guns or butter during the Vietnam era. The day of reckoning is coming here, I say to my colleagues. One of these days it is going to be guns or pensions because in the last 12 years it has gone from $1 to $9 billion, and in the next 25 years it is going to $30 billion.

If we do not begin to get a handle on this fiscal time bomb, our successors in this body are going to have such a problem on their hands that it will overwhelm them and the defense budget. As the Senator from Iowa said in response to an earlier discussion, it will cut into the very heart and muscle of the military system.

Mr. President, the House Appropriations Committee recognized this as one of the worst features of the present military retirement system, and included a provision prohibiting future retirees from "double-dipping." The House committee estimated that the approximately 150,000 military retirees employed in the Federal civil service receive a total of $3 billion in retired and civilian service pay—about $1 bllion of which is derived from their retired pay. The House committee report stated:

> This, in the view of the Committee, is a cost to the military pension system and to the taxpayer that is not necessary, particularly in a time of increasing burdens of taxation at the Federal, State, and local levels.

Unfortunately, this well-thought out House committee proposal was deleted by the full House, on a voice vote. However, we in the Senate do have an opportunity to work for meaningful reform of the retired pay provision by defeating this amendment.

Mr. President, the sponsors of this amendment would have us believe that the military retirees working for the Federal Government are at very low wage levels. This is not the case. I ask unanimous consent to include in the RECORD a table from page 107 of the House Appropriations Committee report showing average compensation for all retirees in the Federal civil service.

AVERAGE COMPENSATION, ALL MILITARY RETIREES EMPLOYED IN THE FEDERAL CIVIL SERVICE

[Fiscal year 1975 data plus 12 percent in pay raises]

	Average retired pay	Average civil service pay	Average total compensation
All retirees (139,298)	$6,775	$15,345	$22,120
Officers (27,623)	10,865	21,660	32,525
Enlisted (111,675)	5,765	13,783	19,548

This chart shows that the average civil service pay of all military retirees is $15,345 annually. For retired enlisted personnel, the average annual civil service pay is nearly $14,000. For officers, with an average civil service salary of $21,660 and average retired pay of $10,865, the average total compensation is more than $32,000 per year.

Mr. President, I bring up these figures to emphasize that the combination of years of service and experience makes military retirees eligible for civil service employment at rates of pay that are very

reasonable. For the most part retiring military entering the Federal civil service do so at a level of responsibility and pay that is comparable to his military occupational level. The transition, therefore, is not likely to result in an overall loss of income, in most cases.

Mr. President, I further would point out that for those retired military at the low end of the pay scale, the committee has included a proviso that permits retirees making under $6,000 per year in retired pay from forfeiting their military retired pay. So the committee has tried to be fair to everyone, while at the same time making some meaningful reform.

Mr. President, I would like to point out one simple thing—according to the study done by the Civil Service Commission for the House Post Office and Civil Service Committee, over 100,000 of all "double-dippers" are under the age of 55 years—the normal civil service retirement age. This is shown on a table taken from the committee print, and I ask unanimous consent that it be included at the conclusion of these remarks. This further goes on to demonstrate the point I made at the outset of my remarks—the 20-year and out policy just does not make any sense and encourages highly unusual situations like this.

Mr. President, it is estimated that about 68,000 military personnel will retire in 1978. About 8,000 to 10,000 are expected to go to work for the Federal Government, without this amendment. Under this provision, some will probably not. We know it will effect significant savings. The House Appropriations Committee estimated anywhere from $26 to $72 million. Mr. President, I believe the exact amount of savings is not the issue—it is the principle of double dipping and reform of the military retired pay. I urge defeat of this amendment.

Mr. President, I ask unanimous consent that an article appearing in the Washington Post of July 17, 1977, entitled "Top 100 Firms Pension Debts Large," a table showing the age of military retirees as of June 1975, an excerpt from the report on retired uniformed services personnel employment by agency and by age, an extract from House report 95–451 on 1978 defense appropriations, an extract from Senate report 95–325 on 1978 defense appropriations, and selected extracts from the study of retired uniformed services personnel in the Federal civilian service—December 1976, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXHIBIT 1

[From the Washington (D.C.) Post, July 17, 1977]

TOP 100 FIRMS' PENSION DEBTS LARGE

(By Evans Witt)

America's 100 largest industrial corporations owe their employees at least $33 billion more in pensions than the companies have put aside to pay retirement checks.

This massive potential debt is more than the companies' combined profits of $32 billion in 1976, one indication that it could pose a major problem for some companies and for their employees.

The bill collector won't come around next week or even next year to collect this debt. Piece by piece, like a home mortgage, the companies have to pay off the debt.

And if the companies fold or can't pay their pension debts, the government will step in.

Paying off these long-term debt obligations plus funding the pension checks due now is quite a burden already for some companies, because it is a business expense that must be paid out of income and thus lowers profits.

For example, Uniroyal's pension costs of $79.4 million were almost four times its $20.1 million profit. McDonnell-Douglas, the aircraft company, made a $108.8 million profit in 1976, but that is overshadowed by the $115.6 million it paid for employee pension costs.

Others among the top 100 whose profits were lower than pension costs include Lockheed, Republic Steel, LTV and Litton.

Together, the top 100 firms paid $9 billion for pensions last year—both in current costs and paying off the $38 billion liability.

That's up $1.4 billion from 1975 costs, a 20 percent rise in one year.

These totals come from an Associated Press study of annual reports and other official reports to the Securities and Exchange Commission by the 100 largest industrial corporations, as ranked by sales.

Despite the huge dollar figures, individual workers' pensions generally are not threatened. A semigovernment agency, the Pension Benefit Guaranty Corp., now insures pensions for millions of workers, assuring them of retirement benefits up to a certain dollar limit even if their companies are unable to pay the benefits.

The $38 billion figure is the total of the so-called "unfunded liabilities" of the pension plans of the top 100 companies. These liabilities are estimates of how much the firm must pay in pensions for all its workers, minus what it already put in the bank and what it plans to put in the bank in the future to pay retirement benefits.

These are estimates based on extremely complicated assumptions, such as future salary increases, inflation in future years and how the stock market will perform.

In terms of total unfunded liabilities, General Motors Corp. is No. 1, with an estimated liability of $7.3 billion. Next is Ford Motor Co., with a $3.3 billion burden, and then Chrysler Corp., with $2.04 billion.

In order, the rest of the Top 10 in pension burden are U.S. Steel Corp., $1.2 billion; Bethlehem Steel, $1.13 billion; E. I. du Pont de Nemours & Co., $959 million; International Harvester Co., $920 million; Republic Steel Corp., $837 million; Union Carbide Corp., $830 million; and Westinghouse Electric Corp., $817 million.

Each firm uses different assumptions in determining its "unfunded liabilities," based on each company's particular view of economic conditions and its own pension experience. Although this means company pension liabilities are not strictly comparable to one another, all the figures in this story are those provided by the companies, based on whatever assumptions each chose.

Assumptions on which these figures are based may not form an accurate picture of future economic conditions, so some of these billions actually never may be paid out to retired employees in pensions.

But the federal Employes Retirement Income Security Act of 1974 (ERISA) requires companies to pay off each year a portion of this estimated liability, enough to elimiate it over 30 or 40 years.

Companies also must pay each year for the pension checks going out. Company by company, the pattern of annual pension costs is similar to that of total unfunded liabilities.

General Motors spent the most last year on pensions and paying off the unfunded liabilities—$1.07 billion. Next came International Business Machines Corp., with $590 million; Ford, $505 million; Western Electric Corp., Inc., $400 million; Exxon Corp., $291 million; Chrysler, $277 million; Bethlehem Steel, $261 million; General Electric Co., $240 million; U.S. Steel, $221 million; and Du Pont, $212.8 million.

Many factors affect a company's pension costs:

The more workers a company has, the higher the pension costs.

Generally, the more employees represented by a strong union, the higher the pension benefits negotiated in collective bargaining.

The younger the work force, the smaller the current pension liabilities: The workers simply haven't worked long enough to build up their pension rights.

The more conservative the accounting policies, generally the smaller the pension liability. For example, Western Electric has the fourth highest annual pension cost. But its accounting policies since the 1940s have required full funding of pensions, its own experts say. Western Electric has no unfunded liabilities.

The more profitable a company is, the more money it has to pay fringe benefits, including pensions, and the more likely it is to fund its pension costs fully.

"Unfunded liabilities" are estimates, the basic elements of which are:

Pension benefits due already retired workers.

Pensions that each individual worker has earned through his accumulated years of service with the company.

Pensions that each worker will earn over the rest of his years working for the company, adjusted for salary increases.

Offsetting to some degree these liabilities can be these assets:

The value of money and investments in the pension fund.

An estimate of how much the company will put into the pension fund over the working lives of the employees.

A projection of how much other income the fund will earn over the working lives of the employees, including employee contributions and investment income.

WHAT THE BIGGIES PAY, OWE

Here is a list of the annual pension costs and the unfunded liabilities of the top 100 industrial corporations in the United States, as reported by the companies.

The companies are ranked in order by total sales for 1976.

The first figure is cost of employee pensions for the latest year, usually 1976, in millions of dollars. The second figure is the unfunded liability for pensions, also in millions of dollars.

[In millions]

Company	Annual cost	Prior service
1. Exxon	$1,291	$790

87. Johnson & Johnson	128.9	xxx
88. Honeywell	150.2	192
89. Amer. Home Products	15	none
90. Raytheon	127.7	113.8
91. Signal Companies	146.3	205
92. Inland Steel	151.7	504.3
93. Warner-Lambert	129.3	101
94. American Motors	137	360
95. Uniroyal	179.4	687
96. NCR	144.5	175.2
97. FMC	125.3	120
98. Burlington	127.3	xxx
99. United Brands	111.7	135
100. PPG Industries	141.9	257

An "xxx" means no figure was provided by the company in its annual report or in its 10–K report to the SEC.

"None" means the company stated in its annual report or 10–K that the assets of a pension fund are roughly equal to or exceed the vested liability or the prior service liability of the fund. The vested liability is that for those pensions that are guaranteed to the workers. The prior service liabilities are those that have been earned for the workers, including those which have been guaranteed.

"Notsg" means the company reported the liability is not significant to the company's finances.

MAJOR STUDIES OF THE MILITARY RETIREMENT SYSTEM—PAST TEN YEARS

STUDY GROUP AND REPORT	TIME PERIOD OF STUDY	MAJOR RECOMMENDATIONS ON 20 YEAR AND OUT POLICY
First Quadrennial Review of Military Compensation "Modernizing Military Pay"	March 1966–November 1967	"Before any basic change is made in present retirement and estate benefits, each service should develop a program of force management under which potential excess retention up to the 20 year point will be curtailed, and desirable retention of individuals beyond the 20 year point will be sought—both for enlisted and officer personnel. This means that an "optimum force structure profile" and techniques of achieving this profile under the new salary program must be developed."
Interagency Committee "Report to the President on the Study of Uniformed Services Retirement and Survivor's Benefits"	May 1971–August 1972	(1) Increase the multiplier of 3% per year for 25 to 30 years of service. (2) Reduce annuities for 20 to 24 years of service by 2% for each year the member is under age 60 at time of retirement. Full annuity to be paid upon reaching age 60. (3) Annuities for 25 or more years of service be reduced by 2% for each year the member is under age 55 at retirement. Full annuity to be paid upon reaching age 55.
Department of Defense Study Group "Report to the Secretary of Defense"	January 1972–May 1972	"Provide a continuously increasing incentive for continued service at all points beyond 5 years of service, and specifically, beyond 20 years.
Defense Manpower Commission "Defense Manpower: The Keystone of National Security"	April 1974–April 1976	"The military retirement system should provide for retirement eligibility with an immediate annuity only upon an accumulation of 30 retirement points. Retirement points should be earned at a rate such that 30 years of service in noncombat jobs will qualify and a minimum of 20 years of service in combat jobs is needed to qualify.
Third Quadrennial Review of Military Compensation	January 1975–December 1976	No formal report ever issued—only staff studies (10 volumes). Prepared: June 28, 1977 by Senate Appropriations Committee.

EXHIBIT 4

RETIRED UNIFORMED SERVICES PERSONNEL EMPLOYMENT BY AGENCY AND BY AGE—REPORT 4A

RETIRED UNIFORMED SERVICES PERSONNEL EMPLOYMENT BY GRADE OR SALARY WITHIN PAY SYSTEM BY AGE—REPORT 4B

The material introduced in the next two reports covers the age of retirees by agency (report 4A) and pay system (report 4B). Ages are calculated as of June 1975, reflecting ages on that date rather than the ages of the individuals at the time of their retirement.

Table 7 gives the numbers of retirees in each of the defined age categories and the percentage representations of all retirees therein. For comparison, the appropriate percentage for each category from the 1972 study is also presented. Although the 1972 results are based on Executive Branch employment only, comparisons are still considered valid.

TABLE 7

Age category	Number of retirees	1975 percentage	1972 percentage
Under 40	7,897	5.6	1.5
40 to 45	32,379	22.8	18.7
46 to 50	32,760	23.1	26.4
51 to 55	35,610	25.1	32.4
56 to 60	23,063	16.3	15.1
60 and over	9,246	6.5	5.9
Unspecified	862	.6	------

Generally, this table indicates that the 1975 retirees were younger than those in 1972. In 1975, 28.4% of all retirees were 45 years of age or younger compared to 20.2% in 1972. In 1975, 51.5% were 50 and younger—the 1972 figure was 46.6%. The break in this trend occurred in the numbers of retirees at 55 and younger. In 1972, 79.0% were 55 or less compared to 76.6% in 1975. Of the 1972 retirees 94.1% were 60 or less compared to 92.9% in 1975.

Table 8 provides a percentage comparison by age categories for the major pay systems identified in report 4B.

TABLE 8

Age category	GS and equivalent	Federal wage systems	Postal	Executive
Under 40	4.5	5.2	8.0	----------
40 to 45	19.3	23.1	29.6	----------
46 to 50	21.2	25.2	24.6	9.1
51 to 55	27.2	25.2	21.2	31.8
56 to 60	19.2	15.1	12.0	22.7
60 and over	8.1	5.3	4.1	36.4
Unspecified	.5	.9	.5	----------

EXHIBIT 5

[Extract from House Report 95-451 on 1978 defense appropriations]

TITLE II—RETIRED MILITARY PERSONNEL

RETIRED PAY DEFENSE

Estimates and appropriations summary

The accompanying bill provides $9,010,000,000 for Retired Pay, Defense, a decrease of $26 million from the request of $9,036,000,000. This will provide retired pay for an average retired population totaling 1,220,671 persons in fiscal year 1978.

The size of the retired population and the total cost of military retired pay continue to increase dramatically. The following table provided by the Department of Defense shows this increase for the past 25 years and projects additional increases in obligations of nearly $3 billion in the next five years. Defense retired pay costs have practically doubled every ten years during this period and under current statutes will continue to increase at a similar rate.

BUDGET AUTHORITY, TOTAL OBLIGATIONS, UNOBLIGATED BALANCE, AND AVERAGE NUMBER OF RETIRED MILITARY PERSONNEL

[In thousands of dollars]

Fiscal year	Budget authority	Total obligations	Unobligated balance	Average number [1]
Actual:				
1952	345,000	330,598	14,402	137,785
1953	357,000	356,385	615	147,216
1954	387,000	386,298	702	162,305
1955	423,500	422,102	1,398	174,012
1956	495,000	478,932	16,068	185,754
1957	515,000	510,784	4,216	192,209
1958	567,000	560,962	6,038	208,570
1959	640,000	634,542	5,458	222,545
1960	715,000	692,922	22,078	242,904
1961	789,500	787,806	1,694	275,914
1962	920,000	895,854	24,146	313,436
1963	[2] 1,029,000	1,014,755	10,925	358,830
1964	1,228,000	1,211,215	16,785	410,853
1965	1,399,000	1,835,578	13,422	462,463
1966	1,600,000	1,592,352	7,648	508,566
1967	1,839,000	1,831,159	7,841	564,280
1968	2,095,000	2,093,478	1,522	624,496
1969	2,450,000	2,422,941	7,059	691,688
1970	[3] 2,859,000	2,853,234	4,766	750,144
1971	3,391,032	3,388,999	2,033	806,139
1972	[4] 3,921,446	3,889,115	12,331	867,190
1973	4,441,684	4,392,218	49,466	923,635
1974	5,150,700	5,136,897	13,803	983,788
1975	6,250,900	6,238,511	12,389	1,049,553
1976	7,325,600	7,300,052	25,548	1,109,357
19TQ	[5] 1,968,248	1,946,132	22,116	1,144,717
Estimate:				
1977 [6]	8,381,700	8,238,100	[7] 143,600	1,197,691
1978 [6]		9,036,000		1,220,671
1979 [6]		9,709,100		1,255,988
1980 [6]		10,482,800		1,289,412
1981 [6]		11,202,700		1,321,633
1982 [6]		11,898,600		1,352,427

[1] Includes those receiving survivors' benefits.
[2] $3,000,000 transferred to "claims, defense."
[3] $1,000,000 transferred to "operation and maintenance, defense agencies."
[4] $20,000,000 transferred to "operation and maintenance, Air Force."
[5] Includes $1,942,700 appropriated plus $25,548 apportioned in fiscal year 1976 but unobligated on June 30, 1976, which is automatically apportioned for use during fiscal year 19TQ.
[6] Estimates for fiscal years 1977-82 are based on October 1976 military pay rates and OPI rates expected to be in effect through fiscal year 1982.
[7] Proposed rescission No. R77-8.

The current unfunded liability of the military retirement system is estimated to be over $160 billion. This, and the unfunded liability of the Federal civil service retirement system, which is about $120 billion, are of equal concern to the committee, as is the current fiscal condition of the Social Security System, which has between $3 and $4 trillion unfunded liability. This bill, however, includes only the military retirement system costs and as such that is all that is addressed here.

ISSUES OF CONCERN TO THE COMMITTEE

The significant increases already experienced and anticipated in the future are of considerable concern to this Committee. This year's review of the overall scope and size of retired military pay costs have led the Committee to recommend two general provisions designed to begin reducing the costs of the military retirement system. These are two of the obvious problem areas in the overall military pension system:

Section 858, a limitation prohibiting the use of funds to pay retired or retainer pay to any military retiree who begins work for the Federal Government after October 1, 1977.

Section 859, a provision that requires that Navy and Marine Corps enlisted personnel must serve a full twenty years of active duty service before being eligible to receive retainer pay. This eliminates the use of "shipping over time" which makes it possible for these personnel to retire and receive retainer pay after as little as 18 years of actual service. These two provisions are discussed in greater detail here.

COMPENSATION OF RETIRED MILITARY PERSONNEL IN THE FEDERAL CIVIL SERVICE

A recent study prepared by the United States Civil Service Commission and published by the House Post Office and Civil Service Committee identified over 142,000 retired military personnel who were employed as civilian employees of the Federal Government as of June 30, 1975. Current estimates indicate that more than 150,000 retired military personnel may be so employed. All but a small portion of these employees receive the entire amount of their military retired pay as well as the full pay for the civil service position which they occupy. The total compensation of all of these reemployed military retirees is over $3,000,000,000, of which nearly one third, or $1,000,000,000, is from retired pay. The average individual earnings from both the retired pay and the civil service pay for all 150,000 reemployed retired military personnel is over $22,000 at current pay scales. More than $15,000 of this is from the Civil Service position.

In this year's review of the military retired pay request of $9.04 billion, the Committee addressed the issue of retired military personnel receiving both retired military pay and Federal civil service compensation (commonly referred to as "double dipping"). This review considered the merits of the current practices, its comparability to other federal retirement systems, and the equity of providing dual compensation of this type to a select group of federal civil servants. The Committee also considered the question of fairness to current retirees employed in the Federal Government.

Committee recommendation

The Committee has included in this bill a new general provision (Section 858) that prohibits the payment of retired pay to any military retiree who begins work in the Federal Government after October 1, 1977. This is a limitation on the use of funds appropriated for retired pay and it applies only to future employees. It in no way affects current employees who are military retirees. It does not limit employment opportunities and it does not prohibit employment of retired military personnel by the Federal Government. The provision specifically deals only with the payment of dual compensation. It does not and is not intended to affect any of the other benefits that accrue to retired military personnel.

The general provision language is as follows:

"SEC. 858. None of the funds appropriated by this Act shall be available after September 30, 1977, to pay the retired or retainer pay of any officer, warrant officer or enlisted member of a regular or reserve component of the armed forces for any period for which the officer, warrant officer, or enlisted member is entitled to receive pay as an officer or an employee of the Federal Government or a member of Congress or a congressional employee, as defined in section 2104, 2105, 2106, or 2107 of title 5, United States Code, or as a person excepted from the provisions of chapter 51 of title 5, United States Code, by section 5102(c) of that title, other than a person covered by section 5102(c), (13), (17), (18), (19), (20), (21), or (24), of title 5, United States Code: *Provided*, That this limitation shall not apply to a person who, on or before September 30, 1977, is receiving retired or retainer pay and who, on that date is an officer or an employee of the Federal Government or a member of Congress or a congressional employee, or as a person excepted from the provisions of chapter 51 of title 5, United States Code, by section 5102 (c) of that title."

Basis for committee recommendation

The Committee this year addressed the issue of the costs of military retirement and examined several aspects of it which contribute to its rapidly escalating costs. The most significant single aspect affecting military pension costs is the availability of immediate pensions after 20 years of military service at any age. This means a person can perform his military service, retire after 20 years and begin immediately, regardless of his age, receiving a military pension of at least 50 percent of his basic pay. This makes it financially advantageous, in many cases, for a military person to retire and seek employment elsewhere because he can receive his retired pay as well as the salary from his employment. In addition, it is possible to vest in a second retirement system so that the military retiree can get eventually two retired pay checks and Social Security benefits.

Because of this concern over the costs and provisions of the military pension system, the Committee recommended this limitation to the use of retired pay funds. The following details the Committee's rationale.

(1) *Costs of the Military Retirement Program.*—In the last 25 years, the costs of the military retirement system have increased dramatically, doubling in size roughly every ten years. In relation to the overall Defense appropriations, the proportion of funds devoted to paying military retirees has increased from 0.6 percent of the total funding available in fiscal year 1952 to 8.0 percent of available funds in fiscal year 1978. This is disturbing to the Committee because these are funds that do not directly contribute to increasing national security. In a sense, because retired pay funding must compete within the overall Defense budget, it may in fact detract from overall national security because other important priorities may not be funded.

In examining the costs of the military retirement system, the Committee, using data provided by the Department of Defense, found that the costs of the 20-year immediate annuity pension are enormous. This data showed the substantial costs associated with retirement at 20 years of service regardless of age. The following table shows representative savings at various ages, based on fiscal year 1975 data.

Military retired pay costs

(Fiscal year 1975 Costs plus 12 percent)

If the minmum age at which pensions could be paid were raised to:	*The annual savings would be:*
40 or older	$149,338,000
45 or older	1,211,240,000
50 or older	2,296,240,000
55 or older	3,797,396,000
60 or older	5,029,687,000

(2) *Costs of Employment of Retired Military Personnel in the Federal Civil Service.*—The Committe estimates that the military retirees employed in the Federal civil service receive a total of $3 billion in retired and civil service pay. About $1 billion of this is derived from the retired military pay. This, in the view of the Committee, is a cost of the military pension system and to the taxpayer that is not necessary, particularly in a time of increasing burdens of taxation at the federal, state and local levels.

(3) *Appropriateness of Permitting Dual Compensation.*—The House report on this issue shows that 94 percent of the 142,000 reemployed retired military personnel working for the Federal Government were 60 years of age or younger and more than half (51 percent) were 50 years of age or less. More than 13 percent retired from the military with some form of disability (using fiscal year 1975 data). The fact that these persons are qualified and able to be employed by the Federal civil service shows that they are capable of employment and that the payment of retired pay of any type under these circumstances is contrary to purposes of retired pay. Retired pay is made to provide for the maintenance of a respectable standard of living after cessation of employment. The practice of paying retired pay and then a civil service salary on top of it is inconsistent with this purpose. Some would argue that military pensions are actually "deferred compensation" intended at one time to offset relatively low military pay scales. Current military pay levels, however, are very adequate and this argument is no longer applicable. Furthermore, the military pension system is noncontributory in nature, so that the individuals do not suffer any loss of pay during the period of time they serve in the military. Military retired pay costs are paid solely from funds appropriated on an annual basis. There is no fund or other mechanism such as exists for the civil service retirement systems into which employees must contribute a part of their income for future retirement costs.

(4) *Comparability With Other Federal Retirement Systems.*—The Dual Compensation Act of 1964 established an unusual condition for federal retirement systems in that it permitted retention of retired pay even though a person might be fully employed with the Federal Government after retirement. There are a variety of federal retirement programs that provide for retired compensation for federal civil servants, postal workers and selected groups of federal employees (such as the Foreign Service and the Judiciary). The most prominent of all retired compensation systems—the Social Security System—is federally operated. The Federal civil service and the Social Security programs, each of which require employee contributions into a fund—both require either total or partial sacrifice of retirement payments upon reemployment. This is based on the premise that if a person is capable of earning a living, he has no need of a retired pay check. This action of the Committee applies this principle to the military retirement system, which is noncontributory. It is particularly appropriate in the case of military retirement where it is possible to retire and begin receiving immediate annuities at as young an age as 37.

(5) *Comparability with Military Retirement System Limitations.*—There is a provision in title 10 of the United States Code that places restrictions on dual compensation of retired military reservists who return to active duty. 10 U.S. C. 684 provides as follows:

§ 684. Payment of certain Reserves while on duty.

(a) Except as provided by subsection (b), a Reserve of the Army, Navy, Air Force, or Marine Corps who because of his earlier military service is entitled to a pension, retired or retainer pay, or disability compensation, and who performs duty for which he is entitled to compensation may elect to receive for that duty either—

(1) the payments to which he is entitled because of his earlier military service; or

(2) if he specifically waives those payments, the pay and allowances authorized by law for the duty that he is performing.

(b) Unless the payments because of his earlier military service are greater than the compensation prescribed by subsection (a) (2), a Reserve of the Army, Navy, Air Force or Marine Corps who because of his earlier military service is entitled to a pension, retired or retainer pay, or disability compensation, and who upon being ordered to active duty for a period of more than 30 days in time of war or national emergency is found physically qualified to perform that duty, ceases to be entitled to the payments because of his earlier military service until the period of active duty ends. While on that active duty, he is entitled to the compensation prescribed by subsection (a) (2). Other rights and benefits of the member or his dependents are unaffected by this subsection.

The Committee's recommended general provision would extend the principle already established in this statute to cover a broader category of military retirees.

This basically prohibits a retired reservist from receiving both a military retired check and a military salary while performing active duty. He may choose whichever of the two is higher.

The Committee believes that it is appropriate that this kind of restriction on receipt of military retired pay by persons serving on active military duty should also apply to receipt of military retired pay by persons employed in the Federal civil service. The same kind of rationale against dual compensation for retired military personnel in military service should apply equally to those employed elsewhere. At the very least, the Congress should insist upon a consistent approach to dealing with military retirees and the statutory limitation in 10 U.S.C. 684 reflects that view.

(6) *Fairness to Other Federal Civil Service Employees.*—The Federal civil service is composed for the most part of dedicated, loyal, hard-working individuals who look upon their public service as being as important and as valuable to the nation as the services performed by military servicemen. Although there are certain aspects of military service that are unique, from the standpoint of fairness and equity to all who choose a public service career of any type, it is highly desirable to treat all in as equitable, uniform and fair a manner as possible.

The employment of retired military personnel in the Federal civil service is often unfair to other civil servants. They transfer into positions and grade levels that many civil servants work and strive for throughout their careers. They receive additional benefits as a result of being a military retiree and they get jobs that would otherwise be filled by a person whose only source of income is his civil service pay. In the view of the Committee, it is unfair to the career civil servant to permit continuation of this dual compensation practice. The House Committee on Post Office and Civil Service, when it acted on the Dual Compensation Act of 1964, recognized this in its Report that said: "The policy should protect career civilian employees from advantages enjoyed by retired military personnel solely as a result of military service . . ."

(7) *Compensation of the Individual Retiree.*—Federal civil service compensation is linked to compensation for comparable work done in the private sector of the economy. Civil service employment also carried with it generous fringe benefits and other satisfactions. For these reasons, it is difficult to argue that Federal civil servants are not fairly or adequately compensated for their services. And when this civil service pay is coupled with military retired pay, the overall compensation package is very adequate. The table below reflects the average pay of all reemployed retired military personnel working for the Federal civil service.

AVERAGE COMPENSATION, ALL MILITARY RETIREES EMPLOYED IN THE FEDERAL CIVIL SERVICE

[Fiscal year 1975 data plus 12 percent in pay raises]

	Average retired pay	Average civil service pay	Average total compensation
All retirees (139,298)	$6,775	$15,345	$22,120
Officers (27,623)	10,865	21,660	32,525
Enlisted (111,675)	5,765	13,783	19,548

It is interesting to note from this table that the average civil service pay of all military retirees is $15,345 annually. For retired enlisted personnel, the average annual civil service pay is nearly $14,000.

For retired military officers, with an average civil service salary of $21,660 and average retired pay of $10,865 the average total compensation is more than $32,000 a year.

These average annual earnings figures are displayed here to emphasize that the combination of years of service and experience make military retirees eligible for civil service employment at rates of pay that are very reasonable. For the most part, in fact, persons retiring from the military who enter the Federal civil service do so at a level of responsibility and pay that is comparable to his military occupational level. The transition, therefore, will not in most cases result in an overall loss of income.

On the other hand, the Committee has received reports that retired military personnel have difficulty transferring into the Federal civil service at rates of pay comparable to that which they receive in the military. If this is true, it is an apparent result of the awareness that employers have that military retirees already have a source of income that makes it possible for them to be paid less and still maintain a standard of living comparable to or better than that which they enjoyed in the military. This also appears to be an accepted practice in private industry. If this is true, and the Committee is not convinced that it is, it is a discriminatory practice that is contrary to the merit system and the principles of the civil service position classification process. If a retired full colonel, for example, who would otherwise be equivalent to a GS–15 in the Federal civil service, were to be offered and accept the pay of a GS–12 or GS–13, yet be expected to perform at the level of a GS–15, for a particular job, this would contravene the purposes of merit system and is wholly undesirable. As such it is a practice that should be investigated by the Civil Service Commission. The Committee believes that this is simply one of the unfortunate consequences of permitting dual compensation and that the unfavorable morale and prestige implications for those military retirees could be avoided. However, many military retirees by choice accept a civil service position at a grade level lower than that for which they may otherwise be qualified for reasons other than pay—geographic location, other benefits of civil service discussed in this section of the report, and so forth. The attractiveness of Federal civil service employment is such that there are 10 persons eligible and desiring to have every single available job.

(8) *Undesirable Aspects of Dual Compensation for Civil Service Employment.*—The policy of permitting dual compensation has resulted in several practices which are contrary to the purposes of the merit employment system and which existing procedures and regulation have not been able to eliminate. The first, the so-called "buddy system", involves the hiring and promotion of retired military personnel. * * * This circumvents the normal channels through which persons enter the Federal Government and is a channel that is generally unavailable to the average citizen who is seeking employment. The second practice, the conversion of a military job to a civilian job, is equally undesirable in that it makes it possible, through this informal mechanism, for a military person to retire into a job essentially identical to the one he held while he was in the military service. Whether or not the additional civilian position is necessary at all is questionable, and whether it should be filled through this conversion process is also questionable.

(9) *Military Personnel Policies Encouraging Early Retirements.*—The Department of Defense, in discussing the need for reform of military retirement in the fiscal year 1978 budget, acknowledged that the current retirement system creates ". . . disincentives to careers longer than 20 years." This is because the immediate annuity pension provision makes it financially advantageous for a military man to retire at that point in his career and seek a second career.

Of equal importance, however, are the official and unofficial policies and practices that make the 20-year career the norm rather than the exception. Officially, statutes and regulations prescribe stages in military careers at which point they must be promoted or be required to leave the service. A twice passed over officer is officially forced out of the service for failure-of-promotion. This official separation under the "up-or-out" policy applies in very few cases, however: just 2,065 in fiscal year 1976; 1,161 in fiscal year 1977 (estimated) and 1,432 in fiscal year 1978 (estimated). The unofficial effect, on the other hand, causes many to chose to leave voluntarily rather than be forced out with the stigma associated with that. There is no official data available to show how many military officers choose to leave the service of their own accord after being passed over a first time, but data provided by the Services shows that 87 percent of officers passed over once are passed over a second time. So there is only a 13 percent chance of success for promotion the second time around. This undoubtedly encourages many to leave with the attitude that 20 years is the extent of most careers.

Also reflecting this unofficial attitude is the fact that more than half (50.5 percent) of all military retirees leave at or shortly after reaching their 20th year of service.

It is disturbing to the Committee that so much talent and expertise is being lost to the military through the execution of these official and unofficial policies. The costs to the individual who desires to stay in the service beyond 20 years but can't are enormous. The cost to the military are considerable in that the skills, training and professionalism developed in a 20-year career are very difficult to replace. The costs, too, in additional recruiting, training and lost time resulting from inexperience cannot be fully estimated.

The argument that changes in these policies will result in a military force that is too old to fight is not valid. Much of the support capability and command, control and communications can be handled as well, if not better, by older, more experienced personnel than those actually assigned to combat duties. No judgment is made on what the appropriate length of service should be, but a change to 30 years, rather than 20, as the basic career length would not be unreasonable.

(10) *Calculation of Savings.*—The Committee estimates that the first year's savings resulting from implementation of this recommendation will be $26,000,000. This is based on consideration of prior-year experience, average cost per retiree and the effect this provision will have on a military person's decision to work for the Federal civil service.

In fiscal year 1978, it is estimated that about 68,000 military personnel will retire on either disability or nondisability. Between 12 and 15 percent of military retirees have chosen to work in the Federal civil service. Based on this percentage, between 8,000 and 10,000 military retirees would be expected to seek and obtain employment in the Federal civil service. (Although this estimate does not account for variable conditions affecting civil service employment, it must be remembered that the number of retired military persons working for the Federal Government increased from 77,655 in 1972 to 141,817 in 1975, an 83 percent increase in three years. At this rate, the number of retired military who might be expected to enter the Federal civilian employment could be much higher.) The average military retiree draws approximately $7,200 annually in retired pay, so the total retired pay that would be paid to the estimated 8,000 to 10,000 retirees who might go to work for the Federal Government would be between $57,600,000 and $72,000,000 in fiscal year 1978. This estimate of average annual retired pay may also be low—FY 1976 retirees averaged $7,900 and two pay raises since then could increase this to closer to $9,000 per retiree. This would raise the totals to between $72,000,000 and $90,000,000. Using the low end of this calculation to reflect a conservative base, the Committee estimates that slightly more than half of those military retirees who would otherwise choose to work for the Federal Government will choose to seek employment elsewhere in order to obtain both the retired pay and other pay checks or for other reasons. Therefore, the Committee's estimated savings is based on the assumption that only 3,600 of the 68,000 new retirees in fiscal year 1978 will choose to work in the Federal civil service and forego their retired pay. This represents 5.3 percent of the total eligible new retirees as opposed to the normal 12–15 percent who go to work in the civil service. Of course, the mix of officers and enlisted retirees will affect the savings. If, for example, just 1,300 of the 68,000 eligibles (1.9 percent) who receive $20,000 each in retired pay annually see more advantages in working in the civil service and give up their retired pay, the $26,000,000 will be realized.

The Committee does not agree with the assumption that all military retirees will go to work outside the Federal Government. Some will, and this is recognized in the Committee's estimated savings. However, many military retirees will weigh the advantages of civil service employment, and they are considerable, and decide to temporarily give up retired pay in order to work for the Federal civil service. One of the major factors they will consider is the generous civil service retirement program which vests after five years of civilian service.

In addition, the Committee believes that savings will result from the fact that more military men will choose to extend their military careers and continue their military service.

(11) *Other Costs to the Government.*—There are several other costs to the Federal Government that must be considered. Primary among these is that a military retiree who works for the civil service for a second career will be eligible for a civil service retirement after a certain period of time and at a certain age. This can be, for example, 40 percent of the civilian pay after 20 years of service or more and it is escalated to keep up with inflation. In addition, military personnel are covered under the Social Security system, and at age 62 or later they can begin receiving that benefit. So it is possible for a person to receive three pension checks from the Federal Government under this system.

Conclusion

The Committee has several objectives it wishes to achieve with this recommended general provision. In properly exercising its responsibility to address fiscal and budgetary issues affecting the Defense establishment and the nation, the Committee believes this is a necessary and proper approach to reducing military retirement costs.

The following are the principle objectives of this recommendation:

(1) Reduce the costs of the military retirement system, which have been increasing dramatically, in fiscal year 1978 and beyond;

(2) Encourage more servicemen to stay in the military longer by reducing the financial incentive to early retirement;

(3) Encourage a more comprehensive Executive and Congressional review of the military retirement system.

(4) Provide an equitable and fair safeguard for current military retirees working in the Federal civil service; and

(5) Insure the integrity of the Federal civil service by reducing the effect of the "buddy system" and assuring appropriate classification of civil service positions for all employees.

The Committee's amendment is an interim step which addresses only one facet of modernizing military retired pay. The Defense Manpower Commission, for example, has recommended that "the present practice of allowing normal retirement with an immediate annuity after only 20 years of active service should be phased out." Other studies have suggested related, major revisions. The Committee does not view this dual compensation provision as a substitute for such legislative reform proposals to be considered by the Armed Services Committee. A full revision of the military retired pay structure is long overdue.

The current structure was devised for an era when the military wage was severely depressed. It has been one decade, however, since Congress altered the pay philosophy and ordered military pay brought in line with the civilian wage structure. Retired pay, designed in part to compensate for the low wage structure, has not yet been brought into line with the new pay structure. As a result, retirement benefits, which are linked directly to the pay system, have skyrocketed. Even the Defense Department has been motivated to say that the current system "provides excessively liberal benefits." President Carter has reflected these same sentiments especially as they relate to reemployed military retirees. He said on March 1, 1977:

"And I've been particularly concerned at the excessive retirement benefits that are available to those who served in the military, who then retire and get full-time jobs working for the government. This is too expensive."

USE OF CONSTRUCTIVE CREDIT IN DETERMINING ELIGIBILITY FOR AN AMOUNT OF RETIRED PAY

In addressing the retired pay request for fiscal year 1978 the Committee took action on two of the least justifiable aspects of the current military retired pay system. The first of these, dual compensation for military retirees working for the Federal government, has already been discussed. The second item is referred to as "constructive credit" for time not actually served. The use of constructive credit is currently authorized by section 6330(d) of Title 10 which provides that an enlistment in the Navy or Marine Corps that is "terminated within three months before the end of the term of enlistment is counted as active service for the full term." This applies only to the Navy and Marine Corps. Air Force and Army enlisted members do not have this option.

Under this system of "shipping over" an individual can reenlist up to three months before the termination of his current enlistment and receive credit for retirement purposes for having served the three month period. It is not unusual to reduce through successive reenlistment the time actually served by 18 months. Thus, retirement (transfer to the fleet reserve) is possible without serving the full 20 years minimum service.

This particular provision of law is also costing millions of dollars in addition to those spent for the early retirements since members of the Navy and Marine Corps who serve over 20 years and then retire receive the constructive credit in calculating the amount of retired pay (retainer pay) they will receive. The amount of retired pay received is determined by multiplying 2½ percent of base pay for each year of service including those years of service or portion thereof for which constructive credit is awarded. This later aspect represents the big cost (millions of dollars) of the constructive credit feature of the law. Added to this is the privilege to count as a full year any time served over six months as a full year in determining retired pay.

The Committee has traced this and related statutes which permit retirements prior to 20 years of service back to 1916, as shown in a later table. It is understood although no one seems to know for sure that the concept for this extra "shipping over" credit is based upon the lengthy period that ships were at sea without contact with the home-port. Members of the crew were expected to have enough time remaining on the enlistment to insure that they could complete the cruise. As a result, they were given credit for having served an enlistment when they reenlisted for the next cruise. This time was later converted to credit in determining eligibility for retirement.

The Committee has placed a general provision in the bill (Section 859) which will terminate this system effective December 31, 1977. However, like the dual compensation provision, it will not impact on anyone already retired or take away any "constructive credit" already earned by anyone currently on active duty in the Marine Corps and Navy. Subsection (a) of the general provision terminates the use of appropriated funds to pay retired pay, the eligibility for which was earned using "constructive credit". Subsection (b) of section 859 prohibits the use of funds for that portion of retired pay that is based upon constructive credit. This last subsection addresses the problem of allowing time not actually served (constructive credit) to be used in computing retired pay. In all cases, credit is given to those who earned "constructive time" under the law prior to December 31, 1977.

The Committee did not make a reduction to the retired pay request because the way the limitation is written there will be little or no savings the first year.

The DoD data base on this matter appears to be incomplete or there is difficulty in extracting the data from the computer information systems. The following table shows that there are currently about 31,600 nondisabled retired members on the rolls who have served less than 20 years, of which about 31,000 are in the Navy.

RETIRED MEMBERS (NONDISABILITY) AS OF JUNE 30, 1976 [1]

	Army [2 3]	Navy [4 5]	USMC [4 5]	USAF [6]	DOD
Years of service:					
10	6	0	0	0	6
11	12	6	1	1	20
12	5	3	0	2	10
13	16	15	2	0	33
14	28	147	2	0	177
15	45	97	11	0	153
16	77	364	32	2	475
17	86	235	43	1	365
18	120	1,507	30	0	1,657
19	608	30,982	27	6	31,623

[1] Information based on unedited statistics from MARDAC data base.

[2] Act of June 30, 1922 (42 Stat. 722)—permitted retirement of Army officers with as little as 10 yr of commissioned service.

[3] Act of July 31, 1975 (49 Stat. 507)—provided retirement for Army officers after 15 yr of service; was in effect until 1948, although suspended during WW II.

[4] Act of May 29, 1934 (42 Stat. 811)—provided retirement for Navy lieutenant after 14 yr of service and for lieutenant (junior grade) after 7 yr of service—revised in 1935 to keep lieutenants to 21 yr and lieutenant (junior grade) to 14 yr of service.

[5] Act of Aug. 29, 1916 (39 Stat. 558)—permitted Navy and Marine Corps enlisted men to transfer to Fleet Reserve with between 16 to 20 yr of service; revised in 1925 but kept the 16 yr of service feature if enlisted man on AD on July 1, 1925.

[6] U.S. Air Force established as separate service in 1947. Pre-1947 retirement under U.S. Army criteria.

The Committee has little confidence in these figures because the Marine Corps has the same "constructive credit provision but few Marines are shown as having retired with less than 20 years of service. Also with more than 1,176,000 personnel on the retirement rolls it seems that more than 30,000 should have taken advantage of the constructive credit provision. The Fleet Reserve retirement rolls contain about 100,000 service members. The Fleet Reserve contains Navy and Marine retirees between the 20th and 30th years. When they reach 30 years, they are transferred to the regular retired rolls.

One reason for the relatively small number (31,000) who have served less than 20 years may be related to granting constructive credit in determining retired pay rates. Personnel may be opting to stay longer and obtain additional constructive credit in calculating their retired pay.

Other data provided by DoD indicate that about 4,000 persons are added to the nondisability retired rolls each year, who have served less than 20 years.

The Committee realizes that the Department was not given a prolonged period of time to provide such date, but in that the inappropriateness of the constructive credit feature in the Navy/Marine Corps laws has been recognized by DOD for some time it would seem that the statistical data would be readily available. In fact, the Committee understands that the current DOD plan to modernize the retirement system will also propose the elimination of this constructive credit feature.

EXHIBIT 6

[Extract from Senate Report 95-325 on 1978 Defense appropriations]

TITLE II—RETIRED MILITARY PERSONNEL

RETIRED PAY, DEFENSE

1977 appropriation	$8,238,100,000
1978 budget estimate	9,036,000,000
House allowance	9,010,000,000
Committee recommendation	9,010,000,000

Appropriations under this title finance retirement pay, as authorized and prescribed by law, for military personnel on the retired lists of the Army, Navy, Marine Corps, and Air Force. This includes payments for nondisability retirement at completion of prescribed lengths of service, for those in temporary or permanent disability status, for Navy and Marine Corps members of the Fleet Reserve who have 20, but less than 30, years' creditable service, and for survivors of deceased members who qualify for continued annuities. The estimates exclude payments to individuals who elect to receive compensation for physical disability from the Veterans Administration. The amounts requested are also exclusive of any administrative expense.

The budget request

The fiscal year 1978 budget request for retired pay is $9,036,000,000, an increase of $797.9 million over the fiscal year 1977 appropriation. The budget request assumes that 1,243,570 personnel will be on the retired rolls by the end of the fiscal year, for an average of 1,220,671 individuals to be supported. The following table displays the budget request by major category.

RETIRED PAY, DEFENSE

[Dollars and personnel numbers in thousands]

	Fiscal year 1976 actual		Fiscal year 1977 estimate		Fiscal year 1978 request	
	Average number	Funding	Average number	Funding	Average number	Funding
Retirement Category:						
Nondisability	818.3	$5,745,796	880.2	$6,544,689	915.9	$7,189,229
Temporary disability	13.4	63,744	11.9	57,372	11.4	60,384
Permanent disability	146.1	855,964	143.9	912,096	145.2	984,055
Fleet Reserve	98.9	549,478	100.0	607,133	101.0	658,556
Survivors' benefits	32.6	85,070	40.7	116,810	47.1	143,776
Total [1]	1,109.4	7,300,052	1,176.7	8,238,100	1,220.7	9,036,000

[1] Totals may not add due to rounding.

The almost $800 million increase in funding requested for fiscal year 1978 is attributable to several factors. The addition of 35,624 to the average number of military personnel receiving nondisability retirement benefits is the largest single factor in this increase. The 1978 request also reflects the impact of the 3.62-percent increase in basic pay effective October 1, 1976, as well as increases resulting from adjustments in the survivor benefit plan approved October 14, 1976. Finally, the Department of Defense has budgeted for future Consumer Price Index-related adjustments to retired pay scheduled to take place during fiscal year 1978.

Subcommittee hearings

Additional data and testimony in support of this appropriation request can be found on pages 752 through 772 of volume 2 of the subcommittee's hearings on the fiscal year 1978 budget.

Summary of committee action

For Retired Military Pay, the Committee recommends an appropriation of $9,010,000, which is $26,000,000 below the budget request and the same as the House allowance. In doing so, the Committee recommends concurrence with the General Provision in the House bill dealing with Military Retired Pay for enlisted personnel in the Navy and Marine Corps.

Section 856 of the House bill deals with the system of constructive credit whereby enlisted personnel in the Navy and Marine Corps can receive retirement credit for time not actually served. By reenlisting up to three months before the termination of his or her current enlistment, an individual in the Navy or Marine Corps can receive credit for retirement purposes for having served the full three months. This General Provision terminates the use of appropriated funds to pay retired pay in cases where eligibility is earned using constructive credit. It also prohibits the use of funds for that portion of retired pay that is based on constructive time. In all cases, credit is given for those who earned constructive credit prior to December 31, 1977.

The Committee also recommends inclusion of a General Provision (Section 844) that prohibits future retirees whose annual retired pay is $6,000 or more as of September 30, 1977, from collecting military retired pay while employed by the Federal Government. With the exception of the $6,000 provision, this is identical to a provision recommended in the bill reported by the House Appropriations Committee.

The Department of Defense provided the following data pertaining to this provision:

RETIRED MILITARY PERSONNEL

	For all retirees	For nondisability retirees only
Percent of retirees who retired in 1976 receiving annual retired pay of—		
$5,000 or less	11.4	4.4
$6,000 or less	33.9	25.6
$7,000 or less	62.6	53.1
$8,000 or less	75.4	65.4

There are approximately 1,200,000 retirees now on the rolls. In 1976, the year for which the data in the preceding table apply, a total of 56,339 military personnel began to draw retired pay. The Defense Department expects that approximately 68,000 military personnel will retire during fiscal year 1978. Accordingly, if the 1978 retiree force composition were similar to the 1976 force composition, this amendment will affect all but 34 percent, or 23,000 individuals, who elected to go to work for the Federal Government. (Note: This does not take into account cost of living increases that have occurred in military retired pay since 1976 which would tend to reduce the percentage of military retirees receiving $6,000 or less in retired pay annually.)

Retirement accounting procedures

In its report on the fiscal 1977 Defense Appropriations bill (Senate Report 94–1046) the Committee recommended that in future budgets the Administration propose including the costs of military retired pay within a more appropriate functional area of the Federal budget. As the Committee stated then, military retired pay contributes nothing to our military preparedness effort. Also, since no other agency budget comparably displays the costs of its retired personnel, the costs of military retired pay should be displayed within the Income Security or Veterans Benefits function.

The Committee received testimony this year indicating that several changes in accounting procedures are being considered by the Department for inclusion in the fiscal 1979 budget request. These changes include transferring the costs of currently retired military personnel out of the Defense function, and setting up a system of accrual budgeting for retirement costs under which the full costs for future defense retirement payments would be charged to the Defense function. The Committee expects to be kept fully informed of the status of these proposed changes between now and the submission of the fiscal year 1979 President's budget.

STUDY OF RETIRED UNIFORMED SERVICES PERSONNEL IN THE FEDERAL CIVILIAN SERVICE—DECEMBER 1976

(Prepared by the U.S. Civil Service Commission for the Committee on Post Office and Civil Service, House of Representatives, February 28, 1977)

TABLE 1.—RETIREES IN THE FEDERAL CIVILIAN SERVICE: NUMBERS BY FORMER MILITARY PAY GRADES (RANKS AT RETIREMENT)

Rank at retirement	Number of retirees	Army, Air Force, and Marine Corps	Navy, Coast Guard, and NOAA	Public Health Service
Commissioned officers:				
O–10	16	General	Admiral	(Note: PHS does not use grades O–9 or O–10).
O–9	34	Lieutenant general	Vice admiral	
O–8	67	Major general	Rear admiral (upper half)	Assistant surgeon general.
O–7	60	Brigadier general	Rear admiral (lower half)	Assistant surgeon general.
O–6	2,486	Colonel	Captain	Director grade.
O–5	8,681	Lieutenant colonel	Commander	Senior grade.
O–4	7,472	Major	Lieutenant commander	Full grade.
O–3	2,471	Captain	Lieutenant	Senior assistant grade.
O–2	1,416	1st lieutenant	Lieutenant (jg)	Assistant grade.
O–1	394	2d lieutenant	Ensign	Junior assistant.
Total	23,097			
Warrant officers:				
W–4	875	Chief warrant officer	Chief warrant officer	
W–3	1,563	Chief warrant officer	Chief warrant officer	
W–2	1,587	Chief warrant officer	Chief warrant officer	
W–1	560	Warrant officer	Warrant officer	
Total officers	27,682			

Military pay grade	Number of retirees	Army	Navy and Coast Guard	Air Force	Marine Corps
Enlisted personnel:					
E-1	86	Private	Seaman recruit	Airman, basic	Private.
E-2	575	Private	Seaman apprentice	Airman	Private, 1st class.
E-3	1,349	Private, 1st class	Seaman	Airman, 1st class	Lance corporal.
E-4	2,604	Corporal, specialist	Petty officer, 3d class	Sergeant	Corporal.
E-5	12,048	Sergeant, specialist	Petty officer, 2d class	Staff sergeant	Sergeant.
E-6	31,510	Staff sergeant specialist	Petty officer, 1st class	Technical sergeant	Staff sergeant.
E-7	44,881	Platoon sergeant; sergeant, 1st class specialist	Chief petty officer	Master sergeant	Gunnery sergeant.
E-8	13,174	Master sergeant; First sergeant	Senior chief petty officer	Senior master sergeant	First sergeant; master sergeant.
E-9	5,566	Sergeant major	Master chief petty officer	Chief master sergeant	Sergeant major; master gunnery sergeant.
Total	111,793				

Note.—The National Oceanic and Atmospheric Administration's Commissioned Corps and the Public Health Service do not have enlisted personnel. There were a total of 141,817 retirees employed in the Federal civilian service at the time of this study. The numbers of retirees shown in table 1 do not reflect a total of 2,342 retirees receiving their full retirement benefits from the Veterans' Administration and, thusly, were not identifiable by military pay grade or rank.

DISTRIBUTION OF RETIRED UNIFORMED SERVICES PERSONNEL BY AGENCY AND BY COMPONENT, REPORT 2: ALL AREA

Agency	Total			Unsp. va.	Regular			Nonregular			Unsp. va.
	Total	Officers	Enlisted		Total	Officers	Enlisted	Total	Officers	Enlisted

Retired Uniformed Services Personnel Employment by Agency and by Age—Report 4A.
Retired Uniformed Services Personnel Employment by Grade or Salary Within Pay System: by Age—Report 4B.

The material introduced in the next two reports covers the age of retirees by agency (report 4A) and pay system (report 4B). Ages are calculated as of June 1975, reflecting ages on that date rather than the ages of the individuals at the time of their retirement.

Table 7 gives the numbers of retirees in each of the defined age categories and the percentage representations of all retirees

therein. For comparison, the appropriate percentage for each category from the 1972 study is also presented. Although the 1972 results are based on Executive Branch employment only, comparisons are still considered valid.

TABLE 7

Age category	Percent of retirees	1975 percentage	1972 percentage
Under 40	7,897	5.6	1.5
40 to 45	32,379	22.8	18.7
46 to 50	32,760	23.1	26.4
51 to 55	35,610	25.1	32.4
56 to 60	23,063	16.3	15.1
60 and over	9,246	6.5	5.9
Unspecified	862	.6	

Generally, this table indicates that the 1975 retirees were younger than those in 1972. In 1975, 28.4% of all retirees were 45 years of age or younger compared to 20.2% in 1972. In 1975, 51.5% were 50 and younger—the 1972 figure was 46.6%. The break in this trend occurred in the numbers of retirees at 55 and younger. In 1972, 79.0% were 55 or less compared to 76.6% in 1975. Of the 1972 retirees 94.1% were 60 or less compared to 92.9% in 1975.

Table 8 provides a percentage comparison by age categories for the major pay systems identified in report 4B.

TABLE 8

Age category	GS and equivalent	Federal wage systems	Postal	Executive
Under 40	4.5	5.2	8.0	
40 to 45	19.3	23.1	29.6	
46 to 50	21.2	25.2	24.6	9.1
51 to 55	27.2	25.2	21.2	31.8
56 to 60	19.2	15.1	12.0	22.7
60 and over	8.1	5.3	4.1	36.4
Unspecified	.5	.9	.5	

The following chart shows a cumulative frequency distribution of the data presented in Table 8:

	GS and equivalent	Federal wage systems	Postal	Executive
Under 45	23.8	28.3	37.6	
50 or less	45.0	53.5	62.2	9.1
55 or less	72.2	78.7	83.4	40.9
60 or less	91.4	93.8	95.4	63.6

Table 9 provides the same types of information as table 8, based on data from the three government branches (the Legislative and Judicial data are combined). Age distribution for the Department of Defense, are also shown, as are the age distributions of all retirees. As a further comparison with the results of the 1972 study, the age distributions for both 1972 and 1975 are shown for the Executive Branch.

TABLE 9

Age category	Government-wide	Legislative and judiciary	Executive 1975	Executive 1972	Department of Defense
Under 40	5.6	11.0	4.8	1.5	3.9
40 to 45	22.8	24.9	20.6	18.7	19.3
46 to 50	23.1	22.3	22.6	26.4	23.2
51 to 55	25.1	20.5	26.4	32.4	27.5
56 to 60	16.3	13.2	17.7	15.1	18.5
60 and over	6.5	7.7	7.3	5.9	6.9
Unspecified	.6	.4	.6		.7

The following chart shows the cumulative percentage distribution of the data presented in Table 9:

	All retirees	Legislative and Judiciary	Executive 1975	Executive 1972	Department of Defense
Under 45	28.4	35.9	25.4	20.2	23.2
50 or less	51.5	58.2	48.0	46.6	46.4
55 or less	76.6	78.7	74.4	79.0	73.9
60 or less	92.9	91.9	92.1	94.1	92.4

Mr. EAGLETON. Mr. President, I reserve the remainder of my time.

Mr. GRAVEL. Mr. President, will the Senator from Alaska yield me 5 minutes to respond?

Mr. STEVENS. I yield the remainder of my time from the other amendment so he has 5 minutes.

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. GRAVEL. Mr. President, speaking to the point raised by my distinguished colleague from Missouri, I think he makes the argument that we have been trying to make.

Unfortunately, I think he demonstrates accurately that there is a great injustice that may be perpetrated if we keep this item in the bill the way it is. We did not get comparability on military pay until the 1972–73 period. So that means that all of the people who served 20 years before that.

When you say it is not contributory to the pension, I think the military people will be happy to have the proper pay and contribute so that they would have what is considered a normal vested right.

But that was not what we did to them. We euchered them into the service, and they were not paid at the comparability level, and now they have paid their dues. They have paid for their pensions, because the margin they did not receive in salary rates is what they have contributed to their pensions.

Are we going to say to them, "You have paid your part of the pension, you have made your contribution, but now we are changing the rules on you"?

I say that is unjust.

The present system may be unjust from 1973 forward, but certainly not in 1950, and certainly not to the people who went into the Korean war and the Second World War, and the early parts of the Vietnam war. It would certainly be unjust to them now to change the rules as far as they are concerned.

Our colleagues probably do have a point on pensions, but the tremendous cost they are talking about is the hidden cost of our defense establishment in prior years. Now we have to pay the price. That may be a problem we have to adjust ourselves to, and perhaps it should be corrected prospectively; but to come in here and say we are no longer going to regard a contract made with those people in prior years, and change the game on them, I do not think is either doing justice or solving the problem we are talking about.

If we want to solve the problem, we had better change the situation as it is today; and I would hope that the committee, recognizing that is the problem, would join us in cutting this sticky matter out pending the study that is to be made, and we could focus the study on the horrendous problem we are going to incur in the future.

When you compare the military to a private company—the Senator mentioned the Coca-Cola Co.—the Coca-Cola Co. or any other company does not hire people to go out and put their lives on the line in defense of the country. But that is exactly what the military have to do, and why we have given them an extra edge in pensions. Also, it is important to remember that people in Coca-Cola and private industry can go out on a project with personnel of an average age of 50, and it would not alter the situation. But it is in the best interests of our defense establishment to have a young fighting force; so it is to our interest to get them in for a period of time and get them out, because after they are 40 years old they are deadwood.

So what would we do? We would take these human beings that have given 20 years of their lives to their country and throw them on the job market when it is tough to get a job at any age. When you are over 40 years old, you are over the hill.

It strikes me as odd that we should discriminate against these people who have given, in a patriotic fashion, of their lives to their country, under a contractual obligation, and then all of a sudden change the rules and say they are not entitled to go to work for the Federal Government when their doing so is a distinct advantage to the Federal taxpayer, and, second, when they have some very fine talents that they have developed in the uniform services of the Government, talents that they could now transfer to the civilian area of the Government.

I think it is foolhardy, first, to exclude this talent, and second, not to meet the contractual obligation. If we do have a problem with pensions, which I think the able Senator from Missouri has demontrated just by reciting the figures, that is a present and prospective problem, and we will not solve that problem by going back to the other people and avoiding the contract they had.

What we should do is consider a new contract prospectively, so that we will not have a $170 billion liability in the future.

The PRESIDING OFFICER (Mr. NUNN). The Senator's time has expired.

ADDITIONAL STATEMENT SUBMITTED

Mr. DOLE. Mr. President, the Senator from Kansas joins the distinguished Senator from Alaska in speaking against the provision in the DOD appropriations bill which would prohibit future military retirees whose annual retired pay is $6,000 or more as of September 30, 1977, from collecting military retired pay while employed by the Federal Government. Furthermore, this provision in the bill would be inequitable in that:

It does not require military retirees who work for the private sector, or for local or State governments, to forfeit their retirement.

It penalizes those who served longer or advanced higher in grade.

It will encourage early retirement with a resulting loss of productive man-years to the services.

It does not differentiate between regular retirement and disability retirement; for example, a disabled veteran of the Vietnam conflict who does not currently work for the Federal Government would be required to forfeit his disability retirement should he accept a civil service position.

STUDY IN PROGRESS

The President has recently appointed a blue ribbon committee to fully review and submit recommendations on the dual compensation issue it seems to the Senator from Kansas it would be premature to take any action on this issue without considering the findings and recommendations of the President's blue ribbon panel. The panel's report is due in March of 1978.

PREVENT ABUSES

In recent years there have been many attacks on the military by Congressmen, bureaucrats, and the general public. This castigation has been focused on what is commonly referred to as "double dipping"; that is, retired military people employed in Federal civil service.

While I am in favor of allowing military retirees to serve this country under civil service, I also support the current study and the monitoring of this activity to prevent any abuses.

Mr. PERCY. Mr. President, the entire military retirement system needs a major overhaul. Why must some military personnel be forced to resign after 20 years of service just at that time in life when they may have reached their professional and intellectual peaks? How much does the current "up or out" system cost, both in terms of money and wasted human resources? We need to determine whether a system incorporating a 30-year voluntary retirement rather than a forced early retirement would be more equitable and less costly. We should also take a hard look at the arguments for and against a contributory retirement system for the military.

The provision in the bill as it now stands addresses only part of the problem. But I believe that this measure will encourage major reform of the entire military retirement system. I realize that the provision may cause some inequities and I call on the Armed Services Committee to address these problems in a comprehensive reform of the retirement system. I believe that such a reform can and must be achieved with fair treatment of our military personnel who are serving our Nation so well. For these reasons, I am voting against the amendment.

Mr. STEVENS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STEVENS. It is my understanding, now that time has expired on my third amendment; that we now revert back to Senator CULVER's amendment to my first amendment. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. In order that the Senators may understand what is going on, I will state that I intend to suggest the absence of a quorum; but it would be my hope that both cloakrooms will send out notice that we are about to——

Mr. STENNIS. Will the Senator please raise his voice?

Mr. STEVENS. That we are about ready to begin the final period of time on the Culver amendment, after which there will be a vote and then two other votes, or there could be three, depending on the result.

I suggest the absence of a quorum, to run about 3 minutes, with the time to be charged equally to both sides on the bill.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. STEVENS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STEVENS. Is time limited to 5 minutes on a side at this point?

The PRESIDING OFFICER. On the amendment of the Senator from Iowa, the Senator is correct. Who yields time?

Mr. STEVENS. Before yielding any time, I might ask the Senator from Mississippi if he intends to take any time on the Culver amendment.

Mr. STENNIS. Yes. Mr. President.

Mr. CULVER. Mr. President, I yield my remaining time to the distinguished chairman of the committee.

UP AMENDMENT NO. 681

Mr. STENNIS. Mr. President, we have to be quite brief. The Culver amendment is the pending amendment here, concerning the commissary out-pull.

The amendment of the Senator from Alaska proposes to pay for his amendment, the cost of which, in round numbers, we will just call $100 million, by taking it out of another part of the bill that we call the readiness fund.

I do not think that fund, the readiness fund, can be belittled, Mr. President. It is very definitely a part of this bill. The Senator from Iowa and I talked about it. I agreed to and did sponsor the amendment before the Appropriations Committee.

It is relatively a small amount for this purpose, but the Senator is very properly trying to get a new and better system started with reference to some action toward fill-ins at certain places that he wanted to try, and I agreed that he should try it out, putting the money at the disposal of the Secretary of Defense.

There is not time to go into the details of that, but I believe definitely he has a good idea which will lead to a definite program of readiness. We are getting into a review of it. He has done more than any other one person, unless we classify the Senator from Georgia up to him on readiness. Both of them have worked on it, some of it together. I do not discount that at all.

Here is a case where the committee tried to put in some money especially earmarked. This $34 billion is getting into the O. & M. funds. If anything is going to be done especially by the Secretary of Defense on this question, it has to come from this money.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. CULVER. I yield additional time to the Senator.

Mr. STENNIS. The readiness amendment itself has to be justified in conference. We have to try to justify it, and then justify the other end of it with the clerk-hire. We add a difficult matter to an impossible situation. I am supporting the Culver amendment. We will come to the other part of it later. I thank the Senator.

Several Senators addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, I yield myself a half minute. In view of the statement of the Senator from Mississippi, I modify my amendment by deleting lines 9 and 10.

The PRESIDING OFFICER. The amendment is so modified.

Mr. STEVENS. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. STEVENS. That is, in effect, accepting the amendment of the Senator from Iowa, as I understand it.

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Now as I understand it, there are 5 minutes left to a side between the Senator from Mississippi and myself as far as the original amendment is concerned.

The PRESIDING OFFICER. The Senator is correct.

Mr. CULVER. There is no vote necessary on that?

Mr. STEVENS. The yeas and nays were not ordered. I accepted the Senator's amendment by modifying my amendment.

Mr. CULVER. The Chair did not have to rule on that?

Mr. STEVENS. That is correct.

The PRESIDING OFFICER. It was modified.

Mr. STEVENS. Mr. President, I yield myself 1 minute at this point because I know the Senator from Mississippi deserves to be heard.

I would ask unanimous consent that Claudia Louis, who has been working with me, be granted the privilege of the

floor during the three votes and the consideration of these amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 499

Mr. STEVENS. Mr. President, the only reason for the provision that I have just deleted is that it was my understanding that the committee desired and requested Members to find a place to reduce funds in the bill if they were going to offer amendments which would restore money in the bill.

Again, the money that I seek to restore is in the budget. It was within the Senate budget. It is a request of the Department of Defense that the commissaries be continued at their current level until the completion of the study going on concerning benefits. I see no reason why we should have a unilateral action on the part of the Senate for the third year in a row when twice the House has refused to go along with similar provisions.

We will await the study of the new Secretary of Defense and the administration concerning commissary costs. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, as I understand, we have 5 minutes. I am going to be quite brief and yield the remainder of my time to the Senator from Missouri, who has worked on this.

Mr. President, we had this proposition before us all last year, the phaseout of the clerk-hire subsidy for the commissary. In-depth hearings were held on the subject matter in our committee by the Senator from Georgia (Mr. NUNN) and his subcommittee. We totally examined all phases of that and other questions. Our committee approved it. It was not unanimous, but it was approved by a large vote. However, it was defeated in the House.

When this matter came up this year—and I did support it last year—I said that my position on the merits of the matter was still the same. This amendment is one way to go at it. There are other ways, and it is a question of which is the best way.

Mr. President, I believe that in a commissary furnished by the Government, the Government pays for the building, the upkeep, the repairs, the electric bills, everything about it, janitors and everything else, the clerk hire goes with the pair of shoes, or whatever else is bought. It is not a taxpayer's bill. It is a cost of the product. Whomever buys the product ought to have to pay that part of the freight. It is just as simple as that.

I am amazed at the amount of opposition this matter has run into, and I do not blame anyone interested in wanting to keep it. But it is something that somewhere, sometime, the Congress will have to face up to and do something about. This amendment will.

I yield to the Senator.

Mr. EAGLETON. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Missouri has 3 minutes.

Mr. EAGLETON. Mr. President, I ask my distinguished colleague from Alaska, would he prefer, maybe, that we sum up on all three amendments and then have the votes in rapid succession?

Mr. STEVENS. I might say to my friend I would like to do that, but there are other people involved in the other amendments and I could not change the schedule. They will come back for the other two amendments. There will be a vote at 12 noon on the treaty. We would like to have the vote on this amendment following the vote on the treaty.

Mr. EAGLETON. I will be very brief and yield back whatever time remains, Mr. President. We will have the treaty vote and then the first of these three votes.

I believe the commissary matter has been well discussed. What this amendment does is very simple. There is about a $300 million subsidy in this bill for commissary clerk-hire. Over a 3-year period this would phase out this $300 million subsidy—$100 million a year for the next 3 years. Over 10 years, it will save the Federal Government $3.9 billion. It is a very simple issue before the body. Do we want to save this amount in the budget?

The current subsidy gives people who shop at the commissary a 25-percent price saving compared to local grocery stores. If this committee provision prevails, it will become a 15-percent savings. It will not close on commissary. The six commissaries here in the District of Columbia will not close, nor the ones in San Antonio, Norfolk, nor any of them. The price break will be reduced from 25 percent to 15 percent. That is all it basically does.

Mr. STENNIS. May we have quiet?

The PRESIDING OFFICER. Will the Senator from Missouri suspend until we have order?

The Senator from Missouri.

Mr. EAGLETON. The issue is joined. Do we want to save this amount of money or do we want to continue a system that, in light of the present comparability military pay has outlived its original purpose.

Back in the old days, when pay was not comparable, one could justify, or attempt to justify, these various fringe benefits. Now, in the day and age of comparable pay—indeed, military pay in certain areas being higher than civilian pay—these fringe benefits are no longer, in my opinion, justifiable. I yield back the remainder of my time.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. ROBERT C. BYRD. Mr. President, there is to be a treaty vote at 12 noon today. I ask unanimous consent that the votes be reversed and that the first vote occur on the amendment by Mr. STEVENS, when the time has run out, and then the treaty vote.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that Stewart Brahs be granted the privileges of the floor during the consideration of the pending bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I have no fight with my good friend from Missouri, it is time for us to look at the retirement problem of people in the military and the future costs to the system if it is continued.

Nor do I argue with the distinguished Senator from Mississippi about the problem of payment of some of these costs. As a matter of fact, the commissaries themselves pay for utilities. The commissaries themselves pay for the new buildings. We no longer build commissaries. We no longer provide the utilities. We have shifted a great many of the costs over.

I am particularly concerned about the promises made by our Government to the people who entered the service in World War II, for instance. The Senator from Missouri talked about those of us who got $21 a month, and many of us here did. Those people who stayed in and made the military a career, and who retired, did so on the belief that they would have the commissaries as one of the benefits after their retirement.

That was not something that was just held out as, "Oh, well, if we still have some, you can use it." It was a promise. We made a promise to those people that when they retired, the military commissary system would be available to them.

We have the strange situation in this bill, Mr. President, where $700 million is for advertising to try to get people to join the military service. Yet, there are at least three things in the bill that guarantee that people will get out of the military service, because there were three promises made to people as they entered the service that the Senate is trying to take away.

I just cannot believe that that is the way to solve this problem—on the one hand, to cut off the benefits and, on the other hand, put up more money to try to get people to join the military service.

I again say, we are paying a debt. We are providing commissaries for those people who need them. I think we could change this system. I urge the legislative committees to look at the problem and find a way to keep the promise we made to the people in the past and tell those who enter now under the new comparability concept that they are not going to be eligible for them. That is the way to solve them. It is not by just cutting through and denying them to people.

Again, I want to point out the number of people who are on food stamps now. We have 53,000 eligible food stamp families in the military today. This will do nothing more than increase their costs and will increase the costs of those people who retired after 20 years, and particularly, the 30-year retirees. I just do not think we should do it.

It is not in the House bill. The House refused to go along with it 2 years in a row. The Department of Defense did not request it this year. It is in the Senate's budget. It is in the President's budget. This is a budgeted item that I am trying to restore.

The PRESIDING OFFICER (Mr. PELL). All time having expired, the question is on agreeing to the amendment of the Senator from Alaska, as modified.

Mr. STEVENS. I ask for the yeas and nays on my amendment.

The PRESIDNG OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from Montana (Mr. METCALF), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Vermont (Mr. STAFFORD), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

I further announce that, if present and voting, the Senator from Wyoming (Mr. WALLOP) and the Senator from New Jersey (Mr. CASE) would each vote "yea."

The result was announced—yeas 59, nays 33, as follows:

[Rollcall Vote No. 299 Leg.]

So Mr. STEVENS' amendment, as modified, was agreed to.

EXECUTIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now go into executive session and proceed to the consideration of the protocol and treaty, Executive Calendar Nos. J and H.

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays on the resolutions of ratification of the protocol and treaty.

The yeas and nays were ordered.

PROTOCOL OF AMENDMENT TO THE INTER-AMERICAN TREATY OF RECIPROCAL ASSISTANCE (RIO TREATY)

TREATY WITH CANADA ON THE EXECUTION OF PENAL SENTENCES

The PRESIDING OFFICER. The resolutions of ratification of the protocol and treaty having been read, the Senate will proceed to vote on the protocol of amendment to the Inter-American Treaty of Reciprocal Assistance—Rio Treaty, Executive J, 94th Congress, 1st session.

The first question is on agreeing to the reservation, which the clerk will state.

The legislative clerk read as follows:

The United States in signing this protocol of amendment to the Inter-American Treaty of Reciprocal Assistance, accepts no obligation or commitment to negotiate, sign, or ratify a treaty or convention on the subject of collective economic security.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reservation be agreed to.

The PRESIDING OFFICER. Without objection, the reservation is agreed to.

The question is on agreeing to the resolution of ratification, with the reservation, of Executive J, 94th Congress, first session.

The resolution of ratification, with the reservation, reads as follows:

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance (Rio Treaty) signed at a special conference of plenipotentiaries at San Jose, Costa Rica, on July 26, 1975 (Ex. J, 94–1), subject to the following reservation:

The United States, in signing this Protocol of Amendment to the Inter-American Treaty of Reciprocal Assistance, accepts no obligation or commitment to negotiate, sign or ratify a treaty or convention on the subject of collective economic security.

The PRESIDING OFFICER. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. METCALF) is necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Vermont (Mr. STAFFORD), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

I further announce that, if present and voting, the Senator from New Jersey (Mr. CASE) would vote "yea."

The yeas and nays resulted—yeas 95, nays 0, as follows:

[Rollcall Vote No. 300 Ex.]

YEAS—95

NAYS—0

NOT VOTING—5

Case	Metcalf	Wallop
Mathias	Stafford	

The PRESIDING OFFICER. Two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

TREATY WITH CANADA ON THE EXECUTION OF PENAL SENTENCES

The PRESIDING OFFICER. The question now is on agreeing to the declaration, which the clerk will state.

The legislative clerk read as follows:

That the United States Government declares that it will not deposit its instrument of ratification until after the implementing legislation referred to in article III has been enacted.

The PRESIDING OFFICER. The question is on agreeing to the declaration.

The declaration was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the resolution of ratification, with the declaration, of Executive H, 95th Congress, 1st session.

The resolution of ratification, with the declaration, reads as follows:

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty between the United States of America and Canada on the Execution of Penal Sentences which was signed at Washington on March 2, 1977 (Ex. H, 95–1), subject to the following declaration:

That the United States Government declares that it will not deposit its instrument of ratification until after the implementing legislation referred to in Article III has been enacted.

The PRESIDING OFFICER. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. METCALF) is necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Vermont (Mr. STAFFORD), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

I further announce that, if present and voting, the Senator from New Jersey (Mr. CASE) would vote "yea."

The yeas and nays resulted—yeas 95, nays 0, as follows:

[Rollcall Vote No. 301 Ex.]

NAYS—0

NOT VOTING—5

Case	Metcalf	Wallop
Mathias	Stafford	

The PRESIDING OFFICER. Two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which both resolutions of ratification were agreed to.

Mr. SPARKMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE SESSION

The PRESIDING OFFICER (Mr. ABOUREZK). The Senate will now return to legislative session.

DEFENSE APPROPRIATIONS, 1978

The Senate continued with the consideration of H.R. 7933.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Mr. Peter Parkham, of my staff, be permitted access to the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, will the Senator yield to me to make an announcement?

Mr. KENNEDY. I yield without losing my right to the floor.

Mr. STENNIS. While the membership is here in larger numbers than usual, let me make an observation here about where we are with reference to this bill. We now are going into an hour and a half recess so far as voting is concerned, unless it is voice-voted.

There is one amendment here that has been debated some already that may be disposed of by a voice vote, and we have an amendment here that the Senator from Massachusetts proposes to present now, I am sure. We have a matter here by the Senator from Ohio (Mr. METZENBAUM) that can be disposed of during this recess. We have another one by the Senator from Maine (Mr. HATHAWAY) which can be disposed of during this same period.

Mr. President, if we are going to finish the bill by 8 o'clock we have got to move along. I call the attention of the Senator from Alabama, if I may, to the fact that we are up against a situation of trying to get these matters moving. There is one matter here, the helicopter matter, that was, I learned, excepted, the amendment was. It is a committee amendment, and it was excepted the other day from the general agreement, and so forth. Therefore, it has the rating here of a committee amendment.

Senators are coming to me and saying they have matters to leave town about, some have. I think we ought to move along. That is a major amendment by both sides that ought to be called up sometime before real late.

I plan on notifying them now to make some plan to call it up as a committee amendment. If we may take a minute or two here, will the Senator from Massachusetts indulge us for just a moment?

Mr. KENNEDY. Mr. President, I am glad to yield further with the understanding that none of this time is charged against the time of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, there are several speakers involved. If we are having a period from 12:30 p.m. until 2 p.m. during which there will be no votes, I anticipate there will be few Senators in the Chamber. But there are some amendments, as the Senator pointed out, that can be handled possibly by voice vote.

I suggest this amendment might possibly be called up around 3 p.m. so I could alert Senators on both sides to be present at that time.

Mr. STENNIS. I wish to be as accommodating as I can. I have to call up the amendment. I do not know that I have to wait that long.

Mr. ALLEN. That is perfectly all right.

Mr. STENNIS. We will make headway. Some Senators have to leave. It is always that way. We cannot avoid it.

Mr. STEVENS. Mr. President, will the Senator yield to me with the same understanding?

Mr. KENNEDY. Yes.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which amendment No. 499 was agreed to by the Senate.

Mr. BELLMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, it was my understanding that it may be agreeable to the Senator from Missouri and the Senator from Mississippi to have a voice vote on my amendment No. 500.

I am prepared to yield back the remainder of my time if that is what they desire to do—to have a voice vote on that at this time.

Mr. STENNIS. Mr. President, this time does not count now against the time of the amendment of the Senator from Massachusetts.

Mr. STEVENS. That is correct.

The PRESIDING OFFICER. The Chair will advise the Chamber that the time is being charged to the Senator from Mississippi on the bill since the time cannot be charged to the Senator from Massachusetts until his amendment is called up.

Mr. ALLEN. Mr. President, will the Senator from Mississippi yield?

Mr. STENNIS. I yield 1 minute, but I can talk to the Senator from Alabama and we can move on with the bill.

Mr. ALLEN. If the Senator will set a time in which he wishes to bring up the helicopter amendment that would be satisfactory. Just give us a little time to notify the interested Senators.

Mr. STENNIS. I wish to have some of the voice voting during this voting recess here, if we could; part of it then and then part of it later. How would that be?

Mr. ALLEN. Will the Senator suggest 1 p.m.?

Mr. STENNIS. He and I will work out something on it.

Mr. ALLEN. All right.

Mr. STENNIS. I yield the floor, Mr. President.

Mr. STEVENS. Mr. President, may I inquire of the Senator from Mississippi if the statement I made is correct? I am prepared to ask to call up my amendment and dispose of it by voice vote if that is correct.

Mr. STENNIS. Yes. We conferred here. The Senator from Missouri and I have conferred, and that is correct.

AMENDMENT NO. 500

Mr. STEVENS. With the indulgence of the Senator from Massachusetts, I ask unanimous consent that we return to the consideration of my amendment No. 500 and set his amendment aside for the time being. He gets the floor back immediately thereafter.

Mr. KENNEDY. Do I understand it is noncontroversial?

Mr. STEVENS. Yes. It is noncontroversial.

Mr. KENNEDY. I yield for those purposes.

The PRESIDING OFFICER. The amendment will be stated.

Mr. KENNEDY. Mr. President, I ask if we can get the yeas and nays on my amendment.

The PRESIDING OFFICER. The Senator would have to ask unanimous consent that it be in order to ask for the yeas and nays.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays are ordered on the Kennedy amendment.

The clerk will state amendment No. 500.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes amendment No. 500.

Mr. STEVENS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Again I state to my good friend I am prepared to have a voice vote on the amendment.

Mr. EAGLETON. Yes.

Mr. STEVENS. I yield back the remainder of my time.

Mr. EAGLETON. I yield back the remainder of the time of the Senator from Mississippi.

The PRESIDING OFFICER. Does the Senator from Mississippi yield back the remainder of his time?

Mr. STEVENS. He does.

Mr. EAGLETON. He does.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the amendment.

(Putting the question.)

The ayes appear to have it. The ayes have it.

The amendment was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BELLMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. I thank my good friend from Massachusetts.

Mr. BELLMON. Mr. President, will the Senator yield for a unanimous consent request?

Mr. KENNEDY. I yield.

Mr. BELLMON. Mr. President. I ask unanimous consent that Dick Hargis, of my staff, be accorded the privilege of the floor during consideration and votes on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, will the Senator yield for the same purpose?

Mr. KENNEDY. I yield.

Mr. DANFORTH. Mr. President, I make the same unanimous-consent request for Mark Edelman, of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Massachusetts is recognized.

AMENDMENT NO. 525

Mr. KENNEDY. Mr. President, I call up my amendment No. 525 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes amendment No. 525.

On page 12, strike out lines 13 through 25 and insert in lieu thereof the following:

PROHIBITION AGAINST USE OF FUNDS FOR CIVILIAN RIFLE PRACTICE PROGRAM

None of the funds appropriated in this Act may be used in connection with any civilian rifle practice program, including the issuance of military rifles or ammunition under the authority of section 4311 of title 10, United States Code.

Mr. STENNIS. Mr. President, may we have quiet? This amendment is certainly entitled to the attention of the Senate.

Mr. KENNEDY. Mr. President, I understand there is a time limitation of 15 minutes to each side.

Am I correct in that understanding?

The PRESIDING OFFICER. The Senator is correct.

Mr. KENNEDY. I yield myself 7 minutes, Mr. President.

Mr. President, I take this opportunity to offer an amendment to H.R. 7933, the appropriations for the Department of Defense, in order to eliminate the functions of the Army National Board for the Promotion of Rifle Practice. The appropriations request for this program in fiscal year 1978 is $694,000.

My reason for moving to delete this activity from the appropriations for our vast military organization is straight forward. Federal support of civilian rifle practice is an obsolete anachronism that cannot be justified in our modern society.

Congress created the National Board for the Promotion of Rifle Practice in 1903 to carry out four missions:

First. To promote practice in the use of military type individual small arms among civilians,

Second. To promote small arms matches and competitions,

Third. To issue arms, ammunition, targets, and other supplies to competitors participating in these activities, and

Fourth. To procure and award to winning competitors, trophies, medals, badges, and other insignia.

According to the legislation creating the board, the basic purpose of these activities is to encourage and support small arms target practice, presumably so that in time of war the Nation would have a trained corps of riflemen and rifle instructors.

Perhaps in 1903, that was a noble goal. At the turn of this century, the need for a prepared civilian force of riflemen may have been important. But if there is any one thing that our enormous military training system has mastered—it has mastered the technique for teaching raw recruits how to shoot.

And I seriously doubt that the funds appropriated for the civilian marksmanship program have contributed substantially, if at all, to the development of proficient marksmen in today's Army.

Indeed, the visible and obvious result of those Pentagon sponsored shooting matches is to provide a Federal subsidy for people who derive recreational enjoyment and personal satisfaction from the use of firearms.

Every member of this Senate is fully aware of my earnest demand to establish a nationwide Federal firearms control system. I believe that only with such a system can we begin to stem the bloody flow of firearms killings in this country.

Until a standardized system to restrain firearms abuse is enacted, I can see no reason why the Federal Government should be involved in paying for people to take target practice in military firing ranges or anywhere else, for that matter.

I at this point bring to the attention of my colleagues some interesting data: In fiscal year 1978, the requested appropriations for the NBPRP expenses are 3½ times as much as what was requested for fiscal year 1971. To expend money on this unnecessary program at any time is unwise, if not foolish. I, for one, am not willing to sanction this expenditure at this time or anytime.

This Nation has been through a period when needed funds for programs to help our poor were stricken by an unsympathetic administration. Shortly, a welfare reform plan based on zero budget increase will be put before us. I need not tell this body that people in this country are hungry, in need of jobs, in need of relief from hospital costs that has many of our citizens checking their wallets to determine if they can afford the proper medication.

To consider an appropriation for this program, given our domestic and international priorities, is unconscionable. In all sincerity, can we justify spending $329,000 on ammunition for target practice and competition?

Let me share with you the figures from the funding support for the appropriation, "National Board for the Promotion of Rifle Practice":

Fiscal year	Total appropriation including supplemental	Value of ammunition transferred under 10 U.S.C. 4311	Number of rounds of ammunition transferred
1978	[1] $365,000	$329,000	34,000,000
1977	297,000	329,000	33,600,000
1976	235,000	280,000	33,600,000
1975	183,000	297,000	33,000,000
1974	169,000	270,000	30,000,000
1973	159,000	-------	----------
1972	122,000	-------	----------
1971	102,000	-------	----------

[1] Requested in 1978 budget.

How can we justify spending $694,000 for ammunition and expenses for a civilian marksmanship program—the benefits which are nonexistent—when that same $694,000 could provide 2.3 million meals to our elderly citizens?

How can we justify spending $694,000 on the NBPRP which contributes little, if anything, to our national defense when many of the young people who would be called upon to defend our country are today languishing in both urban and rural locales unable to find employment?

We certainly cannot justify spending $694,000 for a civilian marksmanship training program as some would argue, because our country's priority is to send a competitive rifle team to international competitions. I have not seen any place else in this year's appropriations or any other where the Congress subsidizes basketball, track, and swim teams which represent the United States in international competition. I hardly think if we were to do so, that shooting would be the first area that we would subsidize.

Further, it is my understanding that this appropriation was deleted in subcommittee, but in full committee, it was restored by voice vote. I intend with the help of my colleagues to support the wisdom of the subcommittee and eliminate all the funds for this unnecessary program.

In 1967, when I first brought the details of this program to public attention, annual expenditures for the civilian marksmanship program amounted to over $3 million. Today, the appropriations bill before the Senate specifically denotes $365,000 for support personnel, of which $50,000 is for the lease of Camp Perry, a cost that has been borne by the National Rifle Association for the last 9 years, and a sum of $329,000 for ammunition and supplies.

During that timespan, we seem to have produced a substantial reduction in this program. But I am currently alarmed by the Department's action which reveals a blatant assault on the integrity of the public trust.

Because the National Rifle Association exercises nearly exclusive control over the eligibility of participants in these programs, the fundamental legality of the programs is in doubt, for participants in these subsidized programs must show allegiance to and negotiate through the National Rifle Association affiliates in order to gain access to the Federal arms supply. If the Defense Department can justify a subsidy for those who enjoy shooting guns, why cannot the Department of Transportation subsidize people who enjoy racing automobiles? Or why should not the Agriculture Department subsidize people who derive pleasure and satisfaction from cultivating and raising roses or camellias? Or, why cannot the Interior Department provide subsidies for young boys and girls who yearn to play the wholesome sports of baseball, football, or basketball?

Mr. President, I would like to advise my colleagues that the entire subject of civilian marksmanship was studied by Arthur D. Little, management consultant firm, and a report was issued in January 1966. I ask unanimous consent that excerpts from this report be printed in the RECORD at the conclusion of my remarks today.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. KENNEDY. The study issued a 57-page report which provides some valuable insights into why this program should be abolished.

The most significant conclusion in the report appears on page 14 and again on page 57, and deals with training soldiers to meet marksmanship proficiency. The report states:

> A fundamental question in determining how much to spend on training is what degree of proficiency is desirable or even "good enough"?
>
> We were surprised to find that no desired objectives or even minimum standards of rifle marksmanship proficiency have been set for either units or individuals going into combat. Therefore, as far as we could tell, no one has yet been able to "price out" the value of achieving a given level of marksmanship proficiency in a rifle company, platoon, squad, or perhaps even more difficult, in an individual rifleman. Thus, it is difficult to justify on a cost/benefit basis, the investments made in teaching riflemen how to shoot.

Further from page 24 of the report, I quote:

> Until more direct study and research is applied to the question of how incremental degrees of rifle marksmanship proficiency relate to a unit's combat effectiveness, and also to the question of "how much it's worth" for a unit to attain higher levels of combat effectiveness, we believe it will be extremely difficult to "price out" the value of the DCM program in terms of a quantitatively expressed cost/benefit relationship.

The Arthur D. Little study recommended that consideration be given to defining and carrying out needed research in this area.

Mr. President, although that recommendation was made in 1966, the Army has never formulated and has never requested funds for the recommended research. Eleven years later, there is still absolutely no cost-benefit justification for this program. I might point out that a program that can be shown to have few, if any, benefits, but has a cost of almost $1 million, such as this, cannot possibly survive under President Carter's zero base budgeting concepts. Zero base budgeting is in fact designed specifically to eliminate such a program.

I think my colleagues should also recognize that Arthur D. Little did an extensive study of the benefits of the program and, in doing so, discovered the remarkable fact that only about 3 percent of the personnel who enter Army basic training have ever been members of civilian marksmanship gun clubs. This completely reinforces the point I made earlier that this program is simply an expensive subsidy being provided to enhance both the image and function of the National Rifle Association and subsidize the sport of shooting in this country.

I am particularly dismayed with the thrust and direction of this program because it serves to validate the role of firearms as an acceptable and attractive part of our daily life. Each year the count of gun deaths on America's domestic battlefields leaps beyond the death toll of the year before. Instead of actively seeking to stop killing over 21,000 civilians with guns each year, the administration is vigorously spending tax dollars to encourage people to do even more shooting.

American households comprise the largest civilian owned arsenal in the history of mankind. Between 100 and 150 million rifles and shotguns are owned by our citizens. And another 30 million handguns are believed to be privately owned by the American people.

With such an enormous civilian arsenal, what rationale justifies a Government subsidy aimed at the development of yet another potentially deadly firearm?

Why should the citizens of this country contribute their tax dollars for the production of a device that could ultimately fall into the hands of those who might abuse such a powerful and threatening weapon?

Mr. President, while I seek to delete less than $1 million dollars from this appropriations measure, it is important to remember that the money amount is much less significant than the overall impact of this program.

My amendment not only would abolish the program by deleting the $694,000 appropriation, it would also deny the use of other Defense Department funds to subsidize any of the civilian firearms activities currently operated under the National Board for the Promotion of Rifle Practice.

There is clearly no justification for the Department to continue this activity, and certainly there is no reason why the Department should expand its subsidy in this area.

I therefore urge the Senate to strike the appropriation for the National Board for the Promotion of Rifle Practice. And insert the following in lieu thereof:

> Prohibition against use of funds for civilian rifle practice. None of the funds appropriated in this act may be used in connection with any civilian rifle practice program including the issuance of military rifles or ammunition under the authority of section 4311 of title 10, United States Code.

Continued Federal support of this privately operated recreational pursuit contributes little, if any good, to the welfare of our citizens or the defense of this Nation. There is no room in our Federal Establishment for programs that may serve to embellish the public appeal for activities that can lead to the abuse or the misuse of firearms.

I will basically summarize the case.

Mr. President, in the existing appropriations there is some $694,000 added in this bill of which $365,000 is for incidental expenses of the National Board including $50,000 for lease of Camp Perry. In addition $329,000, is the value of ammunition which is transferred to the National Rifle Association, which is made available to their members for target practice and for competitions.

This is basically a 20-percent increase over the appropriations of last year. It is in excess of 300-percent increase from 1971.

I think we should ask ourselves why the American taxpayer should be subsidizing one particular activity which will be listed as a sporting activity: We do not subsidize little leaguers. We do not subsidize the bowlers. We do not subsidize young people going out and camping. But we do subsidize effectively with this particular program the National Rifle Association to the tune of $694,000 for ammunition and military personnel.

I think it is appropriate for us to ask why we should be paying American service personnel salaries of some $300,000 to provide solely this particular support

function. So we ask that, and try to consider whether with this particular resource it really makes very much of a difference in terms of our national security. We can look back on the rather detailed study that was done on that by Arthur D. Little in the mid-1960's, and the conclusion of the Arthur D. Little study.

I shall include the relevant section of the report, but just for the purpose of this particular debate mention these lines:

Thus it is difficult to justify on a cost-benefit basis the investment made in teaching riflemen how to shoot.

That is a part of the evaluation of the program on the target-shooting ability of the various ground personnel.

We can justify it perhaps by saying that we need this program to teach young people how to shoot, because then they will go in the military. The fact of the matter is that more than half of all the people who will take the benefit of this particular program are over 20 years of age, and will not go into the military at all. So whatever justification there may be, as small as it is in terms of any kind of study or review, it has to be justified or borne out; and nothing in the report would indicate that it is.

More than half of the people who would use this program will never go into the military. So it fails on that particular basis.

Furthermore, Mr. President, if you are a small gun club in any particular area of this country, unless you are members of the National Rifle Association, you are not eligible to receive any of the ammunition. So they have really, a closed shop. To become a member of the National Rifle Association, you have to pay a good amount of dues. So it is not just the mom and pop target practicing association that exists in the small towns and communities of this country that would be eligible for this ammunition; you have to belong to the NRA organization, the organization sets standards, you have to pay the dues, and then you become eligible for the utilization of this ammunition.

The PRESIDING OFFICER. The Senator's 7 minutes have expired.

Mr. KENNEDY. I yield myself 3 more minutes.

Beyond that, Mr. President, this ammunition is not the type of antiquated ammunition that would justify some of the arguments. Perhaps there was a justification after World War II or the Korean War that "We have a lot of excess ammunition; if we do not shoot it up, it will just clog up the storehouses and warehouses, we have to pay rent for all of that, and it is a cost saving for us." That is not the situation with regard to the ammunition being utilized under this particular legislative appropriation.

So, Mr. President, I think we have to ask ourselves if we can find a justification for this particular program, why do we not justify the Department of Transportation having a driving program for the young people of this country, in order that they may be safer drivers; and why do we not subsidize 4–H Clubs, for the benefit of cultivating agricultural science and techniques? Or why do we not subsidize the Interior Department in providing baseball, basketball, or football programs for young Americans?

We do not do that, nor do we underwrite our Olympic teams, when they compete in the Olympics representing this country. But the Appropriations Committee has made the decision that in this narrow area of shooting, we will justify the expenditure of some $694,000—a 20-percent increase over last year and a 360-percent increase over the year of 1971.

I do not believe it is justified from any point of view, and I would hope that the appropriation would be struck down.

Mr. President, I reserve the remainder of my time.

EXHIBIT 1

A STUDY OF THE ACTIVITIES AND MISSIONS OF THE NBPRP

REPORT TO THE DEPARTMENT OF THE ARMY

Public release of the study of the civilian marksmanship program

A study of the Civilian Marksmanship Program prepared by the Arthur D. Little Company has been received by the Department of the Army.

This study is a comprehensive review of the Army's Civilian Marksmanship Program. Although no final action has been taken on the study, it will be the basis for further consideration by the Department of Army Staff and the National Board for the Promotion of Rifle Practice to determine those actions necessary to carry out those recommendations which may be approved for implementation.

SECTION I

A. Organization and composition of the NBPRP

The NBPRP consists of not less than 21, nor more than 25, members appointed by the Secretary of the Army from the Army, Navy, Air Force, Coast Guard, Reserve Officers' Association, National Guard Bureau, Selective Service, National Rifle Association, and the country at large. These members serve without compensation other than reimbursement of necessary authorized expenses. Each member is appointed for a term of three years, with one-third of the membership terminating annually. Members may serve a maximum of two successive terms and may be reappointed after a break in tenure.

Each group represented on the NBPRP nominates its own members in numbers designated by the President of the Board to fill vacancies. The National Rifle Association is the nominating agency for all civilian members representing both the NRA and the country at large.

B. Programs administered by the DCM

1. The Club and State Association Issue and Loan Program

DCM-affiliated clubs are eligible to receive the following quantities of arms on a loan basis (depending upon the number of club members):

	Senior clubs	Junior clubs	Cadet schools—except ROTC
Rifle U.S. caliber .30 M–1	4–8		1 per cadet.
Rifle caliber .22	4	4–10	10.
Pistol caliber .45 M–1911A1	4		

TABLE I–1

Authorized DCM staff

Colonel—Director of Civilian Marksmanship	1
Colonel—Executive Officer, National Matches	1
Lt. Col.—Executive Officer, National Board for the Promotion of Rifle Practice	1
GS–12—Executive Officer, Civilian Marksmanship	1
GS–12—Budget Officer	1
GS–8—Administrative Assistant	1
GS–8—Assistant for Program Planning	1
GS–8—Secretary	1
GS–8—Purchasing and Contracting Agent	1
GS–6—Unit Supervisors	2
GS–5—Administrative Aide	1
GS–5—Supply Clerks (Typing)	3
GS–5—Clerk Typists	2
GS–5—Correspondence Clerks (Typing)	2
GS–4—Correspondence Clerks (Typing)	2
GS–4—Supply Clerks (Typing)	2
GS–4—Clerk Typist	1
WB–5—Warehouseman	1
Total staff	25

In some cases the above allotments are increased if the club makes a special application to the DCM and presents sufficient justification for their request. For example, an increased allotment might be approved in the case of a particularly large club, if sufficient Government arms are available.

Annual ammunition issues to DCM-affiliated clubs are made on the basis of quantities shown in Table I–2. Initial allotment is based on the entire club membership while subsequent issues are based on the number of members who have fired a DCM qualification course for record the preceding year. Targets are also issued on the same basis. A club may divide up its ammunition (and target) allotment by type any way it sees fit, using these ratios.

TABLE I–2.—BASIS FOR AMMUNITION ISSUES—ROUNDS PER MEMBER

Ammunition type	Senior and college clubs	Junior division, senior club	Junior clubs	Cadet schools
Cal. 45	150 or			Determined by DCM, based on enrollment and supply.
Cal. 30	150 or	150 or		
Cal. 22	300	300	300	

In Chapter VI we explain in detail the requirements the club must meet in affiliating with the DCM. In brief, the primary requirement is that the club must be affiliated with the NRA and thus must meet the NRA's club membership qualifications. Through this requirement, the NRA has the responsibility for ascertaining the character and responsibility of the club officers and the legitimacy of the club's intentions and membership. NRA-affiliated clubs wishing to affiliate with the DCM must then submit to the DCM a roster of club members, a report assuring that it has access to adequate range facilities, and a signed agreement that it will comply with the anti-discrimination provisions of Title VI of the 1964 Civil Rights Act. The only exception made in these requirements is that schools with a Corps of Cadets need not affiliate with the NRA, but can apply directly to the DCM. Table I–3 gives a breakdown of membership and type of DCM-affiliated clubs as of 2 September 1965.

TABLE I–3.—DCM-AFFILIATED CLUBS AND MEMBERSHIP SEPT. 2, 1965

Type of club	Clubs		Membership	
	Number	Percent	Number	Percent
Senior	2,720	46.5	151,302	36.8
Senior with junior division	566	9.7	89,372	21.7

Type of club	Clubs		Membership	
	Number	Percent	Number	Percent
Junior (includes public high schools)	2,457	43.9	161,933	39.3
College	78	1.3	6,018	1.5
Cadet schools	33	.6	2,679	.7
Total	5,854	100.0	411,304	100.0

Source: DCM records (computer run SAOAS-69).

State NRA Associations (now about 50 in number) are also eligible to be issued the following arms for selection and training of teams to represent the state in the National Matches:

Rifle U.S. Cal. 30–NM or Cal. 7.62 mm–NM—8 per State Association.

Pistol Cal. .45 M1911A1–NM—6 per State Association.

As with the club program, the arms issues to the State Associations may be increased above the amounts shown if a sufficient reason is given (e.g., particularly large teams in large or heavily populated states). The State Associations are also given ammunition allotments to conduct tryouts and for team member practice for the National Matches. The amounts of these issues are determined by the size of the team and by the available supplies of ammunition.

2. Sales of Government arms, ammunition, and supplies

This part of the DCM program is available to any individual member of the NRA (about 670,000 members as of January 1965) as well as to clubs affiliated with the NRA. Information on the availability and prices of such Government arms and supplies is made available to NRA members through distribution of the DCM Price List which is issued twice a year and through DCM notices published in the NRA magazine, "The American Rifleman."

The DCM office has responsibility for establishing policies and procedures for administering the sales program, but outside of printing and distributing the Price List, has little additional role in the sales program. Individual NRA members must send their arms-purchase requests to the U.S. Army Weapons Command, Rock Island Arsenal, Illinois, and their requests for ammunition to Ammunition Procurement and Supply Agency, Joliet, Illinois, for processing. The inclusion of the purchaser's current NRA membership card or facsimile verifies his eligibility to purchase. Ammunition Procurement and Supply Agency and U.S. Army Weapons Command and the various Army depots administer the shipment of purchased arms and ammunition.

3. Civilian use of military rifle ranges

As authorized by Title 10, U.S. Code, Section 4309b and implementing AR 920–20, all ranges which have been constructed wholly or partly with funds provided by Congress are open for use by those in any branch of the military or Naval service of the United States and by all able-bodied citizens of the United States under prescribed regulations. The only reason allowed by AR 920–20 for denying such use of a military range is if the range is required for the use of the Army or other controlling service. In carrying out these provisions, the DCM provides liaison between civilian organizations desiring the use of range facilities and the installation at which the range is located. The DCM processes these requests and, when satisfied as to the responsibility of the organization, furnishes the club president or secretary a letter addressed to the Commanding Officer of the installation approving the application subject to such regulations as the Commanding Officer may prescribe. The civilian organization then contacts the installation Commander and arranges for suitable firing dates. In the case of National Guard or unoccupied installations, the DCM requests permission from the state Adjutant General or other agency concerned and notifies the requesting organization of the result. If permission is granted, the latter then arranges all details with the Commander or agency concerned.

4. National matches

The Secretary of the Army is charged by law with responsibility for conducting the National Matches. He has delegated the responsibility for planning and conducting the Matches to the President of the NBPRP. The actual planning and administration of the Matches is carried out by the National Match Executive Officer who reports to the DCM.

The National Matches consist of the Small Arms Firing School, the National Trophy Rifle and Pistol Matches, the NRA National Rifle and Pistol Championship Matches, and all ceremonies, activities and official events connected therewith. The National Matches last for approximately 30 days and are held each year at Camp Perry, Ohio, usually during the month of August. These Matches represent the national championships, both for the military and for the NRA, which is the national sports governing body for rifle and pistol shooting in the United States.

The Small Arms Firing School was started in 1918 as a means of making shooters into good instructors. Current methods of instruction employed by the U.S. Army are stressed in this school. The most important function of this school is to develop instructors who can properly train others in their communities and organizations in the use of small arms, including both rifles and pistols. The school is conducted by the Advanced Marksmanship Training Unit of the United States Army. An appropriate certificate indicating satisfactory completion of each course of instruction is given by the Small Arms Firing School to those who meet the qualifications established by the NBPRP.

The National Trophy Rifle and Pistol Matches, for which national trophies and medals are awarded by the NBPRP, consist of the following:

(a) National Trophy Individual Pistol Match

(b) National Trophy Pistol Team Match

(c) National Trophy Individual Rifle Match

(d) National Trophy Rifle Team Match

(e) National Trophy Infantry Team Match

The National Rifle Association Rifle and Pistol Championship Matches are events for which trophies and medals are awarded by the NRA and are as follows:

(a) Pistol and revolver matches

(b) Smallbore rifle matches

(c) Junior-tyro rifle matches and schools

(d) High power rifle matches

(e) Special events

Appropriate opening ceremonies and award ceremonies are conducted as an official part of the National Matches. Entry fees are not charged for any National Trophy Match or for the Small Arms Firing School. They are, however, charged for the NRA championship matches and other related events.

Figure I–1 on page 12 indicates the distribution of responsibilities among the various organizations which play significant roles in the conduct of the National Matches.

5. NBA regional championship matches

Subject to approval by the NBPRP, the National Rifle Association is authorized to sanction individual rifle and pistol matches in which credits towards distinguished designation may be achieved. These matches are open to any citizen of the United States 16 years or older on the date of the match. Military personnel are responsible for complying with the eligibility rules of their own service.

The DCM provides ammunition for issue to competitors in all matches included in the NRA regional tournaments in which credits towards distinguished designation may be achieved. In the event that Government funds are not available for this purpose, the cost of transportation and other charges incidental to shipment of ammunition must be borne by the tournament sponsor. Where ammunition is not available for free issue to competitors in these matches, arrangements are made by the DCM with the nearest Department of the Army agency to provide for the sale of competition and sighting-in ammunition to match sponsors in these particular matches. In this event, the competitor is charged the current-cost-to-the-Government price of the ammunition.

SECTION II

A. Background

The primary aim of any marksmanship training sponsored for national defense purposes is to train potential combatants and prepare instructors of combatants so that they may function effectively in the national interest in case of war. Until the likelihood of armed conflict is eliminated this requirement will persist.

In spite of recent technological developments in the modes of waging war, the Army's Light Weapons Infantrymen (LWI) and the Marines are almost certain to be employed in any "shooting wars" in which our nation becomes embroiled. Since the basic individual weapon of such combat arms is the rifle, it is important that the men in such units become thoroughly proficient in its use.

A fundamental question in determining how much to spend on training is what degree of proficiency is desirable or even "good enough." We were surprised to find that no desired objectives or even minimum standards of rifle marksmanship proficiency have been set for either units or individuals going into combat. Therefore, as far as we could tell, no one has yet been able to "price out" the value of achieving a given level of marksmanship proficiency in a rifle company, platoon, squad, or, perhaps even more difficult, in an individual rifleman. Thus, it is difficult to justify on a cost/benefit basis the investments made in teaching riflemen how to shoot. To make the problem even worse, the training program for the LWI is getting more complex and crowded, and the different subject areas to be covered compete for precious time in the limited amount available in Basic Combat Training and Advanced Individual Training. Allocations of time, personnel and resources to rifle marksmanship training in the Army must be adjusted then in a compromise with other training requirements.

If the Army's marksmanship training program were totally effective that is, if there were sufficient time, facilities and competent instructors to turn out enough completely capable combat riflemen by the time they were needed (including periods of major, national mobilization), then there would be little, if any, justification for a civilian marksmanship program. On the other hand, the shorter the time for mobilization and training and the fewer the trained instructors available, the more valuable is a civilian marksmanship program which contributes to the development of qualified instructors and to the marksmanship training of young men apt to enter military service and be assigned to a rifle unit. The results of our interviews and literature search suggest that due to various compromises, the processes of training and selection employed by the military services in preparing units for combat still leaves something to be desired in the proficiency with which members of rifle units use their weapons in combat.

B. Benefits to the military from the civilian marksmanship program effect of prior marksmanship training and shooting experience on Army basic marksmanship training

The results of our study indicate that the Civilian Marksmanship Program sponsored and supported by the Army, directed by the National Board for the Promotion of Rifle Practice (NBPRP), and administered by the Director of Civilian Marksmanship (DCM) contributes significantly to the development of rifle marksmanship proficiency and confidence in the ability to use a rifle effectively in combat on the part of those who participate in the program or benefit indirecly from it. Unfortunately, only a relatively small percentage of Army trainees appear to have been members of DCM-affiliated gun clubs (just over 3% of our sample) or received any marksmanship training prior to entering service (32%).

Until more direct study and research is applied to the question of how incremental degrees of rifle marksmanship proficiency relate to a unit's combat effectiveness, and also to the question of "how much it's worth" for a unit to attain higher levels of combat effectiveness, we believe it will be extremely difficult to "price out" the value of the DCM program in terms of a quantitatively expressed cost/benefit relationship.

C. Administration of the civilian marksmanship program

There is currently no means for the NBPRP or the DCM to conveniently and systematically examine the various DCM programs in detail, evaluate their benefits and costs, and consider changes or new programs (possibly more consistent with national interest) in terms of the budgetary implications of such changes. In addition, the DCM has little planning, budgetary, or administrative control over aspects of its programs that could generate income to defray the total program cost. The DCM programs would benefit from more systematic liaison between the DCM and the various agencies affected by, participating in, and having financial responsibilities for parts of the DCM program. Several studies and individual efforts have been made recently by some of these various agencies for the purpose of streamlining operations and reducing cost. The DCM should contribute to and be represented in the consideration of such changes.

In the past, it has been difficult for the DCM to document either the concrete benefits or the full and accurate costs of its several programs. Because of this it has been vulnerable to criticism on the grounds that the total program obviously costs more than was represented in the DCM budget.

A final recommendation concerns the DCM program for the sale of Government arms and ammunition. Currently, this provision is available to any individual member of the NRA. We recommend that the sales privilege be extended to any member of a DCM-affiliated club, regardless of whether he is an individual NRA member. If the member does not belong to the NRA, however, he should have his purchase order endorsed by an officer of the DCM-affiliated club. In addition, clubs should be able to qualify for additional small allotments of ammunition as long as they can document by name and date the use of such issue for hunter safety programs, youth programs, or by potential club members.

D. Major recommendations

1. We recommend that the National Board for the Promotion of Rifle Practice (NBPRP) should be continued with some minor changes in its organization and in the administration of the Office of the Director of Civilian Marksmanship.

(a) The membership of the NBPRP should be broadened to include parties-in-interest other than the NRA and the military departments. Representation of capabilities and resources mentioned in the body of this report should result in an increased capability of the NBPRP to carry out its missions effectively.

(b) The Secretary of the Army should appoint the six representatives on the NBPRP from the Country At Large after soliciting nominations from a variety of sources.

(c) The NRA should continue to provide three members to the NBPRP.

(d) The NBPRP should develop and promulgate more effective programs to facilitate the social and cultural acceptance of shooting in America.

2. The DCM should be established as the DCM Program Office and given full program responsibility and authority for all activities related to its legal mission as prescribed in Army regulations and as directed by the NBPRP.

(a) This DCM Program Office should have the responsibility to develop a five year program and a budget plan for review by the NBPRP in its budget committee. It should then make annual reviews of all existing programs or activities and assess their progress, effects, and importance.

(b) The DCM Program Office should also be given the authority to establish reporting procedures for obtaining, on a routine basis, information from the various Army agencies concerned with and contributing to the DCM program. This should also include authority to establish an active liaison program with such agencies so that all parties concerned could contribute to the formulation of policies and procedures affecting the success of the total DCM program.

(c) We recommend that a more inclusive system of accounts be set up so that the true cost to the government of the DCM programs can be accounted for on a regular and complete basis. This should entail provisions for credits to the DCM program for all revenues returned to the Federal Government.

3. The Department of the Army should provide for field representatives for the DCM.

(a) Members of the headquarters staff in each numbered Army Area Headquarters might be assigned the role of DCM field representatives. This function might be added to the job assignment of the Army Area Marksmanship Coordinator or to a member of the public relations staff particularly interested in marksmanship activities.

(b) These field representatives should be responsible for assisting and maintaining personal contact with clubs in the Army Area, for facilitating club use of military rifle ranges, for stimulating organized shooting programs within clubs, especially for junior age groups, and for more effective administration and liaison of the check-out procedures of officers of clubs applying for membership in the DCM.

4. The DCM should take primary responsibility for investigations made of clubs wishing to affiliate with the DCM.

(a) Checks and investigations of personnel in clubs applying for affiliation with the DCM should be focused on club officers.

(b) Information used in clearing applying club officers should be more complete and lend itself more effectively to efficient check-out procedures. We recommend that the DCM require each officer of an applying club to submit his fingerprints. After the club is affiliated, each new person who is elected to office should also be required to submit his fingerprints.

(c) In all other respects, the essential steps of the present system of controls should be maintained. That is, the control procedure should consist of a police records check of club officers, of endorsements from two community leaders, and of a personal meeting with club officers and members. In addition, clubs should continue to be required to affiliate with the NRA to be eligible for DCM affiliation. This will insure continued club support for and liaison with the national sports governing body for shooting and the many relevant activities it promotes.

5. Those aspects of the DCM program which relate to the stimulation of broader interest and participation in rifle shooting among the youth of our country should be emphasized more and pursued even more effectively in order to reach a greater percentage of those young men likely to enter military service.

(a) In designing its programs and in allocating resources, the NBPRP and the DCM should give consideration to more emphasis to club activities. This should include stimulation of membership, more emphasis on junior programs, and further extensions of marksmanship and coaching clinics, and local and regional competitions.

(b) In view of the very considerable support to state, regional, and especially National Matches, the NBPRP and the DCM should capitalize further on the public relations benefits inherent in these competitions and the potential for using films, short subjects, TV coverage, etc., in stimulating greater interest and participation in organized shooting activities in the country. Since the current interest of the general public in international competitions is high, opportunities to capitalize further upon the public relations value of successful performances of members of international shooting teams should be extended.

(c) Any member of a DCM-affiliated club, regardless of whether he is an individual NRA member, should be enabled to purchase government arms and ammunition through the DCM sales program. However, in order to maintain a screening and control procedure over such orders, any such member should have his purchase order endorsed by an officer of the DCM-affiliated club to which he belongs.

(d) Consideration should be given to enabling clubs to qualify for additional small allotments of ammunition issue as long as they can document the use of such issue for hunter safety programs, youth programs for non-members, or for other community programs to stimulate further interest and participation in shooting.

6. Since there are no minimum marksmanship proficiency standards established for rifle units going into combat and since no one has yet been able to "price out" the value of achieving a given level of marksmanship proficiency in a rifle unit, we recommend that consideration be given to defining and carrying out needed research in this area.

(a) Consideration should be given to making "quality control checks" on the marksmanship proficiency of rifle units going into combat. If data is gathered to measure the combat proficiency of units with varying degrees of marksmanship proficiency, this information should be valuable "feedback" in adjusting marksmanship training standards and in evaluating the need for improved selection of individuals who will be more effective in combat.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, I ask unanimous consent that it be in order to suggest the absence of a quorum without the time being charged to either side.

Mr. KENNEDY. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Five minutes.

Mr. KENNEDY. And how much time does the other side have?

The PRESIDING OFFICER. Fifteen minutes.

Mr. STENNIS. Well, Mr. President, if anyone wishes to speak, I will yield time to him.

Mr. President, I will yield myself 5 minutes.

I am familiar with the position of the Senator from Massachusetts, even though I did not get to bear all of his argument here.

May I ask the Senator, what is the amount now involved? $329,000?

Mr. KENNEDY. No, the total is $694,000; $329,000 for the ammunition, $365,000 for the personnel, including $50,000 for the lease on Camp Perry.

That was borne, incidentally, by the NRA for the last 9 years. Maybe the Senator can tell us why, when Camp Perry was paid for by the NRA for the last 9 years, and why the American taxpayer ought to be paying $50,000 to support that in this measure.

Mr. STENNIS. This amendment, Mr. President, has a long and distinguished history, and there is a course of action there that has gone on at Camp Perry for a long time, thought by the Appropriations Committee to be a good investment.

It is a matter that did not come before the Armed Services Committee. I do not know that we have had any discussion of it at any time lately.

Just speaking for myself, though, I have heard it debated many, many times in the committee and on the floor over a period of years, and I think it is a real investment with reference to marksmanship training, which is such an important part of the military program.

There are marksmanship clubs all over the country, just as we have other kinds of clubs that are interested in various matters like conservation of natural resources, we will say, and a great number of other organizations that have an appeal to our young people.

I am not a hunter, much, myself, although I enjoy going hunting some. I do not mean to be too personal, but I wish that I had had some marksmanship training or rifle training, or something of that kind, when I was a youngster, to learn how to swing with the fowl, and shoot to the left as well as to the right.

I think the amount is spread out so thin, and affects so many people—young people, the middle-aged, and others—that it is money well spent. This amount of money for advertising on television and other purposes would not go—it would not be 10 minutes worth, hardly. But these are programs that last month after month and year after year.

That is my position on it. I think that is generally the substance of the position of all the Members in favor of it. A former Senator whom I refer to as one of the wisest men I have ever associated with, the late Senator Hayden, was widely active in promoting these things, and we used to call this the Hayden amendment.

That is all I have to say.

Mr. KENNEDY. Mr. President, let me ask the chairman of the committee, am I not correct that only 3 percent of those who go into the military have had any DCM association whatsoever? And that we do not know, of those 3 percent, what percentage have participated in the marksmanship program, or what percentage actually go into the combat arms?

That was a part of the 1966 Arthur D. Little study, that recommended we get that information.

It is now 11 years later, we have a 360-percent increase in the request, and we still do not have the answers to those questions.

Mr. STENNIS. Mr. President, I do not suppose there are any complete, specific, detailed answers that you could reduce to numbers and sell the idea on it for that amount.

If this was a great sum of money, or if I thought it had any element whatsoever of being used for any ulterior purposes, anything like that, I would feel differently about it.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STENNIS. That is about a complete story. I believe that is the main basis for this appropriation. Frankly, I could not be at the meeting where this was written up, this particular item. I do not know what else was said.

Mr. KENNEDY. Mr. President, I yield myself 2 minutes. This might not seem like a lot of money, $694,000. It happens to represent the total amount that my own State of Massachusetts receives for the meals-on-wheels program. This represents 2 million meals for elderly people at the Department of Agriculture's figure of 29 cents; 2 million of them. In this appropriation, as I mentioned, $50,000 that was being paid by the NRA for the last 9 years is now being paid by the taxpayers. No other area of recreation, no other area of international competition, no other area of enjoyment for the young people of this country is being subsidized by the Federal Government with the exception of this one area of shooting, where more than half of the people who are participating are too old to go into the military in any event. There is probably no area in the total budget which has gotten the kind of a sizable increase this program has, a 22-percent increase.

I can just think of the areas in health which never saw this kind of an increase. That has been true with regard to most of the education programs, most of the elderly programs, most of the areas of human resources. It is just appropriate that the Federal taxpayers understand what they are being called upon to pay for. I have no illusions about the power of the National Rifle Association, and what the outcome of this amendment is going to be, but the record ought to be made with regard to this program, and it will continue to be made by myself and others in the future. I reserve the remainder of my time, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, we are not allowed to vote now, under the rules. I do not know of any other speaker, Mr. President. Could we lay this amendment aside until it is time to vote? That would suit me all right, if it would suit the Senator from Massachusetts. We could reserve 2 minutes to each side at that time to make a little explanation.

Mr. President, I ask unanimous consent that we yield back the remainder of our time except for 2 minutes on each side, and we use that time for an explanation of the amendment when it comes up for a vote sometime after 2 o'clock.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ADDITIONAL STATEMENT SUBMITTED

Mr. STEVENS. Mr. President, I rise in opposition to the amendment offered by the Senator from Massachusetts (Mr. KENNEDY) which would delete $365,000 contained in the Defense appropriations bill for the National Board for the Promotion of Rifle Practice.

As of June 1976 there were 125,192 individuals participating in this program through membership in 2,169 clubs around the country. This small amount of money requested in the budget and approved by the House and the Senate Appropriations Committees, does a great deal to strengthen the ties between our armed forces and the general population. Deletion of these funds would have no impact on the ability of the existing rod and gun clubs to continue to function; it would, however, deny the Army the public relations opportunities now possible through affiliation with these clubs.

I ask unanimous consent that several letters I have received in support of the board's activities be printed in the RECORD at the conclusion of my remarks.

Mr. President, I hope that the Senate will accept the committee position and retain funding for the National Board for the Promotion of Rifle Practice.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Telegram]

FAIRBANKS, ALASKA,
July 12, 1977.

Senator STEVENS,
Capitol Hill, D.C.:

I understand that Senator Kennedy will introduce an amendment to the Senate Wednesday to delete the director of civilian marksmanship program from the fiscal 78 budget. This would be disastrous to youth marksmanship training in Alaska. Please give your best effort to defeat the Kennedy amendment on July 13.

JOE NAVA.

SACRAMENTO, CALIF.
July 14, 1977.

Senator TED STEVENS,
Senate Office Building, Capitol Hill, D.C.:

Kennedy amendment H.R. 7933 would kill civilian marksmanship appropriation. 200,000 gun owners urge "no".

State Senator H. L. RICHARDSON,
Chairman,
Gun Owners of America.

NATIONAL GUARD ASSOCIATION
OF THE UNITED STATES,
Washington, D.C., July 12, 1977.

Hon. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENS: The National Guard Association of the United States has been informed that Senator Kennedy will introduce an amendment on the floor of the Senate to strike funding of $365,000 for the

National Board for the Promotion of Rifle Practice.

This Association strongly supports this appropriation and has a firm belief that civilian marksmanship programs contribute to this nation's defense.

We urge that you vote down the Kennedy Amendment.

Your consideration and support will be appreciated.

Sincerely,

FRANCIS S. GREENLIEF,
Major General, NGUS (Retired), Executive Vice President.

Mr. STENNIS. I thank the Senator from Massachusetts.

Mr. President, the next item I have on my list, and we must keep this bill moving, is a matter of concern to the Senator from Ohio (Mr. METZENBAUM). There may be someone in the Chamber representing him.

I see the Senator from North Carolina is in the Chamber. He might wish to present his amendment now and offer his explanation of the amendment, making the arugment for it. We would have to lay it aside without voting, as he knows.

Mr. HELMS. Mr. President, I suggest the absence of a quorum, with the time to be charged against me on amendment No. 526.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent to be able to modify my amendment, though not with regard to the amount, prior to the time of the vote.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator should send his modification to the desk at the appropriate time.

Mr. KENNEDY. I will.

AMENDMENT NO. 526

Mr. HELMS. Mr. President, I call up my amendment No. 526 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS), for himself, Mr. HUMPHREY and Mr. NUNN, proposes amendment No. 526.

On page 6, beginning at line 2, strike out "$7,910,176,000" and insert in lieu thereof "$7,911,006,000".

On page 6, line 5, strike out the period after the word "facilities" and add the following new language: ", and of which not less than $1,530,000 shall be available only for the continuation of the Area Handbook Program.".

Mr. HELMS. This will restore the Department of the Army's Area Handbook program to an ongoing program. The Senate report for H.R. 7933 indicates that $700,000 is to be appropriated for the phase-out of the program. This amendment—and incidentally, it is cosponsored by the distinguished Senator from Minnesota (Mr. HUMPHREY) and the distinguished Senator from Georgia (Mr. NUNN)—would increase this amount to $1.53 million, the level of the Department of the Army request, and assure the continuation of the program.

The PRESIDING OFFICER. Will the Senator suspend for a moment? I am advised by the Parliamentarian that the first part of the Senator's amendment deals with a figure which has already been subject to amendment and has been amended. Therefore, it would require unanimous consent to offer that particular part of the amendment.

Mr. HELMS. I ask unanimous consent that it be in order to offer that part of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, this amendment would restore the Department of the Army's Area Handbook program to the status of an ongoing program. The Senate report for H.R. 7933 indicates that $700,000 is to be appropriated for the phase-out of the program. Our amendment would increase this amount to $1.53 million—the level of the Department of the Army request—and assure the continuation of the program.

The area handbook program has been in operation for 22 years. During this period, it has been contracted out to American University, which maintains a special section of scholars and experts who devote full-time to this project. The program provides a comprehensive handbook of about 400 pages for each country of the world in which the U.S. Army assigns its personnel. There are presently 106 handbooks in print, representing a source of information which is available nowhere else. Each book is written for the nonspecialist who is probably entering the area for the first time and needs objective, nonclassified background on the host country. Without the area handbooks' in-depth descriptive analysis of a country's social, economic, political, and military structures, the Army cannot carry on the required high level strategic training of its officers and other selected personnel.

Over 80 percent of the annual distribution goes directly to Army personnel. In addition, some 360 Government offices—such as DOD, State, the White House, the National Security Council, Congress, and others—receive copies under this appropriation. However, another 50,000 copies are not distributed under Government appropriations; they are sold at no cost to the Federal budget through the Government Printing Office at a price set to recover printing costs. GPO also distributes copies to 1,700 Federal deposit libraries that have requested them—an indication of the high regard in which they are held. I would like to emphasize, however, that the overwhelming majority of volumes paid for through this appropriation are distributed to Army personnel.

The committee's action in phasing out this program has apparently been based on misinformation. The military requirement is well-documented. The Department of Army program justification for fiscal year 1978 said:

The continuation of the program is considered essential to the Army's program of orienting its personnel for important national security assignments. . . .

Yet the committee's reports, this year and last year, have contained unfortunate errors of fact and misinterpretation.

Last year's report, for example, said:

The committee has been advised that most of the cost pays for travel of the contractors.

Yet not one penny is paid for travel, and the sums paid to the scholars involved are modest.

Last year's report also recommended that the functions of the area handbooks be taken over by the State Department. Yet it is hard to see why the State Department should fund a program which has as its principal beneficiary the Department of Army. Moreover, the State Department's programs are designed for the professional analysts who need rapid technical updates on fast-moving events. It is not practical to provide such update capability in manual form for nonprofessionals. More frequent revision could be performed if more funds were available. However, since the books are intended for nonspecialists, the proposed rate of funding seems adequate.

This year's report is no more accurate than last year's. It states that "There is no military requirement for the handbooks as determined by the Deputy Secretary of Defense." Yet what the Deputy Secretary actually said was that a reprograming action in fiscal year 1977 "does not represent a compelling national defense need." This statement was made at a time of the changing of administrations, and does not represent a judgment on the substantive merits of the program. Indeed, DOD is an agency that has no substantive concern in the matter. The area handbook program is an Army program, developed by the Army for its own use and in response to its own requirements, not the requirements of the Department of Defense or the Department of State. The Army fully supports the program, as quoted above.

This year's report also criticizes as excessive the so-called final 1978 request for $1.8 million, which it characterizes as "a 155-percent increase over the 1977 funding level." But in point of fact, at no time was any request made for $1.8 million. The request was for $1.53 million, the amount provided by our amendment, and an amount which provides only a 10-percent inflation factor over last year's request of $1.4 million. It should be noted that fiscal year 1977 provided only half that sum because of the erroneous information which appeared in last year's report.

Mr. President, the area handbook program is not a major item in the appropriation process, and I can well understand why perhaps not enough time was spent in double checking the information involved. However, it is rather mystifying why this program has been singled out for so much distortion and erroneous implications. The program is a good program, with a sound product, and it is performing well for all who are concerned with its use. In the judgment of Senator HUMPHREY, Senator NUNN, and this Senator from North Carolina, it

should be restored to its function, not phased out.

Mr. President, the distinguished Senator from Minnesota, Mr. HUMPHREY, is well-known to all of us for his broad experience and expertise in foreign affairs. He has been a long-time supporter of the area handbook program, and an enthusiastic one. Not long ago, he wrote a letter to the distinguished chairman of the Appropriations Committee asking that this program be sustained.

Mr. President, I ask unanimous consent that the letter of the Senator from Minnesota be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE, COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY.

Washington, D.C., June 17, 1977.

Hon. JOHN L. MCCLELLAN,
Chairman, Appropriations Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR JOHN: I am writing to request your consideration of a matter affecting the budget of the Department of the Army, the Area Handbook Program.

The Area Handbook Program has been sponsored by the Department of Army since 1955. It has been administered under successive annual contracts with the American University.

Area Handbooks are studies of a country's social, economic, political and military organizations designed for the nonspecialist.

The Army's budget request for FY 78 is $700,000, the amount which was funded for FY 77. The Army had originally requested $1.4 million for the revision and printing of the handbooks in FY 77, but the Senate denied the total request. This denial apparently was the result of an allegation that most of the funds pay for travel of the contractors, an allegation which has since been refuted. Nonetheless, the Conferees agreed that $700,000 be provided and that the Army reevaluate the program.

By letter of April 13, 1977, to you, Major General West recommended that the Army continue the program. Originally, the Army was requested $1.53 million for FY 78, but it revised the request to $700,000 when its effort to reprogram funds in FY 77 failed.

I realize the constraints under which you operate, but I request that you consider providing an additional $700,000 for the program in FY 78.

With best wishes.

Sincerely,

HUBERT H. HUMPHREY.

Mr. HELMS. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield myself 3 minutes.

I have had a conference with the Senator from North Carolina. I think we understand that. There is some money in the bill now regarding this handbook question; a greater sum is in the House bill.

Mr. HELMS. That is correct.

Mr. STENNIS. These figures will be in conference. We cannot know what will come out of conference, but it will be considered. Our position would be to support the $700,000 and see what else happens. But we will take the position that this matter will be considered in the 1979 budget, rather than just demand an immediate cutoff. That is, if it is requested by the President and comes in as such in the budget, it will be considered at face value. And, of course, the ones that are passing on it then will have to decide what to do about it. But our position will not be a demand that it be killed.

Mr. HELMS. Mr. President, nobody could ask for more than that. The legislative history is clear. I thank the Senator.

I withdraw the amendment.

The amendment was withdrawn.

Mr. STENNIS. I thank the Senator.

Mr. President, we have had a discussion about the helicopter amendments. Several are concerned and wanting to leave. We have had a kind of round-the-table discussion that we shall split that debate in two parts, beginning at 1:30. So I shall call up that committee amendment, Mr. President, at 1:30 and we shall have part of that debate.

In the meantime, I had asked the Senator from Ohio to come to the floor. He has an amendment that we have gone over. We think it requires certain reports regarding subcontractors. We think we can take that to the conference and do what we can with it.

I am speaking a little ahead here. I am going to retire from the floor now, by unanimous consent, and eat a little lunch.

Mr. GOLDWATER. Will the Senator yield?

Mr. STENNIS. A very fine member of our Appropriations Committee, Senator DEE HUDDLESTON, is going to hold the floor.

Mr. GOLDWATER. Will the Senator yield?

Mr. STENNIS. Yes, I yield.

Mr. GOLDWATER. I have two amendments that I have shown the chairman. They will not take long for me to explain. I shall be glad to call them up after——

Mr. STENNIS. Well, I have not had a chance to see the Senator's amendments. I am going to have to do now what I said I would. I shall be back in 10 or 12 minutes.

Mr. GOLDWATER. If the Senator will yield, they have been at the Senator's desk now for about 40 minutes.

Mr. STENNIS. I have not had a minute's interruption. I have been working on matters that were here before he brought his amendments in, I say to the Senator.

AMENDMENT 520

Mr. METZENBAUM. Mr. President, I call up amendment 520 on behalf of myself and Senators MOYNIHAN, HEINZ, HATHAWAY, CHAFEE, HUMPHREY, LUGAR, BAYH, BROOKE, and CASE.

The PRESIDING OFFICER. The amendment will be stated. The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) for himself and Senators MOYNIHAN, HEINZ, HATHAWAY, CHAFEE, HUMPHREY, LUGAR, BAYH, BROOKE, and CASE proposes amendment No. 520.

Mr. METZENBAUM. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 50, between lines 21 and 22, insert a new section as follows:

"SEC. 836. (a) The Secretary of Defense shall require all prime contractors receiving contract awards of $10,000 or more from the Department of Defense to file a report with the Secretary at the end of the year showing the amount of Department of Defense work (in terms of dollars) each such contractor had performed by subcontractors during such year and to identify the State or States in which each subcontractor performed the work subcontracted to it.

"(b) The Secretary of Defense shall submit a report annually to the Congress showing, on a State-by-State basis, the total amount of Department of Defense funds paid to subcontractors, during the year for which the report is submitted, by the prime contractors described in subsection (a).".

Renumber sections 836 through 860 as sections 837 through 861, respectively.

Mr. METZENBAUM. Mr. President, our amendment would require the Department of Defense to provide more information about defense procurement spending than is now available. That information was availiable up until 1973. In fiscal year 1976, the Department of Defense accounted for $42 billion in procurement expenditures, nearly 75 percent of the total for all Federal agencies combined. The Department of Defense keeps careful record of all prime contract awards over $10,000, but since 1972, the Department has not kept track of awards to subcontractors. Because of this practice, Department of Defense experts estimate that there is no way to determine where up to 50 percent of the Department's procurement money, a staggering $20 billion this year, is actually spent.

This failure to track the secondary distribution of defense funds results in a distorted picture of Federal expenditures in various States. In fiscal year 1976, for example, one major company, ranked in the top 10 in sales to the Department of Defense, received over a billion dollars in prime contracts. Under current accounting procedures, the Department of Defense reported this entire amount as flowing into the economy of the firm's headquarters State. But a study of this firm's subcontract awards revealed that $374 million of this total was, in fact, allocated to out-of-State subcontractors.

Mr. President, I ask unanimous consent that a recent analysis of this problem by the Northeast-Midwest Research Institute, entitled "Defense Subcontracts: Which Companies Get Them and Why Doesn't the Pentagon Know Their Names?" be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. METZENBAUM. As we are all aware, Mr. President, there has been a good deal of discussion over whether there is regional balance in the distribution of Government contracts. As a businessman, I know it is impossible to make prudent judgments about such an important economic issue on the basis of incomplete and misleading information. I believe we urgently need to develop ac-

curate data on the degree to which regional imbalance actually exists. Our amendment will provide Congress and the public with that data as regards defense procurement.

Mr. President, I should like to add one further comment: The chairman of the committee indicated that this matter would be taken to the conference committee. I hope that, by his indication that it will be taken to conference, he did not mean to imply that it would also be lost in the shuffle at the conference committee. I think those of us who are concerned about loss of defense contracts, about the dwindling number of defense contracts in our State, have a major concern that we know what the facts are. I strongly urge upon the chairman of the committee, as well as the members of that conference committee, that this amendment not go the way of so many others that get lost at the conference stage.

I urge, Mr. President, that this amendment be adopted by the entire Senate.

EXHIBIT 1

DEFENSE SUBCONTRACTS: WHICH COMPANIES GET THEM AND WHY DOESN'T THE PENTAGON KNOW THEIR NAMES?

(Northeast-Midwest Research Institute, Thomas Cochran, Executive Director; Laurence Zabar, Research Assistant, May 16, 1977)

EXECUTIVE SUMMARY

At the request of Congressman Michael J. Harrington, Chairman of the Northeast-Midwest Economic Advancement Coalition, and the Coalition's Task Force on Military Installations, the Northeast-Midwest Research Institute has examined the procedures utilized by the Department of Defense to monitor the flow of its procurement dollars.

The importance of accurately tracking DOD expenditures is clear: this department's annual procurements total over $42 billions and account for approximately 75 percent of total U.S. procurements.

The study shows, however, that under current accounting procedures, the Defense Department loses track of more than $20 billions every year: the dollar value of Defense production that, by DOD estimates, is redirected to subcontractors.

The reliance on prime contract data to determine the geographic flow of Defense dollars may result in a systematic overcounting of the dollars flowing into the Northeast and Midwestern states, where many of the prime contractors' headquarters are located, and undercounting the flow into other regions of the country where the actual production lines are located

DOD once maintained records of the top 700 firms in the dollar value of defense production, including both prime and subcontractor. In 1973, however, DOD officials determined that it was no longer necessary to retrieve this information and, in fact, destroyed records for prior years.

The study also reveals that, by failing to require prime contractors to indicate to whom they award subcontracts, the Defense Department appears to be in clear violation of Federal Regulations that specify the need for DOD to monitor the activities of its prime and subcontractors.

The study concludes with recommendations for an accounting system that more accurately traces federal procurement dollars to their ultimate geographic location.

INTRODUCTION

The 16[1] states of the Northeast and Midwest region share several fundamental economic characteristics and problems:

During the period 1960–75, manufacturing employment grew by 43.3 percent in the Southeast states, 67 percent in the Southwest states, 24 percent in the Plains states, 45 percent in the Rocky Mountain states, and 20 percent in the Far West states. Yet during the same period, manufacturing employment declined by 9.9 percent in the New England states, 13.7 percent in the Mideast states and grew by only 3.2 percent in the Great Lakes states.

Older industrial cities are typical of the region. With their aging capital stock, these urban centers are losing skilled jobs and, in many cases, people. The people who remain tend to be poor and unskilled—local and state governments responsible for their basic well-being are rapidly becoming less able to fulfill their responsibilities as their tax bases stagnate or erode.

The region has not been sharing in the general forward movement of the national economy. During the modest economic recovery of the past 20 months, rates of unemployment have remained high in the Northeast and, to a slightly less extent, in the Midwest.

All 16 states are cold-winter states, and during the energy crisis of 1976–77, most shared similar difficulties in obtaining adequate energy supplies. Without major new initiatives, the long-term energy future of the region is bleak.

Representing nearly a quarter of the Gross National Product, federal government spending has a profound effect on each region's economy. Gauging the regional impact of federal spending requires an accounting procedure that monitors the geographic flow of expenditures. Wages to federal employees, payments to state and local governments and payments to individuals can be traced with relative ease. However, payments for procurements must also be included in any complete picture of expenditure patterns.

To determine the degree to which a capacity for tracking federal procurement dollars exists, the Institute has analyzed the accounting procedures of the Defense Department. In FY 77, DOD will spend more than $42 billion on procurements, nearly 75 percent of total U.S. procurements, and thus qualifies as the nation's largest procuring agency.

This paper discusses the analytic usefulness of maintaining accurate data detailing to whom Defense subcontracts were awarded, statutory requirements that argue the need to keep this information past DOD attempts to track subcontract awards and finally, alternating for change.

THE FAILURE TO TRACK SUBCONTRACTS

DOD's procurement dollars, contributing over 2% annually of the nearly two trillion dollar Gross National Product, impact significantly on the economies of regions where they are spent. Obtaining an accurate account of the flow of DOD dollars, however, has so far proven to be impossible.

While the Institute has had no difficulty in obtaining the names of firms to whom price contracts were awarded by DOD—and the dollar value of the award[2]—this data is not an accurate reflection of where the Defense dollars are actually being spent. The Defense Department estimates that at least 50% of its annual procurements— totalling over $20 billion per year—is subcontracted out by the prime contractors. An Office of Management and Budget analyst contacted by the Institute felt that this estimate was low, and suggested that few plants are more than assembly plants and must therefore subcontract out to other firms to obtain the component parts necessary to assemble the item(s) contracted for. Thus, in this analyst's opinion by failing to require prime contractors to compile a list of their subcontractors by dollar value of the award and the state where the work was actually done, the government loses track of substantially more than $20 billion every year—just as a result of Defense spending. DOD maintains no records indicating to what firm the prime contractor awards subcontracts.

The failure of the Defense Department to track the secondary distribution of its expenditures may result in a systematic overcounting of the money flowing into some states and undercounting of the flow into other states. When many of the firms that contract for defense production were first established, their headquarters tended to be located in the urban centers of the Northeast and industrialized Midwest. More recently, however, many firms are locating production lines in the south and west where labor and energy costs are thought to be less than in other regions of the country, while continuing to maintain headquarters in urban centers. DOD, however, reports its expenditures by the state where the prime contractor's headquarters is located. Thus, while it may appear, by reviewing DOD prime contract awards, that the Northeast and Midwest are receiving their "fair share" of defense dollars, this may not be the case.

A review of subcontracting by a leading Defense contractor, from whom the Institute obtained a list of subcontract awards by state, on a confidential basis, graphically illustrates the problem.

This Northeast based firm ranked in the top 10 in the dollar value of DOD prime contract awards in FY 1976. According to the present Defense Department accounting method, this firm's contract total of $1 billion is reported by DOD as flowing into the firm's headquarters state and accruing to that state's economy. However, a list of this firm's subcontract awards revealed that only 45% of the $1 billion in prime contracts—$450 million—was spent on production lines in the state of its headquarters. Moreover, of the $550 million in subcontracts awarded by this firm, 68% went to firms outside the state where the prime contractor's headquarters is located.[3]

Yet the Department of Defense continues to rely on this highly suspect data. In an April 13, 1977 letter to Congressman MICHAEL J. HARRINGTON, regarding DOD outlays by region, Deputy Secretary of Defense Charles Duncan stated:

"Accordingly, we have reviewed the overall matter . . . using the data contained in the FY 1976 Summary Volume of the 53 volume "A report of the Federal Government's impact by State, County and large City", compiled for the Executive Office of the President by the Community Services Administration. . . . Our review indicates that the 16 Coalition states received 27.4 percent of the FY 1976 DOD outlays and the 12 Southern States received 25.3 percent."[4]

The Community Services Administration report, referred to by Secretary Duncan lists only prime contract awards by the Defense Department.

Until December 29, 1973, the Defense Department published an annual list of the top 700 firms in terms of the dollar value of defense production, including both prime and subcontractors. This compilation, entitled "Economic Information System", contained information indicating where the work was performed and the number of employees employed by each plant. Although the list did not extend beyond the top 700 firms, this information must have been helpful in accurately tracking a significant portion of total defense dollars.

The Institute attempted to review the last edition of this publication to determine if any discernable trends in defense spending could be found. A DOD official, however, stated that, due to lack of interest, all publications related to this system had been de-

Footnotes at end of article.

stroyed. The result has been that DOD now tracks only its prime contract awards and uses this incomplete data as a basis for decisions on the impact of its spending.

The argument most frequently raised by those opposed to requiring the compilation of subcontract data cite the inordinate amount of time it would take to compile this data on an annual basis. Procuring agents at several of the larger defense contracting firms contacted by the Institute stated that it would be impossible to centralize this information within their own firms and present it in aggregate form.

A procurement official with the Navy Department, however, flatly stated that any firm that maintains that it cannot provide this information within two days isn't being truthful. This official went on to ask if these firms are implying that if an airplane engine for which they subcontracted out is not delivered on time, they wouldn't know who to call to find out why?

LEGAL OBLIGATIONS

Defense Department officials in the Comptroller's Office, contacted by the Institute, have indicated that records detailing to what firms and in what amounts prime contractors subcontract defense production are of "no use to them." These officials further contend that they have a legal relationship with their prime contractors that in no way requires them to furnish records listing their subcontractors and dollar value of the awards. In their view, this would be an "unlawful" intrusion into a private business' affairs. According to a DOD official, the Department's sole concern is awarding prime contracts to the lowest bidder. Moreover, DOD officials admit to having little or no interest in the regional economic consequences of the department's procurement actions or in obtaining the data necessary to understand those implications.

This was made clear in the letter from Deputy Secretary Duncan to Congressman Harrington, referred to earlier. Responding to a charge of regional imbalance in FY77 military construction, Duncan stated: ". . . If regional aspects of Defense expenditures are to be considered, *and we do not believe that they should*, the total DOD outlays should be examined . . ."[5] (emphasis added)

Yet, recent court rulings, legislative mandates, and Executive Orders have required government agencies, and private firms doing business with them, to conform to certain guidelines in such areas as contracting preference in labor surplus areas and civil rights.

Thus, precedents have been established to justify report requirements imposed on federal agencies and private businesses concerning social consequences of their policy actions.

For example, Section 1.1–805, subsections 1–4, of the Code of Federal Regulations promulgated under Title 41 of the United States Code, addresses the issue of subcontracting governmental contracts to labor surplus area concerns. The Department of Labor, charged with the responsibility of defining the term "labor surplus", set the standard 25 years ago of a 6 percent or higher unemployment rate for an area to be classified as "labor surplus". Since this figure has never been revised upward to account for the rising national unemployment rate, more than 70 percent of the major labor areas in the country are presently classified as labor surplus and thus fall within the jurisdiction of these provisions.

Under the section cited above, prime contractors who accept contracts worth between $5,000 and $500,000 are required "to undertake the obligation of using his best efforts to place his subcontracts in areas of labor surplus . . ."

Furthermore, in contracts worth more than $500,000, the contractor is required to "undertake a number of specific responsibilities designed to assure achievement of the objectives referred to above (placing subcontracts in labor surplus areas) and to impose similar responsibilities on major subcontractors."

These responsibilities include requiring the contractor to designate a liaison officer who will administer the contractor's labor surplus area subcontracting program and maintain records showing procedures adopted to comply with this policy.

The adequacy of the contractor's "labor surplus area subcontracting program shall be reviewed by the procuring agency concerned, and any deficiencies shall be brought to the attention of the contractor's liaison officer with a request for corrective action."[6]

While the regulations clearly indicates that priority be given by prime contractors to subcontractors located in labor surplus areas, no evidence can be found that the Defense Department is currently enforcing compliance with this requirement or that it even gathers the data on which such an enforcement would be based. In fact, a DOD official maintains that the Defense Department relies on a firm's competitors to inform them of any violations of this statute and takes no other action other than an occasional spot-check to determine the extent to which the firm receiving defense dollars is complying with these provisions. This seems a weak method of enforcement, at best.

Further, Executive Order 11246 Equal Employment Opportunity—issued in 1965, outlines the responsibilities and obligations of contractors *and subcontractors* whose work is paid for by federal dollars. Included in this Order are provisions requiring that each contractor and each of his subcontractors file Compliance Reports with the contracting agency or the Secretary of Labor and a requirement that each contractor and subcontractor permit access to their books by the contracting agency and the Secretary of Labor to ascertain compliance with Part 2 of this Order, entitled "Nondiscrimination in Employment by Government Contractors and Subcontractors."[7]

In summary, then, several provisions would appear to require the maintenance of subcontracting data. These requirements, and the usefulness of such data to those interested in the regional impacts of federal expenditure patterns, strongly argue that a system for retrieving and reporting them be established.

ALTERNATIVES FOR CHANGE

A simple system can be developed and implemented that will enable the government to accurately account for the regional expenditure of its procurement dollars. Such a system could have the following characteristics:

1. firms receiving prime contracts from the government agencies would compile an annual statement listing the amount of money expended through subcontract awards in each state, down to the production line where the work is actually performed. This information would be sent to the Secretary of the appropriate agency by a specified date each year; and

2. the Secretary would, within a specified time period (between 30–90 days) compile, analyze and make this information available to Congress and the public in an annual report.

This information will enable the government to monitor the actual flow of federal dollars and determine which areas of the country are benefiting from the direct and indirect effects of federal procurements.

Such a simple reporting system could be mandated: by each agency through regulations; by the President with an Executive Order; or, by the Congress through legislation.

CONCLUSION

In recent months, considerable controversy has centered around the issue of where the federal government spends its money. The controversy has arisen in part because the federal government lacks an accurate accounting procedure that enables those interested from determining exactly where federal dollars are being spent.

The Department of Defense, the government's largest procuring agent, spending in excess of $42 billion a year, is a case in point. Though cognizant of the fact that at least 50 percent of its prime contract awards—worth over $20 billion annually—is redirected to subcontractors, often in other states and regions, the Defense Department attributes the full dollar value of the prime contract as accruing in to that state's economy where the prime contractor's headquarters is located. This seriously overcounts the flow of money into some states and undercounts the flow into others. The problem is magnified when the Defense Department bases conclusions about its spending—and effectuates policies—on this incomplete data.

In a recent study released by the Institute, a 25 year old policy of targeting contracts and facilities to areas of high unemployment was discussed ("Federal Procurement and Regional Needs: The Case of Defense Manpower Policy Number Four"). A necessary pre-condition, however, is a system that accurately monitors the geographic flow of federal dollars.

Unless such a system is developed, efforts to determine if states and regions are receiving their "fair share" of federal dollars will never succeed.

ABOUT THE NORTHEAST-MIDWEST RESEARCH INSTITUTE

The benefits from the modest economic recovery of the past 20 months have not been shared equally by all regions of the country. Unemployment rates in the Northeast, and to a slightly less extent in the Midwest, have remained above the national average while the economies of the southern and far western States have begun to move forward.

The economic plight of the Northeast-Midwest region* has moved groups of businessmen, Governors, State legislators, Congressmen and others to organize for study and common action.

The Northeast-Midwest Economic Coalition has perhaps the broadest reach of any of these organizations. This bi-partisan group of 204 Congressmen from the 16 States of the region is led by its Chairman, Congressman Michael J. Harrington (D-Mass.); Rep. Frank Horton (R-N.Y), the Coalition's Co-Chairman; and Rep. James Oberstar (D-Minn.), the Secretary-Treasurer. The Coali-

*Connecticut, Illinois, Indiana, Iowa, Maine, Massachusetts, Michigan, Minnesota, New Jersey, New Hampshire, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and Wisconsin.

tion seeks to inform its members about regional implications of Federal policies and influence those policies wherever possible.

The Northeast-Midwest Research Institute was developed to analyze the common problems of the region and seek realistic solutions, concentrating on Federal policy options. While the Coalition's 204 Congressmen are key clients of the Institute's work, it makes its findings available to Senators, decision-makers in the Executive Departments, interested Governors and other elected officials, concerned leaders of business, labor, and industry, and the public.

The Institute neither seeks nor encourages confrontation with other regions of the Nation. In the Institute's view, economic problems of regions must be addressed in the context of national policy because economic difficulty in one part of the country weakens the Nation's entire economic structure.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. Mr. President, as the distinguished chairman of the committee indicated a few moments ago, this amendment is acceptable to the committee. We move its adoption.

The PRESIDING OFFICER. Do both sides yield back their time?

Mr. HUDDLESTON. I yield back the remainder of time.

Mr. METZENBAUM. Mr. President, I appreciate the acceptance of the amendment by the representative of the committee, but may I ask the spokesman for the committee on the floor whether or not there will be some assurance that an effort will be made?

I am certain that this is not a controversial amendment, but I hope it will not be lost at the conference committee level.

Mr. HUDDLESTON. I believe the chairman of the committee indicated he would take this to conference and would make every effort to retain it.

Mr. METZENBAUM. I would appreciate the personal assistance of the distinguished Senator from Kentucky in that effort, as well.

I thank the Senator very much.

The PRESIDING OFFICER. Do both sides yield back their time?

Mr. METZENBAUM. I yield back the remainder of my time.

Mr. HUDDLESTON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Ohio.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. HUDDLESTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Against whose time will it be charged?

Mr. HUDDLESTON. Against the time on the bill.

The PRESIDING OFFICER. Equally divided?

Mr. HUDDLESTON. Equally divided.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STENNIS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, we have a general understanding that at 1:30—and it is that time now—we will go into the matter of the pilot training program. The Senator from Arizona is interested in two amendments, I believe. I have not had a chance to look at them, but I will do so when the debate begins.

What I am trying to do—I say this for the information of the Members—is to pull these matters together. So far as I can tell, the only thing that will require extended debate is the helicopter pilot training matter, and that already has been set up. There are others, but I do not expect them to take a great length of time. However, we always have to allow some extra time.

THIRD REMAINING COMMITTEE AMENDMENT (HELICOPTER PILOT TRAINING PROGRAM)—UP AMENDMENT NO. 682

In keeping with what we already understood, I now call up, for the committee, the committee amendment that relates to the helicopter training program.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

Page 2, line 10, strike out $8,746,573,000 and insert $8,704,357,000.

Page 2, line 19, strike out $6,169,662,000 and insert $6,133,758,000.

Page 3, line 2, strike out $1,919,522,000 and insert $1,899,442,000.

Page 6, line 2, strike out $8,369,746,000 and insert $7,949,376,000.

Page 6, line 14, strike out $10,832,191,000 and insert $10,573,563,000.

Page 15, line 2, strike out $627,700,000 and insert $673,300,000.

Beginning on page 61, line 22, strike all through line 14 on page 62 and insert the following new section:

SEC. 857. None of the funds appropriated in this Act may be used for the consolidation or realignment of advanced undergraduate pilot training squadrons of the Navy as currently proposed by the Department of Defense.

Mr. STENNIS. Mr. President, how much time is there on this amendment, according to the agreement?

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.). The time agreement is for 2 hours, equally divided.

The Chair adds that 2 hours includes amendments thereto.

Mr. STENNIS. Who is in charge of the opposition to the amendment? Is it the minority leader or the minority member of our committee? Who is in charge of the time?

The PRESIDING OFFICER. The Senator from Alabama (Mr. ALLEN) has the time in opposition.

Mr. ALLEN. In opposition to the Senate committee amendment, also with respect to any amendments he might care to offer.

Mr. STENNIS. I just want to be certain we understand that.

Mr. ALLEN. The Senator from Alabama does not plan to offer any amendments unless a motion to table the amendment fails. If it does fail, then, under the unanimous-consent agreement giving 30 minutes for any amendment that was not theretofore filed, he would offer amendments at that time—if the motion to table should fail.

Mr. CHILES. Mr. President, will the Senator yield for a question?

Mr. ALLEN. I yield.

Mr. CHILES. Would that be in addition to the 2 hours allocated, or would that be part of the 2 hours?

Mr. ALLEN. I do not plan to offer any amendments prior to the motion to table; but under the section of the unanimous-consent agreement, any amendment can be offered if it had not been filed at the desk, irrespective of any other agreement. So I would offer some amendments if the motion to table should fail.

Mr. CHILES. It was my understanding that last night we came to an agreement that there would be 2 hours debate on this amendment and any amendments thereto—any amendments on this subject. I thought we were providing an hour to a side.

Mr. ALLEN. That would be any amendments prior to the motion to table. But if the motion to table should fail, I will then avail myself of the right to offer amendments subsequently.

The PRESIDING OFFICER. The Senator from Alabama is correct.

Mr. ALLEN. I thank the Chair.

Mr. STENNIS. Mr. President, I yield time to the proponents of the amendment. The Senator from Florida, a member of our committee is familiar with the facts in this matter.

Mr. President, it will help a great deal if we can have quiet in the Chamber.

The PRESIDING OFFICER. The Senate will be in order.

Mr. STENNIS. How much time does the Senator want?

Mr. CHILES. Seven minutes.

Mr. STENNIS. I yield the Senator such time as he may wish, up to 10 minutes.

Mr. CHILES. I thank the Senator.

For several years, elements within the Department of Defense have been advocating consolidation of all helicopter pilot training at Fort Rucker, Ala. The rationale is based on the premise that about $100 million would be saved over a 5-year period. There has been a lot of opposition to this consolidation, and this opposition has not all come from Florida. Certainly, we would save economically by such a move.

Much of the opposition has come from within the Department of Defense itself, from those who are knowledgeable about naval aviation, from pilots who have gone through real Navy training and would have to work with pilots who would result from the consolidated or the Army training, and from ship captains who would have the fighting capability of their ships diminished if there were one error by one pilot in an attempted landing at sea.

Why, one might ask, is the Secretary of the Navy supporting this consolidation? I am not really sure. But I do not think he ever has done any flying. I understand that he knows a lot about railroads.

What about the Chief of Naval Operations? I quote some of his supporting statements when he recently testified in support of consolidation:

I think the future fleet pilots ought to be trained by experienced fleet pilots. (But . . .) I accept that decision.

That is, the decision to consolidate.

Is this an endorsement of consolidation under Army command, or is it better to say that is a military officer taking his orders and recognizing that he must take has orders and do the best he can under the circumstances?

How about the assistant commandant of the Marine Corps? I quote:

We prefer helicopter training at Pensacola . . . but we accept the decision and we will carry out our orders.

I applaud these fine men for their sense of duty, but I am gravely concerned that if we go forward with this consolidation, not only will the Navy and the qualities of maritime training be lost, but also, there will be no cost savings resulting from this move.

Retired Navy personnel have been explicit in their concern about this proposed consolidation. During the same hearings at which the Department testified, John Warner, former Secretary of the Navy; Admiral Moore, former Chief of Naval Operations; and Admiral Hill, former Assistant Deputy Chief of Naval Operations for Manpower, laid bare any contention of cost saving and raised serious questions about the effect on quality of training.

Let us examine some of the differences in the quality of Army versus Navy training.

Army pilots do not receive the rigorous instrument training of Navy pilots. Army missions are flown in clear weather over land, and they can rely on ground markers for their orientation. The recent unfortunate incident in which an Army helicopter strayed into North Korean territory and was shot down apparently resulted because the pilot lost sight of his ground markers and unintentionally strayed into hostile air space. Navy, Marine, and Coast Guard pilots must be prepared to fly over water in all weather conditions and find their destination with instruments and without ground markers.

Well, what is the Army doing at Fort Rucker with its instrument training now?

On April 13, 1977, the commander of the Air Force detachment at Fort Rucker sent a communication to the director of training at Fort Rucker:

Air Force is not satisfied with the instrument training provided its undergraduate helicopter pilots. . . .

There appears to be no central concept or idea underlying basic instrument training which builds on a student's previous experience * * *

Instruction in basic instruments of the flight line is not standardized . . .

Does this sound like a program which should be used to train pilots who might crash at sea if they miss their ship?

Well, as an afterthought, and when the going got too rough with this consolidation proposal, the Deputy Secretary of Defense agreed to beef up the instrument training which would be given maritime pilots at Fort Rucker—beef it up in terms of hours. However, given the quality of the program being used now, how much good are more hours going to really do?

One thing the Secretary did not propose to beef up adequately, however, was the cost of the additional helicopters to provide the additional training. Careful inspection of all their aircraft costs shows that it is going to take $98 million for the Army to buy and operate the helicopters which they will need for this complete program.

The PRESIDING OFFICER. The 5 minutes of the Senator have expired.

Mr. CHILES. I thought the Senator yielded me such time as I might need.

Mr. YOUNG. I yield time to the Senator.

Mr. CHILES. Now the Army has said that it can get some aircraft out of its own inventory—but those helicopters are flying now and to move them to training will require their replacement for their current missions. If not, we could have saved money already by getting rid of them long ago.

Let us look at some other aspects of this study to see what was included and what was not—and what the ground rules seem to be.

This latest round began last year when the Senate overwhelmingly opposed consolidation for helicopter training by a vote of 61 to 23. We sent the Secretary of Defense back to the drawing board and asked him to do a thorough, objective review of the costs and benefits involved.

Did we get an objective analysis? Hardly.

To begin with—an internal defense memorandum, now in the public record, shows that the study team was in agreement on the outcome of the study before they ever began.

In this memorandum, they talk about how to enhance their position with "swing Members" of Congress—that is a study memorandum, Mr. President, before the study was to begin, a study that the Congress dictated was to take place to determine whether this consolidation was feasible or not. That memorandum says, "How do we enhance our position with the swing Members of Congress?"

They chose an option which "would permit implementation of consolidation a year earlier," and they finally talked about being sure to coordinate early-on with the GAO so that the study would be "compatible with their perceptions." That is the kind of impartial study I would like to have any time I am on the other side.

This apparently was not difficult to do.

None of the GAO people who reviewed the OSB report were experienced in aviation or in flight training from a professional standpoint.

And, for example, in their review and endorsement, GAO failed to even notice that OSD mistakenly attributed hundreds of people to Navy's helicopter training program—people that are actually dedicated to Navy's fixed wing training requirements. This slight oversight adds up to $26 million in direct manpower and operations and maintenance, and $9 million in support tail—$35 million in all.

GAO also accepted Army cost material for which there is no source documentation or statistical data. Perhaps you were under the impression that I was under—that the GAO does audits.

I guess when you think that you are on the winning team, there is no need to do your homework.

The leader of this team, Deputy Secretary Duncan, is kind of sitting on some of my homework.

The leader of the team, Deputy Secretary Duncan, is now sitting on some of the studies—in fact, a particular study that said—that he had his staff prepare—an Economic Adjustment Assistance Planning Report showing what would be the influence on the move from Whiting Field helicopter activity on Milton and Pensacola, Fla.

He has had it prepared, he has had it dated May 1977, he has had it printed, I understand, with a blue cover and black binding, and he has had it stacked somewhere in the Pentagon.

When I last tried to get it a few days ago, I was advised that the study is not yet approved, that Secretary Duncan still had some decisions to make regarding it.

I would venture to say those decisions will be made after today's debate, and that study is going to show when those decisions are made that it is going to cost another $15 million, because of the economic adjustments that are going to have to be made, because of the economic assistance for the move in the local housing market. So that is one more cost.

I have said the savings are illusory, and I think we find that is true. Any time we could pin that down, we find the study is back in the Cabinet somewhere and it has not been released.

I kind of think that the only decision he has left to make is whether to officially let us know that it is going to cost about $15 million in economic adjustment assistance for the Department when this move depresses the local housing market for the military as they leave Florida.

Does this sound like the thorough, objective effort that we expected from the Department?

When the OSD consolidation study was being conducted, did they look to the affected commands for guidance?

There was very little participation in the formation of the study by Navy personnel. In fact, the ones who were actually on the flight line who knew anything about the flight business were given 5 days to comment on the study.

Even the Chief of Naval Operations, Admiral Holloway, felt compelled to testify that this was simply inadequate time, that the command should have been allowed at least twice that time for a response.

Does this sound like a thorough, objective report?

The bottom line is that the only way to save $100 million is if you are going to close a base. But they say there is not going to be any base closing or if you are

not going to have the adequate training or the same kind of training that we are now having.

Well, OSD's bottom line is that they would save about $100 million if we went through with this consolidation.

By bottom line is that the only way to save $100 million in training costs over 5 years is to simply not train Navy and Marine helicopter pilots, or perhaps close a base.

Training cost savings really are not there. OSD made a few oversights:

First. They ignored the equivalent aircraft investment recover costs for Army aircraft, and their 5-year operating costs. That is a $98 million oversight.

Second. They overestimated the people to be saved by mistakenly attributing hundreds of manpower spaces to helicopter training, which, in fact, are for fixed wing training. Only a $35 million error.

Third. They failed to account for the decreased operating costs of Navy's more fuel efficient T–34 trainer. An $11 million oversight.

Fourth. They wrongly included the expense of training foreign students which would be reimbursed by foreign governments. About $9 million wrong.

Fifth. They are sitting on their own report which addresses the disruption of the local housing markets resulting from this move; $15 million.

Sixth. They used unaudited Army cost material with no source documentation.

The issues here clearly do not revolve around dollar costs and training quality. While the Department officially denies that this proposed consolidation is an indication of a broader policy of consolidating flight training for all services at a few locations, testimony at House hearings raised serious questions about what the future holds for flight training across the country—especially if it is subject to the kind of study that OSD has applied to the issue of helicopter consolidation.

Last year, this body overwhelmingly defeated a proposal to consolidate training by a vote of 61 to 23.

One crash of one helicopter on one ship could easily add up to $100 million and put a ship out of action. Let us not be fooled by stacks of paper studies generated from air conditioned Pentagon offices.

Under the circumstances and because of the risks we may be taking with Navy and Marine personnel through possible inadequate training, we should sustain the Appropriations Committee's action, and allow the Navy to continue its current helicopter training programs in its own hands.

I think it becomes clear as we view this in the Senate, as we did last year, this is something that certain people in the Department of Defense are determined to do. They are not going to look at the facts or the figures. But the fellow who is responsible for flying and the ship captain who is out there who is responsible for those choppers finding their ships in all kinds of weather, they are the ones we keep hearing from, and they are the ones who keep saying, "We need this kind of training because it is a different kind of training from what the Army gives, and we need to have that training be separate." That is why, I think, the Senate overwhelmingly voted for this last year to prevent the consolidation, and why I think they will overwhelmingly support the prevention of the consolidation again.

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. I yield such time as the distinguished Senator from Arizona may require.

Mr. GOLDWATER. Mr. President, we went through this last year, and I think we might as well make it clear at the outset that this is political. It has nothing to do with training, it has nothing to do with the quality of pilot training.

I come from a State that trains pilots, and if you can figure out a better way to train the pilots than the way we are training them in Arizona I would be for it.

We are the only country in the world that has three training commands. We are the only country right now that has two helicopter training commands, and, Mr. President, I just do not think it makes any sense.

Let me try to argue some of this in as rational a way as I can. For example, we heard it all last year during the debate that there is something special about flying a helicopter over water. I think I am the only helicopter pilot in this body, and I am an active helicopter pilot. When you can learn how to fly a helicopter, and the most important maneuver is hovering, it does not make any difference whether you are hovering over an ocean, a canyon, a desert, trees, or what not. In fact, Mr. President, the Navy helicopter pilot training program does not produce—let me repeat that—does not produce qualified antisubmarine warfare pilots; and, in fact, has relatively little training directly related to flying at sea.

The Army program similarly does not turn out qualified helicopter gunship pilots. What do they do? They train these men, and women now, in the basics of helicopter flying, how to lift it off, how to do emergency procedures, how to make it go forward and backward and sideways, and after they have learned these things they are assigned either to the Marines, in the case of the Navy, or the Navy. The Navy selects the men they are going to use to fly helicopters off the decks, and they assign them that kind of training.

The same thing happens in fixed-wing training. When the Air Force graduates a young second lieutenant from jet flying training at Williams Air Force Base in my State he is not a qualified fighter pilot. He has to go to a fighter school. If he is going to be a materiel airlift commander he goes to an airlift school. If he is going to be an air defense pilot he goes to an air defense school, and the same way in the Navy. The Navy fixed-wing program merely does the same thing that the Air Force program does. It teaches a young man or a young woman how to take an airplane off daytime, at night, and on instruments, and how to land it.

Then, when the pilot is assigned his assignment, if it is on a carrier he is given special training on how to land and take off on a carrier.

Many Navy pilots never land on a carrier, like many Air Force pilots never fly single-engined fighter planes. Many of them fly just transport planes.

But, Mr. President, this idea that I keep hearing on this floor about the Navy's having to train their pilots, because it is over water I say is plain unadulterated poppycock.

As for instrument training, instrument flying in a helicopter has not been perfected. You can do it but they have not perfected a dependable landing system yet. You would think that would be easy. I have even thought of handing a string down with a bob, and when the string got slack I knew I was pretty doggone close to the ground, but we have no safe way of doing it.

The Army Training School at Fort Rucker—and I have been through that school, not as a student—has the finest equipment in the world for the training of helicopter pilots. It has far, far more sophisticated, newer simulators than does the Navy. For the Navy to put in this new equipment—and you can teach a lot of helicopter flying in a simulator—it would cost the Navy hundreds of millions of dollars to bring this facility in Florida and elsewhere up to date.

Mr. President, less than a year ago we argued the same subject which would have allowed helicopter training to be consolidated, and although that amendment was lost it was generally agreed that maybe the facts were not all determined as to the quality of training and the potential savings. Subsequently, in last year's DOD Appropriations Act there was a requirement for a formal study of this proposed helicopter consolidation which was to be completed and forwarded to Congress by April 15, 1977.

Mr. President, the Department of Defense, because preliminary results of that study showed consideration to be cost effective, again included undergraduate helicopter training consolidation in the fiscal year 1978 Department of Defense budget. The final results of the study provided last April sustained preliminary findings. However, as we know the proposal was still deleted by the Appropriations Committee in spite of the fact that the study requested by Congress confirmed that consolidation was the way to go.

Mr. President, why did they do this? Again, politics, that dirty old word politics got into it because, as I read section 857 of this act, it says:

> None of the funds appropriated in this Act may be used for the consolidation or realignment of advanced undergraduate pilot training squadrons of the Navy as currently proposed by the Department of Defense.

There is no mention in there about helicopter training at all. What the Navy in their usually sly way has done is to convince people from the States that have helicopter training, that while helicopter training is not mentioned in this section 827, "Do not worry, boys, it is in there and it is going to sneak in."

Mr. President, since last year there has been additional support generated for

this consolidation. Secretary of the Navy Claytor has indicated his support of this consolidation in a letter addressed to Senator ALLEN, and I am sure that Senator ALLEN will make that a part of the record.

In addition Secretary Claytor appeared before the House Appropriations Defense Subcommittee in June and made a statement in support of this consolidation. That letter and the statement are part of the package attached to our dear colleague letter asking for your support of this amendment.

On July 13, 1977, Deputy Secretary of Defense Duncan wrote to Senator PROXMIRE to allay the concern that some Senators thought that this proposal to consolidate undergraduate helicopter training was an "opening wedge" in a trend that would lead to all jet training being conducted by the Air Force. The Secretary stated that this concern is groundless. On May 5, 1977, in further support of consolidation the Comptroller General of the United States wrote to Chairman MEL PRICE of the House Armed Services Committee saying that it was the GAO position that the defense study—again I point out this was a study at the direction of Congress—demonstrates once again the feasibility and desirability of consolidating helicopter pilot training.

Mr. Staats concluded his letter with a recommendation that Congress approve the proposed consolidation of helicopter pilot training.

Mr. President, it has been argued that the Navy has some unique training requirements for its helicopter pilots that cannot be satisfied if training is consolidated. I believe I am the only Member of Congress who is certified by the FAA to fly both fixed-wing and rotary-wing aircraft; therefore, Mr. President, I am confident when I make the statement that there is no reason why Navy helicopter pilots cannot be trained at Fort Rucker, especially after the training syllabus has been adjusted to unique Navy training requirements, and they have none.

Those who are concerned about specialized Navy skills, such as flying from ships under operational conditions, can be assured that those skills are gained at a later point in the pilot's training program. It would be similar to an Air Force pilot flying to Nellis Air Force Base to learn combat tactics after having graduated from jet school, as I mentioned earlier. I believe the major concern of those who oppose this consolidation program is not that Navy helicopter pilots will be any less well trained; rather, for some the concern centers on the potential impact on the overall Navy flight training system and its basis.

It is my understanding that the only impact would be that caused by the movement of Navy helicopter assets from Pensacola Navy Air Station to Fort Rucker, Ala., and the possible shutdown of one auxiliary field. There will be no other training impact on Navy's other training bases nor, as Secretary Duncan wrote, is this designed as a first step in an attempt to consolidate all jet pilot training under the Air Force.

I reiterate to my colleagues Secretary Duncan's words, "this concern is groundless."

Mr. President, if we are not to be hypocritical in our pronouncements about savings in the Department of Defense, then the consolidation should be supported. The Department of Defense supports it, the Secretary of the Navy supports it, the House approved it by a vote of 333 to 54, the Department of Defense study supports it, and the GAO verifies the findings of the congressionally directed study. If there was ever a case that was clear cut and an opportunity to save money, this is it.

Mr. President, as I did last year, I urge my colleagues to vote for this. This makes sense. We stand here on this floor day after day after day. We sit in committee meetings hour after hour, figuring out how we can save a little bit of money in defense. We have some of our colleagues who suggest that we destroy whole weapons system concepts. Yet, here is a program that can save $120 million a year and turn out just as good, if not better, trained pilots for the Navy.

I remember as an Air Force officer I resisted the Army training Air Force helicopter pilots. But they do a much better job of it than the Air Force ever could, and we are very, very highly pleased with the product that has come out of Fort Rucker under the Army.

Mr. President, I possibly will have more to say on this. but I do not want to hog all the time. I feel very strongly about this. I think we have a lot of Members of this body who talk about saving money but when it comes down to the chips, when it comes down to closing a base in your own State or in a friend's State, then that is another matter. I do not care where the base is, or what the matter is. If we are going to save money in this Government of ours we have to stop saying, "Hooray for me and to hell with you."

Mr. President, I will save the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I am glad to yield such time as he may wish to the Senator from Florida (Mr. STONE).

How much time does he want?

Mr. STONE. Three minutes.

Mr. STENNIS. I yield 5 minutes, Mr. President, more if he wishes.

The PRESIDING OFFICER. The Senator from Florida (Mr. STONE) is recognized.

Mr. STONE. I appreciate that, I say to the chairman.

Mr. Presidnt, each year we analyze something that is so basic as to really not require analysis.

It is different to fly a helicopter on a mission over water than it is to fly a helicopter on a mission over land. It is different to be required to land and take off on ships in all weather than it is to be required to exercise and execute a mission over land in, generally speaking, flyable weather conditions.

The difference of the mission has always required training from the very first day for that mission. When an attempt is made to train a helicopter pilot under land conditions followed by a supplemental or advanced training for training regarding over water conditions, you have not only wasted time and money, but you have without any question turned out an inferior product.

The main difference between the Air Force and the Navy, between the Army and the Navy, is the difference of the mission.

The training that has done us so proud for naval and marine helicopter pilots, which has proved such a success, does not require tinkering, does not require major surgery. If we had had a series of failures in the discharge of marine and naval missions by helicopter pilots, that would be time enough to look not merely for a way to save money, but for a way to save lives. But the opposite is the case.

Not only would this constantly repeated attempt to train one kind of pilot with another kind of training be a failure in terms of mission, but a failure financially as well, and we would not only be spending more money for basic and further training, but we would be spending money to unlearn and unteach that which has been taught, because of a different approach entirely.

So the Senator from Florida, adopting a mission approach to this issue, asks our colleagues once more to stand up for the success that we have enjoyed, instead of turning it around at a very substantial risk of failure.

I thank the Senator from Mississippi.

Mr. GOLDWATER. Mr. President, will the Senator let me answer a couple of questions?

Mr. STENNIS. I yield the Senator such time as he may require.

Mr. GOLDWATER. Mr. President, I wish to repeat for the benefit of my friend from Florida what I stated before: that learning to fly a helicopter has nothing to do with whether one is flying over water or over land; and I further wish to repeat, as I stated before, that the Navy program does not produce qualified antisubmarine warfare pilots, and has very little to do with flying at sea. I repeat that. This is the Navy UHPP helicopter training program. It has very little to do with training directly related to flying at sea. After the pilot learns to take the helicopter off, to move it in any direction he wants it to go, then they start training those men who are going to fly at sea in antisubmarine warfare and rescue missions; they teach them that particular skill, and they also teach them skills that will allow a Navy pilot to hover 25 or 30 feet over the sea and lower a line to rescue a man in the water, as was done day after day by both Marine and Air Force pilots in North Vietnam.

There is an advantage, if you want to know it, in flying a helicopter at sea from a ship. The ship is always headed into the wind, but the helicopter pilot flying on the ground has to contend with a crosswind, and there is nothing more difficult, in trying to fly anything that flies, than trying to land a helicopter in a strong crosswind.

So I wish to rebut the allegations we heard time and time again last year that there is something different about flying

a helicopter over water. There is absolutely no difference.

I made quite a long flight over the Pacific Ocean myself, and it did not bother me a bit. I just kept slowly repeating the Lord's Prayer that the engine would keep on running.

Air Force pilots, incidentally, did the rescue mission at Mayaguez.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. CHILES. Did the Senator have to worry about trying to find that ship at sea when he made that trip across the water?

Mr. GOLDWATER. I was headed for an island, and could see it. But if I were headed for a ship, yes, a trained pilot can find what he is aiming at, I do not care what he is flying. It is hard to do, and I have great admiration for Navy pilots who go out on carriers and are able to come back with no homing devices. A helicopter pilot can do it more easily, because, while the fixed-wing pilot is normally on instruments, a helicopter pilot can fly visually, or on instruments, or can do whatever he wants to.

Mr. CHILES. I am just thinking about all those pilots I have talked with, and I would hate to try to tell those fellows it is easy, that anyone can do it, because I would hate to be out there trying ot find that cork bobbing in the whole ocean. I would hate to try to get that plane down on top of it.

Mr. GOLDWATER. I will tell you the truth: There is very little flying by the Navy of helicopters off ships. In the daytime, when you have rescue work to do——

Mr. CHILES. I am sure the able Senator from Arizona, who is an able pilot, would agree that, while those helicopters fly 24 hours a day, night and day, in all kinds of weather, when they are on patrol, they are often far from the carrier, going around the fleet.

Mr. GOLDWATER. Around the fleet; that is not very far from the fleet. I want to remind the Senator of what I said before, the Navy training program does not teach antisubmarine warfare.

Mr. CHILES. It teaches them instrument training, it teaches them from the very first start, taking off, that they are not going to be helped in working out their roll and direction and height, but they are going to have to start taking off on their own.

The PRESIDING OFFICER (Mr. DECONCINI). Who is yielding time to the Senator from Florida?

Mr. GOLDWATER. I might say, for the edification of my friend from Florida——

Mr. ALLEN. Mr. President, I will yield the Senator 1 minute.

Mr. GOLDWATER. The very first instruction given to the Army trainee is in a simulator, on instruments, and they probably spend 10 or 12 hours on instruments before they are ever subjected to the rigors, whatever they may be, of getting a bird up and down. They fly simulators; and the Navy does not have good, sophisticated simulators.

I yield the floor.

ADDITIONAL STATEMENT SUBMITTED

Mr. PROXMIRE. Mr. President, I must oppose the Chiles amendment and defend the House language which calls for the consolidation of undergraduate helicopter pilot training. If ever there was a proposal which was easy for the Senate to support, it is this one.

The consolidation of undergraduate helicopter pilot training is supported by the President, the Secretary of Defense, the Secretaries of the Army, Navy, and Air Force, the Chief of Naval Operations, and the Commandant of the Marine Corps.

Here is a proposal which the Department of Defense estimates will save $90 million over the next 5 years. GAO corroborates that savings estimate and predicts an additional $46 million savings for a total of $136 million saved over the next 5 years.

Equally important, here is a proposal which will dramatically improve the training of helicopter pilots. It will almost double the amount of inflight training received by Navy and Marine pilots and will train those pilots on the sophisticated equipment which now benefits only the Army and the Air Force.

When this proposal was introduced last year, the House supported consolidation by a vote of 288 to 110—an almost 3 to 1 margin. The Senate withheld support pending further consideration and the conferees asked that the Secretary of Defense and the Navy study the proposal.

The study requested by the Senate was published by the Secretary of Defense in April of this year. That study overwhelmingly supported consolidation. In House testimony, the Secretary of the Navy and the Chief of Naval Operations urged the House committee to consolidate the training programs. After 3 days of extensive hearings, the House Appropriations Committee approved consolidation.

Mr. President, why is there such strong support for consolidation from the President, the Secretary of Defense, and the heads of the armed services?

Well, there are three major reasons: large savings, increased efficiency, and improved training.

COST SAVINGS

Let us look at the cost savings involved in this proposal. The Secretary of Defense estimates that consolidation will save $90 million by 1982—5 years from now.

Where do the savings come from?

To start with, it costs less for the Army to train helicopter pilots than for the Navy to do so. In fiscal year 1976, it cost the Navy $110,000 to graduate a pilot. It cost the Army only a little over $80,000. The Army would have had to spend 38 percent more on each pilot to equal the level of the Navy's expenditures.

And what did the extra $30,000 per pilot pay for in the Navy program?

It gave Navy and Marine helicopter pilots training on fixed wing aircraft. Not helicopters.

It is no wonder that 40 percent of the Navy helicopter pilots and 60 percent of the Marine pilots do not continue into career service.

In addition to savings from having the Army train helicopter pilots on UH–1 helicopters, there will be additional savings from not having to staff and operate two separate training facilities. In order to maintain a separate Navy program at Pensacola, we will have to add $9.4 million to this year's appropriations, unless consolidation is approved.

But that figure is deciptively small, Mr. President, because expenses would increase in the outyears. In fiscal year 1979, for example, we would need to spend an additional $23 million to procure T–34 C fixed-wing aircraft in order to continue the Pensacola training program.

So without consolidation we will be spending ever increasing sums to keep operating a helicopter training program at the Pensacola Navy Base that the Navy does not want.

How much money will we have to spend if we pass this amendment and prevent the services from consolidating their helicopter training programs?

The Secretary of Defense says consolidation saves $90 million over 5 years. GAO calls that estimate conservative. Let me explain.

The Secretary of Defense used cost estimates provided by the services to compute the net savings from a consolidation. GAO stated in a May 5 letter, a copy of which is on your desks, that the Defense study neglected reductions in future retirement costs for personnel no longer needed, future veterans benefits for those personnel, and base operating costs for the Pensacola Naval Air Station. Using the GAO estimate, the amendment offered by the Senator from Florida becomes even more expensive—costing $146 million over the next 5 years.

Whether one adopts the cost analysis of the Secretary of Defense or that of GAO, consolidation represents a huge savings to the American taxpayer.

INCREASED EFFICIENCY

A second reason to support the original House language is the increased efficiency which will result from consolidation.

The Army base at Fort Rucker, Ala., which can train 2,500 to 4,000 helicopter pilots a year, is now only being used for 700. Consolidation would greatly increase the efficiency of training due to economies of scale and better utilization of existing facilities.

IMPROVED TRAINING

Besides large savings and increased efficiency, consolidation will provide better training for Navy, Marine, and Coast Guard helicopter pilots.

The Navy and Marine pilots will receive almost double the amount of inflight training under the consolidated program. At Pensacola, Navy and Marine pilots spend only 100 hours flying helicopters. At Fort Rucker, they will receive 195 hours of inflight training. In addition, the Navy and Marine pilots will receive 50 hours of training on sophisticated helicopter simulators which feature full degree motion and computer simulation. The closest things they have at the Pensacola base are nonmoving, noncomputerized cockpit procedure trainers.

That the Army provides higher quality training than the Navy is not surprising. Helicopter pilot training is the Army's only undergraduate flight instruction. The major undergraduate pilot training program in the Navy and the Air Force, however, is instruction in specialized skills required by jet fighter attack pilots. Helicopter pilot training is a low priority.

It is no wonder that the Marine Corps best helicopter pilots told the House committee that they were unhappy with the Pensacola program and would prefer Army training.

With so many factors supporting consolidation, how can anyone oppose it? Let me respond to the questions which have been raised.

Does not the Navy need more over-the-water training?

No. Navy pilots receive only 40 minutes of over-the-water training in the current Navy program. The Navy has waived such training when a carrier was not available. Under the Army program the Navy pilots will fly down to Pensacola—which is only an hour away—and receive the same amount of carrier training as they now do, if not more.

Would not the Army have to buy new helicopters to accommodate the increased number of students—thus invalidating the cost estimates?

No. The Secretary of the Army testified before the House Defense Appropriations Subcommittee that there were enough UH–1's in storage or otherwise available to handle the consolidated program. The Secretary stated clearly that no new funds would be needed for any new equipment purchases.

Is not the consolidation of undergraduate helicopter pilot training the first step toward the consolidation of all military pilot training programs?

No. The heads of the Armed Services have opposed such consolidation. The Secretary of Defense has not only opposed broad consolidation but is currently investigating possibilities for further specialization. And I have in my hand a letter I just received from the Deputy Secretary of Defense flatly stating that there will be no consolidation of jet pilot training.

Would not this consolidation be a departure from the historic independence of the Armed Service training programs?

No. The Air Force and the Navy have consolidated their Advanced Undergraduate Navigator Training at Mather Air Force Base near Sacramento, Calif. The Marine Corps and the Army have consolidated their artillery training at Fort Sill, Okla. These and other consolidated training programs are providing better instruction at less cost.

Are not the Navy and the Marine Corps unhappy with the Army training syllabus?

No. The Secretary of Defense added an additional 20 hours of helicopter flying time and 10 hours of simulator time which the Secretary of the Navy, the Chief of Naval Operations, and the Commandant of the Marine Corps have stated will completely satisfy Navy and Marine Corps requirements. And I have a letter from Deputy Secretary Duncan to prove it.

Would not the proposed consolidation destroy the specialized instruction now given to Navy and Marine helicopter pilots at the Pensacola base?

No. Navy and Marine Corps pilots will provide the actual instruction for Navy and Marine students in all phases of flight training except the primary introductory period. Each service will have its own service-unique portion within the syllabus in which to provide special training oriented to that service's needs. In the current program at Pensacola, in contrast, 48 percent of the flight instruction is not even given in helicopters but in fixed wing aircraft.

Finally, do not the Secretary of the Navy, the Chief of Naval Operations, and the Commandant of the Marine Corps really oppose consolidation?

Well, Mr. President, if anyone questions their support for consolidation, I have three letters here dated July 15. One is from the Secretary of the Navy; one is from the Chief of Naval Operations; one is from the Commandant of the Marine Corps. And they all support consolidation.

In closing, let me emphasize that this consolidation has been carefully studied and tested. The studies include reports by GAO, the Secretary of Defense, and the Interservice Training Review Organization, all of which recommended consolidation. More important, the Air Force consolidated its undergraduate helicopter pilot training program with the Army in 1970 and has been completely satisfied with the results over the past 7 years.

The issue at hand could not be clearer. A vote for the Chiles amendment is a vote to spend an additional $9.4 million this year and an additional $90 million over the next 5 years. It is a vote to keep Army helicopters in storage and to prevent the Navy and the Marines from receiving the helicopter pilot training which they desire.

A vote against the Chiles amendment will save $90 million over the next 5 years. It will make use of the Army's capacity. It will give Navy and Marine helicopter pilots the additional and better training which they have requested.

I urge my colleagues to support the President, the Secretary of Defense and the heads of the armed services and vote against this amendment.

Mr. President, I ask unanimous consent that letters from Deputy Secretary of Defense Charles W. Duncan, Jr. and Secretary of the Navy Graham Claytor be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DEPUTY SECRETARY OF DEFENSE,
Washington, D.C., July 13, 1977.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: It is my understanding that, in connection with consideration of the President's proposal to consolidate Defense undergraduate helicopter pilot training, some senators have expressed a concern that this proposal is an "opening wedge" in a trend that would result finally in consolidation of all jet pilot training under the Air Force.

This concern is groundless.

I attempted to allay any such concern in my appearance before the House Appropriations Committee during the extensive special hearings last month on proposed undergraduate helicopter pilot training consolidation. I wish to reemphasize to you that I cannot envision a situation where naval jet fighter/attack undergraduate pilot training would be consolidated with Air Force training.

Economies of scale in training operations make the proposed consolidation of undergraduate helicopter pilot training very desirable, even under the longer syllabus which I have approved, at the request of the Secretary of the Navy, to assure the quality Navy says it needs. However, I can find no basis for analogous economies of scale from a consolidation of Navy undergraduate jet pilot training with Air Force.

I strongly urge your support, and the support of the Senate, of the present proposal to consolidate undergraduate helicopter pilot training.

Sincerely,

C. W. DUNCAN, JR.

DEPUTY SECRETARY OF DEFENSE,
Washington, D.C., June 16, 1977.

Honorable GEORGE H. MAHON,
Chairman, Defense Subcommittee, House Appropriations Committee, Washington, D.C.

DEAR MR. CHAIRMAN: At the recent hearings on undergraduate helicopter pilot training, one issue which remained to be resolved was the syllabus for Navy and Marine Corps students. The Secretary of the Navy, the Chief of Naval Operations, and the Commandant of the Marine Corps have stated that a 195/50 syllabus (195 helicopter flying hours, 50 simulator hours) would completely satisfy Navy and Marine Corps undergraduate helicopter pilot training requirements. This syllabus would entail an increase in training time above the 175/40 syllabus which was the basis of the report on undergraduate helicopter pilot training consolidation and would be equivalent to or better than the present Navy program.

After due consideration and to insure that Navy and Marine Corps helicopter pilots have the training that those Services deem necessary, I have decided that Navy and Marine students will receive the 195/50 syllabus within the consolidated training program.

Sincerely,

CHARLES W. DUNCAN, Jr.

DEPARTMENT OF THE NAVY,
Washington, D.C., July 15, 1977.

Hon. WILLIAM PROXMIRE,
U.S. Senate, Washington, D.C.

DEAR SENATOR PROXMIRE: In response to your request, I'd like to confirm, in no uncertain terms, the Department of the Navy's support for the consolidation of undergraduate helicopter pilot training with the Army at Fort Rucker, Alabama.

I would emphasize two fundamental factors underlying the decision to consolidate helicopter training. First, quality of training will be maintained or improved. To assure the complete adequacy of the consolidated syllabus, the Department of Defense has recently approved our request for an additional 20 flight hours and 10 simulator hours to provide increased instrument and maritime training for our unique Service requirements.

The other key factor in this decision is the expected savings of at least $90 million over the next five years. A careful and independent review of costing data associated with consolidation, made at my request by Navy and Defense Department Comptrollers, confirmed the amount of the savings. Furthermore, the General Accounting Office reviewed both the feasibility of consolidation and the anticipated savings and found the estimates to be conservative and recommended that Congress approve consolidation.

I know you will agree that we must make every effort to ensure the efficient use of de-

fense dollars. In my view, the consolidation of helicopter pilot training is that type of action.

I appreciate the opportunity to express my support for this consolidation plan.

Sincerely,

W. GRAHAM CLAYTOR, Jr.,
Secretary of the Navy.

(This concludes additional statements submitted.)

Mr. ALLEN. Mr. President, I yield myself 1 minute. I hope the distinguished majority leader will approve the request I am making.

I have consulted with the distinguished Senator from Florida (Mr. CHILES) and with Mr. STENNIS, the manager of the bill. In order to expedite the consideration of the amendment, I ask unanimous consent that at 2:30 I be recognized for the purpose of making a motion to table the committee amendment.

Mr. STEVENS. Mr. President, reserving the right to object, will the Senator permit us—it will be my intention to move to take up the remainder of the consideration of my amendment No. 501, and then have a vote. Will the Senator amend his request so that he would be recognized immediately after that vote, so that we can start terminating some of these things?

It may run just past 2:30, is my point.

Mr. ALLEN. To take it up, the Senator means, after this?

Mr. STEVENS. It can be taken up right now, if we can come in and have a vote, and then the Senator can come in after that vote.

Mr. ALLEN. Is that the request of the majority leader as well?

Mr. ROBERT C. BYRD. If the Senator will yield, I would support that request, and I think clockwise it would come out about as the Senator wishes.

Mr. ALLEN. Well, I will require considerable time, because Senator PROXMIRE wishes to speak, and I want to speak, as do some others.

I would suggest that 30 minutes after the rollcall I be recognized for the purpose of making a motion to table the committee amendment.

Mr. ROBERT C. BYRD. I have no objection to that.

Mr. STENNIS. Mr. President, I have in mind that we proceed now, if it is agreeable, to a vote on this Stevens amendment, and then thereafter we could vote on the Kennedy matter, but I am not sure he can get back.

Mr. ALLEN. Suppose we wait until after action on the Stevens amendment, and then we will consider the request, in view of the action at that time.

Mr. STENNIS. The point is, you expect, then, to come to a definite restated agreement as to the division of time?

Mr. ROBERT C. BYRD. Yes.

Mr. STEVENS. Mr. President, I ask for the yeas and nays on my amendment.

Mr. EAGLETON. First have it laid down.

AMENDMENT NO. 501

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to further consideration of amendment No. 501.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes amendment No. 501:

On page 55, strike out line 1 and all that follows through line 24, and redesignate the following sections accordingly.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

Mr. STEVENS. This is the third and last of my amendments.

The PRESIDING OFFICER. Does the Senator want to ask for the yeas and nays?

Mr. STEVENS. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. I believe I have asked that Senator GRAVEL, Senator DOLE, Senator TOWER and Senator HATCH be added as cosponsors.

I will be very brief. I know the Senator from Mississippi wishes to be heard, and the Senator from Missouri.

We are talking about a provision which would prevent those people who are retired from the military from accepting a job with the Federal Government if their retirement income exceeds $6,000.

On the average, retired military people working on Federal jobs today earn $15,000 from that job, and they average a retirement income of $6,100. The average military retiree is an E–7 with three dependents, and I do not feel that he should be denied either his retirement income or the Federal job if he is qualified for it under the circumstances.

Let me point out that the problem we have with regard to dual compensation is a real one. We realize that. Again, we realize that the legislative committees ought to be dealing with, and I am sure will be dealing with, the provisions of the retirement system as they apply not only to funding of the retirement system, but also as they apply to the concepts of so-called early retirement and other activities of military people.

Previously, I read into the RECORD a series of incentives which have been denied to the military people.

This discriminatory provision would really deny the Federal Government the services of the people who are best qualified, in some instances, to provide their talents in specific situations. I say discriminatory because they could go to work for the private sector and keep their retirement. There is no income limitation at all; we would still pay the retirement. But if we find key situations where their military background gives them as special qualification to work for the executive branch, the legislative branch, or the judiciary, this would deny them the opportunity to continue their careers and would deny the Federal Government the advantage of their training and their capability which developed in the period of time they have been in the military service.

I believe this is a basic discrimination against those who have served in the military, which should not persist in this bill. I hope the Senate will agree with me to delete it. I reserve the remainder of my time, Mr. President.

Mr. EAGLETON. Will the Senator yield 3 minutes, Mr. President?

Mr. STENNIS. I yield, Mr. President.

Mr. President, may we have order? I ask this time not be charged, Mr. President, until there is order in the Chamber.

The PRESIDING OFFICER. The Senate will please be in order.

The Senator from Missouri.

Mr. EAGLETON. I thank my colleague. Mr. President, I will be brief. After my remarks perhaps Senator STENNIS will have a few things to say and then we will come to a vote.

This is the double-dipping amendment, the last of the three amendments offered by the Senator from Alaska. Very briefly, Mr. President, this amendment examines and probes the tip of the iceberg. The iceberg is the military retirement system.

Back about 12 years ago or so, all pensions paid by the military cost $1 billion. Today, in 1977, it is up to $9 billion. The actuarial projection is that in the next 25 years it will go to over $30 billion.

I also should point out that the unfunded liability of the military pension system is $170 billion.

If we take the 100 largest corporations of this country, their pension liability is $38 billion. The unfunded liability of the military pension system is four times that, $170 billion.

So what we are talking about here, Mr. President, is very, very important. Double-dipping is just the most visible part of it, but it is only a tiny part of it.

I believe the day will come, Mr. President, perhaps not in my lifetime or in the lifetimes of my colleagues here in the Chamber today, but certainly in the next 20 years, where some horribly hard choices will have to be made. President Johnson used to talk about guns or butter during the Vietnam era. We are getting to the point where, with respect to the defense budget, we will have to talk about guns or pensions. Pensions are eating this budget alive. If we do not take meaningful steps to remedy that, and this double-dipping is the first step, I think we will rue the day.

With respect to double-dipping, there are about 140,000 Federal employees who are now drawing both a pension check and a salary check from their Federal civilian jobs. Almost eight thousand of these double-dippers are under the age of 40.

They retired when they were 37, 38, or 39 years of age. I ask my colleagues to name me one business which would permit a valuable employee to retire and draw a pension from that business at age 37, and then turn right around and rehire him in another capacity and give him a paycheck and a pension check as well. It just does not make sense, Mr. President. That is what we are trying to reform here.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. EAGLETON. Will the Senator yield 1 additional minute?

Mr. YOUNG. I will yield 3 minutes to the Senator on the bill.

Mr. EAGLETON. I will not use all 3 minutes. I do not want to belabor the point.

By an earlier Stevens amendment in committee, he put in a proviso so this does not affect people drawing pensions under $6,000. If the pension is under $6,000, they can still double dip. Senator STEVENS offered that amendment in committee. I did not think it was a very good amendment but he was more persuasive than I was and the committee adopted it. It will, for those whose pensions are over $6,000, tell them they cannot draw simultaneously both a pension and a paycheck.

Under the committee bill, when your time comes and you do retire, you can draw your pension when you retire from your civilian job. You cannot draw both while working for the Federal Government. Mr. President, there are even cases where retired military have accrued enough credit for social security to triple dip—getting a military pension, social security pension, and a pension from private industry or civil service.

Mr. President, if we do not begin to come to grips with this pension matter there will be a lot of people in this Chamber shaking their heads in the years to come on how we are to pay for these ballooning pensions. They escalated from $1 billion to $9 billion in 12 years and are going higher and higher. I yield back the remainder of my time.

Mr. McINTYRE. Will the Senator yield for a unanimous-consent request?

Mr. YOUNG. I yield.

Mr. McINTYRE. Mr. President, I ask unanimous consent that Susan Pitts, of my staff, be granted the privileges of the floor, during the debate on the pending bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. STENNIS. Mr. President, what time remains on this amendment?

The PRESIDING OFFICER. The Senator from Alaska has 6 minutes remaining, and the Senator from Mississippi has 7 minutes remaining.

Mr. STENNIS. Mr. President, if I may, I want to get to a vote, just as everyone else does. This is a rather confusing subject. It has been confusing for a long time. Under the present law, as I understand, when a man in the Regular Army or Navy, retires and then goes over and accepts employment with the civilian branch of the Government, he has to give up a certain portion of his retirement pay.

A reserve officer, even though he has put in all those years of active service, is not subject to any penalty. Nor is an enlisted man. That is because of some compromise somewhere, sometime.

Mr. EAGLETON. Will the Senator yield to clarify that? Only regular officers, not reserves or enlisted men are subject to the Dual Compensation Act.

Mr. STENNIS. The enlisted man is in with the reserves, you are correct.

Mr. EAGLETON. Yes. I just wanted to clarify that.

Mr. STENNIS. Anyway, this matter is of growing importance. Personally, I think it cannot be fully settled until there have been real indepth hearings on the matter.

The first I knew about this amendment was when it was amended with the $6,000 proviso on the motion of the Senator from Alaska. That proviso is in there now at his request.

Mr. STEVENS. Let me interrupt the Senator.

Mr. STENNIS. I yield briefly.

Mr. STEVENS. It was at the request of the Senator from Missouri, but he did exempt from his provision those that received less than $6,000 in compensation.

Mr. EAGLETON. I acceded to the Senator from Alaska's request to exempt those under $6,000.

Mr. STEVENS. I wanted to take it all out.

Mr. STENNIS. I was there at the time and as I got it, the Senator from Alaska modified his amendment.

Mr. STEVENS. I modified the amendment of the Senator from Missouri.

Mr. STENNIS. Anyway, the situation is in an unsatisfactory condition. I want to give the whole picture, so far as I can.

It is tied in, in part, with the whole matter of the amount of money, the $9 billion per year, that it takes to pay the retirement benefits. Also, we have the amendments offered here, from time to time, about recomputation. This thing must be solved some way. I am going to vote to sustain here what the committee did. It will not be a complete solution, but it will be a start.

It is true that this matter is pending now, to a degree, before the President's commission. I hope they take it up early. It is going to have to be settled. But just to throw it back and continue to throw it back is not going to solve this very grave problem.

I yield the rest of my time to anyone who might be interested in it. I am just trying to make a frank appraisal of our situation.

Mr. STEVENS. Mr. President, let me yield myself 3 minutes to see what happens here.

I point out to the Senate that, of the 2.8 million people working for the Federal Government, only 141,817 people are included in the coverage of the amendment of the Senator from Missouri. Of those, 111,793 are retired enlisted personnel. The figures that we have show that the annual retirement pay for all retirees—there are 11.4 percent making $5,000 or less; 33.9 percent making $6,000 or less. This is in terms of their retirement compensation. $7,000 or less for 62.6 percent and $8,000 or less for 75.4 percent of the total retirees.

The problem with the amendment of the Senator from Missouri is that those people who retired because of disability, who may have retired in World War II under the disability program, are included in this. My good friend from Alaska, Howard Pollock, who gets a disability because of the loss of his arm, would be barred from receiving the disabilty that he was given during World War II—because of his disability, not because of the length of his service—by the amendment of the Senator from Missouri.

I really do not think this is the place to legislate the question of dual compensation. I agree with the Senator from Missouri and the Senator from Mississippi that there must be something done about the whole concept of dual compensation. But to talk about solving the retirement fund, and particularly the unfunded liability of the retirement fund, by denying those people who could work for the Federal Government—and incidentally, would waive 40 percent of their compensation if they went to work for the Federal Government; that is, 40 percent of their retirement compensation for the officers—is wrong and this subject should not be on an appropriations bill.

I hope that, one of these days, the Committee on Appropriations will strengthen the rule against legislation on an appropriations bill and require an affirmative vote; not require that the burden be on the Appropriations Committee, but require a two-thirds vote for anybody who wants to put legislation on an appropriations bill. Maybe some day, we would be able to get appropriations bills through here and have the subject of the money be considered and not reforms.

I do not disagree with my friend from Missouri that the retirement system needs to be examined. But what he wants to do is prevent those who are entitled to retirement compensation from getting employment from the Federal Government, when that is what they are best qualified for, particularly when you consider the fact that they take examinations. They go onto the civil service rolls under the civil service system.

They compete with other nonmilitary retirees in the acquisition of these jobs. They are found to be the best qualified person for the job under the civil service system. But my friend's amendment will say, "even though you are the best qualified person under the system, if you are entitled to compensation under the pension plan that is currently in existence because of military service, you cannot take the job with the Federal Government."

I think that is wrong.

Does the Senator from Alabama desire to offer his amendment at this time? If he does, I shall yield back the remainder of my time.

Mr. ALLEN. Yes, I do.

Mr. STEVENS. I yield back the remainder of my time.

Mr. ALLEN. Mr. President, I have an amendment at the desk that I call up and offer on behalf of myself and the distinguished Senator from Rhode Island (Mr. PELL) and the distinguished Senators from Florida (Mr. CHILES and Mr. STONE).

The PRESIDING OFFICER. The amendment is not in order until all time has been used or yielded back.

The Senator from Mississippi has 3 minutes remaining.

Mr. ALLEN. It is a perfecting amendment.

Mr. STEVENS. If the Senator from Mississippi will yield back his time, we can get this amendment considered.

The PRESIDING OFFICER. Does the Senator from Mississippi yield back his time?

Does the Senator from Mississippi yield back his time?

Mr. STENNIS. I do not yield back my time.

Mr. EAGLETON. Is the amendment of the Senator from Alabama on the subject of the Stevens amendment?

Mr. ALLEN. It is, and it takes into account that the $6,000 limitation might deprive the Government of the services of able people. It would provide that the provision would not apply to those whose retirement compensation is less than $6,000 and to those who waive the retirement compensation over $6,000.

Mr. EAGLETON. I suggest, in the interest of time, that Senator STEVENS accept the perfecting amendment to his amendment and we can move on.

Mr. ALLEN. It is not a perfecting amendment to his amendment, because his amendment is an amendment to strike. This is perfecting language to the bill.

Mr. STEVENS. His is a perfecting amendment to the bill.

Mr. EAGLETON. Since it is on the subject, I suggest to my colleague from Mississippi that we might as well yield back the time and go to this amendment.

Mr. STENNIS. Mr. President, just to meet the time here, I think the matter has been debated, frankly. We are down to the time to vote. The membership is expecting it. If the Senator is going to amend the bill, he could amend it later, could he not?

Mr. ALLEN. I think now would be the appropriate time because there would not be any language in there if the Stevens amendment carries. I think this amendment offered on behalf of myself and Mr. PELL, Mr. CHILES, and Mr. STONE, would give the opportunity——

Mr. STENNIS. Mr. President, if it will hasten things any, I will in a minute yield back my time.

Mr. STEVENS. Will the Senator yield to me?

Mr. STENNIS. Yes.

Mr. STEVENS. If the Senator is prepared to accept the Senator from Alabama's amendment, I am prepared to withdraw my amendment.

Mr. EAGLETON. Let me see if I have an understanding.

Mr. STENNIS. I ask the Chair to indulge us for a couple of minutes, if I may, Mr. President.

Mr. STEVENS. Just to make sure I understand what——

Mr. EAGLETON. I think I understand the thrust of his amendment. If I do, I think it would be agreeable to me.

Under the bill language as now drafted, let us say a person retires from the military and his pension check is $5,900.

Mr. ALLEN. That is right.

Mr. EAGLETON. He starts to draw that pension check. Let us say he is 42 years old. He gets another Federal job, making $15,000 a year, and he gets the $5,900 check monthly as well as his new Federal salary.

The PRESIDING OFFICER (Mr. JOHNSTON). The time of the Senator from Mississippi has expired.

Mr. STEVENS. I ask unanimous consent for 4 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Does the Senator from Alabama offer his amendment?

Mr. ALLEN. I have offered the amendment, we can talk on the time of the amendment.

Mr. STENNIS. I yield 3 minutes on the bill to the Senator.

Mr. EAGLETON. We have already discussed the fellow who draws $5,900 in retired pay. Let us consider the person who had a similar job in the military, but who will be entitled to a pension of $6,100. He wants to retire.

Under the bill as now drafted by the committee, he would forfeit all of the $6,100. He would not start to draw that at all. Later, when he left Federal employment he would.

But considering the example of two coworkers, one with a $5,900 pension, and another with a $6,100—one would get his full pension while the other would not.

Is that the inequity the Senator from Alabama seeks to correct?

Mr. ALLEN. The inequity is this, that under the bill a retired person making $6,000 would not be eligible for a Federal job.

The inequity is cured by the amendment that would provide that a retired person making more than $6,000 could become eligible by waiving all his retired compensation down to $6,000. It opens up a broad reservoir of experience and talented individuals who might wish to work for the Government and for whom there might be a place in the Government. But he could not draw more compensation than $6,000.

Mr. EAGLETON. Could I see the amendment?

Mr. ALLEN. That is the purport of the amendment.

Mr. STENNIS. Mr. President, if I may ask, the Senator said he is not eligible if he is making $6,000. Does the Senator mean he is not ineligible for a job, or he can take the job but he would have to surrender his military——

Mr. ALLEN. Yes. But the man making $6,000 does not have to surrender his compensation. This amendment would provide that if someone makes more than $6,000, suppose it is $20,000, and he says that he wants to work for the Federal Government and is willing, he can waive all his retirement income over $6,000.

So we accomplish the same thing, but open up a reservoir of potential employees.

Mr. STENNIS. Mr. President, in view of the situation here, our agreement for the final vote, it is unusual, but I ask that there be 3 minutes' time for these Senators to confer and we not leave this amendment. I think we can dispose of it one way or another.

The PRESIDING OFFICER. If the Senator offers his amendment, there will be 15 minutes.

Mr. ALLEN. I tried to offer it, but the Chair has not——

UP AMENDMENT NO. 683

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN), for himself and Mr. PELL, Mr. CHILES, and Mr. STONE, proposes unprinted amendment No. 683:

On page 55, line 24 of the bill, before the period insert the following: ", or who shall waive all retired compensation over $6,000 per year."

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. Mr. President, I suggest the absence of a quorum, the time to be equally divided.

Mr. STEVENS. If the Senator will withhold that, I would like to explore it while they do that.

It is an amendment to my amendment? Or is this a perfecting amendment to the bill?

Mr. ALLEN. No. It is an amendment to the language of the bill. Then, as the Senator states, if he would withdraw his amendment on the adoption of this amendment, the provision then would be that no one could work for the Federal Government unless his retired compensation was less than $6,000, or who waived his retired compensation down to $6,000.

That would be the net effect of it.

Mr. STEVENS. May I inquire, if we have a vote on my amendment and my amendment carries, this amendment——

Mr. ALLEN. The Senator's amendment would not come up.

Mr. STEVENS. This would no longer be in order?

Mr. ALLEN. This amendment would come up first.

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. Mr. President, all I can do is restate what the amendment provides.

The language of the bill which Senator STEVENS seeks to strike out provides that no one who is retired, no Federal employee who is retired, on a retirement of $6,000, can work for the Federal Government.

That overlooks the great number of people who are highly qualified.

All this amendment would do would be to provide that these people who are eligible, who are highly qualified and are drawing large retirement compensation, if they would waive their compensation down to the figure at which others are eligible, they, too, would become eligible.

That is all it involves.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. Mr. President, if I may have a minute from the distinguished Senator from Mississippi.

Mr. STENNIS. I yield to the distinguished Senator.

Mr. EAGLETON. I think the Allen amendment as just discussed make sense. I would strongly recommend to the

chairman that he accept the Allen amendment. Then we will proceed to the Stevens amendment.

I had thought, having once accepted the Allen amendment, that that would dispose of the matter.

In any event, I think the Allen amendment makes sense. I would recommend that the chairman accept it.

Mr. STEVENS. Would someone yield to me?

Mr. STENNIS. I yield 2 minutes to the Senator.

Mr. STEVENS. My problem with this, Mr. President, is that at $6,000 or less, we are dealing with one-third of the people and they are, basically, those who are in the first grades of the enlisted ranks, the people who have built up over the years and have been successful in the military, who have reached what I would have called a master sergeant, technical sergeant, first sergeant level. They are the ones penalized by this.

I think that the level of $6,000 in this regard, if we could possibly do it, ought to be increased so that those people would be reflected. It ought to be $8,000, I think. If they waive everything over $8,000, in effect, they will have the same treatment as the officers who must waive 40 percent of their compensation to take a Federal position under the Dual Compensation Act.

I am willing to withdraw my amendment if the Senator from Alabama will make it $8,000.

Mr. ALLEN. No. I am trying to use the framework of the present language of the bill, to give those who make more than $6,000 the option of cutting their retirement down to $6,000, to become eligible. They do not have to do it if they do not want to.

Mr. STEVENS. $6,000 was not my suggestion. It was a compromise with the Senator from Missouri in committee. I would be happy to compromise again, if we could get the principle. It would be the same thing, as I said, for the officers as for the enlisted men if they waived everything in excess of $8,000.

Mr. EAGLETON. I think the best thing for us to do is to accept the Allen amendment and then vote on the Stevens amendment. We could be jockeying here all day. In the committee, we first talked in terms of $5,000, and then Senator STEVENS wanted to make it $8,000 and then $6,000. I suppose if he made it a $112,000 limit, it would satisfy everybody because it would not affect anybody.

I suggest that we accept the Allen amendment and then vote up or down on the Stevens amendment.

Mr. STEVENS. If that has to be, all right. I am trying to see if there is some balance here with officers. If they go to work for the Federal Government in a nonmilitary capacity after becoming eligible for the military retirement compensation, they must waive 40 percent.

What I am saying here is that there should be some combination. Even if we take the $6,000 figure and they would waive 60 percent of all their compensation, or some balance between those who reach the level of warrant officer, 1st sergeant, or master sergeant, they are the people who are being hurt by this.

Mr. EAGLETON. How about $7,000?

Mr. ALLEN. No.

Mr. EAGLETON. Senator ALLEN wants to stick with $6,000.

Mr. STENNIS. Mr. President, I call the attention of the Senate to the conditions we have to face. This bill has to be completed, under the unanimous-consent agreement. I think we are about as close to an agreement on this as we can get. To find out exactly how it applies would require a calculator, which could be done in conference.

For the committee—I have conferred with others on the committee—we can agree to the Allen amendment and hope it will be adopted. If the Senator from Alaska will withdraw his amendment, there is no complaint about that; but it seems to me that the situation is largely solved.

Unless someone else wishes to speak, Mr. President——

Mr. NUNN. I should like to ask a question.

Mr. STENNIS. I yield the Senator 2 minutes.

Mr. NUNN. It seems to the Senator from Georgia that this so-called double dipping is a symptom of an underlying problem rather than the problem itself, and that is the up or out policy which is required of officers after 20 years.

We have before us the Personnel Management Act, and I should like to get some sentiment from the Senator from Missouri as to whether he thinks this act should be modified basically to allow or require a longer term of service; if so, whether he has any thought as to whether the up or out policy should be modified.

Mr. EAGLETON. As is often the case, Senator NUNN has come to the heart of the matter. He is absolutely correct.

The reason we are in this double dipping dilemma, is the "20 and out" policy which permits somebody to retire and draw an immediate annuity at age 43 or 44. Many servicemen are forced to retire if they do not make the promotion gates, even at a young age.

When there is true reform of the military pension system, there will have to be a considerable modification of the 20 and out policy. Now whether it should be 30 and out, whether it should depend on what the assignment of the person was—combat, support, and so forth—that has all been discussed in the study commissions that already have reported on this matter. There were five of them within the past 10 years with one more to come appointed by President Carter. The "20 and out" policy gives vitality, as it were, to the double dipping dilemma.

Mr. NUNN. The thing that is frustrating to the Senator from Georgia is that it is my understanding that the administration is about to endorse, if it has not already endorsed, the same DOPMA proposal that the Ford administration had last year, which basically endorses and reinforces and builds into permanent law the 20-year up or out policy. It seems to me that is totally inconsistent with the frustration that has been voiced on the so-called double dipping.

I am a little perplexed about the whole situation, because I share the concerns and sentiments about retirement, but the administration—and perhaps the last administration—continues to treat these things as separate items.

Mr. EAGLETON. The new Carter Commission was specifically instructed to study the "20 and out" policy. They were specifically mandated to give attention to that.

Mr. NUNN. In the meantime, we are being asked to approve legislation which contradicts any kind of study on that, and that legislation is being pushed at this moment on the House side by the administration. So I am perplexed.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STEVENS. I say this to the Senator from Georgia: The problem is that an officer must be a major in order to retire. When he retires, he is going to make in excess of $10,000. Under the Dual Compensation Act, he must waive 40 percent if he wants to go to work for the Federal Government. So automatically the Allen substitute would take care of that. It would be in the vicinity of 40 percent. The chief warrant officer, W–4, retires at somewhere around $12,000. Under this amendment, if he goes to work, he has to waive everything over $6,000. In other words, he must waive at least 50 percent of his retirement compensation in order to go to work for the Federal Government.

The discrimination I have been trying to get at is the discrimination between the Dual Compensation Act of the officers and the existing law for enlisted men. Enlisted men do not have to waive today. By putting it at $6,000, the Senator from Alabama, unfortunately—and I attribute no malice—gets into the situation where automatically the chief warrant officer, the technical sergeant, and the master sergeant must waive a great deal more of their retirement compensation than a major would waive if he went to work for the Federal Government. I am trying to get some equity. The breaking level would be $8,000.

Mr. NUNN. Does the Senator realize that there is a distinction between retired Regular officers and retired Reserve officers; that retired Regular officers are the ones who have to waive part of their retirement pay and yet Reserve officers do not have to waive theirs?

Mr. STEVENS. I do understand it. That is precisely the reason why I do not see why we should legislate in an appropriations bill when no one really understands all the variations of this retirement system now.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. NUNN. I am inclined to agree with the Senator from Alaska on that point. It is so complex that it is bewildering.

Mr. ALLEN. I yield myself 1 minute.

In answer to the distinguished Senator from Alaska, he talks about the man retiring on $12,000 who would have to waive compensation in order to work for the Federal Government. Without the amendment we have proposed, this $12,000 man would not be eligible at all to work for the Government.

Mr. STEVENS. Our statistics show that the proposal of the Senator from

Alabama would be too burdensome to the enlisted retiree.

Mr. ALLEN. Without the amendment, he would not be eligible at all.

Mr. STEVENS. He would be eligible after the vote on my amendment, because we will win.

Mr. ALLEN. The Senator may not win.

Mr. President, I yield back the remainder of my time.

Mr. STENNIS. I yield back the remainder of my time.

Mr. STEVENS. Mr. President, I am constrained to state that the amendment per se is legislation on an appropriations bill, and I raise a point of order.

Mr. EAGLETON. Mr. President, before the Chair rules on that matter, I raise the question of germaneness.

The PRESIDING OFFICER. The Chair has sent for the amendment, before the Chair can rule.

Mr. STEVENS. I ask unanimous consent to have printed in the RECORD an article by Jerry Waldie.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Federal Times, June 27, 1977]

'DIPPER' TAG OFFENSIVE

(By Jerry Waldie)

There is no doubt that the term "double dipping" is offensive to military retirees employed by the government. But I've been surprised that the term isn't equally objectionable to all government employees. It is to me and I'm neither military nor civil service retiree nor an employee of the government.

I do, however, work with such employees, both retirees and non-retirees, on a daily basis. With rare exceptions they are conscientious and productive individuals who give a full day's work for a full day's pay.

Why, then, refer to their wages and salaries as "dipping?" Mind you, the term "double dipping" refers to wages for work currently being done, and retirement income for work that has been done.

To use the phrase "dipping" to describe the compensation a federal employee receives from his employer is reminiscent of that tired old saw that the government employee is "feeding at the trough of the taxpayer." He is doing no such thing. He is performing a responsible job and earns every cent he receives, including retirement pay. Whatever the proper description of that mutual obligation might be, "dipping" is not an acceptable one.

Neither do I follow the argument implicit in the term "double dipping" that military retirement income is somehow less than honorable payment for services already rendered. It is true that military personnel do not have dollars deducted from their checks as payment toward retirement. But one of the reasons they do not contribute in that manner is that their pay was at a level where their "contribution," in effect, was made by accepting lower pay for their service. To argue that military people do not "contribute" to retirement seems simplistic and unfair. Therefore, when they become entitled to receive their retirement income, to describe that payment as "dipping" is wrong. I think the term "double dipper" demeans all employees of the government.

Those that use it betray a contempt for government service, military and non-military, that is revealing.

The PRESIDING OFFICER. The Chair has sent for the amendment.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I will withdraw the point of order, Mr. President.

The PRESIDING OFFICER. The point of order is withdrawn.

The question is on agreeing to the amendment of the Senator from Alabama.

The amendment was agreed to.

The PRESIDING OFFICER. The question now recurs on agreeing to the amendment of the Senator from Alaska, amendment No. 501. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

(Mr. MOYNIHAN assumed the chair.)

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK) is necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from California (Mr. HAYAKAWA), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

I further announce that, if present and voting, the Senator from California (Mr. HAYAKAWA) would vote "yea."

On this vote, the Senator from Wyoming (Mr. WALLOP) is paired with the Senator from New Jersey (Mr. CASE). If present and voting, the Senator from Wyoming would vote "yea" and the Senator from New Jersey would vote "nay."

The result was announced—yeas 49, nays 46, as follows:

[Rollcall Vote No. 302 Leg.]

YEAS—49

NOT VOTING—5

Abourezk	Hayakawa	Wallop
Case	Mathias	

So Mr. STEVENS' amendment was agreed to.

Mr. BELLMON. Mr. President——

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BELLMON. I have an amendment at the desk, which I call up and ask for its immediate consideration.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 525

Mr. ROBERT C. BYRD. Mr. President, could we get an agreement that there will be 4 minutes of debate on the amendment (No. 525) by Mr. KENNEDY, which has already been debated, to be equally divided between Mr. STENNIS and Mr. KENNEDY, and then proceed to a vote on the amendment?

Several Senators addressed the Chair.

The PRESIDING OFFICER. Such an order has been entered, I believe.

Mr. ALLEN. Mr. President, reserving the right to object, may I inquire when the committee amendment on the helicopter training will come back before the Senate?

The PRESIDING OFFICER. The Senator from Alabama is correct; the helicopter amendment is now before the Senate.

Mr. ROBERT C. BYRD. Yes; I was asking unanimous consent that we take 4 minutes for further debate on the Kennedy amendment, and vote on it, and then come back to the helicopter amendment.

The PRESIDING OFFICER. Is their objection?

Mr. McCLURE. Mr. President, reserving the right to object, has there been a unanimous-consent agreement on the Kennedy amendment?

The PRESIDING OFFICER. For 4 minutes of debate.

Mr. McCLURE. When was that agreement entered into, Mr. President?

Mr. ROBERT C. BYRD. Just now.

Mr. KENNEDY. The debate has already occurred.

The PRESIDING OFFICER. The Chair would like to state that the 4-minute agreement was reached earlier.

Mr. ROBERT C. BYRD. Oh, it was? I am sorry.

Mr. McCLURE. Mr. President, reserving the right to object, is this on the one relating to civilian ranges?

Mr. KENNEDY. That is right.

Mr. McCLURE. And the time agreement has already been agreed to on that?

Mr. STENNIS. Yes, it has.

The PRESIDING OFFICER. The half-hour of debate was had on it, and, by unanimous consent, 4 minutes of debate immediately preceding the vote was agreed to. Is there objection to proceeding with that amendment?

Mr. BELLMON. Mr. President, reserving the right to object, the Senator from Oklahoma had the floor; did he not?

The PRESIDING OFFICER. The Senator did not. The helicopter amendment is pending, and no other amendment can be offered except, of course, by unanimous consent.

Is there objection to proceeding with the Kennedy amendment?

Mr. DOMENICI. Mr. President, reserving the right to object, I was in the Chamber. I do not understand how the Senator from Oklahoma lost the floor. He was recognized, and the distinguished majority leader got the floor from him.

Mr. ROBERT C. BYRD. Oh, no, I did not receive it from him. The Senator from Alaska moved to reconsider the vote, and someone moved to table that motion, and the motion to table the motion to reconsider the vote on the Stevens amendment was agreed to. The floor was then open, and I sought recognition.

Mr. DOMENICI. I was here, and perhaps that happened, but I do remember the Senator from Oklahoma was recognized.

The PRESIDING OFFICER. The Senator's proposal was not in order. The Senator was recognized, but he wished to call up an amendment which was not in order at the time.

Mr. ROBERT C. BYRD. And then the developments transpired as I explained following that.

Mr. BELLMON. When will it be in order for the Senator from Oklahoma to call up his amendment?

The PRESIDING OFFICER. Will the Senator restate his question?

Mr. BELLMON. When will it be in order for the Senator from Oklahoma to call up his amendment?

The PRESIDING OFFICER. After the helicopter amendment and the pending amendment, and the other remaining committee amendment, are disposed of.

Mr. BELLMON. Is there an agreement to vote on the bill at 8 o'clock, Mr. President?

The PRESIDING OFFICER. There is an agreement to vote at 8 o'clock.

Mr. BELLMON. Would this preclude calling up other amendments?

Mr. ROBERT C. BYRD. No. The Senator can get recognized after the disposition of the helicopter amendment, and I will be glad to ask unanimous consent, if there is no objection, that after we finish the helicopter amendment the Senator from Oklahoma (Mr. BELLMON) be recognized.

Mr. STENNIS. Mr. President, I am not going to object, but we do have the agreement here on the Kennedy amendment, and time on this helicopter amendment, and I think we have to proceed now to dispose of those, and then take our chances on the matter of getting the floor. I am not trying to keep anyone from getting the floor.

The PRESIDING OFFICER. Is there objection to proceeding with the pending amendment at this time?

Mr. BELLMON. Mr. President, reserving the right to object, when will the Bellmon amendment be in order?

The PRESIDING OFFICER. As the Chair has stated, after the helicopter amendment and the last remaining committee amendment.

Mr. BELLMON. Mr. President, I ask unanimous consent that the Bellmon amendment be the order of business following the disposition of the committee amendment.

The PRESIDING OFFICER. Is there objection? The Chair hearing none, it is so ordered.

Mr. McCLURE. Mr. President, further reserving the right to object, would it be possible to get a brief extension of the time on the amendment of the Senator from Massachusetts? The Senator from Idaho was unaware that there had been any agreement entered into on that. I had requested, on our side of the aisle, that there be some reservation of time. In my absence on the Clean Air Conference, that time has been given away. I would like a few minutes to discuss that issue.

The PRESIDING OFFICER. The Chair informs the Senator from Idaho that time could be taken from the general time available on the bill.

Is there objection to proceeding with the pending amendment? Without objection, it is so ordered, and the clerk will state the amendment.

Mr. KENNEDY. Mr. President, as I understand, the amendment has already been stated. It has been reported, and there has already been debate on it. Now we have a 4-minute time limitation, 2 minutes to the Senator from Massachusetts and 2 minutes to the Senator from Mississippi.

Mr. President, I yield myself 1 minute and 45 seconds. May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

Mr. KENNEDY. Mr. President, this amendment is a very simple one. In the past 6 years, there has been a 350-percent increase in the amount of money which would be appropriated for ammunition and personnel to be available to the National Rifle Association for pistol and rifle competition. They support this proposal because they say it is a sport that needs further support.

Mr. President, no other appropriation provides any degree of support for any other sport, or any other competition. Moreover, this appropriation includes $50,000 for the support of Camp Perry, which has been supported by the National Rifle Association for the last 9 years.

I say that if the National Rifle Association wants this competition, if they want ammunition, then the American taxpayer should not have to pay for it. The National Rifle Association should pay for it. There is no reason why they should have the exclusive right, as provided by this legislation, to be the ones who are going to be supplied ammunition.

In 1966, there was a study by the Arthur D. Little Corp., which pointed out that only 3 percent of the members of the DCM ever go into the Army, and pointed out further that there is no correlation between the experience that they have received in terms of any firing or the utilization of any of this ammunition and their expertise in targeting.

Approximately 65 percent of the members of the National Rifle Association who are going to use this ammunition are too old to go into the Army, the Navy, or the Marine Corps in the first place. Basically, this is a subsidy for one particular narrow activity, which is a sporting activity. I say if we are going to be able to do this for firing or for shooting, we ought to be able to do it for baseball, we ought to do it for basketball, we ought to do it for boating, we ought to do it for all the other sports that affect the young people of this country. If we say we are not going to be involved in those, there is no justification for a 350-percent increase in the last 6 years.

Mr. STENNIS. Mr. President, there is some confusion here about the time. The Senator wants 5 minutes. I wonder if it is agreeable to everyone that the Senator from North Dakota yield to the Senator from Idaho on the bill.

Mr. KENNEDY. Mr. President, I am not going to object, but I was here to debate this earlier. If there is going to be additional time, I would like to have similar time for us.

Mr. STENNIS. The Senator would certainly be entitled to equal time.

Mr. President, I will just use the 2 minutes, if I may.

I will say to the Members of the Senate this is relatively a small amount for a nationwide promotion of this rifle practice. This is something which cannot be placed in a computer and then come out with a full answer about its influence. But over the years there are those of us who have observed that it certainly does have, according to what the military people and others tell us, an encouragement for the interest in the military, for the military life, the marksmanship, and all the things which go to make up promotion for youngsters particularly. That is the group in which I am interested.

There is no hint of any kind of abuse, or anything of that kind, in the way these moneys have been handled.

The late Senator Hayden in the old days was always the author of the amendment. He gave it almost a personal supervision. It is one of those things which grew as a tradition, as I see it. It has been put in from year to year under a very popular vote, when it came to a vote, in this body. With all deference, it has been taken as a matter of course. I judge that is the sentiment and the unanimous vote as far as I know in the committee for the sum of $365,000.

Mr. RIEGLE. Will the chairman yield at that point?

Mr. STENNIS. I yield.

Mr. RIEGLE. Was the Senator from Massachusetts correct when he said that two-thirds of the recipients of this program are beyond military age?

Mr. STENNIS. I do not know that percentage, but a good number of them are. It is not limited to the military age.

Mr. RIEGLE. I thank the chairman.

The PRESIDING OFFICER. The time of the chairman on the amendment has expired.

The following Senators requested and, by unanimous consent, the privilege of the floor was granted in behalf of the

following staff members: Mr. DOLE, Ernest Garcia; Mr. LEAHY, Douglas Racine; Mr. BARTLETT, Ron Lehman; Mr. CHAFEE, Ed Hawley.

Mr. McCLURE. Will the Senator from North Dakota yield 5 minutes on the bill?

Mr. YOUNG. I will yield.

Mr. STENNIS. And I will yield to the Senator from Massachusetts the same amount of time.

Mr. McCLURE. I thank the Senator.

I thank the manager of the bill and the Senator from North Dakota for making it possible for the Senator from Idaho to take part in this debate. Had I known of the timing of the offering of this amendment, I would have been in the Chamber and would have participated more fully in the dabate at that time.

I think there is a more fundamental issue involved in this amendment. It goes far beyond that question. It is an annual assault on the question of gun control. That is simply what it amounts to. Those who are in favor of gun control make this kind of an annual assault on the Office of Civilian Marksmanship.

I do not want to debate the issue on the basis of whether or not our Olympic shooters are capable or not. They are. They have participated through this program, and they have done remarkably well at the Olympics because of the participation in this program. But to suggest that this is simply a support for a sporting event ignores all of the past experience of what this program is all about.

I think if we look back we will find out that a great many of the people who participated in this program have served in the armed services. One of the reasons why our citizen soldier does as well as he does is because he has had some familiarity with firearms, many of whom gained it only and solely through this kind of a program.

One of the reasons they are familiar with firearms and able to conduct themselves as well as they do when they go into the service is because they have had some background and some training in gun safety, gun handling, and marksmanship. Certainly, if there is anything which contributes to the effectiveness of the infantry of this country, it lies in that kind of a preliminary training of thousands upon thousands of young people who would otherwise have no contact with firearms, but when they are called into the service of their country in time of crisis they already have this kind of background.

That is why it has had the support of the Military Establishment in years past. In spite of the criticisms of the program, the study by the Arthur D. Little Corp., in regard to the constant effectiveness of this program, finds it is indeed very cost-effective in terms of its results.

The question of whether or not the recipients of the money are young people who are able to serve in the armed services after they receive the money begs the question because, of course, a good many of the people who receive money directly are the people who are instructing the young people. The beneficiaries are not necessarily the same people who receive the money directly. They are instructors, the people who keep these gun clubs going, the people who keep this program going.

I think it would be a tragic error for us, under some kind of a mistaken idea of gun control, to come in here and abolish something which has had as much value as this has had over the years.

Unless I mistake the thrust of the amendment, it grows out of the urge to control firearms. I will say to the Members of this body that firearms are still essential to the armed services. We have not yet found a way to conduct wars without firearms, even though there has been a debate on the neutron bomb, which indicates it is somehow immoral to kill people with neutrons but it is not yet wrong to kill people with bullets. Wars are fought by people who kill other people. That is an unpleasant fact of life, but it is a fact of life.

If we are going to have adequately trained services, we are going to have to continue to have people who are familiar with the use of firearms.

It seems to me to be entirely wrong for us now, as we move to an all volunteer service, where we have done away with large portions of the vestiges of the idea of the citizen soldier, that we cut the last link, that we destroy the last link, between the concept of a citizenry that is somehow prepared to take up arms and defend his country by destroying one of the most effective programs that we have.

It has been scaled down under the pressure of the gun control lobby. We have done away with the Camp Perry matches, one of the most renowned international matches which was kind of the hallmark, the Olympic games, if you would, outside of the Olympic games, in marksmanship. We sacrificed it on the altar of gun control. Why? Are we talking about misuse of guns? Are we talking about the incidence of crime? Are we talking about the criminals using or misusing firearms? Are we talking about the incidence of crime on the streets?

No, we are just going to do away with it because somehow we are caught up in the emotions of antigun legislation, and that emotion is to be brought to bear now to destroy this program.

I think it would be a tragic mistake that will not be unnoticed by the gun fraternity of this country. If there is one thing we have learned, it is when the people of this country have the opportunity to speak on this issue, they are opposed to gun control, whether it be by referendum in Massachusetts or in the mail received by Members of Congress.

It is the antigun lobby which is well organized, well financed, and correlated in their activities here in Washington. But they are a minority of the people of this country.

I think it would be a massive mistake if we now adopt the amendment of the Senator from Massachusetts. I hope that, indeed, we shall not.

The PRESIDING OFFICER (Mr. RIEGLE). The Senator's 5 minutes have expired.

Mr. KENNEDY. Mr. President, just a response to the Senator from Idaho.

Irrespective of what one's position is on gun control, I wonder why the American taxpayer ought to be supporting this endeavor to the tune of $694,000. If the NRA wants to conduct rifle matches, if they want to purchase ammunition, why do they not go out and do it? Why should they be subscribed and underwritten by the American taxpayer?

If young children want to learn baseball, we do not, at this time, underwrite that game, If they want to play football or any of the other outdoor sports, all of which are enormously worthwhile and valuable. we do not say the American taxpayers are going to underwrite it. This is the one exception in this area, target practice.

If the NRA wants to conduct those matches, fine. There is nothing here to prohibit that. But the fact of the matter is that over 60 percent of those using the ammunition are never going to go into the military service.

The Senator from Idaho talks about cost effectiveness. Despite the fact that other people have asked for similar studies, there is only one study on it, only one, by Arthur D. Little. This is their conclusion, talking about this particular program:

> It is difficult to justify on a cost-benefit basis the investment made in teaching riflemen how to shoot under this program.

That is the cost-effective study. It is not just a casual comment of a Member of the Senate. That is the basis of the only study that has been done.

I would welcome a study being done. I asked to see if we could not get a study done.

The fact remains that only 3 percent of the people who go into the Armed Forces have been members of the programs under the DCM. There has been no study done to find out whether those members have gone into the combat area or whether it has improved their marksmanship. There would be no justification of this support based on the information or testimony that we have here.

The Senator from Idaho talks about what happened at Camp Perry. He said we discontinued Camp Perry in terms of the report. We did it for 9 years. The NRA underwrote it for 9 years and had the rifle matches out there for 9 years. However, not for the 10th year. The American taxpayer is being asked, under this appropriation legislation, to underwrite Camp Perry for $50,000. They are beginning to creep in again. I ask the chairman of the Armed Services Committee or any member of the Appropriations Committee if there is any other single program that has been increased by 22 percent, which is the increase this year? Three hundred sixty-five over the last 5 years, 22 percent for this year.

We can say, this is not a big amount of money, $694,000. It happens to be just about what the State of Massachusetts gets for the meals-on-wheels program. That happens to be 2 million meals for elderly people in this country.

Two million meals. I wonder how many States have received those kinds of re-

sources. Our State, under the formula, received that. That is what we are talking about in terms of dimension.

Let them go out and justify the program. Let them have their target practice. Let them be able to purchase the ammunition. Let them move ahead. There is nothing in the amendment of the Senator from Massachusetts that would prevent that. But do not ask the American taxpayer, on the one specific area of target shooting, to underwrite that activity, when they have not been and appear not to be willing to underwrite any of the other activities that can benefit young boys and girls in learning how to live and enjoy their lives.

Mr. President, I yield back the remainder of my time.

Mr. STENNIS. I yield back the time I have.

The PRESIDING OFFICER. The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE) and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I also announce that the Senator from Maryland (Mr. MATHIAS) is absent on official business.

I further announce that, if present and voting, the Senator from Wyoming (Mr. WALLOP) and the Senator from New Jersey (Mr. CASE) would each vote "nay."

The result was announced—yeas 15, nays 82, as follows:

[Rollcall Vote No. 303 Leg.]

YEAS—15

Abourezk	Hathaway	Moynihan

NOT VOTING—3

Case	Mathias	Wallop

So Mr. KENNEDY's amendment was rejected.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MCCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Senators will please cease conversations, so that we can resume consideration of the pending committee amendment.

THIRD REMAINING COMMITTEE AMENDMENT—UP AMENDMENT NO. 682

Mr. STENNIS. Mr. President, to carry out the avowed purpose to vote on this bill, on final passage, by 8 o'clock, we will have to move along. The agreement is to return to the consideration of the helicopter amendment, which has been debated by each side.

The PRESIDING OFFICER. The Chair advises the Senator that he has 45 minutes remaining on the helicopter amendment. The Senator from Alabama (Mr. ALLEN) has 40 minutes remaining.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. STENNIS. I yield to the Senator from Alabama, on my time.

Mr. ALLEN. I do not believe, in view of the interruptions we have had on this amendment, that it would be well at this time to shorten the time. So let us proceed. Possibly, before all the time has been used up, we might be able to go ahead with the motion. I believe that, for the time being, we had better reserve our time.

I now yield 5 minutes to my distinguished senior colleague.

Mr. STENNIS. Mr. President, what is the remaining time now, and is there any other understanding?

The PRESIDING OFFICER. The Chair advises the Senator from Mississippi that he has 44 minutes remaining on this amendment, and Senator ALLEN has 40 minutes remaining.

Mr. STENNIS. I thank the Chair.

Mr. ALLEN. I yield to the distinguished Senator from Alabama (Mr. SPARKMAN).

The PRESIDING OFFICER. The Senate will be in order, so that the Senator can be heard.

Mr. SPARKMAN. Mr. President, my colleague has been on the floor all the time and has been engaged in debate. I am sorry that a conference committee has kept me from the floor during a good part of the debate.

In looking over the record of dealing with the problem of the proposed consolidation of helicopter pilot training at Fort Rucker, Ala., I have been amazed how many times it has been recommended by those one would expect to be respected in those recommendations.

Knowing Senator STENNIS as I do, I could hardly believe that he was turning aside from what the Defense Department recommended and from the expense involved in it.

The Defense Department had something to say about the amount of money that would be saved by this consolidation, and the General Accounting Office suggested that the amount that the Defense Department has come up with, it was believed, would not make up the expense, that it would be much more than that. I have seen figures used here over a few years that suggested that $90 million would be the cost of this, over what the other program would be.

President Carter has carried forward in his budget for this year the amount necessary, or at least a program for consolidating the training at Fort Rucker. It has been acted upon many times. I cannot see the logic of not going through with what the Defense Department has urged and what the General Accounting Office has said would be a much lower figure than anticipated. The training has been going on there for years.

A lot has been said about landing on carriers, but these are land-based machines. Those who do need to land on carriers certainly do it. The two places are near enough together so that it could be done, and there would be no sacrifice so far as adquate defense with helicopters is concerned.

I hope very much that this matter will be considered very carefully. As I recall, there was a vote in the House of Representatives that amounted to more than 2 to 1 when this matter came up, and it has been favored many times in many different ways. I hope that the amendment offered by my colleague, of which I am a cosponsor, will prevail, to save money for the Government and get a program that has been recommended by the Government—the President, the Department of Defense, and all others connected with it.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. ALLEN. I yield the Senator an additional 3 minutes.

Mr. SPARKMAN. I have been interested in looking over the testimony with respect to this matter and looking over the fact sheets that have been available. I believe the facts definitely are in favor of the consolidation, and I earnestly hope that the proposal will be approved by the Senate. I wish the Senator from Mississippi could accept it. It seems to me that his whole nature would be for it.

But he is unable to do it, and I earnestly hope the Senators here will recognize the real facts regarding it and will support the amendment.

Mr. ALLEN. Mr. President, I yield myself 15 minutes.

The PRESIDING OFFICER. The Senator from Alabama is recognized for 15 minutes on his own time.

Mr. ALLEN. Mr. President, what the Senate has before it at this time is a committee amendment that goes contrary to the recommendations of the administration, contrary to the Secretary of the Navy, the Chief of Naval Operations, the Commandant of the the Marine Corps, and the Secretary of the Army.

The amendment of the committee seeks to prevent the administration from carrying out a program to consolidate undergraduate helicopter pilot training under one head.

Mr. President, we hear a lot of criticism of the Department of Defense, often strongly criticized by Congress for alleged wastefulness. But here we have the Department of Defense recommending a consolidation that will result in a savings of some $103 million over a 5-year period.

The Defense Department had a study in which they suggested that the sav-

ings would amount to some $13 million a year. The GAO made a study and they recommended the consolidation, and they said the $13 million was not sufficient; that was not the amount of saving, that the saving should be $9 million more.

I have the report of the GAO here and the study of the Defense Department, excerpts, and I will at the proper time ask that they be included in the record.

We hear so much about the defense budget, the Pentagon budget, as being loaded with fat and that we should eliminate some of the fat. Then the Defense Department comes in with a recommendation that they say will result in a saving of $100 million over a 5-year period and, according to the Secretary of the Navy, will give equal or more efficiency in the operation of this program. Yet the Senate committee says to the Defense Department in this amendment that we are opposing, "You cannot carry out this plan. We do not want you to do it. Yes, there is a big saving here, but we do not want you to make this saving."

Another thing occurs to me, Mr. President: It was pointed out there has been a change from this program of last year, and some statements were made here on the floor that if they would just prove there is going to be a saving "We would be for this consolidation." But the Defense Department study shows a tremendous saving, the GAO says what the Defense Department found is not the full saving; that it is $9 million a year more, after the Defense Department said $13 million saving, so how can Senators now say it has not been proved that a saving will result?

Members sometimes berate the Department of Defense for lack of foresight, lack of businesslike management, lack of initiative in searching and eliminating practices that waste the taxpayers' money, and some comment was made that last year the Secretary of the Navy did not give full support to this consolidation.

But the present Secretary of the Navy, as is indicated by a letter to me, which I will introduce, is 100 percent for the program and, in fact, has contacted a number of Senators in this regard.

The Secretary of the Navy is the Honorable W. Graham Claytor, Jr. He comes to the Navy from the presidency of the Southern Railway System, one of the few moneymakers among railroads in the country. He operated one of the best-managed railroads in the entire country; so well operated and so well in the black that it is, I believe, the only railroad in the country that kept its passenger line, its trunkline, from New Orleans to Washington, and able to have that as a loss leader.

But he recognizes the benefits to be obtained by this consolidation, and he supports the consolidation.

So it came as a shock and a surprise to me when, faced with a proposal by the Department of Defense to save money while strengthening national security, some Senators stand in opposition. Perhaps their opposition is because they do not fully understand the merits of the proposal.

What is the proposal? The Department of Defense proposes to consolidate all Defense helicopter pilot basic training. Mr. President, I underscore the word "basic" because after this basic training program of all the services then they would go for specialized training in the service to which they belong. So this argument about the Army helicopter training not being the type of training that a naval pilot might want certainly has no merit because after this basic training they will be able to go to the specialized training with which the service of which they are members is concerned.

You might say even if the consolidation does take place there, at the point where the consolidation is made they would have Navy and Marine instructors. So there is no reason for saying they cannot get the same or better pilot training at the new installation.

The Department of Defense proposes to consolidate all defense helicopter pilot basic training into a single program, making possible the elimination of the separate program now conducted by the Navy. This action will save at least $90 million over the next 5 years; partly because training aircraft which the Navy would need to continue its separate program would not have to be bought, but mainly because of the fact that a single integrated training program is cheaper than two programs.

At the present time, I might say, parenthetically, Mr. President, there has been a factsheet and letter distributed here by advocates of the amendment; that is, opponents of the consolidation. We also have a factsheet. I might be able to read some of the excerpts from it, but it refutes every single so-called fact in the factsheet that has been distributed to Senators.

I will, at the proper time, offer for the RECORD a copy of this factsheet which does show the inaccuracies in the fact sheet that has been presented by the opponents of consolidation.

Mr. SPARKMAN. Mr. President, will the Senator yield for one question?

Mr. ALLEN. Yes, sir.

Mr. SPARKMAN. Is it not true that last year in the conference report it was recommended that there be a report——

Mr. ALLEN. Yes, sir.

Mr. SPARKMAN. A study and a report?

Mr. ALLEN. Yes, sir.

Mr. SPARKMAN. And that study was made?

Mr. ALLEN. That study was made.

Mr. SPARKMAN. And the report was made?

Mr. ALLEN. And the report was made.

Mr. SPARKMAN. And the report recommended the consolidation?

Mr. ALLEN. It certainly did.

Mr. SPARKMAN. It was the committee that asked for the report?

Mr. ALLEN. Yes, sir.

Mr. SPARKMAN. In order to give them guidance?

Mr. ALLEN. Yes, sir; and the report was given to them, and I assume they studied it.

Mr. SPARKMAN. But they are reluctant to be guided by it.

Mr. ALLEN. It seems that is the case, I will say to the distinguished Senator. Not only did the Department of Defense make the study and a report, but the GAO made a study, and it, too, recommends the consolidation.

I thank the distinguished Senator for his helpful remarks.

Mr. President, there are two separate undergraduate helicopter training programs sponsored by the DOD. Army and Air Force helicopter pilots are training at Fort Rucker, Ala., while Navy, Marine Corps, and Coast Guard helicopter pilots are training less than an hour away at Pensacola, Fla.

Some critics of this consolidation proposal contend that these savings are ephemeral, that they will never be realized. But who can vouch for this estimate of savings? The Army, which must do the training with the allotted resources, says that the savings are valid. The Navy, which would have to give up most of the resources, says that the savings are valid. Furthermore, the General Accounting Office has reviewed the resource implications of the consolidation proposal in detail and has reported to the Congress that the savings are even greater than the $90 million estimated by the Department of Defense.

One suggestion made by the distinguished Senator from Arizona (Mr. GOLDWATER) was that some Senators fear that this consolidation might inspire overconsolidation, and for that reason they are going to oppose this, thinking that they might be next.

Nothing could be further from the truth, and I call attention to this report from the Defense Department at this time on item 6 of this report.

IMPLICATIONS FOR FUTURE CONSOLIDATION

The letter by the proponents of the amendment, the opponents of consolidation, alleges that testimony at House hearings suggest that further flight training consolidations are being planned.

In fact, the Deputy Secretary of Defense testified that no flight training consolidations other than UHPT—universal helicopter pilot training were under consideration.

He has since further stated that he cannot envision a situation where naval jet fighter attached undergraduate pilot training would be consolidated with Air Force training.

So I say to some of the Senators who fear other consolidations might affect bases in their States do not worry about this amendment; just act in the interests of national security and in the interests of fiscal responsibility, and there is no penalty going to attach to installations in their States.

During consideration of the military appropriations bill last year, the Senate did not go along with a House-approved plan to consolidate all military undergraduate helicopter pilot training at Fort Rucker, Ala.

And this year they again approved the consolidation by a vote of 333 to 54. I am hopeful, even if we are not successful in killing this amendment, that the results of the conference will be this time to accede to the House position inasmuch

as they voted this way, the Pentagon has complied with the suggestion and the requests of the proponents of the amendment, that is the opponents of the consolidation, and have had the study made, had two studies made, one by the Defense Department and one by the GAO. Both of them show millions of dollars of savings each year. So I think now is the time to go along with the Defense Department in this area.

They are the ones charged with training these pilots. They say that they do a better job at less money through the consolidation and why should the Senate stand in the way for some local consideration, some provincial consideration rather than consideration of what is best for the national good.

The Congressional Committee of Conference on DOD appropriations directed the Department of Defense to make further detailed studies of the proposal and to submit a report by April 15, 1977.

This report, which was submitted as directed, confirms the significant dollar and manpower savings that had been projected, and also reconfirms DOD studies demonstrating that this consolidated training program would provide improved training for all of our military helicopter pilots in the basic program.

On May 5, 1977, the Comptroller General of the United States submitted a letter to the chairmen of the Senate and House Committees on Armed Services, and to the chairmen of the Senate and House Committees on Appropriations citing the DOD report as "conservative." He said that in his judgment savings of $23 million or more annually can be achieved through this proposed consolidation.

Some critics of consolidation will tell you that helicopter pilots of the other services will not be adequately trained in a program conducted by the Army. This simply is not so. What does the Air Force say? The Army has been training Air Force undergraduate helicopter pilots for the past 7 years and responsible Air Force officials have repeatedly stated that they are completely satisfied with the quality of training. What about the Navy and Marine Corps? The Secretary of the Navy, the chief of Naval Operations, and the commandant of the Marine Corps have all stated that the consolidated program, as now planned, would completely satisfy Navy and Marine Corps undergraduate helicopter pilot training requirements.

Under the DOD proposal, which has been studied and approved by a task group of the Interservice Training Review Organization composed mostly of military aviators, Navy and Marine Corps instructors would join Army and Air Force instructors in the consolidated undergraduate program at Fort Rucker. After basic training, Navy and Marine Corps helicopter pilots would go on to advanced service-oriented helicopter training, as is presently the case with the Air Force and Coast Guard.

A comparison of the present training that Navy and Marine Corps student pilots get with the training that they would get in the consolidated program clearly shows that they will get better training as helicopter pilots in the consolidated program than they get now. Consider the additional training they will get:

More total flying hours.

Almost twice as many helicopter flying hours.

Twice as many training hours in helicopter simulators.

Some concern has been expressed that the Navy and Marine Corps missions, which involve flight over water and shipboard landings, are different from those of the other services, and that these unique requirements will not be met in a consolidated program. Let us strip away the rhetoric about the hazards of maritime flying and look at the facts. First, the current Navy program provides very little exclusively maritime training. The program turns out basically trained helicopters pilots, not pilots skilled in antisubmarine warfare or amphibious landing techniques. These mission-oriented skills are learned in advanced flight training conducted by each service. The consolidation of helicopter pilot basic training will not affect these advanced training programs. Second, about 25 percent of the training in the consolidated program will be reserved for service-unique training. The Navy and Marine Corps can each specify the types of training which will be given in these segments, and Navy and Marine Corps military instructor pilots will conduct the training of their own students. Navy students, for example, can fly to Pensacola—only about an hour's helicopter flying time—and get at least as much carrier landing practice as they get now. It is clear that Navy and Marine Corps graduates will be much better helicopter pilots than the graduates the Navy now produces, and that they will be at least as well prepared—and probably better prepared—to enter their services' advanced flight training programs.

These are the facts, and the choice is clear. We can approve consolidation of undergraduate helicopter pilot training, save the taxpayers $90 million or more, and produce better-trained helicopter pilots than the Navy produces now. Or we can choose the route of waste and inefficiency, continue to have two programs at substantially higher cost, and get, for this added cost, Navy and Marine Corps helicopter pilots who are not as well trained as they could be.

On June 30, 1977, by a vote of 333 yeas to 54 nays, the House of Representatives once again gave its overwhelming support to the proposed consolidation of helicopter pilot basic training.

The Appropriations Committee, however, is offering an amendment to kill this cost-savings proposal.

We believe that to deny this consolidation is to fly in the face of reality. We believe that it is in the best interest of national defense for Congress to provide the finest possible training for our military helicopter pilots. We believe that the American taxpayers deserve a break, and this improved training is possible while saving millions of dollars.

Colleague support is vital to bring about this improvement in training with its associated savings.

Mr. President, I ask unanimous consent that certain papers, to which I shall allude, be printed in the RECORD.

First, a "Dear Colleague" letter written by Mr. SPARKMAN, Mr. GOLDWATER, Mr. PROXMIRE, and myself; a letter dated June 10, 1977, from the Honorable W. Graham Claytor, Jr., Secretary of the Navy, in which he strongly supports the consolidation; then a statement of Secretary Claytor before the Defense Subcommittee of the House Appropriations Committee on June 7, 1977, in which he strongly supported the consolidation and interpreting it to the matter at hand in opposition to the Senate committee amendment that we are seeking to defeat; and then a copy of the GAO letter of May 5, 1977, to Hon. MELVIN PRICE, giving the result of the GAO study.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.
July 12, 1977.

DEAR COLLEAGUE: Your strong support is needed to help ensure the best possible undergraduate training for our military helicapter pilots and, at the same time, to help provide the American taxpayers a much-needed savings of some $23 million a year.

At the present time there are two separate undergraduate helicopter training programs sponsored by DOD: Army and Air Force pilots are training at Fort Rucker, Alabama, while Navy, Marine Corps and Coast Guard pilots are training less than an hour away at Pensacola, Florida.

During consideration of the military appropriations bill last year, the Senate did not go along with a House-approved plan to consolidate all military undergraduate helicopter pilot training at Fort Rucker, Alabama. Instead, the Congressional Committee of Conference on DOD appropriations directed the Department of Defense to make further detailed studies of the proposal and to submit a report by April 15, 1977.

This report, which was submitted as directed, confirms the significant dollar and manpower savings that had been projected, and also reconfirms DOD studies demonstrating that this consolidated training program would provide improved training for all of our military helicopter pilots in the basic program.

On May 5, 1977, the Comptroller General of the United States submitted a letter to the Chairmen of the Senate and House Committees on Armed Services, and to the Chairmen of the Senate and House Committees on Appropriations citing the DOD report as "conservative". He said that in his judgment savings of $23 million or more annually can be achieved through this proposed consolidation.

Under the DOD proposal, which has been studied and approved by a task group of the Interservice Training Review Organization composed mostly of military aviators, Navy and Marine Corps instructors would join Army and Air Force instructors in the consolidated undergraduate program at Fort Rucker. After basic training, Navy and Marine Corps helicopter pilots would go on to advanced service-oriented helicopter training, as is presently the case with the Air Force and Coast Guard.

On June 30, 1977, by a vote of 333 yeas to 54 nays, the House of Representatives once again gave its overwhelming support to the proposed consolidation of helicopter pilot basic training.

The Senate Appropriations Committee, however, is offering an amendment to kill this cost-savings proposal.

We believe that to deny this consolidation is to fly in the face of reality. We believe that it is in the best interest of National Defense for Congress to provide the finest possible training for our military helicopter pilots. We believe that the American taxpayers deserve a break, and this improved training is possible while saving millions of dollars.

This proposal will soon be the business of the Senate as it considers the 1978 appropriations bill for the Department of Defense.

We are attaching a copy of the Comptroller General's letter to the Chairmen of the Committees on Armed Services and Appropriations, detailing his independent findings which support the requested consolidation.

Also attached is a copy of a letter from Secretary of the Navy Claytor to Senator Allen, reaffirming the Navy's support for the consolidation.

Your support is vital to bring about this improvement in training with its associated savings.

Sincerely,

JOHN SPARKMAN,
WILLIAM PROXMIRE,
BARRY GOLDWATER,
JAMES B. ALLEN,
U.S. Senators.

WASHINGTON, D.C.,
June 10, 1977.

Hon. JAMES B. ALLEN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR ALLEN: In response to your letter of June 8, I'd like to confirm my support for the consolidation of undergraduate helicopter pilot training under the Army at Fort Rucker.

In my view, there are two primary reasons which form the basis for this decision to consolidate helicopter training. First, the training that will be provided for our Navy and Marine Corps student helicopter pilots under this program is planned to be equivalent to or better than that which they currently receive. Secondly, an expected savings of at least $90 million over the next five years has been identified and essentially corroborated by Navy and Defense Department Comptrollers, as well as by the General Accounting Office.

I have taken the liberty of enclosing a copy of my prepared statement which provides some additional detail. If further information is desired, please let me know.

I appreciate the opportunity to express my support of this consolidation program.

Sincerely,

W. GRAHAM CLAYTOR, JR.

STATEMENT OF W. GRAHAM CLAYTOR, JR., ON CONSOLIDATION OF UNDERGRADUATE HELICOPTER PILOT TRAINING BEFORE THE DEFENSE SUBCOMMITTEE, HOUSE APPROPRIATIONS COMMITTEE, JUNE 7, 1977

Mr. Chairman and Members of the Subcommittee: It is a privilege for me to testify today before this Subcommittee and to present the Department of the Navy's view on the proposal to consolidate undergraduate helicopter pilot training. I welcome this opportunity to clarify the Department of the Navy's position, to provide the rationale for this position and then to respond to any questions you may have. We have with us today the Chief of Naval Operations and, in the Commandant's absence from the country, the Assistant Commandant of the Marine Corps, in the event their specific views can be of assistance.

In my view, there are two fundamental prerequisites to a decision to consolidate. First, the planned training must be generally equivalent to or better than that currently being received, and, secondly, there must be a worthwhile savings or cost avoidance resulting from the consolidation. As I view it, both of these conditions have been satisfied in the current proposal.

In the process of examining the consolidation proposal and the alternatives, conflicting opinions and varying interpretations of supporting data surfaced. A careful and independent review of the cost data, which is pivotal in this decision, was made at my request by the Navy and OSD Comptrollers, who had had no part in the initial preparation of these data. This review essentially resolved previous costing differences between the Navy and OSD staffs. As documented in the study report to the Congress, the Department of the Navy concurs that the proposed consolidation of helicopter training will permit a cost avoidance of just over $100M over the next five years if the "175/140" syllabus is used. The Navy Department would prefer a slightly expanded syllabus of 195 flying hours and 50 simulator hours in order to make sure that our helicopter pilots are adequately trained for their specialized Navy and Marine Corps assignments; if this expanded syllabus is adopted, the five year savings would be about $90M.

With regard to the quality of training, the program now being developed will be based on the core of the Army's syllabus. However, a separate, Service-unique segment is also included which will provide a series of special flights oriented to maritime missions and Navy/Marine Corps tactics. Additionally, I would point out that Navy and Marine Corps pilots will do the actual instructing for essentially all phases of flight training for our student aviators except the primary, introductory period. By augmenting the Army syllabus in these ways, the resulting program will have the potential of producing a graduate helicopter pilot of the same, or even better, quality than the curricula now being used to meet Navy and Marine Corps requirements.

Follow-on fixed-wing training will be provided for those relatively few pilots requiring it after their career decision points—after completion of their initial service obligation at about the five-year point. In the case of the Marine Corps, it is recognized that initial fixed-wing training, as currently provided in the Navy's program, has a certain overall value, particularly in view of the Commandant's feeling regarding his unique requirements. However, after considering these alternatives, it is our position that fixed-wing training is not a prerequisite to training a basic helicopter pilot.

In summary after careful consideration of all of the factors, we in the Department of the Navy support the proposal to consolidate helicopter training with the Army at Fort Rucker. The significant cost avoidance in Defense resources with consolidation, together with the expected preservation of quality of training, indicate consolidation to be the best course of action.

WASHINGTON, D.C.,
May 5, 1977.

Hon. MELVIN PRICE,
Chairman, Committee on Armed Services,
House of Representatives.

DEAR MR. CHAIRMAN: We reviewed the Department of Defense study of undergraduate helicopter pilot-training consolidation submitted to the Congress on April 29, 1977. The study concluded that consolidation of the separate Army and Navy programs was feasible and that large savings could be realized. We believe that the claimed savings of $13.8 million or more annually are conservative because they do not include reductions in (1) future retirement costs of both military and civilian personnel no longer needed, (2) future veterans benefits for those military personnel, and (3) base operating costs for the Pensacola Naval Air Station, Pensacola, Florida. We estimate that these items would be additional savings of as much as $9.2 million annually. We discussed this report with Defense officials, and they agreed with our findings. We believe that the Congress should approve the recommended consolidation of helicopter pilot training.

BACKGROUND

In our May 1974 report entitled "Need To Assess Potential for Consolidating Undergraduate Helicopter Pilot Training," we recommended that the Secretary of Defense consider consolidating undergraduate helicopter pilot training at one site under a joint, all-helicopter program. In response, Defense asked the Interservice Training Review Organization to study the potential for consolidating this training. The Organization concluded that consolidation of the separate Army and Navy programs was feasible and that large savings would result.

Defense proposed consolidation of helicopter pilot training in the fiscal year 1977 President's budget. The conferees on the Defense Appropriations Bill did not approve consolidation but directed Defense to make a study which would more clearly document the savings and address the concerns regarding the training syllabus.

SAVINGS FROM CONSOLIDATION

As a starting point to assess savings, the Defense study used the Army's estimate of costs to assume Navy's training loads and the Navy's budget estimate for conducting a separate program during fiscal year 1978. Adjustments were made to both Army and Navy estimates to derive the net savings from consolidation. Some of the larger changes which are described in more detail in the study report included:

Adjustments to Army costs for (1) additional support personnel, (2) additional flying hours, and (3) modifying Navy helicopters to the same configuration as Army aircraft.

Adjustments to Navy costs for (1) base operations, (2) phaseout of training, (3) changes in student loads, (4) changes in mix of training aircraft, (5) depot-level aircraft rework, and (6) reductions in support personnel.

After adjustments, the estimated costs and savings, by fiscal year, follow:

[In millions of dollars]

	1978	1979	1980	1981	1982	Cumulative 1978–82
Reduction in Navy costs	33.6	[1] 67.7	41.8	40.4	39.3	222.8
Increased Army costs	19.8	24.8	24.8	24.8	24.8	119.0
Net savings	13.8	42.9	17.0	15.6	14.5	103.8

[1] Includes $23,000,000 for procurement of T–34 aircraft which would be avoided.

We traced Defense's cost estimates to the source documents provided by the services and verified the accuracy of the computations. We did not verify the accuracy of each service's cost estimate but believe that the estimates represent the best available data since their budgets for the program are based on this data. We believe that, except for the items discussed below, the study presents a fair assessment of the savings that can be achieved by consolidation.

Future retirement costs and veterans benefits

Since the study addressed only current costs, it did not consider savings from reductions in future retirement costs and veterans benefits. The consolidated program would eventually result in reductions of 1,918 Navy and Marine Corps military personnel and 268 civilian employees. Although the military spaces no longer needed in this program were used by the Navy partly to satisfy personnel required to man its new ships, it is appropriate to consider these as savings because the Navy's total personnel authorizations would have to be increased accordingly if the consolidation is not approved. We estimated the unfunded retirement cost for these personnel based on factors which represent the discounted present value of expected future retirement benefit currently accruing to active duty military personnel and civilian employees. These costs would amount to $5.8 million annually.

Likewise, the reduction in military personnel will result in savings due to lower costs for veterans benefits in the future. We could not estimate the current value of these reduced benefits.

Operating costs for Pensacola Naval Air Station

The Navy estimated that the total base operating costs for the Pensacola Naval Air Station were $21,259,000 of which the Navy allocated $5,166,000 to undergraduate helicopter pilot training. Because of uncertainties as to the extent of reductions in functions at that location and to assure that estimated savings were conservative, Defense did not consider these costs in its study.

On the basis of the Navy's claim that these costs are directly related to this program, we believe it would be appropriate to consider any reduction in such costs from consolidation as an additional savings. Using Navy's estimate that two-thirds of base operating costs are variable, additional savings of as much as $3,444,000 would be realized annually if all functions related to undergraduate helicopter pilot training are phased out.

Potential for additional savings from base realinements

The Defense study did not include savings from base realinements made possible by this consolidation. The Navy is studying alternative basing alinements and has proposed other alternatives for further study. Since final decisions on basing could not be made before these studies were completed, savings resulting from base releases were not considered.

The transfer of helicopter pilot-training loads to the Army will leave the Navy with substantial excess capacity at the seven bases involved in pilot training. It appears that, considering future training loads, one and possibly two bases may no longer be needed as training installations but could be converted to naval air facilities for use as outlying fields in support of jet and prop pilot training. Converting these bases would result in large savings.

TRAINING SYLLABUS CONCERNS

The two major concerns about the adequacy of the training syllabus follow.

Navy and Marine Corps students need more instrument instruction than provided in Army's syllabus.

Navy and Marine Corps students should be trained in a maritime environment.

Concerning instrument training, the study concluded that (1) the Army's syllabus provided more rotary-wing instrument flying hours and simulator time than the Navy's program and (2) it was expected that from 25 to 30 flying hours would be available in the service-unique portion of the consolidated training syllabus which could be used to provide additional instrument instruction.

The study concluded that a relatively minor part of the Navy's training was related to a maritime environment. Navy's syllabus provides for 48 minutes' flying time for field carrier-landing practice which is conducted over land and only 42 minutes' flying time for carrier qualification which is conducted over water. In the past, the Navy waived the latter training when a carrier was not available, such as during major overhaul.

CONCLUSIONS AND RECOMMENDATION

We believe that the Defense study demonstrates once again the feasibility and desirability of consolidating helicopter pilot training. Savings of $23 million or more annually can be achieved. In our opinion, the training syllabus can be tailored to meet Navy and Marine Corps needs.

We recommend that the Congress approve the proposed consolidation of helicopter pilot training.

We are also sending this report today to the Chairman, Senate Committee on Armed Services, and to the Chairmen, House and Senate Committees on Appropriations. We are sending copies to the Director, Office of Management and Budget, and to the Secretary of Defense.

Sincerely yours,

LEWIS B. STAATS,
Comptroller General of the United States.

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. ALLEN. Mr. President, I yield myself additional time.

The PRESIDING OFFICER. The Senator is recognized for an additional 5 minutes.

Mr. ALLEN. Mr. President, I ask unanimous consent to print in the RECORD a paper entitled "Undergraduate Helicopter Pilot Training Consolidation;" then a letter from Mr. Claytor to Mr. PROXMIRE; a letter from Gen. Lewis H. Wilson, commandant of the Marine Corps, to Mr. PROXMIRE in which he supports the consolidation; a letter from the Chief of Naval Operations, Admiral Holloway to Mr. PROXMIRE; and then a letter from the Deputy Secretary of Defense to Senator MCCLELLAN; also a letter from Mr. Duncan to Mr. PROXMIRE; and then, a summary of the findings of the Department of Defense study.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNDERGRADUATE HELICOPTER PILOT TRAINING—UHPT—CONSOLIDATION

BACKGROUND

DOD presently has two UHPT programs:

Army program at Ft. Rucker, Alabama using all-helicopter syllabus for training Army/USAF pilots.

Navy program at Whiting Field, Florida using part fixed-wing and part helicopter syllabus for training Navy/USMC/Coast Guard pilots.

Consolidation has been urged by Congress, GAO and OSD.

Consolidation was proposed in the FY–77 Budget.

Congress deferred FY–77 consolidation and directed a detailed study on subject be submitted by 15 April 1977.

Consolidation was included in the President's FY–78 Budget.

DISCUSSION

OSD study approved and forwarded to Congress by DEPSECDEF in April 1977.

Study concluded UHPT consolidation with Army at Ft. Rucker is the most cost-effective alternative. Savings/benefits identified in Study were:

$13.8M in FY–78.

$103.8M cumulative FY 78–82.

DOD manpower reduction of 1,917 military, 276 civilian in FY–78 and subsequent.

Better utilization of facilites at Ft. Rucker.

Training of no less quality.

Carries out intent of Congress (eliminates costly duplication in training activities).

ISSUES/ANSWERS

Cost. Previous differences between Navy and OSD regarding cost savings have been essentially resolved.

Independent review of costing data by Navy Comptrollers concurs that consolidation permits a cost avoidance of $99.2M with the 175 flight hours/40 simulators hours syllabus.

Difference of $4.6M between Navy and OSD estimates results from Navy desire to use Service instructors vice contractors during instrument phase of training.

Syllabus. Navy had requested an expanded syllabus of 195 flying hours and 50 simulator hours to provide additional instrument and service unique training.

Expanded syllabus will reduce five year savings to about $90M.

DEPSECDEF memo of 16 June 1977 approved the 195/50 syllabus for Navy/USMC students.

Initial Fixed Wing Training. Although desirable to meet USMC unique requirements, initial fixed wing training is not a prerequisite to training a basic helicopter pilot.

Follow-on fixed wing training will be provided for those pilots (40% USMC/15% USN) requiring it after completion of their initial service obligation.

Funding to accomplish this has been included.

DEPARTMENT OF THE NAVY POSITION

Navy supports UHPT consolidation at Ft. Rucker.

A significant cost avoidance will result from consolidation.

The proposed 195/50 syllabus should provide training which is equivalent or better than that currently being received.

OTHER SERVICE POSITIONS

Army fully supports and has indicated capability to accomplish desired training.

Air Force (50 students per year) supports consolidation which it has utilized since 1970.

Coast Guard accepts consolidation (about 20 students per year).

CONGRESSIONAL ACTIONS ON FY–78 BUDGET

Consolidation approved by full House, on floor 6/24/77.

SAC recommends against consolidation (17 to 8 vote).

WASHINGTON, D.C., *July 15, 1977.*

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: In response to your request, I'd like to confirm, in no uncertain terms, the Department of the Navy's support for the consolidation of undergraduate helicopter pilot training with the Army at Fort Rucker, Alabama.

I would emphasize two fundamental factors underlying the decision to consolidate helicopter training. First, quality of training will be maintained or improved. To assure the complete adequacy of the consolidated syllabus, the Department of Defense has recently approved our request for an additional 20 flight hours and 10 simulator hours to provide increased instrument and maritime training for our unique Service requirements.

The other key factor in this decision is the expected savings of at least $90 million over the next five years. A careful and independent review of costing data associated with consolidation, made at my request by Navy and Defense Department Comptrollers, confirmed the amount of the savings. Furthermore, the General Accounting Office reviewed both the feasibility of consolidation and the anticipated savings and found the estimates to be conservative and recommended that Congress approve consolidation.

I know you will agree that we must make every effort to ensure the efficient use of defense dollars. In my view, the consolidation of helicopter pilot training is that type of action.

I appreciate the opportunity to express my support for this consolidation plan.

Sincerely,

W. GRAHAM CLAYTOR, Jr.,
Secretary of the Navy.

WASHINGTON, D.C., *July 15, 1977.*

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: I welcome the opportunity to respond to your request of 14 July 1977 for my official position with regard to the proposed consolidation of undergraduate helicopter pilot training. Of course, Marine Corps support for the program is predicated on its ability to satisfy our unique requirements.

The consolidated undergraduate helicopter program has been proposed primarily on the basis of its cost effectiveness. Since no Marine Corps funds are allocated to undergraduate flight training programs, any considerations concerning cost are left to the United States Navy to determine. However, if a program is cost effective and fulfills our unique requirements I will support the program.

Initially, Marine Corps opposition to the pilot training focused on the lack of satisfying unique Marine Corps requirements. Incorporation of the separate service unique segment in the revised syllabus has the potential of producing a basic helicopter-only pilot for the United States Marine Corps. Therefore, the Marine Corps supports consolidated undergraduate helicopter pilot training as it is presently proposed, and so long as it continues to be accepted that it will be necessary to transition these helicopter-only trained officers to fixed wing training at the career decision point.

On balance I support the consolidation of undergraduate helicopter pilot training and suggest that we move ahead with it.

LOUIS H. WILSON,
General, U.S. Marine Corps, Commandant of the Marine Corps.

JULY 15, 1977.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: In response to your letter of 14 July concerning the consolidation of undergraduate helicopter pilot training (UHPT) under the circumstances which now exist, my position is as follows.

I originally advised the Secretary of the Navy that I would prefer to retain the undergraduate training of Navy helicopter pilots in Pensacola under the present arrangement. This preference is based upon my desire that, as Chief of Naval Operations, I remain in full control of those programs for which I have the responsibility in terms of ultimate performance. In the case of fleet pilots, the responsibility for their training and readiness to perform their operational missions is that of the Chief of Naval Operations. However, I am equally aware of the President's policy for an austere but capable military establishment, and I fully support that policy. The decision to consolidate UHPT was made by the President on the basis of a cost-versus-effectiveness study which showed that savings up to $100 million could be achieved in a five year period by moving Navy UHPT to Fort Rucker and consolidating it with the Army program.

Because the Army helicopter training syllabus lacked fixed wing training, was limited in instrument training, and totalled 175 syllabus flight hours compared to a Navy syllabus of 181 flight hours, I had reservations concerning the effectiveness of that program in meeting operational requirements unique to a naval environment, although it was clear that potential cost savings were significant. My staff proposed that an increment of 20 additional hours be added to the Army UHPT syllabus for Navy students and concluded that this specially structured 195 hour flight syllabus would produce a helicopter pilot of equivalent flight proficiency to that of a student graduate of the current Navy UHPT program at Pensacola. The cost of these additional flight hours would reduce the projected savings to some degree over the five year period; however, it does not substantially affect the significant cost savings projected by the OSD study on UHPT consolidation. The Secretary of Defense has agreed to this increase in syllabus flight hours to structure a Navy-unique UHPT course at Fort Rucker.

I support the President's decision to consolidate the Navy UHPT at Fort Rucker on the basis that it is cost effective and that significant savings are projected to accrue. This consolidation is in consonance with the President's policy of cost savings in government to be achieved through increased efficiencies without reductions in effectiveness.

Sincerely,

J. L. HOLLOWAY, III,
Admiral, U.S. Navy.

WASHINGTON, D.C.,
June 27, 1977.

Hon. JOHN L. MCCLELLAN,
Chairman, Committee on Appropriations,
U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: In the Report of the Department of Defense Study of Undergraduate Helicopter Pilot (UHPT) Consolidation submitted to the Congress in April, the Department proposed consolidation of this training based on a 175/40 syllabus (175 helicopter flying hours, 40 simulator hours) for students of all four Services. Subsequently, the Secretary of the Navy has recommended additional training hours for Navy and Marine Corps student pilots. He, the Chief of Naval Operations and the Commandant of the Marine Corps have stated that a 195/50 syllabus would completely satisfy Navy and Marine Corps undergraduate helicopter pilot training requirements.

While I believe that the 175/40 syllabus would provide training of equal or better quality than now provided by the Navy, I have decided that Navy and Marine Corps students will receive the 195/50 syllabus within the consolidated program. This will insure that Navy and Marine Corps helicopter pilots have the training that those Services deem necessary.

Sincerely,

C. W. DUNCAN, Jr.

WASHINGTON, D.C.,
July 13, 1977.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: It is my understanding that, in connection with consideration of the President's proposal to consolidate Defense undergraduate helicopter pilot training, some senators have expressed a concern that this proposal is an "opening wedge" in a trend that would result finally in consolidation of all jet pilot training under the Air Force.

This concern is groundless.

I attempted to allay any such concern in my appearance before the House Appropriations Committee during the extensive special hearings last month on proposed undergraduate helicopter pilot training consolidation. I wish to reemphasize to you that I cannot envision a situation where naval jet fighter/attack undergraduate pilot training would be consolidated with Air Force training.

Economies of scale in training operations make the proposed consolidation of undergraduate helicopter pilot training very desirable, even under the longer syllabus which I have approved, at the request of the Secretary of the Navy, to assure the quality Navy says it needs. However, I can find no basis for analogous economies of scale from a consolidation of Navy undergraduate jet pilot training with Air Force.

I strongly urge your support, and the support of the Senate, of the present proposal to consolidate undergraduate helicopter pilot training.

Sincerely,

C. W. DUNCAN, Jr.

VI. SUMMARY FINDINGS

As reported in detail in the preceding chapters, the Department of Defense study of proposed UHPT consolidation results in the following findings about the consolidation proposal incorporated in the FY 1978 President's Budget request and described in Chapter II.

1. UHPT consolidation is feasible in that it is possible to implement a consolidated UHPT program using a single syllabus, with Service-unque segments, which will meet valid UHPT requirements of each Military Service, including adequacy of the following:

Instrument training.
Overwater training.
Carrier/ship landing training.
Type of training helicopter.

Moreover, implementation of this single (Army's new "175/40") UHPT syllabus, with Service-unique segments, could notably improve UHPT effectiveness, as is discussed in Chapter III.

2. UHPT consolidation would be economical in that the estimated net funding and manpower reductions from cessation of the Navy UHPT program significantly exceed the estimated costs and manpower increases needed to expand the Army/Air Force UHPT program at Fort Rucker to accommodate UHPT loads from the Navy program. Cumulative estimated net savings for FY 1978–82 from consolidation are approximately $104 million; approximately 2,200 military and civilian manpower spaces could be saved through consolidation. The report does not include savings from any base realignment actions which might become possible after UHPT consolidation.

The net annual reductions in training operations costs and manpower associated with UHPT consolidation are greater as determined by this more detailed study, than were estimated for training operations in the proposal presented to the Congress last year in connection with the President's Budget request for FY 1977.

In addition, as detailed in Chapter IV, the study has determined that it is possible to take the base realignment action postulated in last year's UHPT consolidation proposal regardless of UHPT consolidation. This implies an opportunity, with UHPT consolidation, to take additional action to improve the alignment of Navy basing. with possibilities for even more savings. However, these possible additional savings are not included in the estimated savings shown in ths report.

The contents of ths report affirm the feasibility and desirability of implementing the UHPT consolidation proposed in the President's Budget request for FY 1978.

Mr. ALLEN. I thank the Chair.

I ask unanimous consent that a factsheet prepared by the Department of Defense be printed in the RECORD.

There being no objection, the factsheet was ordered to be printed in the RECORD, as follows:

FACT SHEET: UNDERGRADUATE HELICOPTER PILOT TRAINING (UHPT) CONSOLIDATION

Subject Response to Letter by Senators Stone, Chiles, Garn and Tower Opposing UHPT Consolidation.

1. Each topic addressed in the Fact Sheet accompanying the subject letter is responded to in the enclosure.

2. Special Navy and Marine Corps UHPT Requirements. The letter notes special training requirements for Navy and Marine helicopter pilots. However, the consolidated UHPT program will provide training at least as good as that provided in the Navy program, and probably better training.

a. Instrument Training:

(1) All instrument training will be in helicopters, not partly in fixed-wing aircraft.

(2) Navy and Marine students will receive twice as much helicopter flight simulator training, in much more capable simulators.

(3) All, or any part of the 50 flying hours allotted for Service-unique training can be used for additional instrument training.

b. Carrier Landings and Over-water Training.

(1) Very little of the current Navy UHPT training is specified to be over water, and less than one hour is devoted to carrier landings.

(2) This much, or more, training of this type can be accomplished in the Service-unique segments of the consolidated course.

Validity of Savings.

a. Aircraft Investment and Operating Costs.

(1) Army has more than enough primary helicopters on hand or in storage to support consolidated training.

(2) Army will receive UH–1 helicopters released from the Navy UHPT program and transfer others from within the Army inventory.

(3) Aircraft operating costs are included in the calculation of cost savings.

(4) Since there are no aircraft investment costs and operating costs are already accounted for, there is no basis for the $88 million in additional cost cited in the letter.

b. Verification of Savings:

(1) GAO reviewed the DoD report on UHPT consolidation in detail and verified that the stated savings were valid and were, in fact, somewhat understated.

(2) Senior financial officials of the Navy, which will lose most of the resources, and the Army, which must carry out the training with the resources provided, agree that the savings are valid.

Pre-Judgment of Study Results.

a. It is not correct, as the letter states, that OSD staff decided on UHPT consolidation before doing the study. The study results show that consolidation is cost-effective; if it had not been, it would not have been proposed by DoD.

b. GAO monitored the progress of the study and advised on methodology; it did not participate in the study or comment on it until the study report was issued. GAO is well known for its objectivity and independence.

Economic Adjustment Report. The letter alleges that OSD is "withholding" the Department's "Economic Adjustment Assistance Planning Report" and that this report identifies $15 million in assistance funding.

The Department is not "withholding" the Report. No request has been made by any member of the Senate for a copy of the Report, which is available upon request.

The Report does not identify $15 million in assistance funding. It identified specific grants of $0.98 million and loan resources of about $1.6 million to initiate the adjustment program for the Whiting Field area.

The Report identifies a strong growth and recovery potential for the Milton-Pensacola area. The federal agency members of the Economic Adjustment Committee are prepared to provide priority adjustment assistance.

Implications for Future Consolidations: The letter alleges that testimony at House hearings suggests that further flight training consolidations are being planned. In fact, the Deputy Secretary of Defense testified that no flight training consolidations, other than the UHPT consolidation, were under consideration. He has since further stated that he "cannot envision a situation where naval jet fighter/attack undergraduate pilot training would be consolidated with Air Force training."

A. Validity of the Cost Savings

Statement 1. "OSD ignored the equivalent aircraft investment recovery costs for Army aircraft, and their five-year operating costs ($98 million)."

Army does not require any additional aircraft procurement to support the consolidated UHPT program. More than enough TH–55 primary trainers for all students are on hand or in storage. To support the consolidated program, Army will require 104 additional UH–1 advanced trainers. Of these, 72 now being used in the Navy UHPT program will be transferred to the Army. The remainder are available within the Army inventory. There is therefore no requirement for additional aircraft investment.

Additional operating costs for Army aircraft are included in the computations which result in the five-year savings of $90 million.

Statement 2. "OSD overestimated the people to be saved by mistakenly attributing about 800 manpower spaces to helicopter training, which in fact are for fixed-wing training ($35 million)."

The statement is incorrect. The manpower savings (over 1,900 military and 250 civilian spaces) are all attributable to stopping the Navy UHPT program and transferring the students to the Army program. These savings are agreed to by the Navy and OSD Comptrollers and verified by GAO. The only manpower saved through consolidation which is related to fixed-wing training is that associated with the fixed-wing portion of the Navy UHPT program, which will phase out when UHPT is consolidated.

Statement 3. "OSD failed to account for the decreased operating costs of the Navy's T–34C trainer ($11 million)."

The statement is incorrect. The decreased operating costs of the T–34C were explicitly included in the cost calculations. The Navy Comptroller and GAO agree with the cost calculations.

Statement 4. "OSD wrongly included the expense of training foreign students which would be reimbursed by foreign governments ($9 million)."

The adjustment is correct as shown in the DoD Report on UHPT Consolidation, and was included to insure comparability between Army and Navy costs. The adjustment is appropriate because the consolidated course cost will be lower than the cost of the more expensive Navy course, and therefore total reimbursements will be less. The Navy Comptroller and GAO agree with the adjustment.

Statement 5. "Army cost material used in the study had no source documentation and were accepted on faith by both OSD and GAO."

The Army cost estimates used in the study were official Army estimates of the additional costs which it would require to train the additional students now trained by Navy.

Statement 6. "OSD is refusing to release its own study of additional costs associated with consolidation resulting from disruption of local housing markets ($15 million)."

OSD has not "refused" to release the "Economic Adjustment Assistance Planning Report". No request has been made by any member of the Senate for a copy of the Report, which is available upon request.

The Report does not identify $15 million in additional costs to the government. It identifies specific grant resources (approximately $980,000) and loan resources (about $1.6 million) necessary to initiate the local adjustment program.

The Report indicates that the Milton-Pensacola area reflects a strong recovery and growth potential. The Federal agency members of the Economic Adjustment Committee will provide priority adjustment assistance to the affected communities.

B. Objectivity of the Study—

Statement 1. "No naval training command personnel participated in the study."

Naval Training Command personnel were extensively consulted during conferences and staff visits throughout the course of the study.

Statement 2. "Only 5 days were permitted for a response at that level to the report."

Key Navy officials, including members of the Training Command, were given portions of the draft report several weeks before it was provided officially for Navy comment. Most of the substance of the report was therefore known in advance to the Training Command. The report was officially provided to the Department of the Navy on March 31, 1977, and the final comments of the Department were forwarded on April 14. The Department of the Navy thus had two full weeks to review the report and prepare comments, in addition to having advanced copies of much of the report.

Statement 3. "OSD memoranda, introduced in the public record make it clear that the department had decided to go through with the consolidation before doing the study."

As was made clear by OSD witnesses in testimony on the cited memoranda, OSD intended to do, and did, an unbiased study. The Secretary of Defense (both the incumbent and his predecessor) agreed fully with the study results. The Secretaries of the three Military Departments all endorse the study results, as does the General Accounting Office. There is no basis for stating that DoD had decided to approve consolidation prior to doing the study.

Statement 4. "None of the GAO people who reviewed the OSD report were experienced in aviation or in flight training from a professional standpoint."

GAO personnel involved had previously studied the issue of UHPT consolidation and were fully conversant with the issues. GAO expertise on this subject compares quite favorably with that organization's expertise on the full range of government operations upon which GAO reports reliably to the Congress.

Statement 5. "GAO chose not to audit the Army cost material used in the study but instead accepted it on faith."

GAO, in is report to the Congress, stated: "We traced Defense's cost estimates to the

source documents provided by the Services and verified the accuracy of the computations. We will not verify the accuracy of each Service's cost estimates but believe that the estimates represent the best available data since their budgets for the program are based on that data."

It should be noted that GAO used *both* Navy and Army budget estimates, not just Army's, in auditing the potential UHPT savings. In any case the Army, which will have to support the consolidated UHPT program with the resources provided to it, has no reason to underestimate the resources it will require.

Statement 6. "The Navy was openly opposed to consolidation last year, and with the turn-around of the Navy Secretary, only retired Naval personnel . . . have been able to freely express their opposition."

The Chief of Naval Operations and the Commandant of the Marine Corps have both stated that training under the planned consolidated syllabus would completely satisfy Navy and Marine Corps UHPT requirements. Experienced Marine Corps aviators who have reviewed both the Army and Navy UHPT programs have testified in support of the consolidated UHPT program. The Comptroller of the Navy has verified the potential savings. These views are the result of understanding the quality of training available under the consolidated program and the resource savings, not the result of an inability to speak freely.

C. Quality of Instrument Training—

Statement 1. "The Air Force is on record as expressing its dissatisfaction with the current Army training: 'There appears to be no central concept or idea underlying basic instrument training . . .'"

The Air Force, in fact, has repeatedly stated that it is completely satisfied with the training the Army has been providing it for the past seven years. The quotation is an extract from a memorandum by the senior Air Force officer at Fort Rucker in which he recommended improvements to the techniques used in instrument training. The Army agreed with his proposal and adopted it.

Statement 2. "The recent incident in Korea in which an Army helicopter strayed into North Korean territory and was shot down apparently resulted from pilot instrument error."

The central issue here is whether all Services will get adequate instrument training in a consolidated UHPT program. The following facts demonstrate that instrument training in the consolidated program will be better than in the current Navy program:

All instrument training will be in helicopters, rather than partly in fixed-wing aircraft.

Army's instrument flight simualtors are much better teaching devices than Navy's, and Navy and Marine Corps students will get twice as many helicopter simulator hours as they do now.

Both Navy and Marine Corps students will receive 50 helicopter flying hours of Service-unique training, designed by the parent Service and taught by instructor pilots from that Service. All, or any part, of these segments can be used to provide instrument training beyond that in the core syllabus.

Mr. ALLEN. Mr. President, I wish to comment about this factsheet at this time.

After several pages of answers to a letter by the proponents of the amendment listing various statements in the factsheet, the validity and cost savings, this factsheet of the proponents of the amendment says:

Statement 1. "OSD ignored the equivalent aircraft investment recovery costs for Army aircraft, and their five-year operating costs ($98 million)."

The answer of the Army is that:

Army does not require any additional aircraft procurement to support the consolidated UHPT program. More than enough TH-55 primary trainers for all students are on hand or in storage. To support the consolidated program, Army will require 104 additional UH-1 advanced trainers. Of these, 72 now being used in the Navy UHPT program will be transferred to the Army. The remainder are available within the Army inventory.

So that fact, as stated in the factsheet of the proponents, has been blasted.

Statement 2 of the factsheet is:

"OSD overestimated the people to be saved by mistakenly attributing about 800 manpower spaces to helicopter training, which in fact are for fixed-wing training ($35 million)."

The statement is incorrect. The manpower savings (over 1,900 military and 250 civilian spaces) are all attributable to stopping the Navy UHPT program and transferring the students to the Army program. These savings are agreed to by the Navy and OSD Comptrollers and verified by GAO. The only manpower saved through consolidation which is related to fixed-wing training is that associated with the fixed-wing portion of the Navy UHPT program, which will phase out when UHPT is consolidated.

Statement 3. "OSD failed to account for the decreased operating costs of the Navy's T-34C trainer ($11 million)."

The statement is incorrect. * * *

Statement 4. "OSD wrongly included the expense of training foreign students which would be reimbursed by foreign governments ($9 million)."

The adjustment is correct as shown in the DoD Report on UHPT Consolidation, and was included to insure comparability between Army and Navy costs. * * *

Statement 5. "Army cost material used in the study had no source documentation and were accepted on faith by both OSD and GAO."

That is a statement in their fact sheet. Answer:

The Army cost estimates used in the study were official Army estimates of the additional costs which it would require to train the additional students now trained by Navy.

Statement 6. "OSD is refusing to release its own study of addtional costs associated with consolidation resulting from disruption of local housing markets ($15 million)."

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. ALLEN. Mr. President, I yield myself an additional 3 minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. ALLEN. The answer:

OSD has not "refused" to release the "Economic Adjustment Assistance Planning Report". No request has been made by any member of the Senate for a copy of the Report, which is available upon request.

It goes right on and refutes every one of the facts set forth in the factsheet of the proponents of the amendment.

So, Mr. President, it appears to me that the time has come to lay aside a provincial outlook on the defense effort. If the Defense Department states that they can carry on this program on a consolidated basis at a saving of $100 million over a 5-year period, that they can do as good or better a job with the consolidation, I do not see why the Senate would say to the Defense Department, "You have come in with a recommendation for saving money; go on back to the Pentagon, we are not interested in your recommendations. We do not credit them; we do not recognize them; we are going to handle this in our own way."

I do not believe that should be the attitude of the Senate, and I am hopeful that this amendment of the committee seeking to go contrary to the administration, contrary to the Defense Department, contrary to the Army, and contrary to the Navy, just on its own judgment of what is right in the matter, will be stricken from the bill.

I believe we would do well to go along with the House of Representatives' position, which they have enunciated on several occasions, and am hopeful that we will remove this matter from the conference by defeating the Senate amendment. At a proper time, I shall make a motion to table the amendment.

I reserve the remainder of my time.

Mr. STENNIS. Mr. President, I yield 5 minutes, now, to the Senator from Utah (Mr. GARN).

The PRESIDING OFFICER. The Senator from Utah is recognized for 5 minutes.

Mr. GARN. Mr. President, this is a matter that we debated at great length on the Senate floor last year. With all due respect to Senator ALLEN and Senator SPARKMAN, I think it is only fair to point out that they are from Alabama. I think it is also fair to point out that Senator CHILES and Senator STONE are from Florida. So we have heard from the Senators of the States affected economically and parochially, who have taken the positions we might well have expected them to take.

The only reason I mention that is that we are going to hear now from the Senator from Ohio, the Senator from New Mexico, and I, who have no interest, State-wise. There are no interests in those States that have anything to do with where undergraduate pilot training is conducted. But each of us has had experience in being involved and in being trained as a military pilot by the services. So I would hope our testimony would have some weight, from our having been participants in those programs.

I will repeat what I said last year: I spent 8 years in the Navy, trained at Pensacola and Corpus Christi as a Navy pilot, and spent the last 4 years as an Air Force pilot. I have some 10,000 hours of pilot time, more in the Air Force than in the Navy because of my length of years in the Air Force.

Mr. President, I can read all of the statistics. I shall not attempt to dispute the $100 million savings.

The thing the Senate needs to understand, however, is the difference in attitude, philosophy, and training between an Air Force or Army pilot versus a Navy pilot. It is an entirely different environment in the attitudes sought to be developed.

For example, there is a great deal more stress laid on instrument training in the Navy. It has not changed very much since I was there. When I went through, we did not receive our wings until we completed all-weather flight school. Air Force pilots got their wings in about 12 months, 5 or 6 months less than a Navy pilot, and then went to all-weather flight school. Incidentally, Mr. President, we lost many people from pilot training at that point.

I say now, as an Air Force colonel, that I do not know what the Air Force did with those who did not go to all-weather flight school after they received their wings. I do not know whether they took them away from them or what.

There is the matter of the naval officer training that goes along with the daily flight training. You fly half a day every day, and go to school the other half a day. I do not know how much the Army knows about that kind of training.

It is not just the manipulation of those aircraft instruments. Much has been said about more training in helicopters and less in fixed-wing. I happen to think that is a disadvantage. Most Army helicopter pilots know how to fly helicopters period. I happen to think knowing how to fly fixed-wing is important. When I was in the Navy, you went through the entire basic flight training period in a fixed-wing, before you ever went to helicopter. And certainly in instrument flying, instrument flying is somewhat more difficult in fixed-wing than helicopter, primarily because of the speed.

Any pilot here, including the dean of pilots in this body, the distinguished Senator from Arizona (Mr. GOLDWATER), will tell you that speed complicates flying, because you need to be ahead of that airplane and not have it flying you. It is natural that your higher approach speeds——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STENNIS. I yield the Senator 3 additional minutes.

Mr. GARN. I think, heighten your responses and your ability to handle instruments in a helicopter, because speed does complicate the picture.

Mr. President, I shall reserve the remainder of my remarks until later in the debate, but I do feel very strongly, with all due respect to the distinguished Senators who are in favor of this consolidation, that they have not experienced serving in both services, have not experienced the differences in attitude and philosophy of a Navy environment compared to an Army environment.

Simply looking at the hard, cold facts, if I had not had the experience I have had, I am sure the savings to be derived from consolidation look very good and very logical, and if I had not had that experience, the arguments of the proponents look very persuasive and I am sure I would be voting with them.

But I hope Senators will listen to the experience of some of us who have had experience in both services.

Mr. SCHMITT. Mr. President, will the Senator from Mississippi yield me some time?

Mr. STENNIS. Yes. Mr. President, I yield 4 minutes to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, I feel fairly strongly on this issue, and I come at it from a somewhat different perspective, even, than the distinguished Senator who just spoke.

I am a civilian and was a civilian all through my pilot training. I received Air Force fixed-wing training and Navy helicopter training.

I feel very strongly that all three services have extremely well-qualified helicopter pilots. I think the important consideration, as Senator GARN has pointed out, is that they have entirely different missions, for which they are, as I say, extremely well qualified.

In my experience with the Air Force and the Navy, I saw the importance of these different missions in guiding the training of the individuals concerned, right from the very day they entered the gates. It permeates the entire syllabus, the entire training techniques, the attitudes of the IP's and the attitudes of the students. Because of that, each service has an extremely high level of operational effectiveness that I feel strongly would be lost if there was integrated training, as has been proposed.

I respect the cost-benefit analyses that have been made. On the surface, they seem persuasive. However, too often in Congress, in many types of issues, we leave out the benefits that we cannot cost.

I think it is extremely important that in this case we include as a benefit that we cannot cost that benefit which comes from a clear focus on the operational aspects which are necessary to be considered in an individual pilot's training, whether in the Army, the Air Force, or the Navy.

I do believe, personally, based on my experience, not nearly as extensive as the experience of the distinguished Senator from Utah, but, nevertheless, based on over 2,000 hours in various types of aircraft and spacecraft, that this operational orientation within each service is extremely important and has a benefit far beyond the dollars being considered here today.

I might add an additional comment, that having the fixed-wing training prior to helicopter training is extremely important. I had flown many hundreds of hours in fixed-wing aircraft before I took on the helicopter at Pensacola. I would not have given a dime for my chances of meeting the syllabus which the Navy presented to us. That was to solo me in 8 hours. But they did it. I felt confident when I soloed. Eight hours after I started I was flying a helicopter by myself. It is based on a certain attitude which is important to the Navy type of pilot training. That is not to degrade in any way the outstanding training I received in fixed-wing aircraft, the T–38 and other aircraft, with the Air Force.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STENNIS. I yield 2 additional minutes to the Senator.

The PRESIDING OFFICER. The Senator is recognized for 2 additional minutes.

Mr. SCHMITT. There is a completely different focus between those two services. Having talked, to an extensive degree, with pilots trained in the Army, one can see an extremely different focus in their operational requirements. But, above all, all three services are doing an outstanding job in the training of those kinds of requirements.

I would strongly recommend that we maintain that spirit and what I believe are the necessary types of training which couple with the separation of this training between the services. I thank the Senator for his indulgence.

Mr. STENNIS. Mr. President, I yield 3 minutes to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized for 3 minutes.

Mr. GLENN. Mr. President, I submit that perhaps the Senators from Florida are off base. That may come as a surprise to them. They are off base in not suggesting we transfer all Army training to the Navy, and amending the present proposal. I say that for this reason: if we used the same cost accounting system which has been used by the OSD studies in charging the full cost of the Navy's training and only charging incrementally what is being charged the Army for this training, we could then reverse this trend and instead of saving an estimated $100 million we could save several hundred million dollars by transferring all Army training to the Navy, if we used this same rationale.

I will not go through all the figures here. It would take to much time right now.

The OSD's UHPT cost comparison between the Army and Navy is weighted in favor of OSD's predetermined position and calculates increases in Army cost incrementally. If this had been done in the opposite manner, we could show several hundred millions of dollars of cost-saving in the other direction. The OSD study, for one thing, understated the Army aircraft requirements.

In quite another area, I wonder why the Interservice Training Review Organization, which is the organization responsible for reviewing any change in training techniques or change in training bases, has not been consulted with regard to this move? They have not been so consulted.

Mr. President, I also would come back to what some of my colleagues have already mentioned. That is the different types of training, given different mission requirements.

The Air Force is unhappy with Army instrument training. The Army, the Navy, and the Marine Corps have never agreed on the type of instrument training required. The Army, to perform their mission, operates most of the time, of course, over land, and a pilot can set down if he needs to, if there is any difficulty. The Army has stressed in their training of pilots more the factor of having a particular part of an instrument panel damaged or shot away in a combat situation, but still enabling the pilot to get the helicopter down.

The Navy and Marine Corps, on the other hand, have stressed full instrument

training for their pilots. I can assure you, Mr. President, if you have ever taken off in a helicopter from a flight deck in the middle of the night when all the lights were blacked out about 200 yards from the ship, as I have been privileged to do on occasion, you will appreciate that kind of training and the importance of it.

How does one get this instrument training? The best way is as the Senator from New Mexico indicated to start out with some fixed-wing training where basic instrument procedures are taught. Later on there is a transfer of this knowledge to helicopter-type training. There is no better way to provide that instrument capability that anyone has so far devised.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STENNIS. Mr. President, I yield an additional 2 minutes to the Senator.

Mr. GLENN. I thank the Senator. The fact the Air Force is unhappy with this is evidenced by a letter we have. This letter is signed by a lieutenant colonel in the Air Force in April of this year, complaining about the low caliber instrument training that the Air Force pilots under contract to the Army are receiving.

Are we to say that all of our helicopter training for those pilots required to operate in a maritime requirement, those required to go out and land aboard ship in the middle of the night, those required to go out under adverse weather conditions and dip sonar sensing equipment into the water under minimum altitude under adverse weather conditions, are to be less than the very best of instrument trained pilots this Nation knows how to produce?

I say that is folly. I say when a pilot partially trained is trying to come aboard ship in the middle of the night, with a carrier deck stacked with highly expensive aircraft, it is penny wise and pound foolish to give other than the best instrument training. I can assure you, Mr. President, if I am going to be riding those helicopters some time, I want that pilot to be the very best trained pilot also.

One time I was picked up off the deck of a destroyer in a sling, hauled up into the helicopter, and taken at night to another ship. Mr. President, do you want less than the best of instrument training if you are going to participate in such situations as that?

In the environment in which Navy and Marine helicopter pilots are forced to operate, to perform their mission they need the very best of training. They are not going to get it under the Army by the current training methods. I say this is pennywise and pound foolish. Further, other figures show that the dollar savings are not what is claimed in the OSD study. I yield back the remainder of my time.

Mr. GOLDWATER. Mr. President, how much time does the Senator from Alabama have?

The PRESIDING OFFICER. The Senator from Alabama has 12 minutes.

Mr. GOLDWATER. Will the Senator yield 4 or 5 minutes?

Mr. ALLEN. I will be delighted to yield.

Mr. GOLDWATER. Mr. President, it has been a real pleasure for me to sit here and listen to a man who was trained to fly in the Navy, who has flown with the Air Force, and who received his training in the Navy, and later flew with the Marines; a man whom I have great admiration for, who learned to fly jet aircraft as a civilian and later learned to fly helicopters.

I want it understood, I am not making a plea for the Army or the Air Force. If, as the Senator from Ohio says, we would put this all under the Navy, I would be the first one to come along. I have been talking about this subject as long as I have been here. We are the only country in the world which now has two helicopter training programs, three fixed-wing training programs, and four tactical Air Forces. I can say it is a big waste of money.

Let us look at the advantages which have been proclaimed for Navy training.

First of all, under Navy helicopter training, they do not train in antisubmarine warfare while learning to fly a helicopter, any more than an Army helicopter pilot is trained in a gunship. My argument is in both fixed-wing and rotary-wing, pilots learn the fundamentals of flying each machine. Once they have become a rotary-wing aviator or a fixed-wing aviator, then the service to which they are assigned will assign them to further training.

The fact that my friend from New Mexico graduated in P–38's does not automatically make him a fighter pilot. The fact that my friend from Ohio graduated in fixed-wing jet aircraft does not automatically make him a fighter pilot. He had to go get that training. The Senator from New Mexico had to go get that training.

We are not talking about the finished product here. When the Navy helicopter pilot finishes training, some of which—in fact a lot of which—is received in fixed-wing, he practices more on instrument than he would if he were assigned to any other segment of the Navy.

Let us just take a look at this: In flying hours, the Navy gives 91 hours and in advanced helicopter, 91. The Army gives a total of 195 in helicopter and in fixed-wing.

I am not going to make a big, prolonged argument about whether he should be a fixed-wing pilot before he is a rotary pilot. I took civilian training. I took Air Force training—it was Army then. I took helicopter training as a civilian. I question very seriously whether experience in fixed-wing really helps in rotary. They are really two different breeds of cat. While they fly a little bit alike, there is a total difference, particularly when you get on instruments.

As far as simulators go, I have seen the Navy equipment. I have flown the Army equipment, the Air Force equipment. There is no comparison between the two. Consolidation would give the Navy neophyte pilot a chance to fly really advanced simulators, during which phase of his training, about 20 hours before he ever gets into helicopter, he learns what instruments are for and how to fly those instruments. But, even then, he is not, by any means, a helicopter pilot.

I just want to remind my colleagues that I am arguing here today that we need one school. I do not care who runs that school. I think we would save millions of dollars if we had one fixed-wing school in this country, instead of having three, as we do now. I think we would save billions of dollars if we had one tactical Air Force instead of four, or possibly two. I am thinking out loud.

We have probably 13 different types of training aircraft. We only need about two at the most. So we are wasting money. That is all I am interested in. Who gets the job—Alabama, Florida, Texas—I could not care less. But I think it is time that we in this body, interested in saving the money of the American taxpayer, started saving that money instead of, every time something hits our own State, standing up and speaking against savings.

I was very interested to see the Senator from New Mexico, who certainly has no Navy bases in that State, and the Senator from Utah, who has no Navy bases in that State, and the Senator from Ohio—I do not think they have any Navy bases. And God knows, Arizona does not have any. We are talking about the same subject. The only ones that are interested are the Senator from Mississippi, who has some concern about northern Florida, and the two Senators from Florida, who are concerned about Mr. SIKES and Pensacola.

The PRESIDING OFFICER (Mr. HASKELL). The Senator's time has expired.

Mr. STENNIS. Mr. President, I yield myself 3 minutes only at this point.

I want to say this: I remember, about a year ago, a tremendous impression being made by the Senator from Ohio, and also my good friend, Senator GARN, both of them former pilots, with tremendous experience. They testified—it was testimony, not oratory, that still rings in my ear. Then, this afternoon, Senator SCHMITT, with his fine background of experience, spoke with such great sincerity and feeling about the main part of the training being the atmosphere, the feel, the environment, the things that were on the ground that went to make up the kind of pilot that we are talking about here today, something beyond my field.

Just a minute or two on this cost question. The Senator from Alabama and I have been down the road together. He was talking about my having been converted here because of the cost. I appreciate the spirit of his fine remarks. I mean Senator SPARKMAN. Let me quote another Alabamian on cost. Admiral Moorer, now retired, was Chief of Naval Operations for years, outstanding. This is Adm. Thomas Moorer. He was later chairman of the Joint Chiefs of Staff. Here is a paragraph from his recent statement, dated June 8, this year:

In sum, this audit—

Talking about cost—

This audit trail indicates in round figures that, far from saving $104 million over 5 years, the move, at the very best, could save only a little more than $2 million per year.

That is not the Senator from Mississippi speaking. That is a man who went to the very top. He had something to make him go there. I know one of those

ingredients is character, honor. We know he had to have some judgment, too. This is what he thinks about this so-called saving.

That does not mean that the others are dishonest; of course not. But he says that, at very best, it could save only a little more than $2 million per year, at great cost to the quality of the training.

That is not something that he read in a book. It is not something these men that I have already referred to read in a book, either.

The PRESIDING OFFICER. The Chair inquires, did the Senator from Mississippi yield himself so much time as he needs?

Mr. STENNIS. Two minutes more.

Those words spoke for themselves. It is a great pity that men who have gotten into this matter are not here to hear what the real testimony is.

I do not discredit the character of anyone that has made any kind of audit, but here is what the man said who knows how to read it and how to go into it and how to analyze it and then cast it against the experience of life.

Commonsense, and that is the only field in which I claim to know anything much about life; that is in this field of commonsense. The commonsense of this thing tells us that it is vastly different by any standards—the training, the feel of things that is required for the Navy helicopter pilot and the Navy pilot from what is in the Army, the Air Force. And that is not to call either one of them inferior. They are all superior.

I say, after all, the best proof of anything is the product. We have the product right here in this membership. And even if it does cost a little more, if they could be heard, they would be convincing.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. STENNIS. I yield the floor.

Mr. ALLEN. Mr. President, how much time remains to our side?

The PRESIDING OFFICER. The Senator from Alabama has 7 minutes.

Mr. ALLEN. I yield myself such time as I may use.

I ask unanimous consent that a statement prepared by the Defense Department for Senator PROXMIRE be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

FACTS ON UNDERGRADUATE HELICOPTER PILOT TRAINING (UHPT) CONSOLIDATION

HOW IS UHPT CONDUCTED NOW?

There are presently two UHPT programs. The Army trains its own student pilots and Air Force student pilots at Fort Rucker, Alabama. The Navy trains its own, Marine Corps and Coast Guard student pilots in the Pensacola, Florida, area. The Army training is entirely in helicopters; the Navy uses a combination of fixed-wing training aircraft and helicopters.

WHAT IS THE NATURE OF THE CONSOLIDATION PROPOSAL

Beginning in October 1977, all new Defense UHPT students would enter the consolidated program at Fort Rucker. Students already in the Navy program at that time would complete the Navy course; as these students finish their training the Navy UHPT program would phase out.
